Cuba Railroad.—The accounts for the year ended June 30 show gross earnings of \$3,059,649 and operating expenses of \$1,685,578, leaving net earnings of \$1,374,071, while interest on bonds and loans absorbed \$576,754. After providing for two dividends of 2 per cent. each on the preferred shares the surplus of \$2,025,383 brought forward was increased to \$2,422,609.

Lincolnshire and Ayrshire Railway.—The half-yearly report states that the gross receipts amounted to £44,326, an increase of £843 compared with the corresponding period of last year. After providing for all prior charges there remains a balance of £9,086, and the directors recommend a dividend on the ordinary shares at the rate of 3¼ per cent. per annum, carrying forward £386.

Callander and Oban Railway.—The report by the directors for the six months ended July 31 last, shows the receipts to have decreased by £354, and the expenditure to have increased by £427. The balance available for dividend amounts to £8,301, which will admit of the 4½ per cent. preference shares, 1878 and 1882, receiving their full dividend; and the 4 per cent. preference shares, 1896, receiving a dividend at the rate of 1½ per cent. per annum. This will absorb £8,271 and leave a balance of £30 to be carried forward.

United Electric Car Company.—The report for the year ended June 30 last shows a net profit of £4,420 and an available balance of £8,482, comparing with £8,478 and £13,811 respectively for the preceding 12 months. The falling off is attributed to the great stagnation in the car-building trade of the country. After paying the dividend on the preference shares, the balance of £2,482 is carried forward. It is stated that the Hadley and Trafford Park works have now been disposed of, with a loss of £46,171, which it is proposed to write off from the general and depreciation reserves. The Preston works are now well employed.

North Cornwall Railway.—The report states that after providing for debenture stock interest and fixed charges, the net revenue account of the Launceston-Halwill line shows a balance available for dividend of £2,195. The directors recommend payment of the usual dividend on the preferred ordinary stock at the rate of 4 per cent. per annum, carrying forward £695. The usual dividend at the rate of 3½ per cent. per annum on the Launceston-Delabole line stocks will be distributed out of the fixed rental of £8,750 per annum paid by the South Western Railway Company in respect of that line. Interest at 3 per cent. per annum on the guaranteed stock of the Wadebridge line will be paid as usual out of the fixed rebate received from the South Western Company in respect of that line. The usual dividend of 3 per cent. per annum on the capital stock of the Padstow line will also be distributed, out of the fixed rental of £2,650 per annum received from the South Western Company in respect of that section.

King's Lynn Docks and Railway.—The half-yearly report states that the gross revenue from all sources amounts to £15,717, a decrease of £1,051. The balance standing to credit of net revenue, after providing for all interest and other liabilities, is £2,765, a decrease of £627. The directors have resolved to pay the full dividend for the half-year on the four per cent. preference stock 1869, and at the rate of 3 per cent. per annum on the consolidated four per cent. preference stock, leaving £295 to be carried forward. The question of the railway dues payable to this company, in respect of traffic passing over this company's line, has now been settled, and £891 of the £1,605 which was held in suspense in the accounts for the last half-year has been received. The receipt of this sum has enabled the directors to pay a further dividend of 12s. 6d. per cent. for the year 1910 on the consolidated 4 per cent. preference stock, making the total dividend paid on this stock for the year 1910 £3 12s. 6d. per cent.

Denver and Rio Grande Railroad.—The income of the company for the year ended June 30, 1911, including \$1,821,806 interest, dividends and other receipts was \$25,213,577, an increase of \$94,285 as compared with the previous year, excluding in both years interest on the Western Pacific second mortgage bonds owned by the company. The gross revenue from operation was \$23,391,771, being \$171,665 less than the previous year; the operation expenses were \$15,957,737, being an increase of \$155,782, and the net revenue was \$7,434,034, a decrease of \$327,448. The percentage of decrease in gross revenue was 0.73 per cent.; increase in expenses, 0.99 per cent.; and decrease in net operating revenue, 4.22 per cent. After providing for taxes and all charges against income, including one semi-annual dividend of 2½ per cent. upon the preferred capital stock, and contributing \$120,000 to the renewal fund, there remained a balance from the year's operation of \$1,118,548, which was carried to the credit of profit and loss. Operation expenses this year include depreciation charges, under Interstate Commerce Commission method of accounting, amounting to \$478,784; whereas there were no such charges against operation expenses heretofore. The aggregate expenditure for additions and betterments to roadway and equipment was \$3,209,708. The company has faced with increasing frequency demands of labour for higher rates of pay. To avoid strikes and their serious consequences to the travelling public and to business interests, advances have from time to time been conceded, usually after resorting to mediation or arbitration under an Act of Congress known as the Erdman Act. Such wage advances since January 1, 1910, are at the rate of about \$600,000 per annum on the basis of the forces employed.

PERSONAL.

RETIREMENT OF MR. DAVID DEUCHARS.

Mr. David Deuchars, the esteemed superintendent of the North British Railway Company, retires at the end of September after an arduous and interesting railway career extending over 50 years, 30 of these having been spent in the exacting capacity of a prominent officer of the North British Railway. His jubilee as a railwayman, by a strange coincidence, falls in the year of his retirement. It was in 1861, as a lad of 15, that he entered the service at Dundee of the Dundee and Arbroath Railway, which railway he latterly took a very prominent part in making a section (owned jointly between Caledonian and North British) of what is now the Through East Coast and Midland route from London to Aberdeen and the North of Scotland. After two years' training in the various departments of goods office work, he accepted an appointment at Dundee under the then goods manager for the Northern Division of the North British Railway Company, and on Mr. Macpherson being removed to Glasgow, in 1865, as general goods manager, he accompanied him as one of the assistants. Two years later, i.e., 1867, at the age of 21, he returned to Dundee as assistant to the then district goods manager, and in 1875 he was appointed district goods manager. All the N.B. Co.'s traffic had to pass to and from Dundee and north thereof over the lines of the Caledonian Company, while for many years the passenger and goods traffic had, at great disadvantage and expense, to be conveyed by the Forth Ferry from Granton to Burntisland, and by the Tay Ferry from Fyfeport to Broughty Pier. These drawbacks were experienced till June, 1878, when the first Tay Bridge was opened. The N.B. Co. had gained for the first time their much-coveted independent access to Dundee, and the traffic immediately doubled itself. At the end of the following year the bridge collapsed in a gale, and for the next eight years, until a second bridge was constructed, the N.B. Co. had again to depend on their rivals for the working of traffic to and from Dundee. During the time he was district goods manager—from 1875 to 1891—the Company made and acquired many important new lines in Fife and Forfar, and constructed docks for the accommodation of their ever-increasing coal traffic from Fife. By far the more important developments took place when the second Tay Bridge was completed in 1887, and the still greater structure, the Forth Bridge, with its connecting lines, was opened three years later.

These two undertakings at last gave to the North British Company that independent and efficient route to the North of Scotland which they had fought so many years to see established; and no one has done more to popularise the route and develop that traffic than Mr. Deuchars himself. To those who know how very closely during his career at Dundee he was associated with the carrying out of the extensive developments and the policy of the Company in the North as initiated by the genius of Mr. Walker, the General Manager, and to those who know how much reliance that "very Bismarck of railway diplomatists" placed in Mr. Deuchars, it was no surprise to find the latter called to Edinburgh as assistant to the new manager on the death of Mr. Walker.

By his ability and tact, Mr. Deuchars had so won the confidence of the traders and business men generally in Forfar, Fife and Aberdeen shires, that a complimentary dinner was given him in appreciation of his services to the town and trade of Dundee and the district. On his leaving Dundee the staff presented him with valuable gifts. Mr. Deuchars acted as assistant-general manager at Edinburgh for nearly two years, and in 1893 was appointed superintendent of the line on the death of Mr. MacLaren, the first General Superintendent of the company. During Mr. Deuchars' tenure of office as superintendent of the line many important improvements and alterations have taken place. The Edinburgh Waverley Station has been re-constructed. Within the area of that city the lines have been quadrupled on either side of the busy station. An additional tunnel has also been constructed on either side. Greater facilities have thus been given to the local traffic passing into Edinburgh as well as to the important and ever-increasing tourist traffic passing through that city *en route* to and from the great commercial district around Glasgow, to and from the popular Clyde and Fife-shire coast holiday resorts, and to and from the Highlands. New lines have been added every year, amongst these being the longest opened in the country in one day—namely, the great engineering triumph, the West Highland line, cut through one of the most hilly districts, yet involving only one tunnel. Improvements in the Anglo-Scottish express services, both by the East Coast and the Midland routes, have been effected in a way which it would be hard to equal. Corridor and dining trains have been brought into use

on the principal parts of the system. Being a keen accountant, Mr. Deuchars has never been behindhand with statements of facts and figures, sizing up as far as practicable the true position of any matters of moment. So successfully has he done this, that, notwithstanding competition and the opening of unremunerative lines, he has been able to bring about results commendable in the highest degree, notably in cutting down unremunerative running to such an extent that he has caused the receipts, per passenger train mile run, to increase from 38. 3d. in 1893 to 38. 0½d. at the present time. Since Mr. Deuchars took office as superintendent in 1893 the mileage of the lines controlled by the Company has increased from 1,231 miles in that year to 1,505 miles at the present time, while the half-yearly revenue has increased from £1,074,118 to £2,511,743. The Directors have decided to re-arrange and divide the duties which have up till now been undertaken by Mr. Deuchars. The eastern division of the line, which is the largest the North British has from a train-working point of view, and which has hitherto been worked as a district under his own immediate charge in addition to his general duties as superintendent of the whole line, is now to be looked after by a separate district superintendent. From the 2nd October next Mr. T. Philip, at present district traffic superintendent at Carlisle, is to have charge at Edinburgh of the eastern division for both goods and passenger traffic, while Mr. John Black, who for many years has so ably filled the position of assistant to the superintendent of the line, is to have the superintendence of the entire line, minus the work of directly controlling, as his predecessor did, the busy eastern or central division. In connection with the mobilisation of troops for the South African War Mr. Deuchars performed a notable part, and was accordingly complimented by the military authorities.

The North British has had its share of Royal patronage, having conveyed Royalty on many occasions to their Highland home as well as to Edinburgh and Glasgow on State visits. Mr. Deuchars has regularly accompanied the crowned heads and potentates from nearly all parts of the world who have travelled by his line, and has received tangible recognitions of his attentions. With the exception of Mr. Turnbull, of the L. and N.W. Railway, Mr. Deuchars is the only superintendent now in office who took a prominent part in the great railway race between London and Aberdeen in 1895. For the last eighteen years he has been a member of the Railway Clearing House Superintendents' Conference, and has now the honour of having been longer connected with it than any of its present members. In 1903 he was unanimously appointed chairman of that conference.

Mr. E. A. Strickland, who has been nominated as president of the Institution of Municipal Engineers for the year 1911-12, is borough surveyor of Windsor. Early in his career he made the detailed surveys of portions of the then Manchester, Sheffield, and Lincolnshire Railway.

Sir Myles Fenton attained his 81st anniversary on September 6. He began work as a boy of 15 on the Kendal and Windermere Railway, and came to the front in 1850 as secretary of the East Lancashire Railway. Then he was made assistant manager of the Lancashire and Yorkshire, but in 1863 he was appointed manager of the newly-opened Metropolitan. In 1880 he became general manager of the South Eastern Railway, of which he is now consulting director. Sir Myles, who has also occupied the position of chairman of the Rhymney Railway Co., resides at Redhill.

Melbourne Suburban Electrification.—On Wednesday last the Royal Commission on the Metropolitan Traffic of Melbourne presented a report recommending the electrification of the suburban railways and tramways, vesting the latter in a Greater Melbourne Council. Pending the creation of the latter body the tramways should be controlled by a special State-municipal trust of twelve paid members. The scheme involves the buying of the existing cable tramways and the erection of a State power-house to supply current. The capital expenditure will exceed five millions.

Scheme to Shorten the Atlantic Passage by Twelve Hours.—The inadequate docking facilities at New York have led to an agitation in favour of the construction of a new port at Montauk, on Long Island, from whence railway tunnels give direct access to the heart of New York City, and thence to all parts of the continent. Opinion differs among steamship people as to the practicability of Montauk as a terminal, but it is admitted that its adoption would shorten the passage to and from Europe by about twelve hours, while the shipping companies would save about £600 a trip in the cost of meals alone. The Long Island Railway Company has contracted to buy 160 acres of water front land near Montauk Point, and the construction of a breakwater and piers will be commenced at once.

RAILWAY NOTES.

Brighton and Third-Class Season Tickets.—The General Purposes Committee of Brighton Corporation, in thanking the directors of the L.B. and S.C. Railway for instituting, from October, a week-day midnight train, have suggested the issue of third-class season tickets.

An Australian Project.—Reuter's Adelaide correspondent reports that the Parliamentary Commission, after making a fortnight's tour through the Eyre Peninsula, favours the immediate construction of a railway through the country to Decres Bay.

Injunctions Against Trade Unions.—According to a Parliamentary return there have been 17 injunctions granted by the Chancery Division against trade unions since the date of the House of Lords judgment in the case of Osborne v. the Amalgamated Society of Railway Servants.

Hints on First Aid.—Railway officers associated with the St. John Ambulance Society's work of instructing railwaymen will be interested in a neat folder issued by the Pennsylvania Railroad Company, giving supplemental hints to lectures delivered by the medical examiners of the Relief Department.

Railway Alterations to Facilitate Tramway Traffic.—Shoreditch Council is considering a scheme of street widening near Shoreditch Church to facilitate the tramway traffic, the proposal involving the setting back of the North London Railway Station, and the widening of the two bridges carrying the railway lines into the City.

Railway Illumination for the Durbar.—The Great Indian Peninsula Railway Co. have placed orders with Greaves, Cotton, and Co., Turner Hoare and Co., and H. L. Rochat and Co. (all of Bombay) for lamps, etc., and with W. T. Henley's Telegraph Works Co. for cables, for the illumination of the Victoria terminus during the visit of the King and Queen.

Ozone on the Central London Railway.—Employees at the Bank of England station of the Central London Railway agree that the atmosphere there has become very bracing since the new system of ozone ventilation has been at work, and passengers say that there is an absence of the musty odour of former days. The new scheme is in course of extension to other stations.

British Columbia Coal and Railway Development.—Mr. R. H. Frisby has returned to Vancouver after negotiating the acquisition by a London syndicate of 48,000 acres of bituminous coal lands on Copper River, a tributary of the Skeena, British Columbia. A portion of the holding is only 32 miles from the Grand Trunk Pacific main line, and a branch line following a water grade will be constructed either by the railway company or by the syndicate.

Glasgow and South Western Railway Station Prizes.—The winners of first prizes in the platform flower garden or border competition in connection with Glasgow and South Western Railway are:—First class, £6 each—Dalmellington (William Taylor), Racks (John Craig), Montgreenan (Edward Blackwood), Lochanhead (John Mirrey), Cunninghamhead (John Hamilton), Glenside (Frank Stoddart). Stations debarred from competing next year are Glenside, Lochanhead, and Racks.

Suggested Swaledale Railway.—Speaking at Swaledale Agricultural Show on Wednesday, held at Muker, twenty miles from Richmond railway terminus, the Hon. Algar Orde-Powlett, M.P., reminded the gathering that a railway line up Swaledale had been promised many times. He was not, he said, going to promise a light railway even so far as Reeth, but in these days there was a disposition to open out country districts, and, so far as he could see, the prospects of a railway up Swaledale looked brighter than they had ever before looked. Even if the line extended only to Reeth (about ten miles from Richmond) it would do something to open out the district.

The Profits of Railway Booking Agents.—Accrington Co-operative Society has made inquiries into the question whether they could profitably open a railway booking office for the excursion and other traffic of their members, and they do not deem it advisable to undertake an agency. The figures presented respecting other societies in 1910 were:—Darwen, receipts £4,500, net profit £69; Nelson, £4,360 and £90; Colne, £1,001 and £37; Burnley, £4,348 and £63. The Burnley society had had to take a separate establishment, and in order to make it pay the booking clerk had to sell cigars and conduct three separate branches of trade.

Caledonian Conciliation Boards.—At a meeting of Glasgow Trades Council Mr. J. Kiddie, delegate of the Amalgamated Society of Railway Servants, reported that the employees of the Caledonian Railway Company had now got their sectional boards reorganised, and that arrangements had been made for the meetings of those boards in connection with all grades. That was a pleasing feature. For some time they had been in the

belief that the sectional boards were dead, that there was no need for them after the awards had been made by the arbitrator under the central board. They had come to light again, however, and the grievances which had been cropping up for a year or two were now to be considered.

Horncastle Railway. The half-yearly report states that the traffic for the six months ended June 30 amounted to £2,085, an increase of £122. The sums received from the Great Northern Railway Company, etc., totalled £2,127, to which must be added balance brought forward, £1,020, together £4,056. The balance available for dividend is £2,168, and the total amount due to the Great Northern Railway Company in respect of work done, interest, purchase of land at Woodhall Spa, etc., is £1,404. The directors recommend a dividend of 6s. 6d. per share, being at the rate of 6½ per cent., which, after deducting income-tax, will amount to £1,469, and will reduce the above balance to £699, out of which the directors propose to pay to the Great Northern Railway Company the sum of £300 on account of money due to them. The corresponding balance in June, 1910, was £664.

GREAT CENTRAL RAILWAY.

CROSS COUNTRY EXPRESSES ARE A DISTINCT FEATURE OF THE G.C. SERVICE.

NEWCASTLE, SUNDERLAND, DURHAM,
YORK, MANCHESTER, BRADFORD,
HUDDERSFIELD, ROTHERHAM and
SHEFFIELD are provided with Through
Luncheon Car Trains via
NOTTINGHAM, LEICESTER, and BANBURY.

to and from
OXFORD, SOUTHAMPTON,
BOURNEMOUTH and the SOUTH WESTERN
LINE, also to and from
GLOUCESTER, CHELTENHAM,
NEWPORT, CARDIFF, BARRY and
SOUTH WALES.

BATH and BRISTOL (with direct connections
for the WEST OF ENGLAND)
are reached by Through Breakfast and
Luncheon Car Trains from
LEEDS, WAKEFIELD, HALIFAX,
HUDDERSFIELD, SHEFFIELD,
NOTTINGHAM and LEICESTER.

EXPRESS TRAINS ARE EQUIPPED WITH RESTAURANT CARS.

For particulars of Train Service, Special Travel facilities and other information apply at any Great Central Station or Agency, Dean and Dawson's Offices, or
send a postcard to Publicity Dept., 216, Marylebone Road, London, N.W. **SAM FAY, General Manager.**

THE BIRMINGHAM RAILWAY CARRIAGE AND WAGON CO., LTD.

WORKS

Railway Carriages,
Tramcars & Wagons
of every description
for Hire and Sale by
Immediate or Defer-
red Payments, Iron-
work, Wheels and
Axles

**SMETHWICK,
BIRMINGHAM.**

MANUFACTURERS OF

The British Standard Brake Block

NOW UNIVERSALLY ADOPTED BY THE LEADING
RAILWAY COMPANIES.

WHY?

Because we cut down your present cost 40 to 60.

THEREFORE

Shift the responsibility on to us.

Our Brake Shoes last $2\frac{1}{2}$ times the life of the ordinary
cast iron Block, with equal braking effect, and
slightly less wear on the wheel tyres.

By our new design and blending of metals the Shoe
can be completely worn out without danger.

One Shoe only, interchangeable and reversible for all
classes of Carriages, Wagons, Vans, etc.

Don't theorise: get the facts from the list of Railways
we now supply.

Our Representatives, with suitable samples for trial, are
at your command.

The National Rail & Tramway Appliances Co. Ltd.,
12-18, TAYLOR STREET, LIVERPOOL.

TENDERS INVITED.

East Indian Railway.

THE East Indian Railway Company is prepared to receive Tenders for the Supply and Delivery of:—

(1) Paints, etc.

(2) Bolts, Nuts, Rivets, etc.

as per specifications to be seen at the Company's Offices.

Tenders are to be sent to the undersigned, marked "Tender for Paints," or as the case may be, not later than 12 o'clock noon on Wednesday, the 27th day of September instant.

The Company reserves to itself the right to divide the order, also to decline any tender without assigning a reason, and does not bind itself to accept the lowest or any tender.

For each specification a fee of £1 ls. is charged, which cannot under any circumstances be returned.

By order,

C. W. YOUNG, Secretary.

Nicholas Lane, London, E.C.,
14th September, 1911.

Great Northern Railway Company
(Ireland).

THE Directors are prepared to receive

Tenders for the Supply of the following:—

5,000 Tons Bull Head Rails (90lb. B.S. Section).

120 Tons Fishplates (B.S. Section).

3,900 Tons Cast Iron Chairs and Permanent Way Fastenings.

Specifications and forms of Tender can be obtained from the Secretary.

Tenders, made out on the forms supplied by the Company, should be delivered under sealed cover, endorsed "Tender for" to the undersigned not later than 10 a.m. on Monday, 10th October, 1911.

The Directors do not bind themselves to accept the lowest or any Tender.

T. MORRISON.

Secretary.

Secretary's Office,

Amiens Street Terminus,
Dublin, 20th September, 1911.

The Great Indian Peninsula Railway
Company.

THE Directors are prepared to receive Tenders for the supply of the following stores, namely:—

Steelwork for Bridges.

Steel Rails and Fishplates.

Cast Iron Chairs.

Steel Fish-bolts, etc.

Railway Tickets, etc.

Miscellaneous Articles and Materials.

Specifications and forms of Tender may be obtained at this office on payment of the fee for the specification, which payment will not be returned.

Tenders must be delivered in sealed envelopes, addressed to the undersigned, marked "Tender for Steelwork for Bridges," or as the case may be, not later than 11 o'clock a.m. on Thursday, the 28th inst.

The directors do not bind themselves to accept the lowest or any Tender.

J. I. BERRY.

Secretary.

Company's Offices,

48, Copthall Avenue,

London, E.C., 20th September, 1911.

PATENT.

THE Owner of British Patents Nos. 7394

of 1907, entitled "An Improved Underframe for Railway and Other Cars," and 24,507, of 1907, entitled "Improvements Relating to the Manufacture of Car Wheels," granted to J. M. Hansen, is desirous of disposing of the patents, or entering into a working arrangement under licence with firms likely to be interested in the same. In the alternative, the owner would be open to consider proposals to manufacture the inventions to fill any requirements of the market in Great Britain on terms to be arranged.

The patents cover inventions interesting to manufacturers of Railway and Tramway Cars and Wheels.

Detailed information as to the inventions will be found in the patent specifications, of which copies will be supplied to any interested party on request.

Full particulars can be obtained from, and offers made (for transmission to the owner) to, MARKS AND CLERK, 57 and 58, Lincoln's Inn Fields, London, W.C.

THE IRISH RAILWAY STRIKE.

However unfortunate the railway strike in Ireland may be from the point of view of the public who are directly affected thereby, it cannot be denied that it provides a wholesome object lesson in what trade unionism, not to mention "recognition," implies. Indeed, if there is any commonsense or justice left in the country, it should put an extinguisher upon the demand for "recognition," which has been at the root of the railway labour unrest in this country. The Railway Commission, which is now considering the Conciliation Scheme of 1907, even though it may not have direct evidence of the condition of affairs in Ireland brought before it, can hardly fail to be impressed by events in that quarter. Statements have already been made on behalf of the railway companies to the effect that the trade unions are attempting to put themselves above the law of the country and to invade the rights of the Government. In Ireland this has actually been done, for the origin of the strike was the refusal of a few men to handle traffic which happened to be consigned by an employer who had a dispute with his own workmen. In other words, these men sought to do, and in effect did, what the railway company itself is debarred by the law of the land from doing—that is to say, in discriminating as between one trader and another, and neglecting its proper function as a common carrier. At the outset it does not appear that the conditions of labour had anything at all to do with the trouble. The Amalgamated Society of Railway Servants, instead of using its influence in the direction of peace, moved its Executive committee from London to Dublin, and then seems to have immediately taken sides with the law-breakers—another illustration of the evils which, as the companies allege, would arise from recognition. To show how helpless the companies really are in dealing with these preposterous demands on the part of labour, it will be noted that the Dublin and South Eastern Railway, which alone had tried to carry out the policy suggested by the strikers, is to be compelled to fulfil its legal obligations, the Timber Merchants' Association having passed a resolution condemning the company's action, and pointing out that it "views with alarm the precedent set up by this company in boycotting traders because they have a dispute with any of their employees." Thus in yet another direction the Irish strike may solve an interesting problem. Is it at all surprising that the Irish public are in a state of indignation and are entirely out of sympathy with the fomenters of this trouble? As usual, the Government would appear to have begun at the wrong end, and after allowing the trouble to be deliberately encouraged by agitators and others, has dispatched a representative of the Board of Trade to endeavour to bring about a settlement. Is it not high time that these troubles should be dealt with in their origin, by amendment of the law if necessary? It is becoming more and more evident that the railway industry is on an entirely different footing from any other branch of commerce, and numerous obligations are laid upon the companies to protect the public from interruptions to traffic, including the not unimportant feature that the railway companies are debarred from locking out their men. Surely the right to strike without

notice, and without suffering any penalties therefrom, which some railwaymen seem to claim as their right, is a privilege which requires to be considerably modified in the public interest. After all, a railway strike is not a strike against the companies; it is a strike against the entire public interest, and even against the Government, and the mere fact that such an extremist as Mr. Keir Hardie has admitted that under all circumstances it is the duty of the Government to keep the railways open discloses how absurd is the present situation.

THE ROYAL COMMISSION.

During the past week the defence of the companies has been continued. We have been spared any sensations, and many of the alarming tales that were told by the men's witnesses have been either controverted or discounted. But, as we have before observed, these are matters of minor importance, some of which, as instanced by Mr. Glover on Thursday, happened three years ago. The circumstances that caused the strike, or led up to it, may also be clear and be found to be such that will not happen again. Mr. Fay reminded the Commission on Thursday afternoon how the good times of 1907-8 were followed by the bad times of 1909-10, which reflected themselves on the arbitrators' awards and led to reductions of working expenses necessitating the re-grading of men, closing of signal boxes, &c. Then there was also a combination of circumstances that led up to the strike a month ago. If there had been no strike at the docks and of carmen and lightermen in London, and no trouble with the carters in Liverpool and Manchester, the air would not have been so charged and probably the strike would not have occurred. Anyway, the grievances of which some of the men complain as to their treatment in the matter of hours and pay, also the combination of circumstances that led to the economies of 1909 and the strike five weeks ago may be explained, and it is to be hoped that none of these may happen again. But what of "recognition"? Some are of the opinion that this question has been answered by the events in Ireland. That may be so, but we must not trust to that alone, effective though the answer may be. The evidence of Mr. Sam Fay, on Thursday, proved clearly enough, however, that recognition would not afford any advantage. His line in the Lancashire and Yorkshire districts is in close touch with unionism, and his determination in this matter will no doubt have weight. Mr. Dent, Mr. Hyde and Sir Charles Owens made good witnesses, but compared with the Northern lines they have little experience. But the best witness on this point up to now has been that excellent fighter, Mr. Ammon Beasley, of the Taff Vale. His line is situated in a veritable hot-bed of Socialism and strife, and yet what a splendid tale he told of the happy relations that exist between his company and its staff. The men's witnesses had hardly anything to say about the Taff Vale. All that they could say was that its neighbour, the Barry, recognised the union. In this respect the Barry is like the North Eastern, but not in this respect alone. They are alike in being constantly in trouble with their staff. Of this we may hope to hear more shortly, as the Royal Commission has sent a request to the North Eastern Company to give evidence, and about Thursday next it is anticipated that Mr. Butterworth will be in attendance. On Monday Mr. Jackson, of the North British, and Mr. Park, of the Highland, will give evidence, and they will be followed by Mr. Bury, of the Great Northern, and then will come an interesting witness in the person of Sir Guy Granet, of the Midland, who will be the last of the companies' witnesses except those from Ireland. It is expected that Mr. Marwood, of the Board of Trade, will be the last witness of all, and then the Commission will proceed to the preparation of their report.

THE BRIGHTON RAILWAY ANNIVERSARY.

Viewed from both its financial and engineering aspects, the contrast between the Brighton Railway on its opening day seventy years ago last Thursday and the London, Brighton and South Coast Railway of to-day is as great as the difference of the early locomotive, the coaches with the railed roof for luggage, and the guard's van with its elevated outside seat to enable that official to keep a look-out for signals, from the graceful and powerful engines of Mr. Earle Marsh which take the Pullman car and other trains to London-by-the-Sea in an hour. In comparison with lines running north, the Brighton Railway, with its branches radiating through Sussex and a portion of Hampshire, may be considered a plant of slow growth, but its advances have been solid for all that, with the result that its stock is as desirable as any in the market. Moreover, no railway has had to face greater difficulties in the matter of securing a clear road out of London, and for some distance beyond. Not only have these troubles been overcome, but the company has constructed a new line to avoid running over the South Eastern system between Purley and Redhill. Its enterprise is not to end at this achievement, for it is generally understood that the aim in view is a doubling of the main line to the coast. To what extent the scheme may be modified by the consideration which is being given to the suggested equipment of the track for electrical working remains to be determined. That the line will ultimately possess the advantage of a dual system of traction before other main railways in this country is not unlikely in view of the success which has attended systems of greater mileage in Germany and the United States, to say nothing of the Brighton Company's two London suburban electrical routes. The effect of one of the latter enterprises in winning back traffic taken away by electric tramways and inducing extra business has been very marked, and satisfactory, if slow, progress is being made in the same direction by the route last electrified. The most remarkable aspect of this traffic gain is to be found in the fact that few steps have been taken to inform the residents of the districts of the improved facilities which have been placed at their service, and it is interesting to speculate what the extent of the gain would be if the enterprise shown by the London Underground Electric Railways was imitated by the Brighton management. The matter has a great importance for the company in the future if we take into consideration the circumstance that for some years special encouragement has been given to developing season ticket traffic to Brighton and to the growing localities on and beyond the London boundary, and that before long electric working is to be extended to Croydon. To affirm that the directorate has yet to accomplish a great deal to give each class of its long-distance passengers the advantage of the lavatory carriages of other leading lines does not detract from the praise which is due to them for their achievements. That attention should be given to this matter as speedily as possible must be acknowledged when it is remembered that the prosperity of the line is dependent on passenger, and not goods traffic. No retrospect of the Brighton line would be complete which did not include a tribute to the able advisers the directors have found in successive general managers and their staff. For many years the name of Mr. J. P. Knight was a household word. Mr. Gooday, too, rendered notable service, while Mr. William Forbes, since 1899, has added to the reputation which he made with the South Eastern and Chatham and Dover Railways.

L. and N.W. Railway and Second-Class Carriages.—On and after October 1, second-class carriages and fares will be withdrawn on the following lines of the London and North Western Railway:—Cheddington and Aylesbury branch, Leighton, Dunstable and Luton branch, Wolverton and Newport Pagnell branch, Abergavenny Junction and Merthyr, Blaenavon, Nantyglo, Ebbw Vale, and Sirhowy branches.

The change in the condition of the money market, which had been so long foreseen and so well prepared for by those responsible for the management of the Bank, appeared with accelerated manifestations during the week. The Imperial Bank of Germany having raised its official rate in company with the Austro-Hungarian Bank, the banks of Belgium and the two Scandinavian States, and, finally, the Bank of France, our own institution followed suit, with the effect of staying, or at all events restraining, the outflow of gold which was already threatening. The Paris cheque was declining, the quotation being 25.19. The demand for gold had proved effective in Turkey and Egypt, and the usual autumn drain to India, Argentina, and Brazil will soon be upon us. In these circumstances the rise of the Bank Rate to four per cent. was only to be expected, and it is most satisfactory to note how strongly the Bank is now placed for the purpose of dealing smoothly with any untoward turn of events which may prove to be the outcome of present entanglements on the Continent. On balance, a trifle of £71,000 left the bank for foreign countries during the week, but the internal circulation returned £1,104,000 to its coffers—£425,000 in notes and £679,000 in gold—thus raising the Reserve by £1,033,000 to £32,573,000. It is a long time since these figures have been surpassed at this date in the season, but the early completion of the harvest, by reducing the employment for cash in the provinces, has, doubtless, contributed to the result. Public Deposits are £1,693,000 higher. Other Deposits have risen £1,236,000. Government securities are half-a-million down, probably owing to the maturity of Treasury bills held by the Bank, and

that item of Other Securities so long retained at an abnormally low level has increased by £2,600,000, and so been raised to a more usual figure. The ratio of Reserve to the liabilities of the Bank is thus reduced to 50½, which is, nevertheless, a remarkably high proportion. What with friction between Germany and France, political assassination in Russia, military law in Spain and Vienna, to say nothing of labour trouble in Ireland and elsewhere, there are many sources from which untoward developments may arise, and persons who are tempted to speculate on the Stock Exchange by the present low level of prices may be warned not to exceed their financial resources, because, bad as things are, the malignance of fate is by no means exhausted, and worse may easily occur. Taking one day for another, the description of business on the Stock Exchange last week might serve for this week, or the previous week for that matter. Since labour, military and financial troubles have occupied the attention of the market there has been no room for any regard to the individual merits of stocks, and prices rise and fall in fortuitously disturbed fluctuations, according as one influence or another gains control of their particular holders. The traffic receipts of our home railways left little to be desired this week, but no effect upon quotations could be traced to that, the talk was all of other things. The German *débâcle*, according to the views countenanced by international *haute finance*, was due neither to any fears as to the outcome of the Moroccan "conversations" in Berlin nor to any manipulations in money inspired from Paris. Its origin in this view was entirely due to over-commitments, especially in United States and Canadian stocks, the crisis being precipitated by the crumbling of prices in Wall Street. The general unrest, which now covers all Europe and North America, is supposed to have no connection with financial troubles anywhere. The increased taxation under which every country is suffering, in spite of all that was said at the time it was imposed, here and in other places, is hardly mentioned; it seems to have been forgotten. Nevertheless, by such as are concerned to examine a little below the surface of things all these phenomena may be suspected of having intimate relations. With so many obstructions to the growth of business, some fears have not unnaturally arisen lest the period of expanding trade which seemed so well established by the statistical evidence of 1910, and that of the first six months of this year, may not have been permanently arrested, if not actually reversed. The best hopes for the contrary are founded upon its very widespread distribution. Taking the imports and exports of the four countries—Germany, France, Belgium, and the United States—together, for the first seven months of the year, the former show an increase of 7.5 per cent. and the latter an increase of 11.4 per cent. It will probably require more shaking than that implied in anything we have thus far experienced to upset a trend of trade founded on so broad a basis.

As we have already said, the fluctuations of stocks during the week have been of a kind from which little is to be gathered or inferred. After a week of backing and filling some appearance of better business at higher prices was made on Friday, based, absurdly enough, on the success of the Conservative party in the Canadian elections. Canadas fell 3 points on the strength of it, but Trunks were better, and the improvement embraced Government stock, Foreign bonds, and Home rails. In the latter, Great Central Preferred rose 1½, Great Northern 1½, Brighton Deferred, Great Eastern, Lancashire and Yorkshire, Midland, London North Western, and South Western Deferred, each 1. Hardly any stock in the active list but rose ½ or ¼. Foreign railways were quiet, and the United States section much depressed. Steels led the decline on reports that the company will be prosecuted under the Sherman Act unless it dissolves voluntarily forthwith.

The movements of the week are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.

BANK RETURN.

The return of the Bank of England for the week ended Wednesday, September 20, compared with that for the previous week, shows the following changes:—

Sept. 21, 1910.	BANKING DEPARTMENT.	Sept. 13, 1911.	Sept. 20, 1911.	Increase.	Decrease.
£	<i>Liabilities.</i>	£	£	£	£
9,689,079	Rest	9,688,528	3,705,427	16,899	—

The Refunding of Strike Ticket Losses.—During the railway strike, which coincided with the close of the holidays of Blackburn and other East Lancashire and Yorkshire towns, thousands of people, mostly mill operatives, had to hire conveyances or walk long distances home, their return tickets being useless. The Lancashire and Yorkshire Railway Company are now refunding half-fares in these instances to applicants who prove their claims. The Midland Company have declined similarly to refund.

Weekly Traffic Summary.

The traffic receipts for the week ended September 17, as officially published by the fifty-two principal railways of the United Kingdom, amounted to £2,465,902, which was earned on 21,521 miles, being at the rate of £114 11s. 7d. per mile of line open. For the corresponding week of 1910 the receipts of the same lines amounted to £2,378,113, with 21,467 miles open, or £110 15s. 7d. per mile. There was thus an increase of £87,789 in the receipts, an increase of 54 in the mileage, and an increase of £3 16s. in the receipts per mile. Thirty-four of the returns distinguish between the receipts from passenger and goods traffic, and these show an increase of £38,026 (or £1 13s. 7d. per mile) in the passenger receipts, and an increase of £49,063 (or £2 3s. 11d. per mile) in the receipts from goods traffic. The aggregate decrease of the thirty-four railways for eleven weeks in the passenger receipts has been £19,506, while the aggregate decrease in the goods traffic was £278,296. The aggregate receipts of the fifty-two railways for eleven weeks (July 2 to September 17) amounted to £26,937,815, in comparison with £27,291,961 in the corresponding period of last year—a decrease of £354,146.

DIVIDEND ANNOUNCEMENTS.

EXETER RAILWAY.—At the rate of 1 per cent. per annum, less income-tax, the A debenture stock, carrying forward £347.

WINNIPEG ELECTRIC RAILWAY.—The directors have declared a quarterly dividend at the rate of 12 per cent. per annum, payable on October 2.

BILBAO RIVER AND CANTABRIAN RAILWAY.—An interim dividend and bonus amounting together to 6s. per share, free of income-tax, for the half-year ended June 30.

BRAZIL RAILWAY.—At the rate of 1½ per cent. for the quarter ending September 30 on the preferred shares. The same dividend was paid for the corresponding quarter last year.

GREAT NORTHERN RAILWAY (U.S.A.).—The directors have declared a dividend at the rate of 1¼ per cent. on the preferred capital stock for the quarter to be paid on November 1.

CHICAGO JUNCTION RAILWAYS AND UNION STOCK YARDS.—The board have declared a dividend of 2 per cent. on the common stock for the three months ending September 30. The same as a year ago.

EAST INDIAN RAILWAY.—The directors recommend the payment of a dividend of £1 3s. per cent. on the deferred annuity capital and the deferred annuity capital class "D" of the company, in addition to the guaranteed interest of £2 per cent. for the half-year. A year ago the dividend was at the rate of £1 1s. per cent.

THE G.E.R. AND GARDEN ESTATE DEVELOPMENT.

Visitors to the exhibition of houses at Squirrel's Heath and Gidea Park, a mile from Romford, comment most favourably upon the splendidly designed station which the Great Eastern Railway Co. has erected for the accommodation of residents at this rising garden estate. The platforms and buildings are very spacious, and the architecture is most attractive. Especially noticeable is the signal box, which stands on an iron bridge spanning the main line, the box itself being over the up platform. Altogether, the station forms a notable departure in railway buildings. The estate is laid out on attractive lines, and on its northern side is an 18-hole golf course, which is to remain in perpetuity. Over one hundred and fifty houses have been erected in a competition for prizes, and the awards may now be seen affixed to the buildings, every one of which has spacious front and back gardens. The houses may either be rented or purchased, and a number of residents have been attracted since the exhibition was opened in June last by the President of the Local Government Board. Freehold prices range from £450 to over £700. Squirrel's Heath and Gidea Park is reached from Liverpool Street in 25 minutes, and the third-class season tickets are as low as £10 per annum. During the remainder of September cheap return tickets are issued after midday on week days at 1s. 3d., and throughout Sundays.

South African Railways.—The working profit of the railways of the United Colonies of South Africa for the past quarter amounted to £1,237,500.

THE RAILWAY COMMISSION OF INQUIRY.

THE CASE FOR THE COMPANIES.

On Monday last the Royal Commission appointed to inquire into the working of the railway conciliation boards entered upon the fourth week of its sitting, Sir David Harrel presiding. This was the seventeenth day of the sittings, and the presentation of the case for the companies, which had opened on Thursday of the preceding week, was continued. The reference to the Commission is in the following terms:—

"To investigate the working of the railway conciliation and arbitration scheme signed on behalf of the principal railway companies and of three trade unions of railway employees at the Board of Trade on November 6, 1907, and to report what changes (if any) are desirable with a view to the prompt and satisfactory settlement of differences."

The witnesses for the companies examined last week were Mr. A. H. Walker, assistant to the general manager of the London and North Western Railway Company, and Sir Charles J. Owens, general manager of the London and South Western Railway Company.

A.S.R.S. INTOLERANCE AND INTIMIDATION.

Lord CLAUD HAMILTON, for thirty-nine years a director of the Great Eastern Railway, deputy-chairman for eighteen years, and chairman for eighteen years, was the first witness on Monday. His lordship stated that he attended not only as the representative of the Great Eastern Railway, but as claiming to speak on behalf of the great majority of the men who were not members of the A.S.R.S., and did not wish to become members, and who desired to be protected from intolerance and intimidation, which he regretted to say had been exercised by that society during their operations. It had always been his habit, since he had been chairman, to take every opportunity of mixing in a friendly manner with the men. That being so, the staff, or the majority of the staff, desired to be left free to deal with him and his colleagues in bettering their position, rather than to be members of the Amalgamated Society and use the officers and agents of that society to urge their claims. Lord Gorell, who was the arbitrator in the recent proceedings, had borne testimony to the great good feeling between the company and its employees. The staff knew that when opportunity occurred they would benefit by increased prosperity. As an instance, in 1897, when the affairs of the railway were rapidly improving a scheme was drawn up under which every section of the staff would have been gradually benefited. Unhappily the South African War caused stock to fall rapidly, and the general manager and he agreed that the scheme could not be perfected.

A PROFIT-SHARING SCHEME.

Since then the directors had considered whether something could not be done in the direction of profit-sharing, and they asked the late Sir George Livesey to give them the benefit of his advice as to the possibility of forming such a scheme. The scheme was abandoned when it was found that it would involve at least 1 per cent. of the annual dividend, which was only $\frac{2}{3}$ per cent. Nevertheless, he believed there were possibilities in the profit-sharing idea if it could be applied to the great railways where the dividends were higher than on the Great Eastern Railway. One reason why, in the opinion of witness, the relations between the directors of the Great Eastern Railway and the staff were so cordial was that the general manager and his two predecessors had been in the company's service from boyhood. Where the staff was conscious that any man in the ranks, if capable, would be chosen in preference to anybody else for the high posts it gave a feeling of contentment among the men which would not exist under other conditions. There was a rule on the Great Eastern Railway that no head of a department should be appointed except from the ranks unless special technical knowledge was necessary. "I ask you, gentlemen," continued the witness, "and, through you, the public, who are the staff of a railway most likely to trust, general managers and men brought up in their midst, who know them personally, know their wants, and are equally interested with them in the success of the company, or the paid agitator, whose income is mainly dependent on the amount of ill-feeling and undiscipline he can create?"

ALLEGED FAILURE OF CONCILIATION A BLIND.

Lord Claud said that one result of 45 deputations which had waited on the Great Eastern directors was that in ten years the wages paid to the men increased by £52,953. This, he claimed, showed how a staff could obtain concessions from a

board of directors who were in sympathy with them without any interference whatever from outside. The statement by Mr. Haggas, M.P., an opponent of the A.S.R.S., that 100,000 railwaymen received £200,000 a week, and that must have included boys. The only serious trouble on the Great Eastern had been from active union men who made speeches and received 7s. 6d. for each speech. During the agitation which took place in 1907, and which led to the Conciliation Board Agreement, there was very little trouble on the Great Eastern, and very little likelihood of a strike taking place. He had some hesitation in signing the agreement, but at the request of Mr. Lloyd George he agreed on behalf of his company to sign the agreement, and loyally to abide by it. In his opinion the scheme of 1907 had not had time for a fair trial. The strike of last month was in no sense due to any failure on the part of the scheme to secure justice for the men. The alleged failure was merely used as an excuse to blind the public for a stoppage of work in order to obtain recognition of the unions, and it was arranged at a period when the Executive Committee of the Unions knew that most of the chairmen and directors of the companies would be away from home. It was evident to witness from the first that ever since Mr. Bell, with most honest intentions, became a party to the agreement his doom was assured as regarded his position on the A.S.R.S. What the companies wanted, and what Mr. Lloyd George wanted, was the certainty of industrial peace and quiet on the railways for a fixed period, but the Amalgamated Society were up in arms about it because they could not exist on industrial peace and conciliation. By the repudiation of the agreement entered into and signed on behalf of the unions on November 6, 1907, these unions had forfeited all right to be trusted. If there were to be any new agreements entered into, they had no guarantee whatever as to their being carried out in an honourable spirit unless strong penalties were imposed.

WHAT RECOGNITION WOULD RESULT IN.

Lord Claud, continuing, quoted Mr. Bell as saying in November, 1907, that recognition was what they asked for, but it was not what they had got. The Associated Society also about the same time accepted the scheme, but regretted that recognition had not been obtained. From this and other incidents, it was evident that the Society had steadily been working for recognition. He protested against attempts by the union's paper to stir up hatred and malice against him and his board. Society men had described as "victimisation" the case of Signalmen Payne, the first chairman of the men's side of the traffic department conciliation board, when he was not allowed by the company's doctor to resume work shortly after his election on account of the condition of his heart. Payne died within about six weeks. On the Great Eastern, out of the staff who were eligible for membership, only about 10 per cent. belonged to the A.S.R.S., and there was no doubt that the society had been persistently fanning discontent in order to recruit an increased membership. Recognition of the society in matters affecting this company's staff would have but one effect, that an organised few would be able to tyrannise over a much larger number, owing to the latter being unorganised. As an instance of the terrorism exercised by the A.S.R.S., witness referred to the case of Osborne. He was warned that Osborne was a desperate Radical and violent trade unionist, but found him a man of integrity, honour, and straightforwardness, and yet because he had the courage to act conscientiously, and refused to do what was repugnant to his convictions, he was tyrannised over and expelled from the society. "The Great Eastern men," said Lord Claud, "are prepared to submit to the discipline necessary to conduct a business in which the safety of life and the welfare of the public are closely concerned. The unions seek to undermine and destroy such discipline. My men want to be free and independent, and I want them to be free and independent, as subjects of a constitutional Monarch."

The majority of railwaymen did not want to belong to the unions. "Do you suppose for a moment," said the witness in conclusion, "if you recommend recognition, even in a limited form, that it will conduce to industrial peace? Nothing of the kind. Any concession in that direction will only act as an incentive to the unions to pursue, to its finality, their aggressive tactics. Any form of recognition would perfect foundations for further demands within a brief period."

WHY LORD CLAUD SIGNED THE AGREEMENT—WORKMEN'S STOCK.

In reply to Sir T. R. Ellis, Lord Claud Hamilton said he would never have signed the agreement of 1907 unless it had been his firm conviction that the question of recognition was to be delayed until the expiration of the scheme.

To what do you attribute the failure of the 1907 scheme?—I attribute it to the determination of the Executive of the Amalga-

mated Society to make it a failure. They never entered into it—when they really understood what it meant—in the same spirit as the railway companies did—namely, with an honest desire to make it a success. He was very strongly in favour of the sectional boards. He would exclude clerks from the scheme because he did not think they wanted to be included at all. He did not approve of a National Board.

Sir T. R. ELLIS: How would you enforce the carrying out of the decisions of the Conciliation Boards?—I would inflict either a very heavy fine or a term of imprisonment on either party who broke an agreement.

Witness added that Parliament should stop intimidation. The law permitting picketing was one of the things preventing the carrying out of decisions. "Peaceful picketing" was a misnomer, and was sure to lead to molestation.

Sir T. R. ELLIS: Do you think it would be practicable to issue workmen's stock to be subscribed for at par, and returned at par to the company on the death of the holder, or on his leaving the company's employ, with a limitation on the amount of stock which any employee may hold, the stock to carry $3\frac{1}{2}$ per cent. interest in addition to $\frac{1}{4}$ per cent. for each 1 per cent. declared by the company?—Witness would not commit himself to detail, but agreed that such a scheme would make for peace.

COULD THE STRIKE HAVE BEEN BROKEN?

Replying to Mr. Henderson, witness said that the figure of 26s. 11d. per week, which he gave as the average earnings of the Great Eastern men, included overtime and Sunday work.

Has recognition had the effect of reducing the North-Eastern Railway to chaos and disaster?—I was one of those who implored the chairman and board not to recognise the unions. They did recognise the unions, and ever since there has been nothing but unrest upon that railway.

Has the quantity of recognition on the London underground railways resulted in chaos and disaster?—Surely you are inaccurate. I do not think recognition was granted, though Sir George Gibb wanted it to be.

Mr. HENDERSON: Do you wish to suggest that the powers of the unions, small as are the numbers of the unions, and great as are the numbers outside, apart altogether from discontent with conditions of service, were sufficient to bring about that national stoppage?—The men who came out acted precipitately, and, if you want my opinion, I would have fought out that strike. My firm belief is that in four days' time subsequent to the Saturday night when the agreement was entered upon, we should have seen the termination of it. In my opinion it was most inopportune that the agreement was arrived at which resulted in this Commission. Once the strike had been broken we should have had no more unrest during the period of arbitration.

You are satisfied you could have broken it?—I am.

A SECRET OF THE CONFERENCE—NO RECOGNITION.

Do you think that any scheme which this Commission may arrive at will be satisfactory to the railway workers, or, at least, the railway unions, which does not include some measure of recognition?—In my opinion you will never satisfy these unions. I look upon the strike as unjustifiable, and if you give them satisfaction you are rewarding them for having given this vast inconvenience to the public and for breaking their agreements.

Witness favoured the plan for the appointment of five or six arbitrators for the United Kingdom, each having a specified district allotted to him. He would not admit that the negotiations which took place at the Board of Trade in 1907 constituted indirect recognition.

Mr. BURNETT said that in the recent negotiations the representatives of the railway companies did meet the union officials.

LORD CLAUD: It was after dinner, I believe. (Laughter.)

Mr. BURNETT: That suggests an excellent idea for a conciliation scheme.

LORD CLAUD: There is an old saying, "Approach an Englishman through his stomach." (Laughter.) He added that the two gentlemen who thought fit—as he thought unwisely—to meet the union leaders, went for the purpose not of negotiating, but of hearing the agreement explained so that there might be no misunderstanding. It could not be called recognition. When one sat on one side of the table, and there were human beings on the other side, one could not help seeing them, but they were not recognised in the sense of there being any conference. The two gentlemen who went into the room to meet the union leaders exceeded their instructions.

TUESDAY.

THE MEETING AT WHITEHALL NOT RECOGNITION.

Sir T. R. Ellis was not present at the sitting, at which the case for the companies was continued in evidence given by Mr. W. H. Hyde, general manager of the Great Eastern Railway, and Mr. A. Beasley, manager of the Taff Vale Railway.

Mr. HYDE first referred to the statement made by Lord Claud Hamilton on Monday, that Mr. Claughton, of the London and North Western Railway, and Sir Guy Granet, representing the Midland Railway, exceeded their instructions in meeting the representatives of the men at the Board of Trade. Lord Claud, he said, desired to withdraw that statement, as he was under a misapprehension. The official statement issued to the Press from the Board of Trade at the time stated that Mr. Claughton, Sir Guy Granet, and himself had been authorised by the companies to meet the men under the special circumstances, and with a view to discussing the suggested terms of agreement. Lord Claud accordingly desired to withdraw his statement.

GREAT EASTERN GOODS WORKERS REPUDIATE THE A.S.R.S.

Mr. Hyde added that he agreed with the evidence given by Mr. Walker (of the London and North Western Railway) with regard to the origin and working of the scheme, and the objections to recognition of the trade union. Proceeding, witness said there had been no undue delay on the Great Eastern in the procedure relating to the Conciliation Boards. Mr. Thomas had referred to a letter sent by Mr. Bell to the President of the Board of Trade, in which he alleged that the Great Eastern Company were practising very questionable tactics, and that at the London goods stations the officials were promoting a petition for the men to sign. It was quite untrue to say that the company were in any way responsible, as they had nothing to do with the matter until the petition was received—the men followed up their petition by waiting upon the directors on May 18, 1908, as they desired personally to express their views that they were content to deal direct with the directors, and did not desire the intervention of the Conciliation Boards. A meeting of the goods men repudiating the Amalgamated Society of Railway Servants' all grades movement was held at Toynbee Hall on November 20, 1908. The company had always been desirous of working Conciliation Boards fairly, and considered that they should have a proper trial for the whole term for which they were arranged. The union members, who presented an impossible programme, would perhaps urge that the boards had not worked well, simply because their demands had not been complied with.

UNFAIR DOMINATION BY UNION MEN.

Regarding the arbitration proceedings, it would be seen that the men's side delayed the course of proceedings, as they were unable for some time to obtain the services of their advocate. There had been one arbitration on the Great Eastern Railway under the conciliation scheme—in June, 1909. Lord Gorell's award was made on August 19, 1909. Upon the award coming into operation a certain grade—namely, the eight-hour signalmen, were affected by it with regard to Sunday duty, as under the award they were given an extra quarter rate for Sunday work, but only provided they worked seven days in the week, and the company arranged to relieve them as far as was practicable from duty on one day in seven. Thus, obviously, in many cases the men earned one day's less wages than they had done previously. These eight-hour signalmen petitioned the company to be allowed to go back to their former working—viz., to be allowed to work seven turns at ordinary rate, and as a number of cases of hardship were brought forward caused by the new arrangement, the company agreed, at the men's request, to their contracting out of the award and working under the former arrangement. The Conciliation Board members took exception on the ground that the company were not strictly carrying out the award. At a meeting of the Central Board on July 20, 1910, the men's side refused to agree to the contracting out, stating that they did not agree with the company's interpretation of the award. The men's side declined, however, to agree to the wishes of the eight-hour signalmen or to refer the matter back to them for their vote. As the men declined to confirm that arrangement, the award was put into operation, notwithstanding that the company were prepared to meet the wishes of 336 out of the total of 363 men. This was evidence of how a small section of men, merely because they were well organised, were enabled to dominate over a large number of men who had no organisation.

G.E.R. SIGNALMEN OUST UNIONISTS AND CREATE SATISFACTION.

The decision of the Central Board created considerable dissatisfaction and bad feeling among the eight-hour signalmen, who strongly resented the men serving on the board not carrying out their desires. When the second election took place in March, 1911, the composition of the board was altered. The members again raised this question, and approached the company in a very different spirit from that which had been manifested by the union members who sat on the previous board. The company thereupon agreed to the old arrangement of the men's working being reverted to, and allowed payment at the rate of time and a quarter for all Sunday duty. This created

a feeling of satisfaction, which had been wanting when the union members were in office. If the national programme had been carried out, it would have cost the company £300,000 a year. The A.S.R.S. only contained about 10 per cent. of the Great Eastern staff eligible for membership in their society, and if recognition were granted it would undoubtedly be used to force the unorganised members of the staff, to many of whom the unions were repugnant, into the society. This was evident from the fact that complaints were made by non-union men that they were unable to learn from the men's representatives on the Conciliation Boards any particulars of what occurred at the meetings, and were told that if they wanted to learn anything to join the union. As an illustration of this, he would quote from a speech made as recently as Sunday last by Mr. Dear, who gave evidence before the Commission.

THE LATEST TYRANNICAL DEMAND.

Addressing a meeting of railwaymen at Stratford, Mr. Dear said they had fought for recognition, but that was no good unless they got all the men into the union. He looked forward to the time when he would be able to stand at the gate and demand that a man should not start work unless he had a ticket. It was evident from this, said witness, what was in the minds of the union leaders.

The CHAIRMAN: That is his pious thought?—It is his address to the men.

Witness agreed with the abolition of the central boards, which had proved merely a stepping-stone to arbitration. He thought the provision of an outside chairman would not help matters at all. If the boards met periodically at stated times it would lead to matters being brought up unnecessarily, and also to a delay in considering questions of real importance.

A MEETING WITHOUT RECOGNITION.

Mr. HYDE, in reply to Mr. Henderson, questioned the official statement explaining how it was that the companies' representatives met the men's representatives.

Mr. HENDERSON: Do you consider it was recognition?—No.

Do you consider it was recognition "under the special circumstances"?—Oh, no. They were simply invited by the Board of Trade "under certain recommendations of the Government and under the special circumstances."

To that extent they recognised the officials of the union? To that extent they met them.

They met them without recognising them?—They met without recognition.

Replying to further questions from Mr. Henderson, witness said he thought the Great Eastern Railway men came out in the recent stoppage largely in sympathy with men on other railways. They caught the fever of strikes.

Would you be strongly against recognition if the grant of recognition were accompanied by conditions which would secure something like permanent peace upon railways?—I cannot follow you in that assumption at all. It is assuming that permanent peace would begin with recognition. I cannot assume that at all. I think the chaotic disaster of the North Eastern Railway was one of the effects of recognition.

Asked whether he had gone into the effect of recognition on other industries, witness said that, whereas the railways, with the exception of the North Eastern Railway, enjoyed complete immunity from strikes, the mining, the textile, the engineering, and shipbuilding industries, as well as other trades, suffered severely. That showed that recognition did not make for peace.

Mr. HENDERSON: It shows nothing of the kind. Nobody puts forward the claim that recognition is going to make disputes impossible. I said "recognition accompanied by machinery."—This shows that with recognition there is a large number of disputes. I prefer to have no recognition.

TAFF VALE RAILWAY MANAGER AND RECOGNITION.

Mr. AMMON BEASLEY, general manager of the Taff Vale Railway, said he had had 50 years of railway management. His railway took no part in the drawing up of the scheme of 1907, but subsequently they gave their approval to it at the instance of the Board of Trade. In South Wales there had been most disastrous strikes through the men not accepting agreements entered into by their representatives. The conciliation scheme was accepted by the company on the understanding that it was an alternative to recognition, and but for that his board would not have accepted it. Notwithstanding this, there had been no relaxation in the efforts of the union to obtain or force recognition, and it was contrary to every principle of justice that, having accepted arbitration, his board should be defending themselves to-day against a demand for recognition. There was no necessity for the abrogation or material alteration of the scheme, though he was prepared to welcome any

suggestion for simplifying it or expediting settlements. Before the company accepted the scheme he suggested the advisability of having only one board and an outside chairman. The national programme was impossible. In 1906, he calculated the programme would mean an aggregate annual increase in the wages bill of his railway of £47,000, or 24.32 per cent. of the wages paid in the previous year in the grades affected. It was also an increase of 5 per cent. upon the actual gross receipts of the company, and 11 or 11½ per cent. upon the net receipts.

WEDNESDAY.

The general managers of the Taff Vale, South Eastern and Chatham, Glasgow and South Western and Great North of Scotland Railways, and the passenger superintendent of the last-mentioned company, gave evidence on Wednesday. At the opening of the sitting, the CHAIRMAN said: I should like to mention that it would be an advantage to the Commissioners in forming their plans for the future if the railway companies could give us some idea of the number of witnesses they propose to offer. While we desire to hear evidence which may be fairly regarded as applying to the peculiar circumstances of any one company, and at the same time bearing upon the matter referred to us, we hope that the introduction of matter bearing only remotely on the subject of our inquiry will be avoided. It will be borne in mind that we have already on record a very full expression of opinion on general topics, an expression which we presume may be regarded as conveying the views of the companies generally.

BOARD OF TRADE CRITICISED.

Mr. A. BEASLEY, Taff Vale Railway, continued his evidence, and in reference to the settlement of the South Wales Railway strike in 1890, he was asked by Mr. HENDERSON whether the several companies concerned then conceded the principle of recognition.

Mr. BEASLEY: No, I do not consider at all that the question of recognition was involved except for the purpose of settling that particular strike. I may say that none of the companies then involved has recognised the unions, except the Barry. Like the North Eastern, their experience since has been that so far from recognition making for peace, their men have been in a continual state of unrest, and I see that the Barry men are to-day threatening to strike.

In reference to the Taff Vale strike of 1900, the witness stated that the presence of Sir F. Hopwood, representing the Board of Trade, was mischievous, and Mr. HENDERSON asked, "Because a representative of the Board of Trade comes upon the scene with the idea of conciliation his presence is regarded as mischievous?"

Mr. BEASLEY: Don't put it in that general way, please. In that particular case, under the circumstances applying at that time, the presence of a representative of the Board of Trade was distinctly mischievous. The strike would have been settled a week before it was if he had not been there. I do not say a word against Sir Francis Hopwood. He did everything a man could do, but if he had not been there the men would have gone in earlier than they did.

Mr. HENDERSON read the following extract from Sir Francis Hopwood's report:—

So far as I am personally concerned, putting aside the A.S.R.S. for the moment, this case has done enough to confirm me in my opinion that railway companies would lose nothing by deciding to receive in conference an agent of their servants, whoever he may be, as long as they were given reasonable evidence that such an agent represented the majority of the class, and was prepared to take the responsibility of binding that class by his action.

Mr. BEASLEY: That was simply an expression of opinion.

Mr. HENDERSON: An expression of opinion from an independent, impartial and highly-experienced official.

Mr. BEASLEY: I agree; but it does not follow that his opinion on that point is therefore to be accepted without question.

Replying to Sir T. R. ELLIS, witness said he thought no machinery for settling disputes was necessary on railways. The method of direct access was protected by the 1907 scheme, and the establishment of that scheme had not affected it prejudicially so far as he knew. The companies assented to the 1907 scheme because they thought that for seven years there would be peace, and that during that term the question of recognition should not be raised. He thought it desirable to place some restrictions on the abuse of their power by the trade unions. There was more unrest on railways where there was recognition than on others.

In reply to Mr. BURNETT, witness said it was possible to imagine a species of recognition which should be clearly defined.

SUGGESTED AMENDMENTS TO THE CONCILIATION SCHEME.

Mr. FRANCIS H. DENT, general manager of the S.E. and C. Railway, denied the statement by Signalman Fagg, secretary to the men's side of the central board, that difficulties had been placed in the way of his giving evidence. The Conciliation scheme of 1907 was accepted not only by the companies but the trade unions in lieu of their claim for recognition. His company only came into the scheme at the instance of the Board of Trade. They were of opinion—which subsequent events had confirmed—that it was not favoured by a considerable number of men on the system. If the scheme was to be continued it would be desirable to modify it. There was too much time lost under the present scheme. In regard to sectional boards, he suggested that they should be increased in number, as some of the grades were not adequately represented. The southern companies would have particular objections to the setting up of a national board. Companies like his own would never be represented at all on it. The northern companies would control the representation, and the same thing would happen to his company's men. He was opposed to the idea of bringing any third party at all into the sectional conciliation boards. It would prevent a free interchange of views, and, as regards the suggestion that a trade union official should be allowed to appear, this would lead to a muzzling of the men themselves and disregard of their own wishes. He would always be controlled by the executive of the trade union. This position was obviously shown by the national programme referred to. His experience of the efforts of the A.S.R.S. had shown him that the question of hours and wages was a minor one with them. They were everlastingly trying to interfere with discipline. So long as the responsibility of the safe conveyance of passengers rested on the boards and officers of the companies, it was undesirable for recognition to be given to unions. It was very undesirable that railways should be liable to be held up because of a dispute between two unions, such as had just taken place in the shipbuilding trade on the Clyde.

In reply to Sir T. R. Ellis, Mr. DENT said that he did not favour an independent chairman being introduced into the sectional boards, unless he came in as an arbitrator with a deciding voice. In this event he had no objection to the men's case being voiced by a representative who was not an employee, provided that an opportunity was given for the board to arrive at an agreement before either the chairman or the outside advocate was called in. He would prefer, however, that a matter which was not settled should go straight to arbitration.

OPPOSED TO SPECIAL STRIKE LEGISLATION.

Sir T. R. ELLIS: You object to a national board composed of railway interests. What do you say to a national board not solely confined to railway interests, but containing representatives of traders and workmen generally with a determining authority?—It seems to me that assuming that representatives of the workmen were trade unionists, we should be to a certain extent before a board of enemies on both sides.

You would have one side you could rely on. Certain railway interests would, of course, be there?—That would only be a section of the employers' side, and that would not be fair. Matters would work more smoothly if they did not have a central board. He did not think it would be wise to give any scheme a duration of more than three or four years. It had been suggested that some special legislation should apply to railwaymen to keep them from striking. He did not believe that any legislation would ever keep men from striking. There was no legislation more drastic than that which the Army and Navy were under, and that had not prevented mutinies. He felt very strongly, and his directors agreed, that no legislation should be instituted which would put railway servants at a disadvantage as compared with the ordinary workman.

STRIKES SHOULD BE MADE ILLEGAL.

Mr. DAVID COOPER, general manager of the Glasgow and South Western Railway, said that the conciliation scheme had proved quite acceptable to both sides in his company, and they had not had recourse to arbitration. They had only had occasion to refer petitions from two grades to the Conciliation Board and settlements were arrived at in each case. In the event of the Commission deciding to recommend any amendment of the scheme he favoured the abolition of the central board. Failing agreement by the sectional board, recourse should be had to an arbitrator, an assessor being appointed from each side. If a proposal on these lines were adopted it should be made incumbent on the Government to introduce legislation to make strikes on the part of railwaymen illegal. At present the men had the power to strike, but the companies had not the power to lock-out. The estimated cost to the company if it adopted the

national programme was £57,016, equivalent to a reduction in the dividends of 1 per cent. per annum.

Mr. GEORGE DAVIDSON, general manager of the Great North of Scotland Railway Company, said that the scheme as put into operation by his company had been satisfactory, and no representation had been made for any change in the scheme. He did not see much objection to calling in an independent chairman to settle a matter at the sectional board provided this was not done until the parties were hopelessly at variance.

Mr. WILLIAM DEUCHAR, passenger superintendent of the Great North of Scotland Railway, denied the evidence of Signalman Rothney, that he (Mr. Deuchar) intimidated a signalman at Fraserburgh by threatening him with punishment unless he abstained from making further complaints.

THURSDAY.

Mr. Robert R. P. Glover, assistant to the general manager of the Great Western Railway, and Mr. Sam Fay, general manager of the Great Central Railway, were before the Commission during the whole day. Mr. Henderson, M.P., was absent, having to attend an arbitration at Glasgow.

Mr. GLOVER strongly denied the charges brought by union witnesses against the company, and said that the men were very much better off in the way of betterments in the four years since the boards were set up than they were in the ten years preceding. With regard to the complaint that the company placed without notice counter proposals on the agenda paper, involving heavy reductions for the men, witness explained that the scheme did not provide for notice to be given by the company, though it did for notice by the men. The Board of Trade had remedied that deficiency. Explaining the system under which discipline is upheld on the Great Western, Mr. Glover said that inquiries into the conduct of the men were generally conducted orally, and the report received was sent to the man involved. He was required to furnish an explanation of the irregularity with which he was charged, and if that were not satisfactory it was customary for him to be seen by an official. The man in trouble could bring in another man to state his case after he had failed to satisfy his officer that he ought not to be dealt with in a disciplinary manner.

The CHAIRMAN: Don't you think a more satisfactory conclusion would be arrived at if a man might state the extenuating circumstances before he is punished rather than afterwards?—He has every opportunity. There have been cases where the friend has come in in the first instance.

Replying to Sir T. R. Ellis, witness said that in accepting the scheme of conciliation and arbitration the company thought they were getting in return a settled condition in the labour world. It had proved a workable scheme, though not perfect.

Sir T. R. ELLIS: You think the old method of dealing direct with the men was preferable?—I do.

You have done nothing whatever since the scheme was established on the Great Western Railway to prevent its fair operation?—That is my honest conviction.

CROSS-EXAMINATION ON RECOGNITION.

After you had the arbitration decision there were certain difficulties, and you, as a concession, met Mr. Bell for the purpose of removing them. Did you find him a very terrible person?—Not at all; he is a very well-balanced, reasonable man.

And do you think the discussions you had with him were of use in settling the difficulties?—Yes.

Then, when you met Mr. Thomas in the same way, did you consider you were doing anything seriously to the disadvantage of your company?—I should refer to Mr. Thomas in just the same terms.

You read the interview that Mr. Thomas gave to a newspaper, in which he said the relations were most friendly in every way. Do you agree with that?—Quite.

What do you call that?—Anything but recognition, Sir Thomas. (Laughter.)

The WITNESS objected to the men appointing a secretary to the board who was not in the company's employ. He had not found the slightest necessity for the presence of anyone else, and contended that the men had competent secretaries already.

Sir T. R. ELLIS: I want to see any reason why they should not be entitled, if they choose, to appoint a man as their secretary who is not in the employ of the company.—Because it is bringing in somebody as a buffer between the employer and employee.

Supposing it is. What is the objection to that? A buffer between the employer and the employed might be a very useful thing?—The objection is very largely based upon experience. You give certain people an inch and they want an ell.

In your arbitration the men had an outside representative.

Did you object to that?—Yes, on the ground that he was neither of the company nor of the men.

Sir T. R. ELLIS said that nobody was the worse for the men being represented before the arbitrator.

The WITNESS: Except that the principle, to which we attached enormous importance, was laid aside.

Sir T. R. ELLIS: You laid aside the principle and recognised Mr. Thomas and Mr. Bell with very good results? I don't like the word "recognition." We were thrown into the same boat, and stopped there a little together. (Laughter.)

And enjoyed it?—Yes.

The WITNESS said he admitted his experience with Mr. Thomas and Mr. Bell had been a good one. They were business men, and it was a question of personality. But recognition was a vital principle. He said with conviction that the tendency and the influence of the union unhappily was to make the members look to the union first rather than to the company first, and that was most important in matters of discipline.

LEGISLATIVE RESTRAINT FOR UNIONS.

On the question of the employment by railway companies of what was known as "blackleg labour," witness said that he would not favour such a question being included in the scope of the boards. He would rather face a strike than submit such a claim to arbitration. By order of four Unions thousands of contracts were broken during the recent unrest, and witness suggested that the Unions should not be allowed to pay any person who broke his contract, and also thought that the Unions should use their influence to protect men who were carrying out their contract.

Sir T. R. ELLIS: What would you give them for that? Nothing. I should ask for it as an elementary right.

Would you go to the union and ask them for what you want, or would you go to Parliament and ask them to pass an Act prohibiting these payments?—I should go to Parliament.

Would you go to Parliament and say: "Penalise these unions, not for breaking a contract I have made with them, but for breaking a contract I have made with someone else"? Is that a position in which you would get much sympathy in Parliament?—I think so. First of all I am not penalising any union. I am only asking for them to be prevented from inciting, aiding and abetting and supporting the breaking of contracts. The union is a known inciter to the breaking of contracts.

The WITNESS, continuing, stated that he only wanted the unions restrained, and not payments from them.

Mr. SAM FAY, general manager of the Great Central Railway, said that there was no arbitration on his railway, all settlements being by mutual arrangement, either at the sectional or central boards. There was some little delay in getting on with the scheme, for the reason that at the time the Great Central and Great Northern Companies had prepared a working agreement, and the case was before the court. There had been meetings of the conciliation boards since the settlement, when changes favourable to the men at various parts of the company's system had been made. From information obtained from the railway companies witness stated that out of 172 programmes dealt with by the various companies, no fewer than 127 settlements had been arrived at without recourse to arbitration, 20 being effected without convening the boards, 57 at the sectional boards, 50 at the central boards, and 45 by arbitration. If everybody had done his level best to make it work the machinery provided would have been effective and fairly satisfactory as far as questions of wages and hours of duty were concerned. Although the cost to the companies of the settlements arrived at was very considerable, and more particularly in providing for a reduction in the hours of duty and overtime, the individual man did not receive anything like the amount which the men expected, or were led to expect. Another source of discontent was the medical examination, including the eyesight test.

PENALTY FOR THE INFLECTION OF COMMUNAL LOSS.

Although, said Mr. Fay, the so-called "all grades" programme would not, perhaps, appear to be a very large thing for each individual man, yet the increased cost to all the companies, had it been complied with, was roughly something between £6,000,000 and £7,000,000 per annum, a sum which the railway companies could not entertain. He was of opinion that if the railways had been worked by the State the result of the application from the men would have been the same as it met with at the hands of the companies and the arbitrators; no Chancellor of the Exchequer could be expected to receive with a beaming countenance an application for £6,000,000 or £7,000,000 at a time of falling revenues and with a number of pressing social ques-

tions on hand. With regard to the recent strike, witness said that the leaders of the unions were swept off their feet at the meeting at Liverpool. He did not consider that recognition had anything whatever to do with the strike, nor did he think that recognition would prevent a strike occurring again under a similar combination of circumstances. Witness objected to recognition because it would interfere with discipline. It was often difficult enough now to keep in hand the younger members of the staff who had not been long enough in the service to appreciate that discipline was a necessity. If trade unions had anything to do with discipline or management it must be in the direction of relaxation of the regulations. If any change was needed in the constitution of the conciliation scheme he would recommend the abolition of the central board. The appointment of an independent chairman for the sectional boards would be very detrimental to the cause of conciliation. He agreed that two assessors, one on behalf of the staff and one on behalf of the company, to assist the arbitrator would be advantageous. The statement that the railway companies had so manipulated the awards of the arbitrators as to deprive the men of the benefit of them was incorrect as far as the Great Central Railway was concerned.

Recognition would afford no guarantee of continuity of service, or that strikes in the future would be thereby avoided, but witness had considered very carefully whether any binding arrangement could be made to avoid the disaster of either a local or a general strike. He was not prepared to advocate on behalf of the railway companies any alteration in the general law which applied to other industries as well as the railways, but he thought there should be some penalty for the infliction of loss upon the community. The Canadian Act offered some resistance to strikers, if not an effective resistance. It practically resembled the Bill of Mr. Crooks, and made it a penal offence to strike or advocate a strike during the consideration of the question under arbitration. If they had that tacked on to the conciliation scheme it ought to do something. He did not believe that they would ever make any arrangement that would absolutely prevent strikes short of Government control, and he was not sure that that would do it.

The CHAIRMAN: Would you make it possible to bring before a Conciliation Board the objection of the men to working with non-union men?—No. I do not think we could.

Sir T. R. ELLIS: Do the differences existing between railways and other industries justify exceptional treatment?—I think it is a national more than a railway question. I am not disposed to ask for exceptional legislation.

The CHAIRMAN: A man can always by giving notice withdraw his labour?—Certainly; you cannot interfere with freedom of contract. But during the time the dispute is under consideration under the conciliation scheme I would make collective action on the part of the employees a penal offence.

STRIKE PAYMENTS AND BROKEN CONTRACTS.

The WITNESS agreed that the support of the union might assist the men in keeping their contracts, though he failed to see how so many hundred thousand men could be kept from breaking their contract if they so desired.

Sir T. R. ELLIS: Don't you think the support of the union is worth buying?—It all depends on the price. I don't think that recognition is going to free you from strikes.

But supposing an agreement was come to between the companies and the union, by which the latter would not pay strike money to those who had broken their contracts, don't you think that would be important?—Undoubtedly it would.

How is it going to be done?—I can't tell you.

Might I suggest, first, an agreement with the union not to pay strike money to a member who had broken his contract, and, in the second place, the passing of an Act of Parliament to prevent the union paying strike money to such a member?—We had an agreement with the union in 1907, but the men, I believe, were too strong for the union. I do not say that the union would run away from their bond if they could help it, but I do not think they could help it. You are assuming that all railwaymen are in the union. What are you going to do with the outside men?

We have had it in evidence that no strike can be effective without the assistance of this organised body. I do not want to deal with the other men; they cannot make a strike.—I am not sure about that. I think you can have an effective strike for ten days or a fortnight without the unions at all. I do not think that railwaymen are so hard up that they could not last a fortnight.

Do you think that the support of the union is worth buying?—It depends on the price. I do not think recognition will protect us from strikes.

You cannot keep off that blessed word "recognition"?—Yes, but that is what you are driving at. (Laughter.) I have no personal feeling in connection with this business, and I would just as soon shake hands with a trade union leader as with a duke, but I do not want to live with either of them if I can help it. (Laughter.) If recognition is obtained in the form that has been suggested in this room I should spend the greater part of my time with the trade union officials. I have no objection to them personally, but, as I say, I do not want to live with them. (Laughter.)

"BLACKLEG" LABOUR.

Sir T. ELLIS: Would you confine the questions which could be referred to the sectional board to those dealing merely with hours and wages, or extend them to all the relations between employers and employed?—I should not like to extend them, because I do not know where you would get to.

I do not refer to matters involving discipline and management. Suppose the men said, "We are not going to deal with 'blackleg' traffic, we shall not have that as one of our duties"? Is that a question you would refer?—How could we? We are under legal obligation to take all the traffic that is offered to us. How could we refer the question to a conciliation board or anybody else when we are under penalties to carry traffic which our employees refuse to handle? We would be between the devil and the deep sea.

And upon that there would be nothing for it but a strike?—Upon that we should be helpless.

FRIDAY.

The Royal Commission sat again yesterday, Sir David Harrel presiding. Mr. Herbert Marriott, goods manager of the Lancashire and Yorkshire Railway, who was previously passenger superintendent, said that he had been chairman on the company's side on some of the sectional boards and a member throughout of the central board. He found that conciliation had worked remarkably well, as the company and their men had arrived at a mutual settlement without arbitration in June, 1909. The concessions then made cost the company £37,785 a year, which he considered the price of industrial peace for a term of years. The national programme would have cost £273,518, and would have reduced the dividend on the ordinary stock quite $\frac{1}{2}$ per cent. He recommended sectional boards, with employees as secretaries and with an independent chairman. Appeal to be to a board of three; this board having the status of a High Court judge, their decision holding good for three years, at least, with five months' subsequent notice from either side. Strikes or lock-outs pending final decision to be punishable by fine or imprisonment. Questions of promotion or discipline should not be referred. His company objected to recognition, owing to the experience of the North Eastern and to the great number of unions. At Liverpool a programme presented by the men on July 14 was immediately and favourably dealt with. On July 31 an entirely new programme, with six days' notice, was submitted, which the directors could not entertain under the 1909 settlement.

In reply to Sir T. R. Ellis, Mr. MARRIOTT said the unions were at present above the law, and should be brought within it and picketing should be abolished.

Mr. HENDERSON: You don't think the conditions of service had anything to do with your men coming out on strike?—If they had, why did they not say so before coming out?—The witness did not agree that without the recognition of trade union officials the men and masters met on terms of inequality.

The Commission adjourned until Monday.

UNDERGROUND ELECTRIC RAILWAYS OF LONDON.

The Underground Electric Railways Company of London, Ltd., have issued the following comparative statement of receipts and expenses of the Associated Companies for August:—

Metropolitan District Railway.					
	Month of August.		Inc.	July 1 to Aug. 31.	
	1911.	1910.		1911.	1910.
Gross receipts.....	£52,422	£51,475 +	£947 ...	£112,269	£109,372 +
Working expenses.....	28,898	28,282 +	616 ...	57,243	56,282 +
Net receipts	£23,524	£23,193 +	£331 ...	£55,026	£53,090 +
London Electric Railway.					
	Month of August.		Inc.	July 1 to Aug. 31.	
	1911.	1910.		1911.	1910.
Gross receipts.....	£51,257	£51,190 +	£67 ...	£111,443	£110,163 +
Working expenses	31,695	30,498 +	1,197 ...	63,510	61,176 +
Net receipts	£19,562	£20,692 -	£1,130 ...	£47,933	£48,992 -
London United Tramways.					
	Month of August.		Inc.	July 1 to Aug. 31.	
	1911.	1910.	or Dec.	1910.	1909.
Gross receipts	£34,494	£33,996 +	£498 ...	£70,152	£65,003 +
Working expenses.....	18,818	20,942 -	2,124 ...	37,659	40,789 -
Net receipts	£15,676	£13,054 +	£2,622 ...	£32,493	£24,214 +

THE IRISH RAILWAY STRIKE.

On Friday, September 15, two men at the Kingsbridge Terminus of the Great Southern and Western Railway refused to handle timber belonging to Messrs. Henry Kelly and Co., some of whose workmen were on strike. On Saturday night the 400 goods porters and carmen at Kingsbridge, who had also struck work in sympathy with the two men, were followed by the passenger porters. On Sunday 200 men of the Midland Great Western left work and were subsequently joined by the goods staff of the Great Northern Railway. Later in the day the trouble spread and all the lines were affected except the Dublin and South Eastern Railway, the manager of which line did not insist on his men handling so-called "black-leg" goods. The other three managers told the men that the companies had no legal right to refuse any goods.

On Monday, September 18, the goods traffic over the whole of the three lines involved was paralysed, and only a restricted passenger service could be run with the help generally of the clerical staff and the apprentices. The night mail trains were suspended.

On Tuesday 36 men were landed in Dublin to take the place of the strikers, but on the way to their destination 27 of them fell out. It is reported that many of the men are willing to work, but that they are not satisfied with the amount of protection the Government are prepared to give to them. So far very few acts of actual violence or damage to property had been reported. The Executive Committee of the Amalgamated Society of Railway Servants arrived in Dublin, and threatened to call a general strike on Irish railways unless the companies "ceased from dismissing or penalising in any form men who refuse to handle the traffic of firms where the employees are on strike, and reinstate the men without penalty."

The situation remained very much the same on Wednesday, only, of course, the inconvenience and loss suffered by everyone becomes greater as time goes on. Mr. Mitchell, of the Board of Trade, arrived in Dublin and conferred with both parties. The railway companies showed no signs of yielding. The A.S.R.S. decided to keep its orders for a general strike of all workers in abeyance. The English railways do not book beyond the ports. The protection to men willing to work was not adequate enough yet, and assaults on them continued to be reported in isolated cases, although on the whole order had been fairly kept. Beyond the despatch of Sir George Askwith's, Lieutenant, Mr. Mitchell, the Government had taken no overt act to intervene in the dispute—except the proposal to form an industrial board under Sir George. The Great Northern maintained a partial goods traffic, and, together with the Midland Great Western, ran a full passenger service. The Dublin and South Eastern are likely to have their dearly-bought peace rudely disturbed, as the Timber Merchants' Association has instructed its law agent to compel the company to fulfil its legal obligations, and a timber merchant intends suing them for damages.

On Thursday Mr. Mitchell held consultations with the men, and it was stated that the Lord-Lieutenant was on his way from Aberdeenshire, so that more hopeful feelings were engendered. These were dashed at night by the Executive Committee of the A.S.R.S. declaring a general strike on the Irish railways. This, however, according to the secretary, was not to affect the British lines "at present." The strikers were being gradually replaced by other labour, while many works were being necessarily shut down. Services were very slowly improving, the defensive forces being more in evidence; but distress and misery was spreading and deepening in many places, and, consequently, acts of violence were becoming more frequent. The Dublin and South Eastern Company continued to refuse "black-leg" goods.

Mr. P. J. Brady, M.P. for St. Stephen's Green, addressing a Nationalist meeting at night, appealed to his constituents to consider their responsibility to the public; in holding up the necessities of life they made the whole of Ireland suffer.

On Friday, September 22, half the men at the Dublin station of the Great Northern came out, but outside Dublin the men on all the railways have declined to follow their example. Owing to the police protection to the London and North Western traffic, perishable goods have been moved more expeditiously, and four heavily-laden steamers left Dublin, while the passenger traffic continues to be worked with fairly satisfactory results. The strike extended to Belfast on Friday afternoon, 100 men of the goods department of the Great Northern Railway ceasing work.

Buenos Ayres Underground Railway.—A start was made on September 15 with the construction of the first underground railway at Buenos Ayres. The first completed line is to be ready in June, 1913.

MEETINGS AND REPORTS.

FORTHCOMING MEETINGS.

- Sept. 26 (Tues.).—**Ottoman Railway from Smyrna to Aidin** (Half-yearly), Winchester House, Old Broad Street, E.C., at 12.
- Sept. 27 (Wed.).—**Highland Railway** (Half-yearly), Inverness Station, at 1.
- Sept. 28 (Thurs.).—**Dick, Kerr and Co.** (Annual), Cannon Street Hotel, at 12.30.
- Sept. 29 (Fri.).—**Knott End Railway** (Half-yearly), 1, Walbrook, E.C., at 3.
- Sept. 29 (Fri.).—**Lanarkshire and Ayrshire Railway** (Half-yearly), 186, West George Street, Glasgow, at 2.30.
- Oct. 4 (Wed.).—**Canadian Pacific Railway** (Annual), Montreal.
- Oct. 20 (Thurs.).—**Grand Trunk Railway** (Half-yearly), City Terminus Hotel, Cannon Street, E.C., at 12.

(Reports, Traffic Returns, Prospectuses, and all other items of financial intelligence should be sent as early as possible to the Editor of THE RAILWAY TIMES, 12, Norfolk Street, London, W.C. Telephone, 2948 Gerrard. Telegraphic address, Altimetry, London.)

UNDERGROUND ELECTRIC RAILWAYS.

Sir Edgar Speyer, Bart., presided at the half-yearly ordinary meeting of shareholders of the Underground Electric Railways Company of London, Ltd., held on Tuesday last at Electric Railway House, Broadway, Westminster. The report and accounts were given in our issue for September 2.

The CHAIRMAN, in moving the adoption of the report, said:—"You have all read the report and accounts, and you will agree that they are satisfactory, both as regards what has been done and what we may infer from them may be done in the future. They show good progress, but I need hardly point out again that, although the results are better, the dividends paid on the share capital of the railway companies are not by any means a fair or adequate return on the large amounts invested in these enterprises."

A GREAT IMPROVEMENT ALL ROUND.

"As regards the accounts, the revenue account shows total receipts of £158,536, an increase of £10,921, or 7½ per cent., on the first half of 1910, and the net revenue, before allowing for income bond interest, is £39,497, a gain of £13,104, or 49 per cent. The income derived from investments was £105,975, or £15,678 more than in the first half of the previous year. This increase is chiefly due to the better earnings of the London Electric Railway Company. The revenue from holdings in the Metropolitan District Railway Company in the half-year under review was practically unchanged, but the outlook in that respect justifies the hope of some improvement in the current six months. The rents of properties rose from £1,462 to £2,679. In the first half-year of 1910, under the guarantee in respect of Metropolitan District assented first preference stock, the company had to provide on balance £1,343, but on this occasion the Underground receives on balance £2,686. Satisfaction with these results has already been expressed in the report before you, but I desire to emphasise this favourable feature and to point out that this company is now deriving, after having waited for many years, the full benefit of its guarantee of a 3½ per cent. dividend on about one-third of the Metropolitan district first preference stock. Our administration expenses show a decrease from £5,032 to £3,390. As in the case of the last half-year of 1910, we have again abstained from taking credit in our revenue account during the half-year under review for interest accrued on unpaid calls on shares of this company. The interest accrued to the end of the half-year, June 30, amounts to £22,000. As pointed out on a former occasion, the directors consider this a good debt, but that it is conservative to keep the balance in reserve for the present. I need not here refer to the working results of the several companies in which the Underground Company is interested, as the chairmen of these companies have fully explained the affairs of their undertakings, and it is not necessary for me to repeat any of their statements, as you have no doubt read them."

SALE OF THE POWER HOUSE.

"The most important event of the half-year from the shareholders' point of view has been the passing of the Metropolitan District Railway Act of 1911, which received the Royal Assent on June 2nd last. As a result of this Act, the arrangements for the sale of the power house to a joint committee of the London Electric and the Metropolitan District Railway Companies have been successfully concluded. The Lots Road power house

undertaking will be transferred to the Joint Committee, which consists of three members of the board of the District Railway Company and three members of the board of the London Electric Railway Company, and will be leased by the Joint Committee to the two companies for 999 years as from January 4, 1912. The consideration payable to the Underground Company is the proceeds of the sale of £2,200,000 joint power house rent charge stock. The money thus obtained will redeem the entire existing issue of £1,000,000 four per cent. power house debentures, and £1,088,700 four-and-a-half per cent. bonds of 1933, while the sum realised by the sale of London Electric Preference stock referred to in my last speech has already liquidated the £1,000,000 five per cent. prior lien bonds. You will see from this that the Underground Company within twelve months will have reduced its fixed charge debt by no less than £3,088,700. Moreover, when the transfer of the power house has taken place, the surplus of about £630,000 realised in excess of the book value of the power house undertaking will be applied in wiping out that amount of suspense items which now stand at about £1,000,000 on the assets side of the balance-sheet. I think I am justified in congratulating the shareholders on the successful results of these transactions."

"I referred in my last speech to the Westinghouse Award, and informed you that the Westinghouse Company would appeal against it, but we were advised that the Award was good. This appeal has not yet been heard, but we hope it will come on after the Long Vacation, so that when I have the honour of addressing you again at the next meeting this matter should be finally disposed of. The opinion then expressed by our legal advisers as to the validity of the Award is unchanged."

The motion was seconded by Lord George Hamilton, and was carried unanimously.

CALEDONIAN RAILWAY.

At Glasgow, on Tuesday last, Sir Charles Bine Renshaw presided at the half-yearly meeting of the shareholders of the Caledonian Railway Company.

In moving the adoption of the report and accounts (an analysis of which appeared in our last issue) he referred to the various items in detail, and remarked that there remained available for dividend, after meeting feu duties and interest and displacement charges, £701,833, an increase of £3,070 on the amount left for distribution last year. The preference stock absorbed £380,537, and the balance sufficed to pay a dividend on the undivided ordinary stock at the rate of 3¼ per cent. per annum, carrying forward £21,221. He knew quite well that those figures would not be wholly satisfactory to some shareholders, but he was confident that the directors had now succeeded in placing the accounts in a more satisfactory condition, and if good traffics obtained in the future their prospects were brighter than they had been for a considerable time. There would probably, however, be increases in the wages bill, and they were at present engaged in considering the salaries of the large staff of clerks in their employment.

THE RECOGNITION QUESTION.

At the time when the precipitous action of the Trade Union leaders in Liverpool led to a general strike of railwaymen, the company had no questions outstanding with those engaged in their employment. The unfortunate effects of those strike notices were felt less directly in Scotland, but their through traffic was still much disorganised in consequence. The strike in England had resulted in a commission of inquiry being appointed to investigate the working of the Conciliation Boards appointed in 1908. The inquiry involved the difficult question as to recognition of the union officials at the meetings between the companies and their own employees. Under the 1907 scheme the representative of the men in an arbitration case could be, and he thought in actual practice in every case had been, a representative of a trade union. It was now urged by the union that their representatives should be the recognised representatives of the employees at all meetings. The railway companies wished to meet directly with the men actually in their employment, and felt that in that way good working understanding and agreement could best be arrived at. Of the 600,000 railwaymen employed in the United Kingdom about 120,000 were stated to belong to trade unions. It was obvious that the companies must consider the interests of the non-union men as well as those belonging to unions, and that in some stage of the proceedings both were entitled to be heard. (Hear, hear.) The "recognition" of the union accorded by the North Eastern Company had no effect in averting from that system the 24-hours' strike notice, and indeed its traffic remained disorganised longer than that of any other company, while its receipts were more seriously affected.

RAILWAYS HANDICAPPED—TRADES DISPUTES BILL.

There was one great difference between railway work and work in an ordinary industrial occupation. The latter was carried on subject to the right of those employed to strike or of the masters to "lock out." A "lock-out" in railway employment, having regard to the statutory obligations under which railways worked, was an impossibility. Railway companies had to pay compensation for injury and for loss of life caused by any default on the part of the company and its servants, and were also liable under certain circumstances for damage to goods. It was essential that all questions of discipline and of management must rest with the companies, on whom the legal responsibility was placed. (Hear, hear.) At the Trade Unions Congress the president, referring to the strike, spoke of "the supreme folly" of the directors, and said "the suffering placed on the public generally by the high-handed action of the railway managers would not easily be forgotten." The public quite understood that the "suffering" resulted from the 24-hours' notice sprung upon the country by the leaders of the unions, in violation of the rules of the unions, and with no regard to the engagements under which the men were working. Such action would have been impossible if the wiser counsels of Lord Haldane and Sir John Lawson Walton, the late Attorney-General, had prevailed when the Trades Disputes Bill of 1906 was passing through Parliament.

NATIONAL INSURANCE BILL.

To railway shareholders the passage of the National Insurance Bill would mean a considerable and heavy direct charge, amounting in the case of this company to a sum estimated at £17,000 per annum in addition to the direct contribution of the employees. That charge would not be grudged if it could be so collected and its benefits distributed so as to ensure the minimum expense in collection and administration, and the money paid by the company and its employees and the State contribution could be administered solely for the benefit of the employees of the company; but that at present was not assured to them, and, in addition, the clause which provided for certain deficiencies in the funds being provided out of the local rates would, in view of the increased benefits which were being promised, probably involve a large addition to the constantly increasing burden of the local rates, nearly one-seventh of which were a charge upon the revenues of the railway companies of the Kingdom. A national insurance scheme ought to be a charge on national funds, and no part of it a charge on local funds.

A HINT TO THE GOVERNMENT.

Without the creation of any new charges rates were constantly increasing. Twenty years ago they paid £79,666 to local rates, ten years ago £105,423, and last year £138,230. The average cost of their coal for the four years ending July, 1891, was 5s. 2½d., and for the last four years 8s. 8d.—an increased charge per annum of about £120,000. Assurances were given in the August negotiations by the Government that they would propose to Parliament next session "legislation providing that an increase on the cost of labour due to the improvement of conditions for the staff would be a valid justification for a reasonable general increase of charges within legal maxima, if challenged under the Act of 1894"; but it was not only the improved conditions which had been and might be made for their own staff that had to be taken account of, it was the general increase in charges which were consequent on the changed conditions under which railway work was carried on to-day, as compared even with 1894. In conclusion, Sir Charles mentioned that the judgment in the demurrage case was finally given on June 26. The demurrage accounts were now being made up in accordance with the terms of the judgment, and were being issued to the various traders.

Mr. Cox seconded the motion.

SHAREHOLDERS' CRITICISM.

Mr. G. WINGATE complained of the deferred shareholders' treatment. What the holders of deferred stock asked was that the terms on which that stock was held should be recognised by the company. So as to apportion fairly the dividends due on the various classes of stock, the dividends on which were contingent on the profits of each separate half-year, it was necessary that the amount set aside half-year by half-year for renewals and upkeep should appear of a uniform character. There was a general opinion amongst the traders that the demurrage was likely to fizzle out.

Mr. HUGH MAYBERRY said that he had made up his mind that the better way to deal with the accounts was to give notice of the following motion:—

That the shareholders view with much regret the rapidly decreasing shares of the company, and while realising that at least three and a half millions sterling had been irreparably lost through the construction of unproductive lines and other causes, resolve as a first step to appoint

a committee of six shareholders to investigate the accounts of the various departments and with power to employ professional assistance if necessary, with a view to reducing the annual expenditure of management and the introduction of all possible economies."

The Rev. W. MUIR asked the directors to meet a deputation of the shareholders who wished a change of policy regarding Sunday traffic.

The CHAIRMAN, replying, pointed out that under the original Acts by which the payments of dividends were regulated, the stock having been split by the Act of 1890 into preferred and deferred, the course the directors had pursued had been perfectly plain and clear. He knew that it was a question with many of the shareholders as to the dividend which they received in respect of the deferred stock, and he should like to point out to them the very curious position in which the two stocks stood. Taking the price of the deferred stock at a little below £20 and the price as it was the other day of the preferred stock, if anybody would take the trouble to calculate it they would find that the deferred stock yielded, at the rate of dividend which was declared, £1 17s. 6d. per cent. On the other hand, the preferred stock yielded something like £4 17s. 6d. per cent. He suggested to those who were looking more on dividends than to the speculative value of the shares themselves that there were methods open to them by which they could avail themselves of the larger dividends to be earned by the purchase of the preferred stock as against the holding of the deferred. ("Oh!") On the subject of demurrage he did not think it would be in the interests of the shareholders to insist on their full pound of flesh in regard to the past, and they must trust the directors to arrive at a satisfactory settlement. He assured Mr. Wingate that the Cathcart Railway Company was in a much more satisfactory position than it was a few years ago, and it was earning an appreciable income.

The report having been adopted, and the retiring directors re-elected, at a "Wharncliffe" meeting the shareholders agreed to the terms of a provisional order to be promoted by the Glasgow and South Western Railway in Ayrshire.

GLASGOW AND SOUTH WESTERN RAILWAY.

The half-yearly meeting was held at Glasgow on Tuesday, Mr. P. T. Caird in the chair. An analysis of the report and accounts was published in our last issue.

The CHAIRMAN said he was pleased the company had been free from the disturbing influences which had been the means of creating so much disquietude and want of confidence for some time past, and that they had, therefore, been able to take advantage of improved conditions of trade throughout the country in such a manner as to warrant them in entertaining the hope that the results as set forth in the report might be considered as not unsatisfactory. The strike which took place in England last month induced the Government to appoint a Commission to investigate the working of the Railway Conciliation and Arbitration scheme. It was to be hoped that the Commissioners might succeed in arriving at a satisfactory recommendation. He was glad to say that the friendly relations which had so long existed between the company and its employees continued and that the loyalty and zeal the staff had shown during this time of anxiety entitled them to an expression of appreciation from the directors and shareholders alike.

BURDENS OF THE INSURANCE BILL.

The legislature again threatened them with heavier taxation, this time in the form of an Insurance and Unemployment Bill, which, if it passed—and it was sincerely to be hoped it would not pass in its present form—(applause)—would, as far as the insurance part was concerned, involve the company in an expenditure of something approaching a quarter per cent. on the half-year, which would fall to be borne by the ordinary shareholders. The tax would be equal to the present income-tax, and as that was on the level of a war-tax, the position could not be regarded otherwise than as a serious one. It was proposed to impose this fresh taxation irrespective of whether the incidence was equally distributed or not. As to the Unemployment section of the proposed Act, it was unreasonable that a business such as that of a railway company, where little or no fluctuation in the amount of labour occurred, and which, therefore, did not contribute towards the necessity for its enactments, should be subjected to such taxation. The provisions of the Bill, in their view, were wrong in principle, and would, beyond all doubt, have the effect in many cases of increasing rather than reducing unemployment. The tax should be placed on the ordinary basis of taxation. It should be general in its application, for it was unreasonable that those whom it was proposed were to be made liable to its exactions could in any

way be held responsible for the recurrence of those periods of depression which they all deplored. (Applause.)

A REDUCTION IN DEMURRAGE.

Speaking on the question of demurrage, the CHAIRMAN said that claims were being adjusted in terms of the findings of the Railway and Canal Commissioners, and these would shortly be presented. It would be satisfactory to those who incurred demurrage charges to know that the additional time allowed before and after conveyance by the Commissioners would sensibly reduce the amounts formerly claimed by the company. Adverting to the accounts, the chairman stated that the gross revenue was £743,001, and the gross expenditure £531,302, leaving a balance to be carried to net revenue account of £211,699. The increase in the traffic receipts amounted in the aggregate to £31,241. He moved the adoption of the report and the payment of a dividend at the rate of 4½ per cent. per annum on the ordinary stock of the company, being at the rate of 2½ per cent. per annum, to the holders of preferred ordinary stock, and 2½ per cent. per annum to the holders of deferred ordinary stock, carrying forward £10,027.

Sir JAMES BELL seconded.

THE GOVERNMENT'S PROMISE.

Mr. A. MACDONALD, chairman of the Shareholders' Association, said this opportunity should be taken of referring to the extraordinary position in which they were likely to be placed by the increased wages they might have to pay and the increased taxation that might result from the Insurance Bill. When the Shareholders' Association was started it was with the earnest desire to benefit the shareholders by co-operation between the various railway companies, but he also had in view that the men's wages might be advanced. He was glad there was no trouble between the company and their men. The Government had given a promise that they would allow the railway companies to increase rates. While increased fares and increased rates might bring in more revenue to their company, he was afraid it would almost have the opposite effect. It might reduce the goods traffic, he was sure it would reduce the passenger traffic, but they must get more money, and his candid impression was that the best way was to count the railways as roads—which they were in reality—and to relieve them of taxation. (Applause.) He was amazed to find that the local taxation paid by the railways throughout the kingdom amounted to £5,700,000. The municipal taxes in Glasgow, which were more moderate than in some other places, amounted to £47,000, while the taxes in respect of school board and parish council brought up the total to £70,000. The best way to get over the difficulty of paying increased wages, and of relieving them of burdens imposed by the Government, would be to free them from local rates.

The CHAIRMAN observed that the question raised by Mr. Macdonald would be considered when they knew the result of the Commission at present sitting.

The motion was agreed to.

NORTH BRITISH RAILWAY.

Lord DALKEITH, presiding on Thursday at the half-yearly general meeting, held at Edinburgh, in moving the adoption of the report and accounts (which appeared in our issue of last week) announced that the shareholders numbered 35,000 and the debenture holders 10,000. On capital account during the half year the expenditure was £158,326, against the estimate of £245,225, this being due to the number of works not having progressed so rapidly as was anticipated. The operations for the half year had resulted in an increased traffic receipt of £19,000. On the expenditure side of the revenue account there was an increase of about £12,000. Traffic expenses as a whole were practically the same as in the corresponding period. There was an increase in salaries and wages of £5,600. The total working expenses represented 53.66 per cent. of the traffic receipts, as against 53.52 per cent. twelve months ago. The result was that the amount credited to revenue account was better to the extent of £13,720 than a year ago, and to this fell to be added the increased balance of £4,556 brought forward from the previous half-year, or together £18,276. The net balance available for dividend was fully £15,500 better than twelve months ago, and admitted of the payment of a dividend of 3 per cent. on the deferred ordinary shares, compared with ½ per cent. in the corresponding period, while the balance carried forward was slightly improved. With regard to the demurrage question the accounts were being adjusted, and they hoped soon to press for payment. Adverting to remarks made at the last meeting by Mr. Wingate, that the directors, in making up the

accounts, did so with the object of protecting the holders of preferred stock at the expense of the deferred holders, the CHAIRMAN said the directors did not do more than in his opinion was really necessary to meet the liabilities of each half-year.

THE OUTLOOK.

Alluding to the National Insurance Bill the CHAIRMAN observed that if it passed in anything like the form in which it was presented before the Legislature, the additional burden to their company could not, so far as the invalidity section of the Bill was concerned, be put at less than something like £10,000 per annum, while the amount involved in the case of the unemployment section would be considerable. Mr. Deuchars, superintendent of the line, retired on October 1, after serving the company for fifty years, during eighteen of which he had been superintendent. They were well aware how hard and faithfully he had worked in their interests, and he was sure they would join with him in thanking him for his valuable services both to the company and to the public. (Applause.) With the exception of the strike of surfacemen, which commenced in June, the general railway strike did not very materially affect the company. It was much to be regretted that machinery set up by the Board of Trade for the purpose of dealing with such matters, and which resulted in laying upon railway companies large additional burdens in respect of wages and otherwise, should thus be lightly set aside by any section of the staff when, as was admitted in the case in question, there was absolutely no ground of complaint as to the way in which the company were fulfilling their part of the arrangement. If, in addition to the extra expenditure that would be caused by the Railway Accounts Bill and the National Insurance Bill, the shareholders were to be called upon to largely increase the wages of their employees, the prospects of the ordinary shareholders, both deferred and preferred, would not be bright; and if the directors were unable to maintain the dividend of 3 per cent. per annum on the ordinary stock for even one year, the whole of the preference and debenture stocks would cease to be English trustee stocks, and their value would consequently be reduced. It did not seem to be recognised that railway shareholders received only a low rate of interest on their money, nor that it was largely owing to their enterprise that industries and manufactures had been developed. It was time that all railway shareholders took action to protect their interests. Alluding to the Railway Commission, his lordship asserted that the one real desire of the union officials was to obtain from the present Commission something which would force the non-union railwaymen, or, at all events, lead a large number of the non-union railwaymen, into the railway unions. At present less than one-third were members of unions, but with another one-third added, the unions, if necessary, would declare a national strike in order to make the remainder join, or the companies to dismiss them if they refused to. It seemed astonishing that neither the trade of the country nor any national interests were being represented before the Royal Commission; and there was an even more important aspect of the case if there was a total paralysis of the railway service at a time of strained international relations. The unions were demanding "recognition" in the belief that it would lead to increased membership. He could not conceive that any thoughtful man could be in favour of anything being done which would enable the railway trade unions or their officials to become a menace to the trade of the country, the conveyance of food supplies, and even possibly, in certain circumstances, the security of our national existence.

Mr. McDONALD remarked that railway shareholders were promised by the Government reconsideration of the rates attached to the railways. More benefit would accrue and less friction would be caused if, instead of the rates being increased, the burdens both by the Government and the local authorities were lessened. Instead of increasing the rates the best course would be to exempt the railways altogether from taxation by local authorities.

Replying to questions, the CHAIRMAN stated, with regard to the purchase of locomotives, that it was the endeavour of the directors to get them as cheaply as possible, but in the past they had always purchased their locomotives in Scotland whenever that was possible. The dock at Methil would probably be finished in about a year's time. The increased expenditure was almost entirely due to the wages item. If the shareholders or the public thought that by allowing certain increases in rates and fares they could to an unlimited extent increase the wages of the staff they were mistaken. An increase of rates and fares might not always be to the advantage of the company, owing to competition in various directions.

The report was adopted.

DICK, KERR AND COMPANY, LIMITED.

Notwithstanding the continued competition in all branches of the business during the past year, the accounts of Dick, Kerr and Co. for the year ended June 30 last show marked improvement in comparison with the two preceding years. The report states that the profits earned amount to £37,994. Out of this has had to be paid debenture interest and trustees' fees, and there has been reserved the sum required to provide for the premium payable on the redemption of the present debenture stock. These items absorb £12,060, leaving a balance of £25,934, to which must be added the profits brought forward from last year—viz., £42,358, making a total of £68,192 available for appropriation as follows:—Dividend of 6 per cent. per annum on preference shares, £18,300 (the proportion of this dividend to December 31, 1910, has already been paid; dividend of 5 per cent. on ordinary shares of £260,000 (to be paid less income-tax), £13,000; balance to be carried forward, £36,892.

United Electric Car Company.—At the annual meeting of the United Electric Car Company, at Preston on September 20, Mr. George Richardson (who presided) stated that the net profits for the year were £4,420, which the directors considered satisfactory in the face of the stagnation in car building. They had had a very fair share of the limited business given out, but the prices had been cut very fine. Prospects were better than for some years past, the order book being in a satisfactory condition. Alluding to the loss which they had sustained in the disposal of the Hadley and Trafford Park works, he stated that they had sold on the best possible terms. The loss of £46,171 would be met by writing £10,000 off the general reserve and £36,171 off the depreciation reserve. The report was adopted, and the dividends on the 6 per cent. preference shares were sanctioned, £2,482 being carried forward. Messrs. R. H. Prestwich and R. B. Barningham were re-elected directors.

PERSONAL.

Mr. G. R. Askwith, the "Peacemaker," was knighted by the King at Balmoral on Saturday last. Sir G. R. Askwith is now a K.C.B. in the Civil Division. Among the posts he has held is that of assistant secretary of the Railway Department of the Board of Trade.

Lord Kitchener has resigned his membership of the joint managing committee, South Eastern and Chatham Railway, on his appointment as British Agent and Consul-General in Egypt, and, it is said, will also leave the board of directors of the same railway, to which he was so lately elected.

Mr. Robert Miller, who has been managing director of the Bengal and Nagpur Railway Company since its formation in 1887, has intimated his intention to resign. Mr. John Manson, at present the agent of the company in India, is to succeed Mr. Miller, and to be succeeded as agent in India by Mr. G. C. Godfrey. Mr. Miller retains his seat on the board as director.

Mr. John W. Hatter, after 45 years' railway service, has just retired from the post of station master at the Great Central Station in Manchester. He began as a lad porter on the South Yorkshire and River Don Railway Company, and well remembers the gradual improvements that have taken place since then. Among his reminiscences is that of the signal lamps being lighted by candles, 18 inches long in spring sockets like carriage lamps, which had to burn for two or three days without being changed.

RAILWAY PROGRESS IN NEW SOUTH WALES.

The Chief Commissioner of Railways has presented to the Government of New South Wales his report on the working of the railways and tramways for the year ended June 30 last, showing a surplus after meeting all charges as follows: Railways, £553,998; tramways, £47,627; total, £601,625. The principal figures for the railways are as subjoined:—Revenue £6,042,205 (increase £556,490); expenditure £3,691,061 (£414,852); passengers carried 60,910,628 (7,275,357); tonnage 10,355,505 (1,062,527); miles open for traffic 3,790 $\frac{3}{4}$ (117 $\frac{3}{4}$). There is considerable activity in the construction of new railways: 293 $\frac{1}{2}$ miles are under construction, and an additional 243 miles are authorised. The work in connection with the duplication of the main lines is also progressing.

OBITUARY.

We regret to announce the death of Lady Claud Hamilton, wife of Lord Claud Hamilton, following a long illness, at Queenstury House, Richmond. The funeral will take place at 11.30 on Monday next at the Parish Church, Richmond, Surrey.

GENERAL NEWS.**BOARD OF TRADE REPORTS ON COLLISIONS.****TWO ILLUSTRATIONS OF THE NEED FOR AUTOMATIC SIGNAL RECORDERS.**

Colonel H. A. Yorke's report on a collision at Crewe on July 28 was issued this week by the Board of Trade. As the 1.45 p.m. passenger train from Bangor to Birmingham was approaching Crewe, it ran into the rear of the 12.30 empty coaching stock train from Llandudno to London. Thirty-two passengers complained of injuries, such as cuts and bruises. The engine of the passenger train was a good deal damaged in front, and six vehicles had buffer castings broken and windows smashed. All the vehicles of the empty train were also damaged, the rear vehicle of all having its end compartments carried away, bogie damaged, and body partially burnt. Col. Yorke states that the collision was due to a mistake in block working which occurred between Steel Works and North Junction signal-boxes, but the evidence is very conflicting, and it is impossible to say with certainty how the mistake arose. He observes that if the block instruments in this instance had been fitted with some form of automatic recording apparatus (as advocated by him on recent occasions), whereby all block signals would be shown in their proper sequence as sent, the doubt as to which of the two men was responsible for this accident would have been removed. The last carriage of the empty stock train was set on fire. This was caused by the engine of the second train, which was driven into the rear half of the last vehicle of the empty train in such a way that the roof of the carriage was suspended over the engine chimney, the heat from which very soon caused the roof to ignite. The carriage was gas-lighted, but the train being an empty one, there was very little gas in the gas cylinder, which was quite undamaged. There was no sign whatever of any burning in the neighbourhood of the gas cylinder, and it is certain, the report states, that the fire was in no way due to gas.

GREAT WESTERN EXPRESS TURNED INTO A BAY.

A second report issued this week deals with the inquiry held by Colonel Yorke into the accident that occurred at about 12.7 a.m. on the morning of Sunday, June 25, at Henley-in-Arden, on the Great Western Railway. As the 11 p.m. down excursion from Wolverhampton to Bristol was running through Henley-in-Arden, at about 40 miles an hour, it was, owing to a mistake of the signalman, turned into the bay at the back of the up platform, and came into collision with the buffer stops, with the result that the latter were demolished and the engine and tender were overturned on the up main line. Eleven passengers were injured, but in most cases the injuries were not of a serious nature. The driver and fireman were thrown off the engine and badly scalded, and they were unable to give their evidence until July 28 in the General Hospital at Birmingham.

The total length of the train was 297 feet 6 inches, and its weight (exclusive of the engine) was 118 tons 6 cwt. 2 qrs. The train was fitted throughout with the continuous brake, which was in proper order, having been tested at Wolverhampton. The engine and tender were thrown on to their left sides and were badly damaged; the bogie of the engine was torn off and jammed between the tender and the trailing end of the engine, the axles of the bogie being much bent. The front vehicle of the train was completely derailed and leaning over towards the left; the frame and body were badly damaged, the leading end being wrecked, and most of the windows broken. The second vehicle was derailed as to the leading pair of wheels, and both ends were smashed and the windows broken. The third vehicle had two pairs of wheels off the road, buffers damaged, and windows broken. The remaining vehicles of the train had several windows broken. The train was lightly loaded, there being only 33 passengers in it altogether, of whom 22 were travelling in the second carriage from the engine. Fortunately the leading vehicle was empty. The damage to permanent way was not great, but the stop block and up home signal were demolished and four rails badly bent.

In the course of his conclusions, Col. Yorke says:—"From the evidence it is clear that this accident was due to the fact that the signalman at Henley-in-Arden thought that the express excursion train was a rail motor-car, and, acting on that belief, set the points and lowered the signal for it to run into the bay. But how he came to make this mistake is not so apparent. The excursion train left Birmingham at 11.37 p.m., being seven minutes late; but when it passed Tyseley it was only five minutes late, from which it would appear to have been running fast and making up time. It was due to pass Henley-in-Arden at

12 midnight, and it reached that place according to the entry in the train register book (where it is wrongly entered as the rail motor-car) at 12.3 a.m. But this time is evidently incorrect, as the train passed Danzey at 12.2, and cannot have covered the three miles between that place and Henley-in-Arden in the space of one minute. The correct time would be about 12.7. The signalmen were Cooper (Danzey box) and Carter (Henley-in-Arden). 'Both men,' the report states, 'were thoroughly acquainted with their duties, and both appear to be equally confident that the entries in their respective train books were correct.' Cooper asserts that he never sent any block signals at all to Henley-in-Arden in regard to the motor train (until after the accident), while Carter unhesitatingly declares that he received the block signals for the motor train and none for the express. Another point which should be noted is that the register book at Bearley, which is the signal-box next to Henley-in-Arden towards the south, shows that the 'obstruction danger signal' was not sent by Carter till 12.12, whereas according to Carter it was sent at 12.4. Carter admits that his entry in regard to this is incorrect, but says that he made it from memory some time after the accident happened. There are other discrepancies between the entries in the book at Henley and Bearley, and, putting all the facts together, I am forced to regard the entries in Carter's book as quite unreliable. An up excursion train passed Henley-in-Arden at 12.2, and the 'train entering section' for it is shown as having been sent to Danzey at that time, but according to the book at Danzey this signal was not received until 12.4, and the train passed Danzey at 12.8. So long as the signals at Henley were 'off' for this up train it was not possible for Carter to set the road and lower the signal for the bay—the interlocking prevented this. After the up train had passed, and the signals had been replaced at danger, Carter says he saw what he took to be the motor train at his down home signal. He thought it was the motor because he saw a single white light, which is the head light carried by motor trains. He therefore at once pulled over the points and lowered the signal for the bay line, which he was able to do as the up train had passed. Porter Roberts, who was in the signal-box waiting the arrival of the motor, left at this moment, and as he did so he saw two white lights on the approaching train, and knew at once that it was not the motor train, but the down excursion. He immediately shouted to Carter, and both men say that they tried to attract the attention of the driver. But the latter had already discovered the mistake that had been made and was doing his best to reduce the speed of the train. In justice to Carter it must be stated that he is corroborated by porter Roberts in what he says about the motor train having been signalled to him from Danzey.

Carter admits having done a most improper and dangerous thing—viz., pulling over the facing points so as to set the road for the bay line in the face of an approaching train. If he had not done this, but had left the points in their normal position, namely, for the down main line, no harm would have resulted. He could then have either lowered the home signal for the train to run to the down main platform, or, keeping the signals at danger, he could have stopped the train, and subsequently disposed of it in the bay. His excuse is that he thought the motor train was standing at his home signal, but this I am unable to accept. My belief is that, owing to Roberts' presence in the signal-box, or for some other reason, Carter was not giving proper attention to his work. This is proved by the inaccuracies in Carter's train register book, and by his statement that he only saw one head light on the approaching train, when, as a matter of fact, it was carrying two lights. I am therefore disposed to accept the statement of signalman Cooper at Danzey, that he sent the proper bell signal for the express, in preference to Carter's statement that the signal he received was for the motor train. However this may be, Carter had got it into his head that the approaching train was the motor train. But even so he was entirely in the wrong in opening the points of the bay line in the face of it, and it is to this action on his part more than to anything else that the accident must be attributed. For these reasons the principal responsibility for the collision must, in my opinion, rest upon signalman Carter. He had been on duty about five hours and thirty-seven minutes at the time of the occurrence.

Driver Davies' statement is that on approaching Henley-in-Arden he found the down distant signal off. Subsequently he saw a green light on the home signal post which he took to be the down home signal. As he got closer to the signal he saw a red light as well as a green light on the home signal post, and then realised that the green light was the signal for the bay line and the red light for the down main. He had already shut off steam owing to the gradient, and as soon as he realised that his train was being turned into the

bay line, he immediately applied the brake with full force and opened the sand valves. He says that he was travelling about 52 miles an hour and had reduced the speed to about 40 miles an hour by the time he reached the facing points and entered the curve leading to the bay line. He adds that he closed the sand valves and released the brake slightly before entering the curve, with the idea that by giving the engine every possible freedom while taking the curve there would be less chance of the engine being derailed. He adds that the lurch of the engine threw him off his balance, and as he had his hand on the brake handle, this caused him to release the brake to a greater degree and for a longer time than he intended. As soon as he regained his balance he re-applied the brake with full force, but was unable to stop the train.

According to fireman Brown's statement the home signal was seen shortly after the engine had passed the overbridge, which is 547 yards from the signal, whereupon driver Davies at once remarked, 'My God; they have reversed the home signal and turned us into the bay.' This story rather points to the correctness of the suggestion made above, namely, that Carter had left all the signals 'off' after the passage of the previous goods train, and only put them to danger, and reversed the points and lowered the signal for the bay line, at the last moment, when he saw what he took to be the motor train close to his home signal. If this suggestion is correct, it follows that driver Davies was completely misled; that the distant signal was 'off,' and that the home signal which he first saw was that for the down main line; and that at the last moment Carter put these signals to danger, reversed the points, and exhibited the signal for the bay line.

It is impossible for me to decide as to which of the two statements is correct, although Davies declares with so much confidence and energy that the distant signal was 'off' when he passed it, that I find it difficult to disbelieve him. But Davies admits that before passing the home signal he realised that it was for the bay line, and he gives a rather elaborate explanation as to how it happened that his engine was still travelling at a considerable speed when it reached the stop. I find it hard to believe that in the face of imminent danger his mind would be calm enough to consider the arguments in favour of releasing the brake for fear of derailment when passing round the curve. What a man would do under such conditions would probably be to jam on the brake with full force and reverse his engine. The signal is 116 yards from the facing points and 485 yards from the buffer stop, and if, as stated, the speed was only 40 miles an hour at the facing points, it should have been possible if the brakes were in proper condition to have stopped, or nearly stopped, the train before it reached the buffer stop.

It may be, therefore, that there is some truth in Davies' explanation that he was thrown off his balance by the lurch of the engine, and, having his hand at the moment on the brake handle, unwittingly released the brake at the wrong moment. As to whether the brakes were applied before the train passed the signal-box, there is a difference of opinion between signalman Carter and porter Roberts. The former says that as the train passed the box it appeared that steam was on and the brakes off, whereas Roberts says that steam was shut off and the brake blocks grinding against the wheels. The whole case is full of contradictions, and the engine-men, owing to their injuries, were hardly in a condition to be closely examined, so that I am unable to express a definite opinion as to whether any blame rests upon driver Davies for inattention, or for lack of promptitude in taking steps to stop his train when he realised it was being turned into the bay line.

I have on other occasions pointed out the advantage to be gained if some form of automatic recording device were attached to the block signal instruments. An apparatus of this description would abolish all such discrepancies between the signalmen's statements as exist in the present instance. It would be a check upon the signalmen's actions, fix responsibility, render certain the detection of irregularities, and indirectly have a considerable effect in the promotion of safety in working. Such a device need not be of a costly nature, all that is needed being that every time the bell key or plunger of the block instrument is used, a mark should be made by a pointer or pencil upon a tape, so as to afford a complete record of the signals sent. This alone would be of considerable value. It would, of course, be better, though not essential, for the times at which the signals are despatched to be also recorded. Roberts had no right to remain in the signal-box for an hour after handing over the cash to the custody of the signalman, and I cannot help thinking that his presence tended to divert Carter's attention from his duties, and to this extent was a contributing cause of the accident."

BRIGHTON RAILWAY'S SEVENTIETH ANNIVERSARY.

On Monday, September 20, 1841, as duly chronicled in these pages, the directors of the London and Brighton Railway Company ran a trial trip over their main line from London Bridge to Brighton and back, it having been passed for traffic on the previous Saturday by Sir Frederick Smith, the Inspector-General of Railways. The next day the public service began. The lengths of line previously opened were London to West Croydon, June 5, 1839; Brighton to Shoreham, May 12, 1840; the Norwood Junction with the Croydon line to Haywards Heath, July 12, 1841. The London and Croydon subsequently tried Brunel's atmospheric system for a year in 1845, and the next year the two companies amalgamated and adopted their present title: The London, Brighton and South Coast Railway Company.

In our issue of September 18, 1841, the following particulars are given of the line to Haywards Heath. Miles opened 37½, number of shares 36,000, amount of share £50, all paid up, quoted at 45½ to 46, giving a total capital of £1,800,000. The opening through to Brighton did not appear to affect the shares very favourably, for two days after they were quoted at 43½. The equivalent figures at the present time, as given by us, are: miles opened 487; the capital received, according to the last half-yearly account, amounted to £21,725,775, and the shares stand as follows: Ordinary, 100; deferred, 92.

The system now covers a triangle with its apex in London and its base extending from the Isle of Wight on the west to St. Leonards and Hastings on the east, with branches to Epsom Downs, Hayling Island, Bognor, The Devil's Dyke, Seaford, Eastbourne, Tunbridge Wells, etc. The gradual growth of the undertaking during the last 70 years has been faithfully reported in these columns, and the expansion of the system in every direction, commercially and technically, is a fine record of British successful enterprise.

To revert to the opening ceremony, the directors' train, on the 20th, had consisted of three first-class carriages only; but when they came down again the next day to attend a banquet at Brighton they arrived in fine style in a train drawn by two engines and consisting of 13 carriages, three of them devoted to the directors and their friends and the remainder to first and second-class passengers. The whole town was *en fête* with flags flying, bells ringing, and bands playing. In the evening 200 guests sat down to enjoy the townsmen's hospitality. The health of the directors was drunk "with four times four and one cheer more." The chairman of the company, Mr. John Harman, in responding, said that the directors considered the traffic likely to come to the town a very superior traffic; they looked at Brighton as one of the first watering places in the kingdom, they looked at it as inviting the highest families in the land to come to it at certain periods of the year. They had, therefore, arranged to run trains of first-class carriages only.

In the first time table published six down and five up trains were scheduled, of which four were first-class and two were expresses, the remainder being mixed first and second class, stopping at every station, the times taken on the runs being 2 hours, 1½ and 2½ hours respectively; the fares ranged between 14s. 6d. first-class, 9s. 6d. second, and 6s. 6d. for children with the latter passengers. Some curious notes may here be added. Several tunnels on the line were lighted by gas, which it was also proposed to instal on the first 1½ miles out of Brighton. During the construction of the line an accident happened in one of the tunnels by the funnel of a locomotive striking a centering and bringing down a lot of earth on to a gang of men, three of whom died of "suffocation." The jury brought in a verdict of "Accidental death with a deodand of 1s. on the chimney of the engine." These deodands, or "gifts to God" from the community, were abolished in 1846.

GRAND TRUNK STATION AT WINNIPEG.

The new Grand Trunk Pacific station at Winnipeg, which was recently opened, is known as the Union Station, and is one of the finest as well as the most modern depôts on the American continent. The building has a frontage on Main-street of 352ft. and a depth of 140ft., and covers a ground area of approximately 50,000 square feet. It comprises basement and four storeys surmounted by a dome 90ft. in diameter and 100ft. above street level. The new depôt forms a part of an extensive project involving a system of trackage and railway buildings which will provide one of the best-equipped terminals in the world.

RAILWAY NOTES.

A West Riding Widening.—Messrs. Robert McAlpine and Sons, Glasgow and Westminster, have been awarded the contract for widening the line from Nostell Station to Hemsworth by the directors of the Great Northern and Great Central Railways West Riding Railway Joint Committee.

An Isle of Wight Complaint.—Ventnor District Council have instructed their clerk to communicate with the London and South Western Railway, the London, Brighton and South Coast Railway, and the Isle of Wight Railway asking if they could not make such arrangements as would prevent annoying delays and so ensure passengers and mails arriving at the proper time.

Grosvenor Road Station Closed.—The Grosvenor Road Station, on the South Eastern and Chatham, has now been closed. The same station on the London, Brighton and South Coast was closed as soon as the barriers came into operation at Victoria Station, for the halt on the Grosvenor Bridge had only been made in order to collect tickets, the number of passengers who used the station having gradually diminished. This makes the tenth railway station that has been closed to passengers in the Metropolis for the same reason.

Increased Winter Services on the Caledonian Railway.—In continuance of the policy of long-distance residential trains inaugurated at the commencement of the summer season, the Caledonian Railway Company intimates a number of important additions to the winter service commencing on October 1, special consideration being given to week-end travelling, which has greatly increased within the last few years. The additional facilities will include the continuance of the week-end "Tinto" express between Glasgow and Edinburgh and Peebles, Moffat and other popular inland resorts; 5.25 p.m. in October from Glasgow to Gourock; late connection to Wemyss Bay off the 8.30 p.m. from Glasgow throughout the winter; 8.10 and 10.15 a.m. from Glasgow and 8.20 a.m. express from Ardrossan; continuance of the improved Cathcart Cifele service with the addition of a ten-minutes' service between 10 and 11 p.m. for suburban residents attending entertainments; continuance of the improved Glasgow, Busby, East Kilbride, and Strathaven trains, and the Saturday service on the Central Low Level line; new connection to Dumfries, Portpatrick and Kirkcudbright out of the 4.30 p.m. express from Glasgow (Central) and 4.15 from Edinburgh (Princes Street); on the Northern sections a number of the new summer trains to be retained, and the 7.40 p.m. "Grampian" corridor express, from Perth, to run into the Central station instead of to Buchanan Street; 7.15 p.m., except Saturday, train Perth to Crieff to continue throughout the winter, leaving Perth on Saturdays at 8.35 p.m. for Auchterarder, thus enabling passengers to reach Perth in good time to join the 10.5 p.m. London express; the 4.28 p.m. Stirling to Perth to be resumed for the winter; and great improvements in the Dundee, Perth, and Crieff service.

The West Country Riviera

For Autumn Holidays.

Sidmouth, from Peak Hill.

For a delightful holiday at this time of the year the West Country Riviera, extending from the border of Dorset along South-East Devon to Exmouth, is unrivalled. The lovely "garden coast," with the picturesque red cliffs, is extremely beautiful just now when autumn tints impart the wonderful colour schemes which make its scenery famous. Here and there mid hill and dale are ideal sheltered retreats, the better known being Lyme Regis, Seaton and Sidmouth, the latter, according to Ruskin, "being unequalled for transporting landscape and coast scenery." Budleigh Salterton is noted as possessing what is said to be the finest seaside golf course on the South Coast.

Illustrated Guides to these and other holiday resorts in Devon, Cornwall and the Sunny South, together with all information as to Cheap Tickets, Trains, etc., free, upon application to Mr. HENRY HOLMES, Supt. of the line, Waterloo Station, S.E.

CHARLES J. OWENS, General Manager.

A Convincing Reason

why the typewriter purchaser should select the

"REMINGTON"

has always been furnished by the unique Remington strength and reliability.

Eighteen additional reasons are furnished by the eighteen original improvements found in the latest Remington Models (Nos. 10 and 11.)

Let us send you descriptive booklet.

REMINGTON TYPEWRITER COMPANY,

100, Gracechurch Street, LONDON, E.C.

Telephone No. Avenue 5555 (4 lines).

The British Standard Brake Block

NOW UNIVERSALLY ADOPTED BY THE LEADING RAILWAY COMPANIES.

WHY?

Because we cut down your present cost 40 to 60.

THEREFORE

Shift the responsibility on to us.

Our Brake Shoes last $2\frac{1}{2}$ times the life of the ordinary cast iron Block, with equal braking effect, and slightly less wear on the wheel tyres.

By our new design and blending of metals the Shoe can be completely worn out without danger.

One Shoe only, interchangeable and reversible for all classes of Carriages, Wagons, Vans, etc.

Don't theorise: get the facts from the list of Railways we now supply.

Our Representatives, with suitable samples for trial, are at your command.

The National Rail & Tramway Appliances Co. Ltd.,

East Indian Railway Company.

NOTICE is hereby given that the Registers of Holders of this Company's 3 per cent. New Debenture Stock and $\frac{3}{4}$ per cent. Debenture Stock will be closed from Saturday, the 14th day of October, to Friday, the 3rd day of November, 1911, both days inclusive, for the purpose of preparing warrants for the payment of interest for the three months ending 3rd November, 1911.

Transfers in respect of these Stocks will not be received at this Office while the Registers remain closed.

By order,
C. W. YOUNG,
Secretary.

28-30, Nicholas Lane, London, E.C.
26th September, 1911.

South Indian Railway Company.

THE South Indian Railway Company, Limited, are prepared to receive Tenders for the Supply of (1) Steel Rails and Fishplates. About 164 tons for 55lb. rails. (2) Rolling Stock. 8 60ft. Carriage Underframes (Broad Gauge).

Specifications and Forms of Tender may be obtained at the Company's offices.

Tenders addressed to the Chairman and Directors of the South Indian Railway Company, Limited, marked "Tender for Steel Rails and Fishplates," or as the case may be, must be left with the undersigned not later than 1 o'clock p.m. on Wednesday, the 11th October, 1911.

The Company are not bound to accept the lowest or any tender.

A charge, which will not be returned, will be made of 20s. for each copy of specification No. 1 or 2.

Copies of the drawings may be obtained on payment at the Office of Robert White, Esq., M.I.C.E., Consulting Engineer to the Company, 3, Victoria Street, Westminster, London, S.W.

By order,
NEVILLE PRIESTLEY,
Managing Director.

Company's Offices,
91, York Street, Westminster, S.W.
29th September, 1911.

Great Northern Railway (Ireland).

THE Directors are prepared to receive

Tenders for the Supply of the following:—
5,000 Tons Bull Head Rails (90lb. B.S. Section).
120 Tons Fishplates (B.S. Section).
3,900 Tons Cast Iron Chairs and Permanent Way Fastenings.

Specifications and forms of Tender can be obtained from the Secretary.

Tenders, made out on the forms supplied by the Company, should be delivered under sealed cover, endorsed "Tender for" to the undersigned not later than 10 a.m. on Monday, 16th October, 1911.

The Directors do not bind themselves to accept the lowest or any Tender.

T. MORRISON,
Secretary.
Secretary's Office,
Amiens Street Terminus,
Dublin, 20th September, 1911

East Indian Railway.

THE East Indian Railway Company is prepared to receive Tenders for the Supply and Delivery of:—

- (1) Galvanised Eye and Straining Belts and Strand Wire for Fencing.
- (2) Steel Palisade Fencing.
- (3) Wrought Iron Piping.
- (4) Brass and Copper Tubes and Copper Rods.
- (5) Screws, Nails, etc.

as per specifications to be seen at the Company's offices.

Tenders are to be sent to the undersigned, marked "Tender for Belts and Wire for Fencing," or as the case may be, not later than Twelve o'clock noon on Wednesday, the 11th day of October proximo.

The Company reserves to itself the right to divide the order, also to decline any Tender without assigning a reason, and does not bind itself to accept the lowest or any Tender.

Fees, which cannot under any circumstances be returned, are charged for the specifications as under, viz.:—For Nos. 1 to 4, 21s. each; and for No. 5, 10s. 6d.

By order,
C. W. YOUNG,
Secretary.
Nicholas Lane, London, E.C.

A SOLEMN BARGAIN.

Only those who were privileged to hear Sir Guy Granet give his evidence before the Royal Commission on Railway Conciliation can appreciate the effect it had on all who heard it. Not that any forensic skill was displayed on the contrary, Sir Guy told his tale in a quiet conversational tone—but the matter was telling. His one and only subject was the question of recognition, and he based his objection to the unions coming between the companies and their men on the high ground that the latter had bought exemption from recognition for a period of at least seven years from November, 1907. Not only had they bought this freedom for a period, but the price paid was a high one. It was nothing less than the delivering over to an outsider of the power of deciding what the rates of pay and what the hours of labour were to be for their staff. For the first time we had first-hand evidence of what happened in November, 1907, when Mr. Lloyd George had meetings with a committee of chairman, with Sir Guy Granet as secretary, on the one hand, and with the men's leaders on the other. The witness spoke of the proposals and counter-proposals made on that occasion: how the all-grades programme was never mentioned, the sole topic being recognition. The companies were apparently, from the first, willing to establish conciliation boards, but the unions wanted to be represented thereon. However, in the end the companies said that if the boards were limited to their servants they would go a step further than had been asked, and would agree to arbitration. Then came the task of reconciling the men, but Mr. Lloyd George eventually succeeded there also. The period during which the scheme was to remain in force was a matter of compromise. The companies suggested ten years, but the men wished for three. It was at last agreed, that it was to be for six years and twelve months' notice, which was equivalent to a period of seven years. Here, then, was a solemn bargain between the companies, the men and the Government. It may be asked, as Mr. Burnett questioned, do the unions regard the transaction as a solemn bargain? Sir Guy could not, of course, reply definitely, but he said that having regard to all that passed, to the proposals and counter-proposals made, to the amendments to these counter-proposals made by the representatives of the unions, to the discussion as to the time during which the counter-proposal was to remain in being and so on, it seemed to him that the other side must have known that they were parties to a bargain, and a bargain under circumstances which justified the witness in calling it a solemn bargain. It is true that, at present, we have not heard what the Board of Trade has to say, but this will, no doubt, be verified by Sir Hubert Llewellyn Smith on Tuesday next, and if so the companies' case will be greatly strengthened. The Irish witnesses have considerably helped by their accounts of the recent stoppage there, while, finally, it cannot be said that Mr. Butterworth's evidence as to recognition on the North Eastern has injured the case against recognition. He showed that the conditions were unusual, inasmuch as the North Eastern is situate in the densest sphere of trade unionism, and the former directors were men who had had to deal with the unions in their ordinary business. Mr. Butterworth

admitted that they had their troubles and he would have been glad to have been able to say that recognition of unions had prevented those troubles. Then the action of the leaders in the recent general strike, and their later attempts in Ireland, might call for a reconsideration of the relations between that company and the unions.

UNITED RAILWAYS OF THE HAVANA.

The financial year of this Company ends on June 30, and the dividend for the year 1910-11 on the ordinary stock is shortly due. The payment is made annually only, and for the year 1909-10 the distribution was 4 per cent. In addition the following transfers were made to reserve:—(a) General reserve, £85,000; (b) general renewals, £25,000; (c) insurance fund, £5,000, whilst a balance of £12,000 was carried forward. The total reserves at June 30, 1910, were raised to £340,000, of which the general reserve represented £285,000. During the financial year ended June 30 last, the gross receipts showed a decrease of £25,000, but on the other hand the Havana Central system, which is controlled by the United Railways, yielded almost a corresponding increase in receipts. The total length of railway owned and operated by the United Railways is about 660 miles, and in addition to this the Havana Central owns 67 miles. In the aggregate it may be found that the joint profit earned by the two Companies does not materially differ from that of the preceding year, and in that case the dividend of 4 per cent. on the United of Havana Ordinary Stock may be maintained, particularly as the margin of £115,000 carried to reserve during 1909-10 was available to help that result. The dividend, whatever it may be, is included in the current quotation, but the particular interest now being taken in this stock is directed more especially to the new financial year. The railway, as is commonly known, is an enormous carrier of sugar. During the year 1909-10 the sugar traffic, and products connected with the sugar cane, yielded 30.60 per cent. of the gross receipts, and represented no less than 51.10 per cent. of the total goods and live stock traffic. The railway also claims to have handled no less than 37.39 per cent. of the total sugar production of Cuba, and although its general traffic is considerably larger than it was a few years ago, the undertaking—as indeed the Island of Cuba itself—is mainly dependent upon the sugar crop. The anticipations at present indulged in are that the new crop will be an exceedingly large one, and also that it will be marketable at exceptionally favourable prices, on account of the comparative failure of the beet crop in Europe. Thus directly and indirectly a prosperous season appears to be ahead of the Island, and in this prosperity the United Railways of Havana must necessarily have a considerable share. The new financial year, which began on July 1 last has shown a continuation of the small decreases in traffics previously experienced, so far as the United Railways are concerned, accompanied by steady increase in the revenue earned by the Havana Central. It must be remembered, however, that the revenue to be derived from the new crop cannot be expected to affect receipts until towards the close of this year. The Company has had a somewhat chequered career, but in the last few years the physical condition of the property and its reserves have been strengthened by a more conservative distribution of profits. In all probability any large increase in the revenue will be taken advantage of to further the same policy, but even allowing for that, which of course is for the ultimate good of the ordinary stockholders, it would appear that the dividend prospects of that stock are particularly good in the present financial year. Each 1 per cent. of additional dividend represents a sum of about £47,000 a year. The present return on the stock, allowing for accrued dividend, is about 5 per cent. on the basis of the present quotation of 84.

MEXICAN RAILWAY DIVIDEND.

In spite of the issue of regular monthly statements of working expenses and gross receipts, the dividend announcement of the Mexican Railway Company is still of necessity surrounded by a good deal of uncertainty. This arises principally from two causes. The first is that the amount of the ordinary stock and the second preference stock is small, and a very little change in the net profit one way or the other suffices to turn the scale for or against the dividend. In the next place, the whole of the available profit, subject to any provision the directors may choose to make for contingencies, has practically to be divided up to the hilt, because both the first and the second preference are entitled to their priority over the ordinary stock only in respect of each separate half-year. During the past six months the Mexican Railway has fared fairly well, but not so well as was at one time expected, the political unsettlement still prevailing in the country having handicapped the company. Some improvement, however, in the net position was indicated by the official working statement, and finally a dividend of 2 to 2½ per cent. on the ordinary stock had been estimated. In anticipation of this fairly satisfactory dividend the prices of the securities have latterly been recovering. The dividend declaration on Thursday shows this estimate to have been justified, for the company is paying 2¾ per cent. per annum on its ordinary stock, as against only ¾ per cent. per annum for the June half of 1910. In each half year of last year the distribution was made at the rate of ¾ per cent. per annum on the ordinary stock, the full dividends of course being provided in each half year upon the 8 per cent. first preference stock and the 6 per cent. second preference stock. The distribution of 2¾ per cent. about to be made upon the ordinary stock proves to be the best in any year since the corresponding period of 1890, and that is so far satisfactory. After the dividend was announced, however, the prices of the securities were inclined to recede, as anticipations were realised, and there is for the immediate future very little to “go for.” The working statements for the months of July and August showed a decrease in net receipts of \$44,500 (Mexican currency) or, say, about £4,500 sterling, and since the end of August the tendency of gross revenue has been downwards. The ordinary stock, although even at the improved rate of dividend it yields no very handsome return, has other attractions of no mean order. Its reversionary value is great, for the railway is the only important system in Mexico which is not under the direct control of the Government. Intrinsically also its position is a good one, for the traffic is capable of considerable development, and each one per cent. of additional profit for six months is only a matter of £11,200.

MEXICAN RAILWAY COMPANY.

The Mexican Railway Company, Limited, has issued the following estimated revenue statement for the month of August:—

	Month of August.			July 1 to August 31.		
	1911.	1910.		1911.	1910.	
Gross receipts ...	\$662,400	\$746,900	—	\$84,500	\$1,309,900	\$1,466,400
Expenses ..	309,700	377,400	—	67,700	625,600	737,600
Net earnings ...	\$352,700	\$369,500	—	\$16,800	\$684,300	\$728,800
						\$44,500

The National Railways of Mexico have placed an order with the Monterey Steel Works for 14,000 tons of 85lb. steel rails, delivery to be made between October, 1911, and April 1, 1912. These will be used in the furtherance of the work in laying the main lines from El Paso and Laredo to Mexico City.

L. and N. W. R. and Sir E. Fry's Award.—As the result of prolonged and numerous meetings between the men and their superiors of every rank, the London and North Western Railway have issued peremptory orders that each day's work should be counted independently. The spreading of Sir Edward Fry's award of 72 hours over the whole week has been a great source of discontent.

		Mar. 17, 1910.	4	Sept. 20, 1911.

The movements of gold during the week are an ample justification for the cautious policy adopted by the Directors of the Bank of England during the summer. The weekly return showed £1,596,000 taken for export, chiefly to meet the demands of Egypt and Brazil. There will be larger demands later from other quarters as well as these. The receipts of coin from the reduction of the internal circulation was but trifling—viz., £77,000, while the active circulation of notes expanded by £108,000. The Reserve is in consequence £1,627,000 lower. The resources of the open market have been very appreciably diminished, as is seen by the decline of £1,843,000 in Other Deposits. Public Deposits have advanced £269,000, and in spite of reduced balances carried by the joint-stock banks Other Securities are no more than £76,000 higher. In these circumstances it is natural to find that the rates charged for loans and discounts have steadily advanced. On Thursday, the Paris cheque at one time fell as low as 25.14, which resulted in diverting a sum of about a quarter of a million sterling in bar gold from the Bank of England. The proportion of Reserve to liabilities is, however, but the third of a point lower, and at the very satisfactory figures of 55½ per cent. leaves little to be desired.

On the Stock Exchange all went well for the first part of the week. Prices rose in almost every market, and a sustained re-action from the recent depression and stagnation seemed assured. The movement had developed sufficient vigour on Wednesday to resist the baleful

influence of an alleged imminent rupture between Italy and Tripoli with the possibility of upsetting the cauldron of the Balkans, but could not withstand the exacerbation of this difficulty which occurred the following day. Domestic labour troubles were also considered to have assumed a more threatening appearance on that day, and the market for a time gave way to a sort of hopeless feeling, as if there were never to be an end of the reiterated disturbances brought about by foreign complications and working-class discontent. In spite of the eloquent testimony to the tendency of our trade to expand which railway traffic receipts afford, Home rails suffered a sharp set-back on Thursday. Taking events in their order: Saturday confirmed and widened the general improvement which had been initiated the previous day. There were practically no exceptions in any department of the market to mar the general evidence of growing confidence. Government stocks were all higher. Among Home rails an advance of 1½ took place in Brighton A and 1½ in both South Eastern A and Great Northern Deferred. Canadas rose 3 on the day. Trunks and Mexicans improved in all classes of their stocks. United States railways showed buoyancy. When the markets opened on Monday the danger of trouble between Turkey and Italy was well in evidence, but the fear of this danger was not allowed to interfere with the rise of domestic stocks. Consols again advanced and the rise in Home rails made further progress, but the trouble was reflected in Foreign Government stocks and international securities. Italian 3½ per cents. fell 2 and Turkish 4 per cent. Unified 2½. The stocks of American and Canadian railways were also lower, but from other causes obscurely connected with Wall Street finance. The next day the decline in these particular stocks continued, but again the buoyancy of Consols and Home rails was not impaired. Among the latter there were no fewer than nine advances of a point or more:—Great Central 94 Pref., Great Northern Def., Great Western, Brighton A, Chatham 4½ per cent. Pref., Chatham 2nd Pref., London North Western, Midland Deferred and South Eastern A. It was carry-over day, and rates were higher all round on account of the rise in the Bank rate. Home rails paid 4½-5½ per cent. and the addition of the contango naturally enhanced quotations, but the stocks were not easy to take in, and the rise was evidence of a remarkably good tone, especially as the failure of the Bank of Egypt had been sprung on the markets early in the day. Canadian, American and Mexican rails were again depressed. On Wednesday an upward turn occurred in this group. A sharp advance took place in United States railways. Canadas and Trunks both rose, and activity extended to the whole department of foreign rails. The rise in Home rails continued, and some advance also occurred among our own and foreign Government stocks. This favourable condition, however, did not outlast the day. On Thursday the improving tone yielded to the continued pressure of outward circumstances and a general set-back ensued as already stated. Consols fell ½. There were several declines in foreign Government securities. In Home rails, Brighton A fell 1½, South Eastern Deferred 1½, Midland Deferred and Great Northern Deferred each 1. London North Western was also 1 lower. The American market was flat. Mexican and Canadian rails declined sharply. The relapse developed further on Friday, with falls in foreign Government bonds. Turkish Unified dropped 2 and the whole active list in Home rails bore witness to the pressure of sales. A reaction, however, took place towards two o'clock which bettered prices before the close. Consols ended 1-16th higher on the day, but the recovery was in few cases sufficient to leave Home rails where they were at the opening of business. The market as a whole was the plaything of political motives or conjectures, and it was hard to trace any indication of the direct influence of trade and the prospects of trade.

The movements of the week are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.

Electric Freight Transit on Tyneside.—Mr. Vincent L. Raven, chief mechanical engineer to the North Eastern Railway, and Mr. C. H. Merz, of Newcastle-on-Tyne, consulting electrical engineer to the North Eastern directorate, are on a visit to the United States for the purpose of inspecting the methods adopted for the electrical haulage and shunting of goods and mineral traffic. Although electric transit has been used for passenger trains on Tyneside for seven years past, the goods and mineral traffic is steam hauled.

Weekly Traffic Summary.

The traffic receipts for the week ended September 24, as officially published by the fifty-one principal railways of the United Kingdom, amounted to £2,395,758, which was earned on 20,400 miles, being at the rate of £117 8s. 9d. per mile of line open. For the corresponding week of 1910 the receipts of the same lines amounted to £2,326,107, with 20,346 miles open, or £114 6s. 6d. per mile. There was thus an increase of £69,651 in the receipts, an increase of 54 in the mileage, and an increase of £3 2s. 3d. in the receipts per mile. Thirty-three of the returns distinguish between the receipts from passenger and goods traffic, and these show an increase of £34,933 (or £1 12s. 5d. per mile) in the passenger receipts, and an increase of £35,959 (or £1 13s. per mile) in the receipts from goods traffic. The aggregate increase of the thirty-three railways for twelve weeks in the passenger receipts has been £9,883, while the aggregate decrease in the goods traffic was £242,823. The aggregate receipts of the fifty-one railways for twelve weeks (July 2 to September 24) amounted to £28,957,579, in comparison with £29,248,104 in the corresponding period of last year—a decrease of £290,525. Owing to the strike on the Irish railways the traffic receipts of the Great Southern and Western Railway are not included. The returns, however, embrace all the other Irish systems.

DIVIDEND ANNOUNCEMENTS.

MEXICAN RAILWAY.—At the rate of 2½ per cent. per annum (against ¾ per cent. a year ago), less income tax, on the ordinary stock.

HARBORNE RAILWAY.—The net revenue for the half-year ended June 30 was £2,270, an increase of £178 on the corresponding period of last year. After payment of rent charges and interest on debenture stock, there is a balance of £1,516, and a dividend of 2 per cent. is proposed.

BENGAL AND NORTH WESTERN RAILWAY.—The accounts for the half-year ended June 30 last have been received from India. Subject to audit the net revenue admits of the payment of a dividend for the half-year of £3 10s. per cent., free of Indian, but subject to English, income tax. A year ago the distribution was at the same rate.

DEMERARA RAILWAY.—At the full rate for the half-year on the 4 per cent. extension preference stock; at the full rate for the half-year on the 7 per cent. perpetual preference stock; at the rate of 3½ per cent. per annum on the preferred ordinary stock; and at the rate of 2 per cent. per annum on the ordinary stock. All dividends are at the same rate as a year ago.

DELHI, UMBALLA, KALKA RAILWAY.—The net revenue for the year ended June 30, 1911, admits of the payment of a final dividend of 3½ per cent. and a bonus of 1 per cent., making with the ad interim of 3½ per cent. paid in June, a total payment of 8 per cent. for the year, against 7 per cent. a year ago.

PLYMOUTH, DEVONPORT, AND SOUTH WESTERN JUNCTION RAILWAY.—The report states that the balance available for dividend amounts to £10,330, and the directors recommend a dividend at the rate of 1½ per cent. per annum on the ordinary stock, carrying forward £1,330. A year ago the dividend was at the same rate and £1,644 was carried forward.

ROHILKUND AND KUMAON RAILWAY.—The accounts for the half-year ended June 30 have been received from India. Subject to audit the net revenue admits of the payment of a dividend for the last half-year of £3 per cent., and in addition to the above the directors recommend a bonus of 10s. per cent., both free of Indian, but subject to English, income tax. A year ago the distribution was at the same rate, including bonus.

Loyal Railwaymen Expelled From Their Union.—It was reported yesterday that seventeen engine drivers have been expelled from their society in the Erewash Valley for remaining loyal to the Midland Railway Company during the strike. One of them who is the treasurer refuses to hand over the money or books until legally compelled.

Great Central Canals Temporarily Closed.—The Great Central Railway Company have given notice that owing to the long drought and scarcity of water the Peak Forest and the Macclesfield canals were closed from Wednesday last, and that boats will not be allowed to navigate them until further notice. Boats drawing more than 2ft. 3in. water must not navigate the upper level of the Hollinwood canal.

THE FASTEST RAILWAY RUNS: 1911.

Below will be found our annual tables specifying every booked start to stop run in the summer train services which attains a velocity of 56 miles per hour. As we have explained on previous occasions, this is no arbitrary standard; but has been fixed upon, only after careful analysis, as furnishing the best criterion of the relative celerity of the communications provided by the principal railway companies:—

GREAT WESTERN RAILWAY: TWENTY-ONE RUNS. AGGREGATE, 2,498 $\frac{1}{2}$ MILES AT 56 MILES PER HOUR.

Run.	Miles.	Jrney. Time.	Speed. m.p.h.	Train.
Paddington to Bristol <i>via</i> Bath	118 $\frac{3}{4}$	H. M.		
Paddington to Bristol <i>via</i> Badminton	117 $\frac{3}{4}$	2 0	59.2	10.15 a.m. and 11 a.m.
Bristol to Paddington <i>via</i> Badminton	„	2 0	58.8	1.5 p.m.
Paddington to Exeter	173 $\frac{5}{8}$	3 0	57.8	11.50 a.m. and 3.30 p.m.
Exeter to Paddington	„	3 0	57.8	1.45 p.m.
Paddington to Bath	106 $\frac{7}{8}$	1 51	57.7	4.15 p.m.
Leamington to Paddington <i>via</i> Bicester	87 $\frac{1}{4}$	1 31	57.5	9.24 a.m., 12.36 p.m., & 5.19 p.m.
Leamington to Greenford	79 $\frac{1}{2}$	1 23	57.4	6.14 p.m.*
High Wycombe to Birmingham	81	1 28	57.2	9.42 a.m.
Taunton to Paddington	142 $\frac{1}{2}$	2 30	57.1	11 a.m. and 6.10 p.m.
Leamington to High Wycombe	60 $\frac{1}{4}$	1 4	56.9	4.29 p.m.
Paddington to Exeter	173 $\frac{5}{8}$	3 5	56.3	11.10 a.m.
Exeter to Paddington	„	3 5	56.3	12.5 p.m.
Banbury to Paddington	67 $\frac{1}{2}$	1 12	56.2	8.53 p.m.
Westbury to Paddington	95 $\frac{1}{2}$	1 42	56.1	3.58 p.m.

* This run is not shown in the public time-book. The train due Paddington at 7.50 p.m. halts at Greenford to detach the Victoria (S.E. & C.) coaches, which proceed *via* West Ealing and Ealing Broadway to the West London line.

LONDON AND NORTH WESTERN RAILWAY: SIXTEEN RUNS. AGGREGATE 1,722 $\frac{3}{4}$ MILES.

Run.	Miles.	Jrney. Time.	Speed. m.p.h.	Train.
Willesden to Coventry	88 $\frac{1}{2}$	H. M.		
Lichfield (Trent Valley) to Nuneaton	19 $\frac{1}{4}$	0 20	57.7	9.31 a.m.
Willesden to Birmingham	107 $\frac{1}{2}$	1 53	57.0	10.17 a.m.
Willesden to Coventry	88 $\frac{1}{2}$	1 33	57.0	8.52 a.m.
Stoke to Willesden	140 $\frac{1}{2}$	2 29	56.9	5.44 p.m.
Euston to Birmingham	113	2 0	56.5	1.19 p.m.
Birmingham to Euston	„	2 0	56.5	4 trains.
Euston to Stafford	133 $\frac{1}{2}$	2 22	56.4	5 trains.
Stafford to Willesden	128	2 17	56.0	5.30 p.m.
				11.40 a.m.

MIDLAND RAILWAY: SEVENTEEN RUNS. AGGREGATE, 1,520 $\frac{1}{4}$ MILES.

Run.	Miles.	Jrney. Time.	Speed. m.p.h.	Train.
Kettering to Bedford	22 $\frac{1}{4}$	H. M.		
Appleby to Carlisle	30 $\frac{1}{2}$	0 23	58.0	10.10 a.m.
St. Pancras to Kettering	72	0 32	57.6	7.21 p.m.
Trent Junction to St. Pancras	119 $\frac{1}{4}$	1 16	56.8	3.30 p.m.
St. Pancras to Leicester	99	2 7	56.5	11.50 a.m.
Leicester to St. Pancras	„	1 45	56.5	6 trains.
Nottingham to St. Pancras	123 $\frac{1}{2}$	„	„	5 trains.
Kettering to St. Pancras	72	2 12	56.1	6.3 a.m.
		1 17	56.1	4.8 p.m.

GREAT NORTHERN RAILWAY: SIX RUNS. AGGREGATE, 720 MILES.

Run.	Miles.	Jrney. Time.	Speed. m.p.h.	Train.
Peterborough to King's Cross	76 $\frac{1}{4}$	H. M.		
Grantham to Doncaster	50 $\frac{1}{2}$	1 18	58.6	12.7 p.m.
Grantham to King's Cross	105 $\frac{1}{2}$	0 52	58.2	4.26 p.m. Sats.
Wakefield to King's Cross	175 $\frac{1}{2}$	1 50	57.5	5.56 p.m.
King's Cross to Doncaster	156	3 5	57.0	2.20 p.m.
Doncaster to King's Cross	„	2 45	56.7	2.15 p.m.
		2 47	56.0	7.8 p.m.

GREAT CENTRAL RAILWAY: FOURTEEN RUNS. AGGREGATE, 510 $\frac{1}{2}$ MILES.

Run.	Miles.	Jrney. Time.	Speed. m.p.h.	Train.
Leicester to Nottingham (Arkwright Street)	22 $\frac{1}{2}$	H. M.		
Woodford to Leicester	31	0 22	61.3	4.33 a.m.
Rugby to Leicester	19 $\frac{1}{2}$	0 31	60.0	6.5 p.m.
Leicester to Nottingham (Vic.)	23 $\frac{1}{2}$	0 20	59.2	4.10 a.m.
Woodford to High Wycombe	45 $\frac{1}{2}$	0 24	58.7	2.10 p.m.
Marylebone to Leicester	107 $\frac{1}{2}$	0 47	58.0	8.31 p.m.
Leicester to Nottingham (Vic.)	23 $\frac{1}{2}$	1 54	56.5	6.20 p.m.
Nottingham (Vic.) to Leicester	„	0 25	56.4	5 trains (two bi-weekly).
Rugby to Leicester	19 $\frac{1}{2}$	„	56.4	9.43 a.m.
Leicester to Marylebone	103	0 21	56.4	3.39 p.m. Sats.
		1 50	56.1	8.50 a.m.

NORTH EASTERN RAILWAY: FOUR RUNS. AGGREGATE, 213 $\frac{1}{4}$ MILES.

Run.	Miles.	Jrney. Time.	Speed. m.p.h.	Train.
Darlington to York	44 $\frac{1}{2}$	H. M.		
York to Darlington	„	0 43	61.7	1.9 p.m.
York to Newcastle	80 $\frac{1}{2}$	0 45	59.0	9.13 p.m.
Darlington to York	44 $\frac{1}{2}$	1 24	57.4	9.43 a.m.
		0 47	56.4	8.43 a.m.

CALEDONIAN RAILWAY: FIVE RUNS. AGGREGATE, 162 $\frac{1}{2}$ MILES.

Run.	Miles.	Jrney. Time.	Speed. m.p.h.	Train.
Forfar to Perth	32 $\frac{1}{2}$	H. M.		
Perth to Forfar	„	0 32	60.9	11.36 a.m., and 7.2 p.m.
Forfar to Perth	„	0 33	59.0	5.25 a.m.
		0 34	57.3	5.1 p.m., and 9.25 p.m.

LONDON AND SOUTH WESTERN RAILWAY: ONE RUN.

Run.	Miles.	Jrney. Time.	Speed. m.p.h.	Train.
Basingstoke to Vauxhall	46 $\frac{1}{2}$	H. M.		
		0 49	56.9	5.3 p.m.

The following table shows that the speed of our best trains is steadily improving:

Aggregate Mileage at 56 Miles per Hour

	1909.	1910.	1911.
Great Western	1,919	2,239	2,498 $\frac{1}{2}$
London and North Western	1,634	1,634	1,722 $\frac{3}{4}$
Midland	816	1,208	1,529 $\frac{1}{4}$
Great Northern	338	825 $\frac{1}{2}$	720
Great Central	389	390 $\frac{1}{2}$	516 $\frac{1}{2}$
North Eastern	169	169	213 $\frac{1}{4}$
Caledonian	130	162 $\frac{1}{2}$	162 $\frac{1}{2}$
London and South Western	65	49	49
Total	5,460	6,677 $\frac{1}{2}$	7,412

The following railways possess no run at 56 miles per hour, so the fastest performance of each is scheduled:—

Company.	Run.	Miles.	Jrney. Time.	Speed. m.p.h.	Train.
Lancashire & Yorkshire	Liverpool to Manchester and vice versa	37	H. M.		
			0 40	55.5	24 trains.
Great Southern and Western	Ballybrophy to Mallow	77 $\frac{1}{2}$	1 28	53.0	12.35 p.m. (11 a.m. ex Dublin)
South Eastern	Tonbridge to Ashford	20 $\frac{1}{2}$	0 30	53.0	4.53 p.m.
Great Eastern	Lincoln to Spalding	38 $\frac{1}{2}$	0 44	52.1	2.43 p.m.
Glasgow and South Western	Kilmarnock to Carlisle	91 $\frac{1}{2}$	1 46	51.5	2.6 p.m.

* Although accomplished on the North Western line, this is a North Staffordshire Company's express Derby to Llandudno, worked by a North Stafford engine.

THE RAILWAY COMMISSION OF INQUIRY.

THE CASE FOR THE COMPANIES CONCLUDED.

The Royal Commission appointed to inquire into the working of the railway conciliation boards entered last Monday upon the fourth week of its sittings, Sir David Harrel presiding. This was the twenty-second day of the sittings, and the presentation of the case for the companies, which had opened on Thursday, September 14, was continued. The reference to the Commission is in the following terms:—

"To investigate the working of the railway conciliation and arbitration scheme signed on behalf of the principal railway companies and of three trade unions of railway employees at the Board of Trade on November 6, 1907, and to report what changes (if any) are desirable with a view to the prompt and satisfactory settlement of differences."

Additional evidence to that published in our last issue was given on Saturday by Mr. H. MARRIOTT, goods manager of the Lancashire and Yorkshire Railway. It was not, he said, true that the clerks on that line were required to act as train men in case of a strike, as stated by the secretary of the Railway Clerks' Association before the Commission. The company happily received more offers than were needed from the clerical staff to assist on the platforms and in the parcel offices during the late strike. There was no foundation for the Railway Clerks' Association secretary's statement that the question of salaries on that line was in an unsatisfactory state. Seventy per cent. of those who signed a memorial in November, 1910, had received increases.

In reply to Sir T. R. Ellis, Mr. Marriott said it was desirable that there should be a determining authority in the conciliation scheme, and that it should be obligatory on both sides to carry out his decision. There should be no stoppage of work until the whole machinery for the settlement of a dispute had been exhausted, and no financial assistance should be given by any organisation to those who stopped work or caused a lock-out during the conciliation proceedings, or afterwards, in opposition to an agreement or award. Ample protection should be given to those who desired to work and carry out that agreement. He did not mind the presence and assistance of an outside official at the arbitration, but he could not see that it was necessary nor desirable, even in the interests of the men themselves, that an outsider should be introduced when terms were being discussed between employers and employed at the sectional board.

Would the repeal of the Trades Disputes Act help you?—I think that is very necessary in the public interest. There is no peaceful picketing nowadays, and I think that in the interests of the country something in the direction of the abolition of picketing and the prohibition of financial assistance to those who refused to carry out a decision is necessary.

Do you think the unions can be of use in preventing agreements being broken?—Not much, I am afraid, judging by what we have been through, and by what is going on now.

Mr. Henderson asked the witness to convey to the representatives of the companies his desire to have a return of the wages paid to all the staffs, and Mr. Marriott promised to do so, Mr. Henderson adding that he had asked two or three times for the return. If he could not get the information he should take steps to induce the Commission to act upon their powers and call for the return. In reply to Mr. Henderson, the witness said that in his opinion it was in the interests of the men that, until arbitration was reached, the trade union official should be kept out of the proceedings. He was not prepared to allow the men free choice in the selection of their secretary for the sectional boards. The company must manage its business in its own way.

MONDAY.

Mr. William Whitelaw, chairman of the Highland Railway Company; Mr. William F. Jackson, general manager of the North British Railway; and Mr. Oliver R. H. Bury, general manager of the Great Northern Railway, were the witnesses examined.

Mr. WHITELAW said the recognition of the unions, apart from the objection of the majority being represented by the officials of the minority, would have two deplorable results. An agitation would be commenced, as on the North Eastern line, to compel every man to join a union, and the position and salary of a number of the trade union officials would depend upon

their having work to do, and they would be more frequently employed in manufacturing grievances than in trying to settle genuine ones. It was the extreme men who pulled the strings, and he could not give a better illustration of that than what was happening in Ireland, where the Amalgamated Society was using its power to compel the companies to do what Parliament had stated that they were not entitled to do.

INCREASED CHARGES VALUELESS TO SOME COMPANIES.

It was often thought that all shareholders were plutocrats, but any large increase in working expenses in addition to the expenditure being forced on the company by proposed legislation must be very serious both for the ordinary shareholders and the general financial position of the company. The last dividend on the ordinary stock for a complete year was 2 per cent. The proposal to assist companies to obtain increased revenue with which to meet increased charges for labour was in the case of some companies utterly valueless. An increased rate for almost any traffic on the Highland line meant the loss of traffic altogether in consequence of sea competition. The only traffic that could stand an increase of rates was the Post Office traffic. He regarded the continuance of the passenger duty as most unfair in view of the expenditure which Parliament had imposed, and was imposing, on railway companies. The abolition of this duty and an increase of 5 per cent. in the Post Office payments would meet the expenditure incurred by the conciliation scheme on the Highland line, though this sum would only have provided a small portion of the amount required to give effect to the national programme, which would cost the company nearly one per cent. of the ordinary dividend.

Mr. W. F. JACKSON, general manager of the North British Railway Company, said the improved conditions asked for in the national programme would cost the company not less than £200,000 per annum. He denied that the company had put technical objections and petty obstacles in the way of carrying out the conciliation scheme. The scheme had worked well on the North British, and there was no substantial feeling against it on the part of the staff. He was strongly opposed to recognition of the unions; any such recognition, so far from producing peace, would have the opposite effect. The union officials were not in a position to understand, appreciate, or express the desires of the men so well as they were able to do themselves. Recognition was not a genuine demand of the men, but only a strong desire on the part of the union officials. Their hope was that recognition would lead to increased membership, and that with increased membership they would be able to take up the position that union men would decline to work with non-union men. To leave the railways under the control of the unions would be a national calamity. If recognition were forced upon the companies, it should be in conjunction with its logical complement—viz., the relieving of them from responsibility for the management of railways in the public interest, and from liability in respect of the public safety, and that was impossible.

Answering Sir T. R. ELLIS, Mr. Jackson said it was understood that if the scheme of 1907 were accepted, the question of recognition should be dropped during the term of the scheme.

Who said that?—I should not like to say that anybody said it, but it was the understanding in the minds of all the representatives of the railways that that was one of the conditions of the settlement.

Mr. HENDERSON: Are you in a position to put before the Commission the present conditions of your company as to hours and wages of the respective grades?—I am not. The matter was being considered by the companies as a whole, who would decide whether or not a wages return should be sent.

CENTRAL CONCILIATION BOARDS—ARBITRATION AWARDS.

Mr. OLIVER BURY, general manager of the Great Northern Railway, said he was not concerned in any way with defending the 1907 scheme. The railway companies did not ask for it, they only assented to it with the utmost reluctance, after great pressure from the Board of Trade. He denied that the scheme had failed to afford the men the opportunity of full investigation, or that everything that could be said in support of the men's case was not put before the arbitrator, or that the Great Northern failed to give the scheme a fair trial. He concurred in what, he believed, was the general opinion, that the central conciliation board was unnecessary, and should be abolished. The reason for favouring the retention of the sectional boards was that the men on them necessarily possessed more intimate knowledge and experience of the matters to be discussed than did those on the central board. Men were really experts in their own grades. The central board of the Great Northern was composed of a platelayer, a fireman, a goods checker, and a goods guard. It was not reasonable to suppose either of them was so competent to deal with cases of such men as, say, engine

drivers, signalmen, or express passenger guards as those men themselves. There were, however, twenty representatives of the men on the four sectional boards, and the chances of finding on those boards men with personal knowledge of the questions to be discussed affecting each grade was, of course, proportionately greater. The suggestion that men's representatives could negotiate as well as the men themselves was fallacious and opposed to all railway experience. The witness was opposed to Mr. Williams's proposal that there should be one board for each railway, as in the case of the North Eastern. To put forward as an example the railway where strikes were the most common was not a proposal to be seriously considered. It was vital that the finding of an arbitrator should be binding on both sides. If the men were free to accept a finding when in their favour and to strike when it was not, then the Great Northern would claim to be left to manage their railway themselves. With regard to the claim for the recognition of trade unions his company seriously objected to it in any form. It was only by cultivating relations of mutual trust and goodwill between the company and their servants that they could give a satisfactory service to the public. The effect of bringing in the union officials would be to destroy this personal relation.

RECOGNITION WOULD FACILITATE STRIKES.

Recent events had shown the extent to which the public were dependent on the railways. Indeed, the very existence of government depended on the railways being kept open. That being so, nothing should be done which would increase the possibility of a general strike, but the effect of granting recognition to trade unions would be to lead to and facilitate general strikes. One great difference between railways and all other industries was that railways must in the interests of the nation be kept going. "We railway managers," said witness—"all of us men of experience, all of us sincere in our desire to help the Commission to arrive at a solution of our difficulties—say with one voice we cannot have recognition. There is still another very important factor differentiating railway employment from almost every other industry, and that is the enormous concession of compulsory arbitration as to wages and hours which was made by the railway companies in 1907. By this concession the companies, as regards their labour bill, practically gave an open cheque for any arbitrator that might be chosen. Surely the great concession of compulsory arbitration was sufficient for the railway companies to make without adding to it recognition of trade unions." Apparently the union leaders were supporting in Ireland a strike declared for the purpose of preventing the companies from discharging their legal obligations. They claimed the right to forbid the carriage of goods that had been handled by what they described as "blackleg" labour, or in other words, to determine whose traffic should be carried and whose traffic should not. If recognition were granted on all railways it would give to the unions the power to bring the British railways to a standstill—a power which no one ought to have. The effect of recognition on discipline would be very serious. In the opinion of those competent to judge, recognition would sap the foundations of discipline, make the proper management of a railway impossible, and expose the public to the inconvenience and dangers which must inevitably follow upon divided authority. The suggestion that the company agreed to recognition in 1907 was quite unfounded. They were pressed to do so, but refused. What they agreed to was that when a case went to arbitration, the men might be represented before the arbitrator by any advocate they chose.

LEGALISED INTIMIDATION.—CONCILIATION SCHEME AMENDMENTS.

There would have been little interference with the service on the Great Northern during the strike had those men who wished to work been permitted to do so. No men should be allowed, by any form of intimidation, to prevent others from following their lawful occupation. The Trades Disputes Act, 1906, had unquestionably legalised one form of intimidation. It sanctioned "peaceful picketing" by any number of persons. The Act should be repealed or made inapplicable to railways. He recommended the following amendments of the Scheme of 1907: (1) Abolish the Central Conciliation Board. (2) Provide that any question of wages or hours which could not be settled at a Sectional Board should be referred to arbitration upon the signature of 75 per cent. of the men affected to an agreement, binding them to abide by the finding of the arbitrator. (3) Provide for arbitration in accordance with the proposals already put before the Commission by the railway companies.

Answering Sir T. R. ELLIS, witness said he was certain that the managers were told that "recognition" was to sleep for the period of the agreement.

What do you think was the cause of the strike?—I don't think it was recognition at all.

Then as far as that is concerned there has been no breaking of the bargain made in 1907. No. He agreed that whatever scheme was established there must be at some point a determining authority.

Mr. HENDERSON: Are you in a position to give us the actual amount the scheme has cost your company in benefits to the men?—Under £30,000 and over £25,000.

Are you in a position to hand in a return for your company as to the conditions of service, wages, and hours?—No, sir, I am not.

TUESDAY.

The examination of Sir W. GUY GRANET, general manager of the Midland Railway, occupied the entire day. He stated that he proposed to confine his evidence in chief entirely to the question of the recognition of trade unions by the railway companies. He said he had no hostility to trade unions or to the principle of collective bargaining, but was opposed to recognition upon railways. He agreed generally with the other railway witnesses regarding the reasons against such a course.

THE 1907 OFFER IN LIEU OF RECOGNITION.

Witness wished, as secretary to the Railway Chairmen's Committee which was appointed to meet Mr. Lloyd George in 1907, to emphasise one point and one reason against recognition which had been alluded to by some previous witnesses. This was that a bargain was made with the Government and with the unions who signed the agreement that the demand for recognition should be abrogated pending the trial of the conciliation scheme, and after considerable discussion as to what constituted a proper period of trial—the railway companies suggesting 10 years and the unions three years—it was finally agreed that six years, with a 12 months' notice at the end of it, would be a proper term. The sole subject for discussion at that conference was recognition. The scheme suggested by the Government was conciliation boards elected by the servants of the companies but not confined to companies' servants. The companies were so opposed to this introduction of an outside element that they made a counter offer, and said:—"We will accept a scheme of conciliation boards, and if you agree to the boards being confined to our own servants we will agree that in the event of being unable to come to terms we shall submit the questions before the boards to arbitration." He could confidently assert that that offer was accepted in lieu of recognition, and that so far-reaching a proposal—the effects of which had never been fully realised by the public—would never have been made by the companies unless they had been assured that their scheme would receive a seven-years' trial and would ensure them freedom from demands for recognition for that period. Arbitration was a tremendous departure on the part of the companies, because it took from the directors the power of deciding what the rates of payment and the hours of their workmen were to be. He had no hesitation in saying a solemn bargain was made, backed or assented to by the Government, that for seven years the question of recognition should not be pressed upon the companies, and that the substituted scheme should be given a fair trial. In these circumstances it would be wrong as a matter of justice to press recognition on the companies. But beyond this the experience of what had happened in spite of the fact that the representatives of the unions signed the agreement inclined him against recognition, which was put forward as a means to an end. The argument put to the companies was that if they granted recognition the employers would have in return a system under which they would be able to make bargains with their men which could not be impeached as, in the past, bargains had been, on the ground that they had taken advantage of their men, who, owing to their being the servants of the companies, had not been able to fight their case properly, and further that those bargains would be supported by the full force of all the union machinery. It was also urged that the companies would have the great advantage of the support of the unions to maintain those bargains.

MAJORITY OF MEN NOT UNIONISTS.—ADEQUATE WAGES UPHELD.

In the face of their recent experience of the bargain made with the unions that the conciliation scheme should be fairly tried for seven years, and of the sudden repudiation by the signatories to that solemn agreement, how could they have any such belief in the efficacy of recognition? Even if it were admitted that the scheme had so broken down that it ought not merely to be amended but repudiated, one would have expected procedure such as in 1907, when full notice of the union demands was given to the companies. But in this case not

merely was no notice given, but the union broke their own rules. Having quoted these rules, the witness said that he did not charge the union with deliberate bad faith. He believed that Mr. Williams and Mr. Thomas tried their utmost to prevent the outburst, but they found a state of things at Liverpool in which they had either to swim with the stream or lose all their influence, and they therefore did the former. And then, after the bulk of the railway men were out at Liverpool they sent the companies their famous 24-hours' ultimatum. Under these circumstances his confidence in the efficacy of recognition, the attractiveness of which would be that a bargain with a union was a thing that could be relied upon, was not great. Further, the unions admittedly did not comprise the majority of the men eligible for membership. Notoriously—except on the North Eastern Railway and some of the Welsh railways—the preponderance of the men engaged in the movement of traffic were not members of the unions. So far as he could imagine, this must be taken as an indication that the majority of the men employed did not want recognition. If they did, why did not they join the unions? In other trades, so far as he knew, where recognition was the practice it was because the bulk of the men concerned were in the unions. He could not see why in the sole instance of railways, where admittedly considerations of public safety came in which were not present in other trades, it should be necessary to employ the pressure of a Royal Commission to bring about a state of things which if the men wanted they could ask for by the simple expedient of joining the union. His opposition to recognition had no relation to any desire to pay men less than they ought to get. He had no desire to see men underpaid, and he thought he had shown that. On the contrary, so long as he was allowed to manage on commercial lines, and not forced to employ three men where only two were necessary, and so long as it was recognised that the maintenance of discipline was as necessary on a railway as in the Army or Navy, and that, therefore, the authority of the officers must not be weakened, he would welcome any amendment of the Conciliation scheme which would tend to simplify it and expedite its action, even though it might lead to an immediate increase in the wages bill.

ARBITRATION AND STRIKE LEGISLATION.

In reply to the CHAIRMAN, witness said that in 1907 there was a threat of a general strike, which induced the Government to intervene, and led to the belief that there was a grave state of things existing. His own belief was that there was not in 1907 that grave state of things which was suggested, and, anyhow, if there was, it had nothing to do with the question of recognition. It was not, unfortunately, in his power to state the reasons which actuated the companies in 1907, but they did not make their concessions from any apprehension as to what their future relations with the men would be.

Sir T. R. ELLIS: You agree with collective bargaining. How can there be collective bargaining without unions?—Under the Conciliation scheme you have collective bargaining.

Do you believe that for any scheme to be effective there should be at some stage a determining authority?—I am not absolutely sure about that. At first sight it seems essential that there should be a determining authority, but I am not sure from the point of view of results whether you get such good results with a determining authority as without. In the old days there was more elasticity in the relations between the parties.

We have advanced since those days?—I am not sure from what the men get that that is so. Witness agreed that when the stage was reached when the determining authority was called in the men should be entitled to be represented.

Do you think that there should be special treatment, legislative or otherwise, for railways as compared with other industries?—I complain that we have too much separate treatment. I am inclined to think not.

What do you understand recognition to mean?—I take it that in its broadest sense it means that in all your dealings with your employees you should recognise their union, and deal with their union rather than with the men.

Do you consider the scheme of 1907 has been a failure?—No, not on the whole. I think there are flaws in it.

Do you think the Central Boards might be dispensed with?—Yes.

Witness said that, on the whole, he preferred not having a determining authority. A strike would not necessarily follow failure to agree. It was a weapon—a legitimate weapon in his opinion—but the matter at issue might not be so important as to justify so drastic a measure. On the other hand, if it was so important that a strike only would meet the case, he thought that it might well be submitted to arbitration. He was rather

of opinion under these circumstances they would not have strikes. He did not believe in repressive legislation to prevent strikes. He did not think it answered. He did not think they would ever prevent a strike under certain circumstances, and he was not prepared to suggest any alteration in the present law. He was opposed to the scheme for a national board.

Do you suggest any alteration in the present law; in the Trades Disputes Act, for instance?—No.

THE WHITEHALL MEETING A "PHYSICAL" RECOGNITION.

Examined by Mr. HENDERSON, witness said the representatives of the companies did not meet the representatives of the unions in 1907.

What would be your position on the question of recognition on a railway where the majority of the men were distinctly members of the unions?—My position would be that I should have probably to reconsider my position.

You meet me to that extent?—Yes.

Then there are conditions which might commend recognition to you?—I do not know about commending recognition.

Make it more acceptable?—It is not a question of it being acceptable. There are conditions under which I recognise that I should have to look at the matter from a different point of view.

Then you are not beyond hope? (Laughter.)

Coming to the recent negotiations, witness said that before Mr. Claughton and himself met the representatives of the unions, the question was submitted to a meeting of the representatives of the companies.

Mr. HENDERSON: Do you think a settlement would have been reached that day unless you had been willing to meet the deputation from the unions?—I really cannot say.

Was that recognition?—No. Really, with great respect to you, Mr. Henderson, this was a case in which under very special circumstances—to which I am not permitted to allude, but which are not likely to recur—at the earnest solicitation of the Government, as a special case, we are authorised to meet the representatives of the unions. At the meeting we tell them that it is only under these special circumstances that we get this limited authorisation. You surely do not suggest that this was recognition! Witness added that it was a physical recognition, but he did not think it was anything more than that.

Mr. HENDERSON: It was beneficial?—Now, you ask me too much.

It resulted in a settlement?—Yes.

And in the appointment of this Commission?—Yes.

And has given me the opportunity of this cross-examination?—Yes.

To that extent, at any rate, it was beneficial?—Not to me. (Laughter.)

Mr. HENDERSON inquired whether witness was in a position to put in a statement of hours and wages of the different grades on the Midland.

Witness replied in the negative, and said he would object, unless compelled, to put in any such statements on the ground that it was not relevant to anything which was being inquired into by the Commission. Of course, if the Commission were to order him to do it, he would have to do so. The Board of Trade had asked the railway companies in connection with the Census of Production to furnish the information Mr. Henderson had asked for in every grade, every rate, the number at each rate, and the earnings as well, and the companies had agreed to give that information in bulk, not company by company. It would be shortly in the hands of the Board of Trade.

Mr. HENDERSON pointed out that witnesses of the companies had referred to the earnings of the men and challenged the figures given in a book of railway statistics compiled by Mr. Bell, and nearly every representative had told them something about the all grades programme. Surely the Commission had a right to know the actual conditions, and how far they differed from the national programme.

WITNESS: I am entirely in the hands of the Commission.

WEDNESDAY.

Managers of Irish railways appeared before the Commission throughout Wednesday.

The first witness was Mr. CHARLES H. DENT, general manager of the Great Southern and Western Railway of Ireland. He said that the Irish companies were not consulted by the Board of Trade before the agreement of November 6, 1907, was entered into, and they informed Mr. Lloyd George that if they were asked to allow the question of hours and wages to be submitted, possibly to an outside arbitrator, it was necessary that they should have some assurance that if the railway companies in Ireland were to be bound the men should be held

to their contract also. The Irish companies also did not like the system of having a single arbitrator. Sir G. R. Askwith replied, stating that it was thought desirable to avoid including in the agreement any provision as to penalties for non-compliance with an award. Such provisions had not been usual in the rules of conciliation and arbitration boards, it being found in actual practice that awards were adhered to by the employees, owing partly to the pressure of public and working-class opinion. Mr. Askwith's expectations, as recent events had shown, proved inaccurate. On February 28, 1908, the company agreed to join in the scheme, and there was no avoidable delay in setting up the boards. The company maintained that any request for improved conditions should be signed by a substantial number of men in each class. There was a distinct refusal to sign the petition, many of the men advocating a strike rather than the signing of such a petition. Subsequently the men signed and presented the petitions and the demands were discussed by the various sectional boards. Only 450 men on the railway came out when the Executive of the A.S.R.S. called upon the men to strike on August 15 last. No man had been punished or suffered in the slightest degree for having presented a memorial or petition or for having acted in connection with the conciliation scheme. Compliance with the demand of the national programme was estimated to cost £48,375 per annum. He objected to any person except the employees of the company attending at deputations or at conciliation boards.

TRYANNY OF PICKETING AND INJURY TO TRADE.

Dealing with the Irish strike inaugurated last week, witness stated that it arose through two railwaymen refusing to receive some loads of timber brought to Kingsbridge goods station from a firm who had some employees on strike. Since then only a few petty consignments had been smuggled out by consignees, and the company had had to obtain protection to bring in provisions for their own men. Trade unions were trying in Ireland to undermine the discipline of railways. Last Friday a member of the Executive of the A.S.R.S. stated at Dundalk that they wanted to "scotch" the Great Northern Railway of Ireland on the following morning, that if they did not win they were prepared to fetch the railway servants of the United Kingdom out on the following morning, and that before they would be beaten they would run England and Ireland into civil war.

Answering Sir T. R. Ellis, witness said that they had absolutely declined to recognise the unions. The view of the Irish railway companies was that they would not recognise the unions in any form whatever. He would permit an outsider to represent the men before an arbitrator.

Sir T. R. ELLIS: The present strike has nothing to do with hours or wages. Have you any suggestion to make as to how such questions should be dealt with and a strike prevented?—I think that is a matter for the Government, if the laws are to be broken with impunity. I think public opinion, certainly in Ireland, is very strong on the subject that the first thing to be done is that the law should be respected. Owing to recent settlements under which men had been brought back without suffering any penalty, he was afraid they had been educated up to the idea that they could walk out without notice. But for intimidation the bulk of the men would not have gone out.

WITNESS said that the company had received any number of applications from "this side," and when he left they had about a hundred qualified men willing to go over, but the company did not wish to bring them over. The State should see that men who desired to work should be permitted to do so.

Mr. HENDERSON, M.P., inquired whether any conditions which could be laid down would induce the witness to re-consider his position in regard to recognition.—Witness said that he would not do so even if the majority of the men were in a union.

In reply to Mr. Burnett, witness said he did not consider that the representation of the men by an advocate before the arbitrator constituted recognition.

Mr. JOSEPH TAYLOR, manager of the Midland Great Western Railway of Ireland, said that his company's employees had free and ready access to the chief officers of the board of directors and no dispute existed in 1907. The company received the national programme from Mr. R. Bell in 1907, but did not regard it seriously. Compliance with the demands would almost have swamped the dividend. The Midland and Great Western joined the 1907 scheme reluctantly, in the hope that it would ensure peace. The general railway strike in August, which extended to Ireland, and the more recent strike in Ireland, had rudely dispelled their hopes and proved that their fears were only too well founded. Only 130 men struck work out of a total of 3,146 in response to the 24 hours' notice on August 17, 1911, showing that the men had more sense than their irrational

leaders. The existing strike was ordered on the most unreasonable grounds by the executive of the A.S.R.S. It was still paralysing Ireland, and doing incalculable injury to her trade, injury which might never be repaired. Partial as the strike was on their line, their receipts last week decreased £3,500, or over 25 per cent. It spread to the witness's line through a Dublin checker refusing to handle timber and slates from a firm whose employees were on strike. It seemed inconceivable that any men or union should have the power to paralyse the trade and commerce of the country in the way the leaders of this society had done, and yet go unpunished. It was an unfortunate state of the law which ought to be remedied. He protested against the suggestion that they should be asked to recognise a society which could be guilty of such an act, which ought to be made criminal.

A STANDING ARBITRATOR FOR IRELAND.

Witness favoured the abolition of the Central Board, and the appointment of a standing arbitrator for Ireland, to be assisted by two assessors. He opposed the establishment of a national board either for the United Kingdom or for Ireland alone. Recognition would be disastrous to discipline and the proper management of railways.

Mr. HENDERSON: Do you go as far as Sir Charles Owens and suggest that railway servants ought to be in the same position as soldiers?—If things go on as they are going, I firmly believe it will come to that.

You would like the right to strike withdrawn from railway servants?—I think railway servants ought not to be allowed to strike. He did not think the present dispute in Ireland was a case for mediation.

Mr. J. R. KERR, general manager of the Cork, Bandon, and South Coast Railway, said that the concessions granted under the scheme amounted to £800 a year. The scheme did not require any modification in the case of small railways. He was opposed to recognition.

Mr. M. F. KEOGH, secretary to the Dublin and South Eastern Railway, said that the Irish railways, as a whole, were in a position so different from that of the railways of Great Britain, that a scheme unsuitable in the one country might quite well work advantageously in the other. The present scheme had worked well in Ireland. Additional expenses pressed far more hardly on Irish companies than on wealthier ones. The lower standard of wages for labour in Ireland must not be lost sight of. The 1907 scheme was adopted by his company with reluctance, and they hoped to gain from it the assurance of peaceful conditions for seven years and the postponement for the same period of the question of recognition. The granting of the demands of the men would have swept away the whole of the dividend. No complaint of substance had ever been received regarding the working of the agreements arrived at under the scheme. He opposed the granting of recognition, which would place in the hands of irresponsible outsiders a dangerous power of interference, without in any way relieving the directors and officials of their responsibility. The union officials having deliberately broken their solemn obligations should not be rewarded by the concession of recognition.

Answering Mr. HENDERSON, witness said that he thought the presence of a union advocate before the arbitrator was unfortunate. Most of the complaints that the Commission had had to deal with had been against the awards of arbitration. No action that Parliament could possibly take would satisfy him that recognition was a good thing.

THURSDAY.

Nearly the whole day was occupied by the examination of Mr. A. K. BUTTERWORTH, general manager of the North Eastern Railway Company.

Mr. BUTTERWORTH stated that his Company was not one of the signatories to the Agreement of 1907 arrived at in negotiation with the Board of Trade. The principle of collective bargaining on the railway went back as far as the year 1849. The principal points in which the North Eastern Conference differed from the Board of Trade scheme were as follows:—

(1) The Board of Trade scheme provided for sectional boards to be set up for the different groups of men, and for a central board to be elected from the members of the sectional boards, all matters being considered in the first instance by the sectional boards, and afterwards, if necessary, by the central board. In the North Eastern scheme the whole of the elected representatives were on the central board, and there were no sectional boards, but provision was made that matters might be remitted by the Conference to a sub-committee, or, by arrangement between the secretaries, might be so referred to a sub-committee in the first instance, and, in practice, the majority of applications, except those of a general nature, were considered in the first instance by sub-committees.

(2) The Board of Trade scheme was limited to discussion about the rates of wages and hours of labour, whereas the North Eastern scheme covered all questions affecting conditions of service.

(3) The Board of Trade scheme provided that the whole of the men's representatives on the sectional and central boards must be in the company's service, whereas the North Eastern scheme provided that the secretary to each side of the Conference might be a person outside the service of the company, and gave power to such persons to take part in the proceedings. This provision was deliberately inserted to enable the men, if they wished, to appoint as their secretary a trade union official not in the company's service.

(4) The Board of Trade scheme provided for arbitration on proposals agreed to by the Conciliation Board, but not accepted by either the company or the men, and also in cases where the Central Conciliation Board failed to agree on any matter. The North Eastern scheme did not contain any provision for arbitration.

Witness claimed that in spite of representations to the contrary and certain local criticisms from certain sections of the men, the North Eastern Conciliation Conference had succeeded. There had been sixteen meetings of the Conference and forty-eight meetings of the sub-committees, and the number of applications dealt with had been:—Points on the interpretation of Sir James Woodhouse's award, 25 cases; ordinary applications, 280; special grievances, 665; total, 970. In 1888 there was already a strong element of trade unionism on the North Eastern Railway, and the recognition of trade unions and the formation of organisations for discussing and settling questions arising between employers and employed were the common practice in other industries throughout the district. The directors decided that there was no essential difference in regard to the broad principles implied in the recognition of the unions, namely:—(1) Recognition of the right of the men to combine; (2) recognition of their right to choose their advisers and spokesmen, or negotiators.

RELATIONS WITH UNIONS MIGHT BE RECONSIDERED.

Referring to the alterations in the relations between railway companies and unions brought about by the general strike, witness said that whilst the North Eastern directors still maintained the general attitude towards trade unionism which had marked their policy for many years, they felt that the situation created by the action of the four trade union executives might call for a reconsideration of their relations with the unions in important particulars. It was intolerable and fatal to the public interests that a strike, the professed object of which was to secure an advantage which already existed on one railway, should be extended to that railway. The national strike, and still more the last Irish strike, seemed to mark a new departure in trade union policy as affecting railways by the introduction of the "sympathetic" strike, and it remained yet to be seen how far it was possible to maintain the same relations towards the new unionism as had been maintained in the past towards what used to be understood by trade unionism. A few years ago all that unionists asked was that they should not be ignored; now they demanded in most threatening tones that no one else should be allowed to exist. He objected to such a euphemistic term being applied to such an atrocious thing as a "sympathetic strike," and to the term "blackleg labour" being applied to such a harmless thing as the right to work. Apart from questions connected with these recent developments, he would place in the forefront of the disadvantage of recognition the tendency to encroach on matters which ought to be left in the hands of the company. Recognition seemed undoubtedly to create a tendency to claim a voice upon questions the ultimate decision of which must rest with the company. Another disadvantage of unionism was the tendency to put a stop to direct communication between officials and men. Where the men desired that a member of their union should take part in their negotiations witness saw no objection, and, indeed, saw advantages in the plan. He attached, however, great importance to recognition being voluntary on both sides, and not forced on an unwilling employer. A general obligation on employers to recognise a union might easily lead to disputes as to whether that obligation was being fulfilled. To obtain recognition a union must deserve it by its membership and conduct, and then it would obtain it. The A.S.R.S. had done much to prejudice its claims for recognition on many railways by its militant attitude, and the very hostile and bitter tone of its official organ. Witness doubted the advisability, or practicability, of the total prohibition of strikes in this country at the present time, and the establishment of compulsory arbitration.

PENALTIES AGAINST UNIONS ADVOCATED.

Whether strikes were made illegal at all, if recognition were accorded by a railway company, two things were essential—(1) enforcement of rules, contracts, awards, and agreements, and (2) protection of those who are willing to work. Witness

said that a trade union should be liable to pay compensation when the union, or its members, struck improperly, or were otherwise in default. It should be illegal for a union to give strike pay to members striking without notice, or in breach of the terms of an agreement. His recommendations might involve the repeal of the Trade Disputes Act of 1906, but the experience of the last few months had shown conclusively that in absolving unions from liability for loss caused by their actions, Parliament went too far. It might be made a condition of recognition by a railway company that the union should come under such liability. If strikes were not made illegal, "peaceful picketing" should be abolished. It was open to grave doubt whether picketing was not certain to degenerate into personal molestation. If the abolition were not practicable, he suggested a limitation of the numbers of a picket to two or three persons, the wearing of a badge, and the making it illegal to beset a workman's house. He preferred conciliation to arbitration, and the North Eastern Conference to the Board of Trade scheme. In the event of arbitration, he advocated a tribunal of a more or less permanent nature in order to ensure uniformity of decision. The tribunal should consist of three members. Witness deprecated the idea of introducing Judges of the High Court into the tribunal in any capacity on grounds of public policy, nor did he favour the idea of a National Board, which seemed merely placing one more obstacle in the way of prompt decision. In any case, he deprecated having more than two stages of discussion or decision, and if there were to be two, he considered that the first should be conciliation and the second arbitration.

By Sir T. R. ELLIS: He was in favour of collective bargaining in one shape or another, but he would prefer that the union official should not appear upon the scene until later than was at present the case.

Sir T. R. ELLIS: What do you suggest to this scheme—that the grievance should be discussed at a Sectional Board, that they should in the first instance endeavour without the presence of an outside chairman to come to terms, but that there should be a chairman who could be called in at the instance of either party at a later meeting to settle any question not settled by conciliation—a determining authority?—That is very much like the present Board of Trade scheme, sweeping away the Central Board and substituting an independent chairman. I should think that would work satisfactorily.

Witness expressed the opinion that the question of "blackleg" labour was undiscussable.

Replying to Mr. Henderson, Mr. BUTTERWORTH said that nearly half the £20,000 bonus which the Company had just distributed went among clerks and men of that class. He did not think it would be right to put any sort of compulsion upon clerks to perform the duties of men on strike.

You made an attempt to organise a list of volunteer clerks who would take the place of strikers last February?—That is so. If strikes are to be the order of the day I think we should get a very effective organisation to tackle them.

What is the position of the clerk who refuses to register according to your district superintendent's letter of February 8?—It would not stand in the way of his promotion.

Witness further denied that the agreements had been so manipulated on the North Eastern Railway that the men had lost the benefit of them.

Mr. HENDERSON put specific cases which, he said, were from his own constituents, and Mr. Butterworth said he would write privately to Mr. Henderson on the matter.

Would you agree, in spite of the recommendations of an arbitrator, or the agreement of a conference, that a grade on the whole might be drawing less money than formerly?—A manager who tries to bring that about ought to be sacked.

I am afraid we would have a general sacking?—No, you would not. It is very easy to make an accusation against a general manager.

In reply to Mr. Henderson, witness said he had no objection to putting in a return if the Commission desired it. He was not in a position to speak for other companies.

Mr. HENDERSON: I asked a witness yesterday, and he could not unless all the railway companies agreed. Perhaps I am putting it too strongly. He did not feel disposed, unless the other companies did.—We are such outcasts in railway circles that I do not think we should be any the worse.

Mr. CHARLES A. MOORE, manager of the Belfast and County Down Railway Company, said that in his company there could be no grounds for any dissatisfaction at the working of the scheme. Recognition would not be in the interests of discipline or good management. The unwarrantable conduct on the part of a union and its representatives in securing the present strike in his line's goods traffic was deserving of the severest censure possible.

FRIDAY.

With the evidence of Mr. Henry Plews, general manager of the Great Northern Railway of Ireland, the case for the companies was concluded yesterday, and then Mr. J. H. Thomas, M.P., was recalled to give supplementary evidence for the men.

Mr. Plews said that he had failed to find any reasonable ground for granting recognition. It must have the effect of causing greater estrangement between the companies and their staff, and would result in friction and less likelihood of amicable arrangements being concluded. To introduce a third party at a sectional conciliation board would rob it of its character of conciliation. If this third party were given any determining authority it would convert the conciliation into an arbitration. Recognition would weaken discipline, and make the proper working of railways almost, if not altogether, an impossibility. The primary object of the society in pressing for recognition was to use it as a means of coercing every member of the staff to join. If this object was accomplished, and the whole of the railwaymen were under the control of the executives, a position would be created inimical to the interests of the public and dangerous to the well-being of the State. Witness thought the present scheme had not failed. The existing scheme, modified by the omission of the central board, would be a complete, ready, and economical system, fully meeting all the requirements of the case. Some method, however, was required of enforcing on both sides the obligation to carry the award into effect. Whether a strike was ordered by the executive or arose without its sanction, it was equally a breach of agreement, and collective bargaining by these societies had failed.

Mr. J. H. Thomas, M.P., was then recalled. The CHAIRMAN reminded him of the circumstances under which his evidence was being received at present. Mr. Williams, who was the first witness examined before the Commission, explained at the time that his evidence had been prepared, and was being given under circumstances of rather extraordinary pressure, and requested the Commission to bear that in mind, and permit him to add to and explain his evidence later. Their reply was that they would take that into consideration. Mr. Williams made application two days ago, and had deputed the witness to come in his stead.

Witness said that he fully appreciated this, and realised that nothing in the nature of rebutting evidence would be allowed, for the simple reason that it would be an everlasting sitting. He desired to supplement the evidence previously given.

Witness urged that recognition did not mean interference with discipline. In the event of a deputation of the men waiting on the representatives of the company to discuss questions of conditions of employment, they should be accompanied, if they desired it, by a representative of their trade union. He did not mean that if any individual man had some point of difference or grievance he must immediately report to the society, and that the society should insist on accompanying the men to the management. They believed that it was helpful for the men themselves to make local representations first. He explained the care with which the society administered its benefits so as not to interfere with the management or with necessary discipline. He handed in a table showing the benefits paid from 1872 to 1910, excluding strike payments. This was as follows:—Legal assistance, £101,234; unemployment, £111,540; disablement and death, £114,663; Orphan Fund payments, £150,301; Protection Fund, £131,369; total, £618,108. Strike pay amounting to £10,822 had been deducted from the Protection Fund. The sum in respect of unemployment was paid under three different sets of circumstances—that the member is dismissed from his employment for some cause other than his own misconduct, that the member is "played off" in consequence of a dispute or stoppage in another trade, or is on short time through those causes, and that the member is suspended from duty, an action after full and careful inquiry found not to be justifiable. The payments for suspension benefit were only £18,436, as against £93,104 under the other two heads mentioned. In regard to protection benefit, during the thirty-six years ending December, 1910, £23,000 of the amount was paid as damages to the Taff Vale Railway Company, and £22,000 in addition went in law costs.

The Commission adjourned till Tuesday.

Railway Advertising in Yiddish.—The hold which the Yiddish tongue has taken among the population of East London, due to the immigration of foreigners, may be instanced by the facts that the London and North Western Railway Company has issued a four-page handbill of excursions to the Birmingham district, and that classes are held for the instruction of the police in the language.

THE IRISH RAILWAY STRIKE COLLAPSE.

The railway strike, which has caused a great deal of inconvenience throughout Ireland during the past week, to all intents and purposes came to an end on Wednesday. The dispute was due to the refusal of the railwaymen to handle timber coming from a firm which was at variance with its employees. When, therefore, on Wednesday, the Irish Transport Union withdrew the embargo upon railwaymen touching this timber, the bottom was instantly knocked out of the strike and men began returning to work. The first step in the strike was taken on September 21, when the executive of the A.S.R.S. threatened to declare a national stoppage on the ground that all their "efforts to settle the unfortunate dispute have proved unavailing owing to the railway managers not agreeing to cease dismissing or penalising in any form men who refused to handle the traffic of firms where the employees are on strike, and reinstate all men without penalty." The best idea of the commencement of the strike was given in the evidence of Mr. C. H. Dent, the general manager of the Great Southern and Western Railway of Ireland, before the Railway Commission on Wednesday. He explained that on the 15th inst. some loads of timber from Kelly and Co. were brought into Kingsbridge goods station, Dublin, to be forwarded to the country. Some of this firm's employees being on strike two of the railwaymen refused to receive the goods. The traffic manager explained that the company were legally bound to accept the goods, and shortly afterwards the greater number of the goods staff at Kingsbridge left in a body.

The Great Southern and Western line was chiefly affected, some 5,000 of their men being out. It was stated that some 50 per cent. of the men employed at the Dublin Station of the Great Northern and Ireland Railway were out. The other lines were involved to the following extent: Midland, 240; Great Northern, 200; North Western, 230; Belfast and County Down, 400. In the early stages there were some prospects of ugly scenes. Volleys of stones, it was reported, were thrown at engines and trains near Cork tunnel, and some large kegs of butter which had arrived at North Wall, Dublin, were thrown into the river. Later some clerks who were in charge of a consignment of timber at North Wall were attacked and assaulted. Although appeals were made for protection it was not until Wednesday that effective protection was secured for goods traffic passing through the streets of Dublin, and a vigorous resolution of protest was passed by the Chamber of Commerce in this connection.

The disastrous effects which the strikes have had on Irish railways are shown by the weekly traffic returns issued by some of the companies on Tuesday. These were made up on Saturday, that is only two days after the strike was officially declared. The Midland Great Western Company is down by no less than £3,517, and the Dublin South Eastern, though not included in the strike, is down by £405. The figures of the Great Southern are not available, but they will no doubt be the worst.

In order to secure the running of troop trains the War Office sent one half of the Army Railway Corps from Aldershot to take charge of these trains.

FIRM ATTITUDE OF THE GREAT SOUTHERN DIRECTORS.

A difficulty in the way of a final settlement arose on Thursday, when the Great Southern and Western Railway directors met a deputation from the men. Sir William Goulding, the chairman, put to the deputation the terms on which the company would reinstate the men. After consideration, the men agreed to withdraw the restrictions with regard to the handling of traffic in dispute; but they asked for a reinstatement of the whole of the employees without penalty. The company, however, declined to dispense with the new hands, or to reduce the loyal men promoted, and the chairman has intimated that they will go on filling vacancies, individual applications being considered. Mr. Williams, the general secretary of the A.S.R.S., states that Sir William Goulding, in thus presenting the case of the company, declared that the strike must go on, and the men, for their part, said the same thing.

The position yesterday (Friday) showed little change. The men were considering the terms of the directors of the Great Southern Railway. The Midland and Great Western Railway was working satisfactorily, and on the Northern line the conditions assumed a normal character. A fear prevails that the failure to secure reinstatement on the part of the men may lead to acts of violence, some of the strikers having displayed a threatening temper. Mr. Dent, manager to the Great Southern line, is reported to have stated that the works at Inchicore, Cork, closed down on Thursday night. This will throw 1,600 men out of employment. For the first time since the commencement of the strike a goods train on the Great Southern line arrived at Wexford South yesterday.

MEETINGS AND REPORTS.

FORTHCOMING MEETINGS.

- Oct. 4 (Wed.).—**Canadian Pacific Railway** (Annual), Montreal.
 Oct. 18 (Wed.).—**Quebec Central Railway** (Annual), 5, Great Winchester Street, E.C., at 12.
 Oct. 26 (Thurs.).—**Grand Trunk Railway** (Half-yearly), City Terminus Hotel, Cannon Street, E.C., at 12.

(Reports, Traffic Returns, Prospectuses, and all other items of financial intelligence should be sent as early as possible to the Editor of THE RAILWAY TIMES, 12, Norfolk Street, London, W.C. Telephone, 2948 Gerrard. Telegraphic address, Altimetry, London.)

OTTOMAN RAILWAY FROM SMYRNA TO AIDIN.

The 107th half-yearly ordinary general meeting of the proprietors was held on Tuesday, September 26, at Winchester House, Old Broad Street, E.C., the Rt. Hon. Lord Rathmore (President of the Council) presiding.

The LONDON MANAGER AND SECRETARY (Mr. Thos. H. Cooke) having read the notice convening the meeting,

The PRESIDENT said: Gentlemen,—Will you take the report and statements of accounts as read? (Yes.) Then, gentlemen, I have the honour on behalf of my colleagues and myself to move:—

"That the report of the Council of Administration, together with the statements of accounts to the 30th June, 1911, now submitted, be received and adopted, and that in accordance with the recommendation of the Council, a dividend of 8s. per share be and is hereby declared on all the ordinary shares of the Company, payable on and after the 9th October, 1911."

Gentlemen, in submitting this resolution for your acceptance, we have the satisfaction of knowing that the report which we now ask you to adopt presents exceptionally favourable results from the working of the railway for the past six months, and at the same time holds out a reasonable expectation of continuing prosperity for the company in the immediate future. You will remember that when we met you here twelve months ago we had not quite so agreeable a story to tell you, for we were then only just emerging from a series of seasons during which the weather that had prevailed in the districts of Asia Minor served by our line had been, on the whole, unfavourable to the interests of agriculture, and therefore unfavourable to the success of the operations of our railway. But we then comforted ourselves with the hope that (although our profits had been but meagre for the first half of 1910) the latter half of that year would provide us with bountiful harvests and largely increased revenue. That hope was, as you know, amply fulfilled, so that at our meeting in last March we were in a position to report to you absolutely the largest earnings for the completed twelve months which were ever known in the history of our railway. Now we are so fortunate as to present you with another "record," for the results of the traffic for the six months ending with the 30th of June last are better than those we have hitherto obtained from the first half—what we sometimes call the "lean half"—of any preceding year since the line was opened. In those circumstances I imagine that you have no wish that I should go in detail into the items of these accounts (and there is really nothing in them which seems to require special explanation). I shall, therefore, on the present occasion, merely refer in a very few words to the general results. Briefly, then, the receipts on revenue account for the past six months amounted to £139,419, which, as compared with those of the corresponding period of 1910, show an improvement of £24,380. This increase is made up of £3,204 from coaching traffic and £21,175 from goods traffic. On the other side of the account there is a substantial increase of expenditure—the figures being £65,548, as against £53,709, an increase of £11,839. But that is accounted for to a great extent by the larger amount of traffic carried during the past six months, and also by the fact that our general manager very properly took advantage of the favourable conditions in which he found himself for the purpose of improving the state of our permanent way and of our property generally; for instance, as you will have seen by his published letter, the permanent way has been strengthened by the renewal of more than 13,000 sleepers; 4,000 chair-plates have been put in; two miles of the main line have been renewed with 94 lb. steel rails, and ten miles of track have been re-ballasted, while at the same time some of our stations, buildings and goods sheds have been rebuilt and enlarged, and our rolling stock has been reinforced by considerable additions of locomotives, carriages and wagons. I am satisfied, and I know that my colleagues are satisfied, that

this increased expenditure is fully justified, and I have no doubt that you, too, will also approve of it, and all the more willingly because, notwithstanding these additional charges, our net profits amount to £73,871, showing an increase of £12,541 over those of the corresponding period of 1910. Well, gentlemen, the outcome of the working of the railway for the six months with which we are now dealing is, as we have told you in our report, that the balance to the credit of net revenue, including the sum brought forward from the last accounts (after defraying all fixed charges for the half-year and providing for dividend on preference shares) amounts to £45,583, out of which we recommend the payment of an interim dividend of 8s. per ordinary share, leaving a balance of £25,696 to be carried forward. This may seem, perhaps, to some of you a large carry forward, but we are clearly of opinion that it is not excessive, having regard to the importance of maintaining the company's finances on a thoroughly sound basis, of being prepared for any emergency, and of securing, as far as possible, an even rate of dividend, and I feel considerable confidence that the cautious and conservative policy which we now ask you to adopt will commend itself to the proprietors generally. (Hear, hear.) That is all, gentlemen, I have to say as to the report and statements of accounts which we have laid before you. As to the position of the company at the present moment and as to our immediate prospects, the situation is on the whole satisfactory and encouraging. I am sorry to say that cholera has been lately rather prevalent in Turkey, but, although cases still occur, the epidemic seems to have somewhat abated, and it is hoped that with the advent of cold weather it will altogether disappear. While it lasts, however, apart from the danger to life, it must cause inconvenience and even a slight loss of revenue, as the carriage of passengers and perishable goods is, more or less, interfered with by quarantine regulations. I have also to report that there has been some "unrest" amongst members of our staff and our workmen at Smyrna, and large demands have been put forward for increases of pay and other concessions. The council had a few days ago the advantage of discussing this matter with Mr. Barfield, who was just finishing his well-earned holidays, but has now returned to his post, and I may say at once that while we shall, of course, be at all times ready to consider in a fair and friendly spirit equitable requests that may be made to us by our employees, Mr. Barfield may rely upon it that he will have, in resisting unreasonable demands or unfair pressure, the firm and unhesitating support of the Council, and, I am sure, of the proprietors also. (Cheers.) I have now only to add that good progress continues to be made upon the Egirdir extensions, and that it is hoped a further section of 22 miles will be opened in time to carry this season's produce from that part of the country. In other respects also the outlook for the immediate future is, on the whole, as I have said, very encouraging. In his published report the general manager tells us that "the traffic prospects are decidedly good. Cereals in the valleys are excellent in quality, and in quantity are fully 30 per cent. more than last year's; while on the higher land grain sowings are reported to be more extensive, and weather conditions have been very favourable." It is true that our weekly traffic reports have recently shown decreases as compared with those of last autumn; but that is, I believe, explained by the fact that figs, which usually bulk prominently in those reports at this time of year, have not proved quite as plentiful as was expected and have certainly been very slow in coming forward for transport; but, on the other hand, we are led to believe that a larger traffic in cereal crops will compensate us for any deficiency in the fig crop. The weight of the cereals, however, has still to be carried, and it will not begin to make itself much felt in our receipts until next month. Finally, gentlemen, although I will not even now venture to make any confident prophecy, I think we may reasonably hope that (barring some abnormal break in the weather, or some other untoward interference with the regular conduct of our business)—I think we may reasonably hope that our revenue for the whole of the present year will not fall far—if at all—short of the very satisfactory receipts of 1910. (Applause.)

Mr. J. H. TREWBY: I have much pleasure in seconding the resolution.

The resolution was then put and carried unanimously without discussion.

The PRESIDENT: That concludes the business of the meeting. Mr. G. S. OLDFIELD: Before we part, I should like to propose a vote of thanks to Lord Rathmore and the Council of Administration, and I think I may congratulate them, and also yourselves, on the result of the working of the railway during the past half-year. In order, perhaps, to appreciate that

in a word, one may compare the half-year ending June 30, 1910, with the half-year ending June 30, 1911. In the former half-year the carry forward was £35 os. 10d.; this last half-year it is £25,606 8s. 9d. What could be better? What could be more satisfactory? (Hear, hear.) I have great pleasure in proposing a vote of thanks to Lord Rathmore and to the Council of Administration.

Mr. F. D. IBBETT: I shall have very much pleasure in seconding that and in endorsing the remarks of my old friend, Mr. Oldfield. I think with him that it is a very satisfactory position of affairs, and that the policy shadowed is one that I can always support strongly. We must endeavour to maintain our position and have confidence in our Council of Administration and all those who have the best interests of the company at heart. I have much pleasure in seconding the proposition of Mr. Oldfield.

The resolution was put to the vote and carried unanimously.

The PRESIDENT: Well, gentlemen, I beg to thank you all for the resolution of confidence which you have now so kindly carried, and I am particularly glad to have heard what has been said by the proposer and seconder of this resolution, as to approval on the part of the meeting of both our policy as regards the amount of dividend which we now propose and also as regards the attitude which the proprietors wish our general manager and the Council to take up towards any unreasonable demands or unfair pressure. And it is a satisfaction to us to know that we shall have the strong support of the proprietors in any course which we may think it necessary to adopt. I thank you. (Applause.)

DICK, KERR AND COMPANY, LIMITED.

Mr. John Kerr (the chairman of the company) presided on Thursday, at the Cannon Street Hotel, at the ordinary general meeting of the shareholders of Dick, Kerr and Co., Ltd.

The CHAIRMAN, in moving the adoption of the report [which appeared in the last issue of the RAILWAY TIMES], said that in the year's trading keen competition for orders had continued in all departments. The development of electrical power in iron-works and the textile trades and in many other industries showed some progress. If this country did once lag behind Germany and America in the adoption of electricity, it might fairly now be said that the greatest interest had been awakened. A considerable amount of plant has been ordered, and quite a number of important installations were under consideration. At the Preston works the very highest grade of machinery could be turned out in an economical manner by reason of good labour and the best modern equipment.

UNFAIR COMPETITION FROM ABROAD.

Competition for business was acute enough between the home manufacturers, but it was increased by our market being an open one to Continental and American works. These happy manufacturers were secure in their home market, and had ours as a dumping ground. They had every opportunity of maintaining their output. The question of cost was largely one of output. To the working man steady employment was better than intermittent work, even if the nominal wages were slightly higher per week. Work, and plenty of it, was equally essential to employer and employee. The directors were pleased to state that their efforts in the direction of manufacturing steam turbines were meeting with satisfactory results. There could be no question but that this development was on the right lines. In view of the enormous demand for metallic filament lamps, and the fact that the bulk of the lamps used of this class were of foreign manufacture, the directors, after careful investigation, decided to add a lamp factory. To avoid the danger of experimental work they had availed themselves of the experience of a Continental company. The factory was now rapidly approaching completion, and would very soon be in a position to turn out lamps second to none in the market.

INDUSTRIAL UNREST RETARDS BUSINESS.

Proceeding, the Chairman said: "As regards prospects for the coming year, they are encouraging. As soon as international difficulties, which have been causing considerable European anxiety, are settled, an amount of foreign work that is held in suspense should be proceeded with. Although we have been practically free from labour difficulties, there can be no doubt that strikes and threatened strikes all militate against business by delaying work or causing postponement of orders. It is to be hoped the Government will deal in no uncertain manner with 'peaceful picketing,' as the scenes that have recently taken place are a disgrace to the country and a source of public danger. (Hear, hear.) Means can surely be found to deal with this clamant evil without in the slightest inflicting any injury

to the just rights of trades unions. One serious and disastrous effect produced by the reckless policy of a certain section of labour leaders in inciting strikes of the nature and magnitude of those we have just experienced, regardless of the loss and suffering they have produced, is to discourage and frighten the employers of the country and to restrain them from developing their resources for the general benefit of trade, and consequently of labour itself. The balance-sheet represents a rather uneventful year, although the result shows an improvement on the two previous years. You will observe on the assets side an increase of £32,753 on capital expenditure; this is represented by the expenditure on the turbine business, the lamp factory, and additional plant at the Kilmarnock works. The debenture stock has been redeemed to the extent of £50,000. Altogether, since the issue of this debenture stock, £46,570 has been paid off and a reserve fund of £150,000 has been created under Clause 31 of the trust deed securing the debentures. It has always been the policy of your directors to strengthen the position of the debenture and preference-share holders. The contingent liability referred to in the balance-sheet as co-obligants with the Edinburgh and District Tramways Company, Limited, in their liability to the corporation of Edinburgh, under the lease of the tramways, will continue for about nine years. There need be no anxiety under this head, as the tramways are a remunerative undertaking of a first-class character. The plant and machinery have been amply depreciated.

A TRIBUTE TO THE LATE MR. FLETT.

"Regarding the investments, we have experienced the greatest depreciation in the securities recognised as gilt-edged, but this has been fully allowed for in adjusting the total valuation. The re-arrangement of the staff necessitated by the lamentable death of Mr. George Flett last year has been carried out. Mr. Schultz, who has long been actively associated with the business, has been appointed assistant managing director. There was a desire by the staff and directors to commemorate the late Mr. Flett's memory in a suitable manner: the money subscribed by them, in conjunction with a handsome donation by his daughter and 100 guineas by the company, has been the means of endowing a bed in that noble institution, the London Hospital. The directors would like to record their high appreciation of the management and staff for the untiring energy they have displayed throughout the year. I have now to move the adoption of the report and accounts and the payment of the dividends recommended."

Mr. CLAUD T. CAVLEY (deputy-chairman) seconded the motion.

Mr. T. HACKING drew attention to two items of special reserve on the liabilities side of the balance-sheet. The first was balance from last year, £16,000, and the other, special reserve for extensions of manufactories, or replacement of machinery, etc., or special depreciation of the same, £50,000.

The CHAIRMAN replied that the first special reserve was set aside some years ago, and was retained as against a possible liability with regard to the Edinburgh and District Tramways Company's contract. The other was for extensions of manufactories, or replacement of machinery, or depreciation of the same, which, he thought, was a wise provision to make.

DEPRECIATION FULLY PROVIDED FOR.

In reply to other shareholders, the CHAIRMAN stated that in a manufacturing business like theirs it was not wise to disclose the amount of their goodwill; but if any shareholder wished to know it, or desired any other information, it would be supplied to him at the office. With regard to the question of depreciation, there were not many companies that gave this matter more careful attention than the directors of this company.

The resolution was carried unanimously, and Mr. R. H. Prestwich and Mr. T. D. Lingard were re-elected directors.

HIGHLAND RAILWAY.

At the half-yearly meeting of the Highland Railway Company in Inverness on Wednesday, Mr. William Whiteclaw presided.

The CHAIRMAN said the passenger traffic for the half-year showed an increase of £3,000, due to a large extent to the Highland Show at Inverness. As to capital expenditure, their money had been spent chiefly on the new hotel at Strathpeffer. The success of their hotel policy was the feature of the half-year's working. He advised them to continue the policy of doubling little bits of the line, increasing the number of crossing places, and building hotels. The fact was that they could not accommodate their summer visitors in the Highlands. He understood that in the ensuing autumn Session of Parliament the Railway Accounts Bill would become law, and it would cost

them £1,000 in the first year, and £700 per year afterwards. The Insurance Bill, if passed, would probably cost the company not less than £2,000 per year. In this way they had to pay as employers, and if sufficient money was not provided by the State for the purposes of the Insurance Bill any increased sum was going to fall on the rates. That meant that they, as rate-payers, would have to pay a second time. Owing to competition by water carriage at many points of the Highland Railway it would be impossible to increase their railway rates, and it seemed clear that any further expense must come directly out of the pockets of the shareholders. For a good many years he had been warning the shareholders against the depredations of Governments, and if they now found their dividends sadly interfered with they must not blame the directors for not having warned them. Some day, perhaps, the question of the sale of the line to the State might arise, and he took that opportunity of warning them to use their influence to see that when that day came their property had not been already ruined by the exactions of the State and by unremunerative expenditure forced upon them by the State. (Applause.)

The report was adopted, and a dividend at the rate of $1\frac{3}{4}$ per cent. per annum was declared on the ordinary stock.

Mr. BOSHER (Sheffield) moved a vote of thanks to the directors and staff, and said that the evidence given by the chairman before the Royal Commissioners proved to the man in the street that he was wise and level-headed. (Applause.)

Southport and Cheshire Lines Extension Railway.—The receipts for the half-year ended June 30 (including amount payable by the Lancashire and Yorkshire Railway Company for the full year) were £9,064, compared with £8,805 for the half-year ended June 30, 1910. After payment of debenture dividend there is a surplus of £452, which it is proposed to carry forward.

Horncastle Railway Company.—The half-yearly meeting of the Horncastle Railway Company was held at Horncastle on September 20th, Mr. B. P. Stanhope presiding. In moving the adoption of the report, the chairman remarked that the dividend of $6\frac{1}{2}$ per cent. was $\frac{1}{2}$ per cent. larger than in the previous six months. The report was adopted, and it was decided to pay the Great Northern Railway Company £300 on account of money due to them. Mr. J. E. Chatterton was appointed a director in the room of the late Mr. G. Y. Pike.

Glasgow District Subway.—Mr. A. Simpson, in moving the adoption of the report at the forty-third ordinary meeting, held on September 18, stated that after paying the same dividend as at this time last year, they were practically in the same position. In reply to a shareholder, the chairman agreed that if electric power was introduced they would have more passengers. They were quite willing to discuss the matter with the Corporation, and the Corporation knew quite well that the company could not get full value for the undertaking. They were ready to hear what the Corporation might offer.

King's Lynn Docks and Railway.—At the half-yearly meeting held on September 20, at King's Lynn, the Chairman (Mr. W. Pattrick), in proposing the adoption of the report, stated that it appeared that the trade for the current year would very nearly approximate that of last year. The decrease in exports for the first half of this year was pretty well all in coal, and the reason for it was that a very mild winter and spring were experienced on the Continent. What they wanted for their docks was for grain to be cheaper abroad. When it was cheap they got it stored in their warehouses and received nice rents. The export of pig iron was still increasing. The trade for the current three months had improved, so that they might hope to be able to pay the full 4 per cent. on the consolidated stock.

North Eastern of Uruguay Railway.—The annual report, covering the twelve months ended June 30, 1911, states that all rent due to date, and payable by the Central Uruguay Railway Company, under the terms of their lease, has been received, and that after providing for the payment of the interim dividend at the rate of 7 per cent. per annum upon the preference and the ordinary shares for the half-year ended December 31, 1910, the income account shows a balance of £26,367. The directors now recommend a balance dividend at the rate of 7 per cent. per annum upon the preference and 7 per cent. per annum upon the ordinary shares. At the ordinary general meeting, held at River Plate House, London, E.C., on Thursday, Mr. W. Higgins, who presided, said their earnings again showed an increase, the gross receipts being £105,480, as against £100,263. The directors were glad to be able to maintain the rate of the dividend, and he had pleasure in moving the adoption of the report and the payment of the usual dividends.—The resolution was carried.

GENERAL NEWS.

THE ERECTION OF A NEW MIDLAND BRIDGE.

The engineers of the Midland Railway Company performed a notable feat last Sunday. The old steel bridge erected in 1893, which takes the main line between Sheffield and Rotherham over Princess Street, Brightside, was condemned as not being strong enough for the present heavy engines—it was for a double line and weighed well over 100 tons. The Butterley Co., Ltd., Derby, erected a new superstructure close to the old one, weighing about 150 tons. This was completed on Saturday, and at midnight the operation of shifting was begun in heavy rain. The two structures were coupled together and were jacked up on to trucks after the 5.15 a.m. goods train had passed on Sunday, and were then hauled along a temporary road, until the old structure was clear and the new was over its final site. The two were then uncoupled and the new superstructure, on which the rails had all been laid, was jacked down into position. At 8.35 a.m. an engine went over the new span, and subsequently traffic was stopped for an hour to allow of cranes to stand on the new track and move the old girders out of the way. This very creditable operation was superintended and carried out by Mr. Gresley (engineers' department, Derby), Mr. Beresford (Sheffield district permanent way superintendent), Mr. Troutt (traffic inspector for the Sheffield district), Mr. Webb and Mr. Shew (Sheffield district permanent way inspectors).

GREAT CENTRAL SOLICITOR AND TRADE UNIONS.

Mr. Dixon H. Davies, of London, solicitor to the Great Central Railway Company, read a paper on "The Relations of Law and Labour" at the annual provincial meeting of the Incorporated Law Society at Nottingham on Tuesday. There were, he said, some modern provisions of the legislature which tended to set organised labour above the law. The Trades Disputes Act, 1906, contained provisions of that kind. The Government had incurred grave responsibility in granting immunity to trade unions under that Act. Friends of trade unions would do well to bear in mind that there were acts which no society could permit, and that combinations, if unchecked by responsibility, were apt to be tempted to go the length of such acts. It was doubtful whether any hostile foe could inflict on the people of England the miseries which it was in the power of a combination of railwaymen to perpetrate. Besides the repeal of these dangerous and demoralising immunities, it was clearly expedient to add railways to the category of gas works, water works, and other undertakings. A breach of contract by the workmen of such undertakings could still be made the subject of a charge of conspiracy under the Act of 1875. Two proposals were those of Mr. Crooks, to render it illegal to strike until after the dispute had been submitted to an arbitrator; and of Sir Charles Macara, for the formation of a permanent labour tribunal. What the situation indicated was not a hasty abandonment of the system of conciliation and arbitration, but rather a determination to proceed with it, and a courageous grappling with the underlying causes of discontent.

REPORT ON A GLASGOW COLLISION.

The Board of Trade have received from Lieut.-Colonel Druitt a report on his inquiry into the causes of the collision which occurred on August 12 between a passenger train and the buffer stops at Queen Street Station, Glasgow, on the North British Railway. This train, an express from Edinburgh to Glasgow, was not brought to a stand at the proper place, with the result that the engine ran through the buffer stops and mounted the end of the platform, 53 passengers complaining of slight injuries or shock.

The Inspector states that Forrester, the driver of the engine, "could not account for the failure of the brakes, but thinks he might, in the darkness of the tunnel, have placed the handle of the brake valve in the third or 'neutral' position, instead of in the second or 'feed' position, after releasing the brakes coming down the incline, the result being that no air could pass from the main reservoir into the train pipe, and so rendering the brake inoperative. . . . It is unlikely that Forrester would place the brake handle past the 'feed' position into the 'neutral' position, as the notch would be felt by him; and, even if he had done so, the train would have been sufficiently recharged to permit of another application of the brake, while the brake handle was in the 'release' or 'feed' position,

where it must have been, before he could release the brake after slowing at the tunnel cabin. I do not think Guard Young's statement can be reliable. He states the pressure in the train pipe just after passing Cowhairs fell to 25 lbs., but such a reduction would have brought the train to a stand in a very short distance. Also the pressure must have risen in the gauge before the brakes could be released on the incline after the application for slowing at the tunnel cabin, and Young states this did not occur. After the collision the air pump and brake valve were removed from engine No. 575 and tested on another engine and found to be in perfect working order, and the carriages of the train, with the exception of the two rear ones, were worked out from Glasgow on the 3.5 p.m. train, and the brakes were found to be also in perfect order. Thus, the mishap was," Colonel Druitt considers, "due either to Driver Forrester mismanaging his brake in some way, or else in entering the station at too high a speed and not applying his brake soon enough before reaching the buffer-stops. It will be seen from the evidence of the carriage examiner, who was at the far end of the platform when the train arrived there, that the brakes were not on any of the vehicles except the guard's brake, and that when the train came to a stand he examined the vehicles and found every brake block to be then tight on." Attention is directed in the report to the speed at Cowhairs Station being above that laid down in the regulations, to an excess of 12 tons in the weight of the train, to the length of the train exceeding the platform by 105 feet, and to the advisability of long hydraulic stops being substituted for the oak buffer beam stops, as the station is at the bottom of an incline.

THE INSTITUTE OF METALS.

The fourth autumn meeting or congress of the Institute of Metals was held at Newcastle-on-Tyne on September 20, 21, and 22. The Institute is only three years old, and already numbers over 600 members. Sir William White was president for the first two years, and was succeeded by Sir Gerald Albert Muntz, who will be succeeded next year by Professor W. Gowland, of Sunderland. The members were received by the Lord Mayor, Sir W. H. Stephenson, in the Armstrong College. An influential Reception Committee had been formed, under the chairmanship of the Hon. Sir Charles Parsons.

The object of the Institution is research into the nature of non-ferrous metals and their alloys, with especial reference to their corrosion. The President presented a report from the Corrosion Committee, and alluded to the new experimental plant which the Institute was setting up at Liverpool for the purpose of endeavouring to solve the problem of corrosion in condenser tubes. It was a work of very great value, the real value of which was not yet fully realised. The whole of the money obtained by subscription had been exhausted in the construction of the plant.

NON-FERROUS METALS IN RAILWAY WORK.

Amongst the numerous papers submitted to the Congress was one by Mr. George Hughes, chief mechanical engineer of the Lancashire and Yorkshire Railway, on "Non-Ferrous Metals in Railway Work." Mr. Hughes was not able to be present owing to the trouble he was having with his men, of whom 3,200 were out on strike at Horwich. The authors of the papers (which had been distributed) were restricted to a ten minutes' summary, while the speakers in the discussions were only allowed five minutes, except by special invitation. The secretary, Mr. Shaw, read a summary of Mr. Hughes's paper, stating that the author had placed on record some of the methods of working, and uses pertaining to, the non-ferrous metals in locomotive and carriage construction. The use of copper was described in the shape of plates, stays and tubes, and analyses, tests, specifications, together with life of material, and instances of wear and failure were given. Copper fireboxes on the Lancashire and Yorkshire Railway had a life of from 10 to 10½ years, an average mileage for the older engines with 140 lbs. pressure being 210,000 miles. Engines with 160 lbs. pressure ran from 235,000 to 272,000 miles. Individual tube plates showed a life of 7½ years. Workshop methods, such as patching of copper fire-box plates, brazing copper steam pipes, melting and mixtures of brass alloys were dealt with. The moulding and coring of an injector casting were also referred to. The author stated that brass slide valves of the unbalanced type would run 1,000 miles with a wear of .035 inch on the face. Balanced valves wear .0053 inch per 1,000 miles, whilst even better results were shown from a modified form of valve for super-heat designed by the author. A short account of the bearing metals used under the name of white metals was

included, together with a note on non-ferrous metals and alloys used in the railway carriage department.

ALUMINIUM IN CARRIAGE CONSTRUCTION.

An interesting reference to aluminium in carriage construction was made, Mr. Hughes stating that for the Liverpool and Southport electric line aluminium panels had been adopted in the carriages. The cost was £13.0 per car, as compared with £3.4 for steel and £9.3 for baywood mahogany; but a great saving was effected in haulage—of 33 per cent. as compared with mahogany, and nearly 60 per cent. compared with steel. The lessening of dead weight was a great consideration in the case of electric trains subject to frequent stops where rapid acceleration and retardation were essential.

PERSONAL.

Mr. Frederic Northcote Chapple, of 80, Bishopsgate Street, London, has been elected a director of the San Paulo (Brazilian) Railway Company, Ltd.

Mr. Charles Cudbird, station master at George Lane, South Woodford, Essex, has been awarded the Edward Medal by the King for bravery in rescuing a woman who fell on the line in front of a train.

Sir Charles Owens, general manager of the London and South Western Railway, has been elected a director of the Plymouth and South Western Junction Railway Company, to fill a vacancy caused by the death of Mr. A. S. Harris.

North British Appointments.—Mr. Strang, district traffic superintendent at Burntisland, has been appointed chief assistant to Mr. Black, the new superintendent of the line, North British Railway, and Mr. John Strachan, goods manager for the southern and eastern districts, will be traffic superintendent at Burntisland.

Mr. J. J. McCabe, assistant district traffic superintendent of the North Eastern Railway at Middlesbrough, has been promoted to be dock superintendent at Tyne Dock, where he will have charge of both the commercial side and the traffic working. Mr. McCabe has been in the service of the North Eastern Railway Company since 1883.

Mr. F. L. Beard retires to-day from the position of secretary of the Isle of Wight Central Railway, and Mr. George Henley has been appointed secretary in addition to his present position of manager. All communications should be addressed to the company's general office at Newport, Isle of Wight, the London office at Ironmonger Lane having been closed.

Mr. Charles J. Brown, engineer-in-chief of the North British Railway, has been appointed to succeed Mr. Alexander Ross as engineer-in-chief of the Great Northern line. Mr. Ross had held this position since 1897. Mr. W. A. Fraser has been appointed to fill the post vacated by Mr. Brown. He has had a wide experience of railway engineering, and has been engaged in important constructional works.

GRAND TRUNK RAILWAY COMPANY OF CANADA.

The Grand Trunk Railway Company of Canada has issued the following statement for the month of August—

Grand Trunk Railway Company of Canada.

	Month of August.		Inc.	July 1 to Aug. 31.		Inc.
	1911.	1910.		1911.	1910.	
Gross receipts.....	£729,150	£630,400	+ £98,750	£1,414,750	£1,152,000	+ £262,750
Working expenses	533,800	454,900	+ 78,900	1,052,200	890,300	+ 221,900
Net earnings...	£195,350	£175,500	+ £19,850	£362,550	£321,700	+ £40,850

OBITUARY.

Mr. W. F. Copeland.—The death has occurred at St. Aubyn's, Dalkey, of Mr. Wm. F. Copeland, Irish traffic superintendent of the Lancashire and Yorkshire Railway.

Herr Adolph Schwiager, a director of the Siemens Schuckert and Siemens and Halske Works, and a pioneer of railway electrification, has died suddenly at Wiesbaden, at the age of 66.

Mr. Josiah Wharton, the chief traffic manager of the Lancashire and Yorkshire Railway Company, died last week at his residence, Fylde Lodge, Thornton-le-Fylde, in his 66th year. Mr. Wharton spent nearly the whole of his life in the service of that company. He rose to be goods manager in 1902, and was appointed last year to the position he held at the time of his death.

RAILWAY NOTES.

London Stations Closed.—Notices have been posted at the Camberwell and Walworth Road stations of the South Eastern and Chatham Railway intimating that these stations will not in future be open for Sunday traffic. The Sunday patronage of these stations has gradually declined until the number of tickets issued is but half-a-dozen. The falling away of the traffic is attributed to the competition of the tramways.

Important Railway Contract for Belgium.—The Egyptian State Railways Administration have awarded Messrs. Baume and Mercier, of Haine-St.-Pierre, Belgium, the contract for a new double-track bridge to span the Ibrahimieh Canal, near to Assiut, on the direct route from Cairo to Luxor. The competition was international. It is understood that the Belgium price was the lowest, while that of the Cleveland Bridge Company, of Darlington (the only tender received from Great Britain), came next.

Brighton Company's Oldest Pensioner.—The Rev. J. B. Bacon-Phillips, Crowhurst Rectory, Sussex, writes:—"Happily synchronising with the exact date of the 70th anniversary of the opening of the Brighton line, Mr. Isaac Oldaker, the company's oldest pensioner, entered his 100th year on September 21. He is in splendid health, with every faculty unimpaired, and walks two or three miles every day. The oldest ex-station-master in England, he has lived at Brighton for 33 years, and bids fair to join the unique and ever-lengthening list of Brighton's centenarians."

Railwaymen's Garden Party.—On Sunday last, at the residence of Lord Willoughby de Broke, Compton Verney, the directors of the Stratford-on-Avon and Midland Junction Railway entertained the staff to a garden party. Mr. H. Willmott, the chairman of the directors, said the directors felt that during the recent troubles the servants had conducted themselves in a most loyal manner, and as a small mark of appreciation they would give a day's pay extra to every servant who had done over six months' service. During forty-six years' railway service he had never heard of a whole staff at one meeting, and he hoped it would be a forerunner of further meetings of that kind. He was very proud of the staff and everybody connected with it. Lord Willoughby de Broke, a director, mentioned that the gathering was agreed upon long before the recent industrial struggle. On their railway they were hardly conscious of the strike. He hoped the garden party would be the beginning of many meetings of the kind, for such gatherings would promote better feeling. A hearty vote of thanks was accorded Lord and Lady Willoughby de Broke.

October Train Arrangements.—Important alterations in time tables come into operation to-morrow, October 1, but on a number of systems the seaside excursion services are being continued for a month longer at the request of the local authorities, in order to make up for the loss of patronage suffered during the general railway strike. On the Great Northern the sleeping car express for Scotland, hitherto leaving King's Cross at 8.15 p.m., will leave at 8 o'clock, and certain other trains to Scotland will be discontinued from to-day. The 2 p.m. King's Cross to Manchester will leave at 1.40 p.m., while the 4 p.m. ex-King's Cross will continue to convey a through carriage to Woodhall Spa, arriving at the Lincolnshire health resort at 6.58 p.m. The list of excursions arranged by the Great Northern Railway Company for October and November is a varied one, and covers a very wide area. The London and South Western Railway Company has made an advertising feature of the West Country Riviera for autumn holidays, and as the weather has been superb no doubt their enterprise is gaining a reward.

Rewards for Loyal Employees.—Mr. Alfred Aslett, secretary and general manager of the Furness Railway Company, has issued the following notice:—"I am desired by the chairman and directors to convey to all those employees connected with the

sectional conciliation boards who remained loyal to the Furness Railway Company during the general railway strike, that they are to receive a full week's pay instead of the bonus of 50 per cent. on their weekly wages for three days during the period of the strike. The bonus payment of one week's wages will also apply to the employees on both the L. and N.W. and Furness Joint Line and the Furness and Midland Joint Line who are associated with the conciliation boards. The difference between the 50 per cent. bonus for three days and the full week's pay will be included in the wages sheets for the week ending September 9. This further recognition by the directors of the loyalty of the staff during the period of the railway strike will, I feel sure, be fully appreciated by all those employees of the company concerned." The North Eastern Railway Company has decided to pay its loyal employees a bonus amounting in most cases to nearly double pay for all time worked. The total amount of the bonus will come to a little over £20,000. The directors have also expressed their appreciation of the conduct of the salaried and clerical staff, who rendered or offered special services, and also great satisfaction that during the crisis valuable services were rendered by many members of the general public.

The British Standard Brake Block

NOW UNIVERSALLY ADOPTED BY THE LEADING RAILWAY COMPANIES.

WHY?

Because we cut down your present cost 40 to 60.

THEREFORE

Shift the responsibility on to us.

Our Brake Shoes last $2\frac{1}{2}$ times the life of the ordinary cast iron Block, with equal braking effect, and slightly less wear on the wheel tyres.

By our new design and blending of metals the Shoe can be completely worn out without danger.

One Shoe only, interchangeable and reversible for all classes of Carriages, Wagons, Vans, etc.

Don't theorise: get the facts from the list of Railways we now supply.

Our Representatives, with suitable samples for trial, are at your command.

The National Rail & Tramway Appliances Co. Ltd.,
12-18, TAYLOR STREET, LIVERPOOL.

Telephone: 1198 Royal. Telegrams: "Brakeblock. Liverpool."

COMPANY NOTICES.

Demerara Railway Company.

NOTICE is hereby given that the next Half-Yearly General Meeting of this Company will be held at the Cannon Street Hotel, Cannon Street, London, on Friday, the 20th October, at 12 o'clock, to transact the general business of the Company and to appoint an additional Director.

The Transfer Books of the Company will be closed from the 9th to the 20th October, both days inclusive.

R. A. ROBERTSON, Chairman.

H. G. McVARDIE, Secretary.

100, Cannon Street, London.

20th September, 1911.

The Buenos Ayres Great Southern Railway Company, Limited.

NOTICE.

THE Board of Directors of the Buenos Ayres Great Southern Railway Company, Limited, hereby give notice that the Ordinary General Meeting of the Company will be held at the Offices of the Company, River Plate House, Finsbury Circus, in the City of London, on Wednesday, the 18th October, 1911, at 12 o'clock noon, when the Directors' Report and an audited Statement of Accounts for the year ended 30th June, 1911, will be presented, and the business of the Company will be transacted.

And notice is hereby further given that at the said Meeting resolutions will be proposed for the purpose of increasing the Capital of the Company, which resolutions have been submitted to the Board of Directors and approved by them.

The Transfer Books and Registers of Members of the Company will be closed from the 28th September, 1911, until the 12th October, 1911, both days inclusive.

Dated the 6th October, 1911.

By order of the Board.

A. GHEE, Secretary.

TENDERS INVITED.

South African Railways.

THE High Commissioner for the Union of South Africa is prepared to receive Tenders for the supply of:

1 732 lb. Tons Rails, 80 lb. Section.

21 420 lb. Tons Fish-Plates for 80 lb. Section

Rails.

40 118 lb. Tons Chair-Plates for 80 lb. Section

Rails.

Forms of Tender and all particulars may be obtained on application at the Office of the High Commissioner, Stores Department, 100, Victoria Street, Westminster, S.W.

Tenders are to be delivered, in sealed envelopes, addressed to the High Commissioner for the Union of South Africa, 72, Victoria Street, Westminster, not later than noon on the Twenty-fifth day of October, endorsed "Tender for Rails, Fish-plates, and Chair-plates."

The High Commissioner does not bind himself to accept the lowest or any Tender.

The Great Indian Peninsula Railway Company.

THE Directors are prepared to receive Tenders for the Supply of the following Stores, namely:—

Screw Couplings,

Wood Handles,

Anvils,

Copper Pipes, Brass Sheets, etc.

Spark Arresters, Wire Gauze, etc.

Leather Bolting,

Copper Rods,

Bolts, Nuts, Rivets, etc.

Specifications and forms of Tender may be obtained at this office on payment of the fee for the specification, which payment will not be returned. Tenders must be delivered in sealed envelopes, addressed to the undersigned, marked "Tender for Screw Couplings," or as the case may be, not later than 11 o'clock a.m. on Thursday, the 12th October, 1911.

The Directors do not bind themselves to accept the lowest or any Tender.

J. I. BERRY, Secretary.

A.S.R.S. AND THE IRISH STRIKE.

One general impression which may be carried away from a survey of the proceedings of the annual meeting of the Amalgamated Society of Railway Servants, which was held during the past week in Carlisle, is the absolute utility of the whole business. Whether one regards the denunciations directed against the Government for employing the military in the British and Irish railway strikes, the condemnation of working agreements and combinations among railway companies, the resolution in favour of railway nationalisation, or the resolution threatening a general railway strike in the United Kingdom if the Government would not do what this precious trade union wanted, one is struck with the helplessness and hopelessness of the position of the society. As regards the first of these points, the grievance of the employment of troops is now an old story as far as the British strike is concerned, but the society still refuse to see that such employment was not a case of taking sides in the strike, but was a step absolutely necessary for the protection of the community. If the trade union persists in calling such a course "taking sides," then that is an admission that the strikers were at war with the mass of the British people. The main objection to combinations of and working agreements between railway companies appears to be that in the result fewer men are likely to be employed. That may be so in the first place, but such a result must soon be counterbalanced by the increased volume of business. Even if fewer men are employed, the objection is based on the sedulously cultivated fallacy that railways are worked primarily for the benefit of the employees. While all possible consideration should be given to employees and cases of individual hardship prevented, no railway company can be blamed for introducing whatever economies are possible in working. Curiously enough, the expression of objection to railway companies combining was followed up by another resolution in favour of railway nationalisation. This, of course, is the form of combination which would more than any other reduce the number of railway employees required. Some of the delegates evidently saw that point, and they avoided absolute stultification by resolving in favour of a universal eight-hours day for railway servants. The idea was that the eight-hours' day would prevent the reduction of employment which would otherwise result from nationalisation. Nobody seemed to inquire whether, apart from anything else, it would be possible to work the railways at all if there was a fixed eight-hours' day. The further question of how the railways would contrive to pay their way never appeared to emerge into consciousness. In regard to the fulminations over the Government and the Irish strike, it is surely sufficiently pungent comment to note that at the very time that the meeting of this society was passing its resolution the Irish strike was being settled by the men accepting the directors' terms without any reference to the Amalgamated Society at all. Previous to that the Irish railway servants in general had refused to obey the society's order for a general strike. We may leave the society at present in its paralysis, and turn for a moment to the Irish case. From the men's point of view there was

something like a reason for the British strike, but there was none at all for the Irish one. It was gratuitous and unjustifiable from the start and was backed up by no body of public opinion. The men struck, not because of grievances, but because their employers insisted on carrying out their bounden duty of accepting traffic from traders. Whether these traders were involved in disputes with their own men or not had nothing to do with the railway companies or their employees. The Irish railway servants have been very generously treated, seeing that the great bulk of them have been taken back, but they have been forced to undertake that in future they will handle all traffic offered. It may thus be hoped that Ireland will not soon again from such a cause be plunged into the misery which this strike has caused.

THE END OF THE EVIDENCE.

A brief sitting on Tuesday last brought the public proceedings of the Royal Commission to a close and the commissioners are now engaged in the preparation of their report, which, the chairman remarked, they hoped would be issued without undue delay. The only further witness heard since our last issue was Mr. Marwood, of the Board of Trade, and his evidence was interesting because of what he could not say. Not having been present at the Conferences in November, 1907, he was unable to say whether or not the companies were promised relief from recognition for seven years in return for their acceptance of conciliation boards and arbitration, and the consequential handing over to an irresponsible party of the determining of their servants' rates of pay and hours of labour. The Commission has met on 26 days, and from Monday, August 28th, to Friday last they have sat each day from 10.30 to after 4 o'clock, except on Saturdays and Sundays, and on one Monday. Mr. Beale was absent one day and Mr. Henderson for a day and a half; the other members have not missed a sitting. This close devotion to the work in hand has been characteristic of the Commission, and there is reason to believe that the preparation of the report will be dealt with in an equally businesslike way. The Commission has heard 67 witnesses, one of whom was from the Board of Trade. Of the remainder, 10 were trades union leaders, 23 were unionist employees, 10 were non-unionists, and there were 23 witnesses for the companies. From the evidence given it would appear as though the scheme had not had the fair trial at first that it deserved. The companies, naturally, were not enthusiastic and did not hurry, and the men were handicapped by having to carry the All-Grades Programme like a millstone round their necks from the beginning of the journey. The men, too, counted on too much, and arbitration has given results which have fallen short of their expectations. Then the scheme commenced its operations at a bad time. As Mr. Sam Fay observed, the years 1908-9 were periods of depression, when reductions and economies were the order of the day and not the advances and concessions called for in the All-Grades Programme. The decreases in traffic led to less train mileage which, with better loading of trains, called for fewer drivers, firemen and guards, consequently there was considerable re-grading. Then the length of the award has possibly been for too long a period. In fixing a term for its continuance the arbitrator is acting within the regulations laid down in the scheme, but to shut out all hope of re-considering a vexed question for a period of five, six or seven years has not been pleasing to the men. All this caused disappointment and, possibly, irritation. Added to which there have been, no doubt, numerous cases where a too literal interpretation of the law has been adopted. The men who have made these complaints have, generally, stated that this has been done by "understrappers" and minor officials without the knowledge and approval of their superiors. As to the scheme itself,

there would seem to be a general consensus of opinion that it is satisfactory. The A.S.R.S. would abolish the sectional boards, but the Locomotive Society and the companies would eliminate the central boards. It is possible, too, that a determining outside authority may be allowed to come into the sectional boards at the request of both parties, to assist them in their deliberations, and may be allowed to give a casting vote. Any such decision would, no doubt, be open to revision within a certain period. When an outside authority is brought in the men may be allowed to have an outside advocate if they choose. It would not surprise us to find that the Commission suggests that picketing shall be declared illegal, or, at all events, that a man's house shall be exempt from picketing. As to recognition, it is difficult to forecast. Any advantage that lay with the men after the companies' representatives had given their evidence would appear to have been lost by the want of success on the North Eastern, and, above all, by the action of the A.S.R.S. in Ireland. If recognition be granted it may be anticipated that it will be to a very limited extent and with a proviso that the trades union funds shall be liable to actions for damages for breach of contract. This, probably, requires an amendment of the Trades Disputes Act of 1906. If so, as long as the present Government is in power this cannot be regarded as within the sphere of practical politics.

ARGENTINE RAILWAY RESULTS.

For a good many years past the leading Argentine railways have been able to maintain their dividends at regular rates, and the announcements made during the present week indicate that this policy is being continued. The Buenos Ayres Great Southern Company has again declared a dividend at 7 per cent. for the year, and is carrying forward a balance of £137,000. This compares with the balance at the close of 1909-10 of £124,600. It must be remembered that during the past year this company has had to provide the full dividend on the 1910 extension capital, which was previously receiving only 4 per cent. interest. This circumstance alone added about £180,000 to the capital charges of the past year, the 1910 extension capital having amounted to £6,000,000. The only change that has taken place in the Great Southern dividend for the past ten years is that dividends are now paid *less* income tax, instead of free of income tax, as was the case until last year. It says a good deal for the elasticity of its revenue that the company has been able to overtake the large new capital charges of 1910-11 without any reduction in the distribution on the ordinary stock. The Buenos Ayres Western Company is in an even stronger position—not only is it paying 7 per cent. dividend less tax for the past year, but a bonus of $\frac{1}{2}$ per cent. is to be distributed, also less tax, and a balance carried forward of £189,000. A year ago the dividend was 7 per cent., free of income tax, and the balance carried forward was £163,000. Upon the present occasion a transfer of £120,000 is made to general reserve, £10,000 to staff pension fund, £5,000 to benevolent fund, and as already indicated, the balance carried forward is increased by about £26,000. The $\frac{1}{2}$ per cent. bonus is, of course, a new feature, as no leading Argentine railway for many years has exceeded the distribution of 7 per cent. upon its ordinary capital. This extra $\frac{1}{2}$ per cent. may fairly be treated as compensation for the fact that income tax is now being deducted from the dividend payments of the company. From the year 1904 onwards dividends were paid free of income tax, but in their annual report for 1909-10 the directors announced their intention to deduct tax in future, that course being adopted by other Argentine companies. The report of the Buenos Ayres Western Company for 1910-11 shows that the gross receipts of the year advanced by £334,000, and of this

sum £241,000 was additional net profit—an excellent result. The ratio of working expenses was reduced from 56.52 to 52.86 per cent. of gross receipts. It is interesting to note that the Board has received a report upon the proposed electrification of the suburban section of its line, and this is now under consideration. It is intended to increase the capital by £2,000,000, and the probability is that this new capital will take the form of Preference shares. The Central Argentine Railway has also announced its dividend for the year ended 30th June last. The rate is maintained at 6 per cent. for the whole year, which implies that the Deferred stock will also receive 6 per cent. No increase in the distribution had, of course, been looked for, although the company enjoyed a large addition to its published receipts. These results of the three leading railways of the Argentine Republic will certainly be regarded as very gratifying to the proprietors.

Weekly Traffic Summary.

The traffic receipts for the week ended October 1, as officially published by the fifty-one principal railways of the United Kingdom, amounted to £2,434,172, which was earned on 20,400 miles, being at the rate of £119 6s. 5d. per mile of line open. For the corresponding week of 1910 the receipts of the same lines amounted to £2,337,388, with 20,346 miles open, or £114 17s. 7d. per mile. There was thus an increase of £96,784 in the receipts, an increase of 54 in the mileage, and an increase of £4 8s. 10d. in the receipts per mile. Thirty-three of the returns distinguish between the receipts from passenger and goods traffic, and these show an increase of £44,976 (or £2 2s. 7d. per mile) in the passenger receipts, and an increase of £51,872 (or £2 8s. 11d. per mile) in the receipts from goods traffic. The aggregate increase of the thirty-three railways for thirteen weeks in the passenger receipts has been £54,850, while the aggregate decrease in the goods traffic was £190,951. The aggregate receipts of the fifty-one railways for thirteen weeks (July 2 to October 1) amounted to £31,391,751, in comparison with £31,585,492 in the corresponding period of last year—a decrease of £193,741. Owing to the strike on the Irish railways, which was terminated on Wednesday last, the traffic receipts of the Great Southern and Western Railway were not published and are consequently omitted. The returns, however, embrace all the other Irish systems.

Index Numbers of Railway Debentures.

Our Index Numbers for the prices of best debentures of English Railways, based on the average yield obtained from these stocks, are repeated below, and the table is brought up-to-date. The rate of interest is assumed to be 3½ per cent.

New Turbine Steamer for the S.E. and C.R. Company.—The new turbine steamer "Engadine" of the South Eastern Railway was recently launched at Dumbarton. The vessel will develop a speed of about 23 knots on the Dover-Calais service, and will thus bring France within an hour's journey of England. She is a sister-ship to the "Riviera," which was launched in July last. Particulars concerning the construction of both vessels appeared in the RAILWAY TIMES of August 19.

Rates for money and discount have come down during the week, and the payment of the quarterly dividends on Consols and India loans has made money cheap for the time being. This, however, is not the kind of cheapness with which it is safe to take liberties, since it is due as much to the paucity of satisfactory borrowers as to the multiplicity of eager lenders, and a comparatively small change in the market position would suffice to put quite a different complexion on the state of affairs. The Bank return shows large withdrawals of gold and bullion for foreign countries, as well as the usual changes which mark the close of the third quarter of the year. In addition to £904,000 taken to supply the demand for coin within the country, £1,592,000 was exported, while the active note circulation expanded by £556,000. The Reserve is thus £3,052,000 lower. Public Deposits have declined only £848,000, in spite of disbursements in dividend payments, but the increase of £1,498,000 in Government securities probably reflects borrowing by the Government upon deficiency bills to supplement its resources. Other Securities are £800,000 down, and Other Deposits are reduced by £843,000, which brings them a million and a quarter below the level which obtained at the corresponding date of last year, and does not argue any prolonged ease in the money market. Prophecy, however, is more hazardous than ever, for never have financial affairs been so much governed by political considerations as now. Prices on the Stock Exchange move to the activities of the diplomatist and the politician rather than to the

activities of trade. The Moroccan difficulty is said to have been ameliorated owing to pressure which French financiers have been able to exercise in Berlin; on this assumption, coupled with the discredit into which the Amalgamated Society of Railway Servants have now fallen, the market was encouraged to raise prices in Home rails and kindred stocks at the beginning of the week. Foreign bonds have also been higher, and that has always been considered a useful plank in the platform upon which to found a general rise in domestic securities. In this case, however, there are not wanting critics who declare that the rise in foreign securities is a manipulated business, designed to assist certain international financiers who had been surprised by the Italian movement in Tripoli to reduce their commitments in Turkish securities. It is a long cry from such considerations to the price of North Western stock or Brighton A, yet in these days the connection is closer than that with the recorded traffic receipts, and while twenty persons may be heard vaticinating upon the early end of the war in Tripoli, taking for granted it will be the signal for an upward movement in Home rails, hardly one alludes to the fine receipts from traffic now being published.

Last Saturday British Government stock and Home rails suffered a marked decline owing to the news that hostilities had actually commenced between Italy and Turkey. United States railways were also affected so far as it was possible to tell to what this erratic stock market really responds to. Canadian and Mexican rails went the same way. On Monday a recovery ensued, which embraced all the stocks mentioned, the Mexican railways excepted. The movement was based on the almost unanimous voice of the Continental Press that the duration and area of strife in the Mediterranean would be circumscribed. Like opinions prevailed the following day, when Great Eastern rose $1\frac{1}{4}$, South Eastern A the same amount, Brighton A 1, Great Central B Pref. also 1, Chatham Second Pref. $1\frac{1}{2}$. North London and Underground Electric income stock were lower, but the general tendency was upwards, both in this market and that for Colonial and foreign rails. British Government stocks were again higher. Mexicans rose $2\frac{1}{2}$, but this was due to the election of Señor Madero to the Presidency. On Wednesday an irregular tone supervened. Profit-taking began in Home rails. American railways recorded many fluctuations of considerable amplitude. Government stocks, both foreign and domestic, continued to rise, and this fact was a great encouragement to other markets. The next day, although Consols again advanced, there were backsliders among foreign securities, and the markets generally remained irregular, with very little business doing. On Friday conditions were very much the same: the uncertainties hanging round domestic and European affairs directed attention to stocks of concerns outside this area. United of Havana recovered the loss which had marked the dividend announcement the day before. The future of this company, both immediate and remote, is very promising, and the present price—84—includes the dividend of 4 per cent. now recommended by the directors. The yield is, therefore, 5 per cent., with the prospect of a considerable and permanent improvement next year. Taltal shares also are likely to see better prices. The nitrate industry is healthy and progressive. The traffic of the line is likely to show a rapid improvement during the next few years. Home rails were quiescent, with few changes, and none of any significance.

The movements of the week are set forth in the following table:—

P. and O. Liner for the King.—The new P. and O. liner "Medina," which during the past few months has been fitting out at Greenock to convey the King to India in November, is now ready for sea. Her internal furnishing will be under superintendence from Buckingham Palace.

Threat to Block a Bill of Three Companies.—A meeting of railway clerical workers at Manchester has passed a resolution protesting against the salaries paid by the Lancashire and Yorkshire Railway Co., and against the refusal to institute a wages scale. The general secretary of the Railway Clerks' Association stated that the Midland and London and North Western services had set up a definite scale rising to £110 yearly at the age of 29, and the Lancashire and Yorkshire were the only large company who had failed to fall in line. This state of things had got to be altered, or the Triple Railway Bill shortly to be introduced into Parliament would not go very far till the Lancashire and Yorkshire Railway toed the line.

RAILWAY COMMISSION OF INQUIRY.

CONCLUSION OF THE EVIDENCE.

The fifth week of the sittings of the Royal Commission of inquiry into the working of the railway conciliation boards opened on Tuesday last at the Royal Commission House, Westminster, before Sir David Harrel, chairman, and a full attendance of the members of the Commission. The reference to the Commission is in the following terms:—

"To investigate the working of the railway conciliation and arbitration scheme signed on behalf of the principal railway companies and of three trade unions of railway employees at the Board of Trade on November 6, 1907, and to report what changes if any are desirable with a view to the prompt and satisfactory settlement of differences."

When the Commission rose on Friday of last week, the case for the railway companies had been concluded, and Mr. J. H. Thomas, M.P., assistant secretary to the A.S.R.S., was allowed to be recalled to supplement evidence already given on behalf of the unions by Mr. Williams, the secretary. Mr. Thomas's evidence included the following, besides the report given in the last issue of this journal.

The WITNESS did not suggest that it was possible for any society to draft or frame any code of rules which would guarantee that no man should cease work, but experience proved that where the society had been satisfied that the men were in the wrong it had succeeded in many instances in preventing a dispute. As two recent instances he mentioned the dispute on the Barry Railway, and the threatened stoppage of Midland and Great Western Shunters at Swansea. No scheme would give satisfaction to railwaymen which did not provide for:

(a) The full and complete right of the Unions to negotiate, if desired, on behalf of their members on any questions of conditions of service which had not been settled by the men concerned and their immediate superior officers; (b) the abolition of the present sectional boards, central boards, and compulsory reference to an *ad hoc* arbitrator; (c) the substitution of one composite board for each railway; and (d) the provision of a National Board composed of representatives from the men's Trade Unions and the railway companies, to which questions not settled at the composite board may be referred.

A.S.R.S. HELPLESS IN THE IRISH STRIKE.

Replying to Mr. BEALE, witness admitted that the question of recognition had never been dropped, though he agreed that in a sense it had remained asleep since the Board of Trade settlement. It was not raised again until August 15 last.

Did you not call out all your men in direct violation of their contracts of service?—Yes.

Yet you say you do not interfere with discipline?—Yes. There were special circumstances at that moment. If the executive had not done as they did there would have been scores of sectional strikes which would have been far worse than the national strike.

You did it in the interests of the railway companies?—The result turned out to be as much in the interests of the railway companies as of the men.

Witness said that he had not been in Ireland during the recent troubles, and could not, therefore, accept responsibility for what had happened. Before the executive committee went to Ireland, however, the men were out on strike. What followed was largely the result of the railway company's action in refusing to meet the union leaders.

Mr. BEALE pointed out that the strike resulted from the refusal of the men to handle certain goods, and in reply the witness admitted that the society had supported the men on strike.

Mr. BEALE: Is it the policy of the society to do that?—No.

It was against the policy of the society?—Yes.

You were dragged into it?—Yes, we were.

You are liable to be dragged into things you disapprove of?—Very largely in consequence of the railway companies' own attitude.

I only put the fact you are liable to be dragged into things you disapprove of?—Exactly. We were dragged into this very largely because of the railway companies' own action in refusing to even meet to discuss.

It was a move in the game for recognition?—On the contrary. I do want to remove that. No one deprecates the circumstances of Ireland at the present moment more than I do and more than the society.

I must take it that you were unwillingly compelled to inter-

fere, but if you had not written that letter to the companies asking them to meet you you would not have interfered?—We would have been bound to interfere, for the simple reason that there were thousands of men out in Ireland before we had anything to do with it, and to have held aloof would have been disastrous.

You had to support them? Not necessarily. We had to go and see what happened.

Did you support the strike to punish the railway companies for not seeing you, or on its merits?—I was not there, but I should say that what largely influenced the executive committee in arriving at their decision was the refusal of the companies to even assist in settling an unfortunate difference. Witness said that Mr. Rimmer, the society's secretary in Ireland, made an effort to stop the strike—as the witness did at Swansea successfully—but he should say the men overpowered him. It was a new departure for the men to be called out in breach of their contracts.

Answering Mr. BURNETT, the witness said that if a return of wages were supplied by the railway companies it would still show 100,000 men getting under £1 per week. On the North Eastern system the society had more than once refused to pay strike pay to men who came out without authorisation.

TUESDAY.

This was the last public sitting of the Commission for the hearing of evidence, and the proceedings were confined to the testimony of one important witness, Mr. W. F. Marwood, head of the Railway Department of the Board of Trade.

Mr. MARWOOD said that the conciliation scheme of 1907 was not put forward by the Board of Trade as an ideal scheme. It was drawn up under great pressure of time, and represented what two parties of widely divergent views could be induced to agree upon. It could no doubt have been improved. Regarding the action of the Board of Trade on questions arising under the scheme during the time of Sir George Askwith, witness's predecessor in the Railway Department, a good deal of information was given in a report issued by the Board of Trade in February, 1909 (Cd. 4,534). Since he had been head of the Railway Department various matters had arisen from time to time, and in three cases formal applications had been made for interpretations, two relating to what were the "usual channels" for making application for improved conditions with regard to hours of labour or rates of wages. These concerned two Irish lines, the Great Northern (Ireland) and the Great Southern and Western, and in each case representatives of the company and of the employees were heard by the witness. In the first case it was fairly clear that the usual method in making application had been by way of petition signed by a reasonable number of men affected, and the Board decided accordingly. In the case of the Great Southern and Western Railway the evidence did not show that any one method stood out as the usual method, and the Board stated in writing to both parties that "the evidence shows that the 'usual course' as regards procedure in making applications for improved conditions from the company's servants had not in the past been by way of signed petition," and that "the evidence before the Department was insufficient to show what procedure, if any, can be regarded as the 'usual course.'" The third case of interpretation arose on the Great Eastern Railway, and raised the question whether an award by an arbitrator could be varied by agreement, and, if so, how. The award of Lord Gorell gave to certain classes of employees pay at rate and a quarter for Sunday duty, but provided that this clause should not apply when one of the ordinary week's turns of duty was allowed off. The eight-hour signalmen had previously worked seven days a week for seven days' pay. Under the award the company could either give them seven days' work for 7½ days' pay or six days' work for six days' pay, and they decided to adopt the latter alternative. Some of the men were desirous of reverting to the old conditions, whilst others were not, and ultimately the Board of Trade were asked by the men's side of the Central Conciliation Board to interpret the words, "The decision of the arbitrator shall be binding on all parties." Representatives of the company and of the men's side of the board were heard by the witness, and the decision of the Board of Trade was ultimately given on June 27, 1910, as follows:—

BOARD OF TRADE DECISION IN GREAT EASTERN CASE.

The Board of Trade are asked for an interpretation of clause (f) of the general principles of the scheme for conciliation and arbitration in questions relating to rates of wages and hours of labour of certain classes of railway employees, which was signed at the Board of Trade on Wednesday, November 6, 1907, and more particularly to interpret the meaning of the word

"parties" for the purpose of the provision that "the decision of the arbitrator shall be binding on all parties." The Board of Trade cannot speak authoritatively as to the legal position, and indeed are not concerned therewith, but only as to the interpretation of the meaning and intention of the scheme. The President has given careful consideration to the scheme itself and to the arguments put forward on behalf of the Great Eastern Railway Company, and of the representatives of their employees. The Board of Trade are of opinion that for the purpose of the provision of the scheme to which their attention has been directed, the parties to the arbitration are the railway company on the one part, and on the other the members of the men's side of the Central Conciliation Board as representing the employees of the company. In arriving at this conclusion the Board are influenced by the consideration that the whole idea of the scheme is based on the principle of collective bargaining; and that not only are the matters in dispute referred to the arbitrator through the Central Board, but his award is issued to the two sides of that body. The only alternative would appear to be to hold that, for the purpose of the provision in question, each employee individually is to be deemed to be a separate party, and to be able individually to contract himself out of the award. But such an interpretation would, in the opinion of the Board of Trade, be inconsistent with the objects and intentions of the scheme, which was definitely founded on a representative basis, and would lead to results never contemplated by the framers of the scheme. It follows, therefore, that to carry out the intention of the scheme, a variation of the terms of the award can be made, but can only be made with the consent of both parties; that is to say, of the railway company on the one hand, and of the men's side of the Central Conciliation Board, or a majority thereof, on the other.

Continuing, the witness said that the decision of the Board of Trade was accepted by the railway company. A somewhat similar question arose in the case of the Great Northern Railway Company. No formal application was, however, made to the Board of Trade for an interpretation in this case. The matter was referred back to and determined by the arbitrator.

DEFECTS OF THE SCHEME.

Points of difficulty had arisen in the working of the scheme of 1907, and such questions had been referred to the Board of Trade. Except where there was some definite point of interpretation of the scheme itself, the difficulties had usually been caused by contingencies arising for which the scheme contained no precise provision. The Board had in such cases endeavoured to get the parties to agree upon some course of action to get over the difficulty. The witness then drew attention to the following points, upon which no special stress had been laid in the previous evidence:

(1) Parties who are entitled to an interpretation of the scheme. There was nothing in the scheme to show whether an application for interpretation might be put forward by any section of the employees affected, or whether it must come through the representatives of the men; or in the latter event, whether the members of a Sectional Board or of the Central Board or the signatories to the agreement of 1907 would be the proper persons to apply. In practice applications from the men had been put forward usually through the secretary of the Central Conciliation Board, and this had been the case with every application on which a formal decision had been given after a hearing. A difficulty might, however, arise if a particular section of men, whose views were not represented on the Central Board, wished to have the scheme interpreted on some point, and it would be desirable in any amendment of the scheme to have it clearly stated by whom applications for interpretation might be made. The difficulty did not, of course, arise, at least in the same form, with applications made by a railway company.

(2) Reference to the employees of a Conciliation Board decision involving a reduction of rates of wages. The scheme provided that "Any proposal agreed to by a Conciliation Board involving a reduction of rates of wages shall be communicated to the men, and if rejected by them within a month shall be referred forthwith to arbitration." Mention had been made of a practical difficulty that would arise as to the meaning of the words "rejected by" the men in this clause, and there was also no indication in the clause as to how the reference to "the men" was to be carried out. The views of the men might possibly be best obtained by ballot of the class concerned.

(3) The length of time for which a Conciliation Board can enter into an agreement. The wording of the scheme was that subject to certain provisos "the decision of a Conciliation Board to be final and binding on the parties, and no decision to be reopened within 12 months." There was no precise power here as in the case of an arbitrator's award to fix the period over which an agreement extended, and in many cases Boards had

entered into agreements extending beyond their own period of office. Mr. Walker (of the London and North Western Railway) had put forward a proposal which might dispose of much of the difficulty. He suggested that settlements by a Conciliation Board should remain in force until the completion of the Board's term of office, and thereafter until an application for altered conditions had been made and decided upon, no settlement to be reopened within 12 months in any case. This proposal would preclude a Conciliation Board from agreeing at the commencement of their term of office for a shorter period than three years, and it seemed hardly desirable to fetter their discretion in this way.

(4) Conditions to obtain after the termination of an agreement or award. It was not provided in the scheme that when an agreement or award ran out, the conditions of such agreement or award were to remain in force until a new settlement had been arrived at under the scheme, and it seemed desirable that provision should be made to this effect. In the only case when an agreement on one of the larger lines had as yet run out, the company at once agreed on a representation from the Board of Trade to allow the conditions of the settlement to remain in force until new conditions had been determined in accordance with the scheme.

The witness handed in the following tables, prepared by the Labour Department of the Board of Trade:—(a) (i) Table showing the membership of four trade unions of railwaymen at the end of each of the years 1900-1910. (ii) Table showing the funds of the same trade unions at the same periods. (b) (i) Table giving details of disputes causing stoppage of work directly affecting railway servants in each of the years 1889-1910, and the first eight months of 1911. (ii) Statement giving particulars of each dispute causing stoppage of work, directly affecting railway servants, in each of the years 1889-1911.

GRIEVANCES OUTSIDE THE SCHEME.

By Sir T. RATCLIFFE ELLIS: There was no provision in the scheme for dealing with matters other than those of hours of labour and rates of wages, and he had not considered the question of including other subjects. He could not express an opinion on the question of providing a determining authority on the Conciliation Boards.

By Mr. HENDERSON: He was not present at the negotiations that led up to the scheme of 1907, and therefore could not help him.

Do you believe it to be a flaw in the scheme of conciliation and arbitration that it did not include other things than hours and wages?—I should not go so far as to say it was a flaw. You must remember that in 1907 when the scheme was drawn up the only matter that was put forward—the national programme—related entirely to rates of wages and hours of work, except in regard to one small point which was, I think, that there should be two men in the cab of a motor.

In setting up the scheme for any industry, could a scheme be considered other than defective which leaves the men open to strike on grievances which cannot be included under that scheme?—It seems to me there must be some matters you would have to omit in any case.

Could you specify subjects which you think ought to be left outside such a scheme?—It is not a subject I have gone into deeply, but there must be some matters of discipline which cannot be brought into the scheme, especially in matters of railway working where the safety of the public is seriously concerned.

By Mr. BURNETT: He saw no objection to the application of the Arbitration Act of 1896 to the railway industry. The Act made the Government pay for the cost of arbitration, and he did not know what view the Treasury would take.

When Mr. Marwood's evidence was concluded,

The CHAIRMAN said: We have endeavoured in the course of these proceedings to give due weight to all applications which have been made to us by those who wished to suggest their views to the Commission, and if we have not been able to comply with the wishes of all, we desire at any rate to thank all persons who have been good enough to give their assistance. With the witness who has now been examined we propose to close the inquiry as regards the hearing of witnesses, and we will now proceed to consider our report, which we hope will be issued without undue delay.

The first public sitting of the Commission took place on August 28, and there have been 27 sittings for the hearing of evidence, during which nearly 70 witnesses have been examined. The Commissioners will, in private, consider their report, which it is anticipated will be published before the meeting of Parliament on October 24.

AROUND THE EMPIRE BY ELECTRIC TRACTION.

A NOVEL RAILWAY AT THE CRYSTAL PALACE.

Those who study methods of transport find the "All Red Route" Railway, which has been constructed at the Crystal Palace to serve visitors at the Festival of Empire and Imperial Exhibition, of considerable interest. It is, in fact, one of the happiest ideas of the Exhibition. Perhaps it would be impossible to obtain a more realistic impression in as short a space

leaves Canada, views of the Crown Colonies are met with, including a Malay village in which the natives are seen constructing houses on piles over the lakes, sugar plantations of Jamaica, and scenes in India where realistic reproductions of the towers of Delhi, jungle and forests, Indian towns, and various tropical forests follow. Then, through a deep mountain cutting, we pass to Australia. Here there are a view of the world-famous harbour of Sydney, glimpses of the life of the Australian settlers, and close to the line at one point is a com-

Electric Train in Cutting Passing Canadian Building at the Crystal Palace.

of time of the extent of the Empire, and of the variety of races and industries which it comprises, than is given in the few minutes required for the tour on this "All Red route." Commencing, for instance, at the Pageant Station, the traveller is taken through a splendid panoramic view of the various parts of the Empire. First there is an excellent representation of Blacksod Harbour, in Ireland, now in course of construction. Then comes the first station, Newfoundland, and beyond the train passes along the quayside and extensive harbour of

plete sheep-clipping plant where sheep are being shorn by electricity. We then pass through scenes in New Zealand; particularly noticeable are the town of Wellington and its beautiful harbour. Then the route takes us to Africa, with striking views of Cape Town and its harbour and its many attractions.

The accompanying views give a good idea of the appearance of the railway and some of the features alongside. In the Canadian Station illustration the Parliament building is seen

View of Line from Upper End of Trestle Bridge.

Level Crossing at Upper End of Trestle Bridge, Showing Jumper Cable Connections.

St. John, in which whaling boats are at anchor, while the town is seen in the distance. The train then traverses Canadian territory, through orchards with heavily-laden fruit trees and vast expanses of wheat-bearing country. Presently we pass on the left the reproduction of the Parliamentary Buildings of Ottawa. This model is made two-thirds size of the original, and the exterior has been faithfully reproduced. As the train

on the right. The illustration showing the track at the upper end of the trestle bridge has a representation of a South African diamond mine on the left. A very clear view of the trestle construction is given in another photograph.

Other views give some idea of the uneven nature of the ground traversed by the little railway and the method of its construction. The sole contractors were Messrs. Dick, Kerr

and Co., and the work was carried out under the supervision of Mr. Albion T. Snell, M.Inst.C.E., consulting engineer to the Festival of Empire.

The little railway, which is about one mile in length, is laid with 60lb. rails in lengths of 30ft., connected by fish plates with four bolts, resting on sleepers embedded in ballast 12in. deep. The greater part of the line is level with the surface of the grounds, but near the low-level entrance station of the Palace there is a cutting about 100 yards in length. Near the football ground there is an embankment of about a similar length, the maximum height being 8ft.

Between the stations known as New Zealand and the building of South Africa the railway crosses a valley on trestle work, the length of this trestle work being about 120 yards. There is a tunnel under the main steps of the Empire Avenue 100ft. in length, and this was the heaviest part of the work, as, in addition to the difficulty of the heavy weight of steps to be supported, there were three large water mains, two of 2ft. 6in. and one of 1ft. 6in., that had to be removed. The tunnel walls are faced with brickwork and backed with concrete. The tunnel roof supporting the heavy flags forming the landing for the middle of the steps is formed of rolled joists resting on the walls.

The sharpest gradient on the line is at the end of the tunnel forming a dip of 1 in 12 from the Pageant Station into the tunnel, and 1 in 12 from the tunnel up to the station known as Newfoundland.

Two rails of the same weight as the track rails are laid one on each side of the track, supported on insulators, attached

Map of the "All Red Route" Railway.

The motor cars are mounted on standard 21E type trucks, and the trailer cars on suitable running gear. Powerful hand brakes are fitted on each car, and in addition rheostatic electric

Gradients of the "All Red Route" Railway.

to the sleepers. The rails are bonded in the usual way with one 0000 copper bond. There were originally six level crossings, but at two of these bridges have been built over the track. At these level crossings there is a gap in the conductor rails, bridged over in the usual way by jumper cables.

brakes are provided for emergency purposes. The equipment consists of the Dick-Kerr standard double motor equipment, including two 32 h.p. interpole motors, standard controller fitted on the front platform of the train, and all usual accessories: suitable lighting circuits are also provided.

Train on Trestle near "New Zealand Station."

Royal Train Approaching Canadian Station.

The type of insulator used is similar to that used on the London underground railways.

The rolling-stock consists of nine trains, each train being made up of one motor car and one trailer car. The bodies of each car are identical as regards construction, arrangement, etc. They are of the open cross-bench type, and arranged for seating 35 passengers per car, or a total of 70 per train. The over-all dimensions are as follow:—

Over-all length of motor car over buffers	... 24ft. 1in.
Over-all length of trailer car over buffers	... 23ft. 4in.
Total over-all length of train	... 47ft. 11in.
Over-all width of cars	... 7ft. 6in.

The cars are arranged for a specially low speed to allow of passengers having a good view of the scenery *en route*. The speed varies from 2½ to a maximum of 4 miles per hour, which gives the passengers time to see all that is to be seen.

The voltage of the electric supply is 450. The collecting arrangement on the cars consists of specially designed adjustable collector shoes arranged two at the leading end and two at the trailing end of the train. The return circuit is insulated in a similar manner to the positive rail. Trains are run at intervals of about one minute, so that passengers are able to commence their journey immediately on entering a station.

MEETINGS AND REPORTS.

FORTHCOMING MEETINGS.

- Oct. 9 (Mon.).—**Manila Railway** (Annual), Winchester House, Old Broad Street, E.C., at 12.
- Oct. 10 (Mon.).—**Central Uruguay of Monte Video Railway** (Annual), River Plate House, E.C., at 12.
- Oct. 16 (Mon.).—**Central Uruguay Northern Extension Railway** (Annual), River Plate House, E.C., at 12.15.
- Oct. 16 (Mon.).—**Central Uruguay Eastern Extension Railway** (Annual), River Plate House, E.C., at 12.30.
- Oct. 17 (Tues.).—**Buenos Ayres Western Railway** (Annual), River Plate House, E.C., at 12.
- Oct. 18 (Wed.).—**Buenos Ayres Great Southern Railway** (Annual), River Plate House, E.C., at 12.
- Oct. 18 (Wed.).—**Dundalk, Newry, and Greenore Railway** (Half-yearly), Euston Station, N.W., at 11.
- Oct. 18 (Wed.).—**Quebec Central Railway** (Annual), 5, Great Winchester Street, E.C., at 12.
- Oct. 20 (Fri.).—**Demerara Railway** (Half-yearly), Cannon Street Hotel, E.C., at 12.
- Oct. 26 (Thurs.).—**Grand Trunk Railway** (Half-yearly), City Terminus Hotel, Cannon Street, E.C., at 12.

(Reports, Traffic Returns, Prospectuses, and all other items of financial intelligence should be sent as early as possible to the Editor of THE RAILWAY TIMES, 12, Norfolk Street, London, W.C. Telephone, 2948 Gerrard. Telegraphic address, Altimetry, London.)

CANADIAN PACIFIC RAILWAY.

The annual general meeting was held in Montreal on Wednesday, Sir Thomas G. Shaughnessy presiding, when the report of the directors (an abstract of which appeared in the RAILWAY TIMES of September 2) was unanimously adopted. Sir William C. Van Horne, Mr. R. B. Angus, Mr. E. B. Osler, and Mr. H. S. Holt were re-elected directors.

Resolutions were passed authorising the lease of the following lines: The South Ontario Pacific Railway, the line of the Alberta Railway and Irrigation Company, and the Esquimalt and Nanaimo Railway. The issue of four per cent. consolidated debenture stock on account of branch lines, and extensions of branch lines, as follows, was approved: The Moosejaw South-westerly branch, the Kerrobert North-easterly Branch, the Weyburn-Lethbridge Branch, the Estevan-Forward Branch, the Swiftcurrent South-easterly Branch, the Swiftcurrent North-westerly Branch, the Wilkie North-westerly Branch, the Wilkie-Anglia Branch, the Bassano-Irricana Branch and the Kipp-Medersyde Branch. The issue of four per cent. consolidated debenture stock on account of steamships, to the amount of £800,000, was approved. A resolution approving the general by-laws of the company was also adopted.

In moving the adoption of the report, the PRESIDENT (Sir Thomas G. Shaughnessy) said: I have the honour to submit, on behalf of the directors, the thirtieth annual report of the company's affairs, for your consideration and approval. The volume of passenger and freight traffic even exceeded our expectations, with the very gratifying result that your gross operating revenue for the year was over \$104,000,000. The additional acreage under crop this year, at the estimated average yield per acre, will furnish a largely increased tonnage for the transportation companies; and, although the quality of the wheat has been injuriously affected in some portions of Western Canada where bad weather prevailed during the harvest season, it is apparent that the financial return to the producers will be very large indeed. The expenditures in the year for the upkeep of property were on quite a liberal scale; and, as a consequence, your railway and equipment are in an excellent state of efficiency.

EXTENSIONS.

It is expected that the seventy-five miles of the Georgian Bay and Seaboard Railway between Coldwater and Bethany, in Ontario, a portion of the shorter and more economical route between Georgian Bay and the head of ocean navigation, will be completed this autumn; and such progress has been made with the construction of the various branch lines in Western Canada that about 374 miles will be finished within the next couple of months and added to the mileage that is being operated. It will not only be desirable, but necessary, to continue to build year by year a good many miles of these branch lines in order to provide present and incoming settlers with transportation facilities; more miles, indeed, than you would have been called upon to provide had the Dominion and Provincial Governments, who have pledged their credit almost beyond the limit of prudence to assist other railway companies, insisted that these

companies should open up new territory, instead of building their lines through settled sections of the country where ample transportation facilities already existed. It is evident that, on some portions of the system, the time is almost at hand when a single track will not accommodate your growing traffic without congestion and increased expense; and, therefore, your directors are of opinion that the double track should be continued westward from Brandon to Medicine Hat, a distance of about 524 miles, as rapidly as the work can be done without undue interruption to the train service. With all that has been done during the past seven or eight years, we find that at points like Montreal, Toronto, Ottawa, Fort William, Winnipeg, Calgary and Vancouver, we must still further enlarge our accommodation for passengers and freight. Nearly all the requisite property has been acquired, and the various work will be carried to completion as soon as possible. It is important that modern and commodious shops should be provided for the maintenance and repair of the large number of cars and locomotives now in service on your lines in Alberta; and it has been decided, that, for present and future convenience and economy, Calgary will be the best location for these shops, provided that suitable arrangements can be made with the city authorities. The outcome of the first season's work on the irrigation system in what is known as the Eastern Block is very gratifying. The great dam at the horse shoe bend of the Bow River south of Bassano, is almost finished; and before the close of the season upwards of six million yards of material will have been moved in making ditches. This should ensure the completion of the work within the next two years; but, of course, some of the land can be served with water before that time. After more than twenty years of immunity from serious accident of any nature to our fleet on the Pacific Ocean, we were so unfortunate as to lose the steamship "Empress of China," wrecked on the coast of Japan on July 27 last. Another steamship to take the place of the "Empress of China," but twice as large and costly, will be provided at the expense of the steamship replacement fund.

WESTERN TERRITORIES DEVELOPMENT.

Very favourable business conditions exist throughout all the territory served by your lines in Canada, and there would appear to be ample justification for expecting their continuance. West of Lake Superior there is a universal spirit of confidence and buoyancy; and, while there is some apprehension that real estate values are, in certain localities, on rather a speculative basis, there is room for serious error in this regard because of the business strides that are being made by almost every city and town of any importance. It will be disappointing if the immigration next year is not larger than ever before; and, with our country's advantages so well known and recognised all over the world, there would appear to be no good reason why we should not have an increasing number of newcomers year by year for a long time to come. If this be the case, there will be no halt in the activity and progress of the West. The commerce and manufactures of Eastern Canada are in a thriving state, as is indicated by the quantity of goods that is being shipped. The increase in the demand for a great many articles previously manufactured abroad, or that had only begun made in Canada in a small way, encouraged the establishment of new industrial works, as well as the enlargement of existing ones, thus furnishing employment for thousands of additional workmen; so that, in point of increased population, Eastern Canada has quite kept pace with the West. With the continuance of good times in the agricultural districts, the commercial interests of the country will be proportionately benefited; and those who are engaged in manufacturing enterprises should feel warranted in making such additions to their works, and in employing such additional workmen, that large consumers of material in Canada will no longer be compelled to go abroad to meet any portion of their requirements.

The shareholders, the directors, and the executive are to be congratulated on having a most capable staff of officers and employees, to whose united efforts the signal success of the company's operations may be attributed. Since the close of the fiscal year, the company and the board of directors met with another serious loss by the death, on July 13, of Mr. Robert Meighen, who joined the board in 1908. Mr. Meighen was a good citizen, a capable and upright business man, and had been a warm friend and supporter of the company from its inception. Sir William Whyte, who, as vice-president, was for many years in special charge of the company's interests west of Lake Superior, and who recently retired from active service, has been elected a member of the board to fill the vacancy caused by Mr. Meighen's death.

At a meeting of the board of directors subsequently held, Sir Thomas G. Shaughnessy was re-elected president, and Mr.

David McNicoll, a vice-president, of the company; and the executive committee was appointed as follows:—Mr. Richard B. Angus, Mr. David McNicoll, Mr. Edmund B. Oler, M.P., Sir Thomas G. Shaughnessy, the Right. Hon. Lord Strathcona and Mount Royal and Sir William C. Van Horne.

BUENOS AYRES WESTERN RAILWAY.

The expenditure on capital account to June 30, 1911, amounted to £22,394,960, while the receipts to the same date were £23,566,576—viz., ordinary stock, £9,747,660; extension shares, 1912, of £10 each, £2,000,000; extension shares, 1913, of £10 each, £1,999,910; 5 per cent. preference £10 shares, £300,000; $\frac{1}{2}$ per cent. preference £10 shares, £2,552,340; Government bonds, £1,000,000; debenture stock, 4 per cent., £5,066,666. The expenditure during the past year was £1,248,321.

The accounts for the year ended June 30 show the receipts to have been as follows:—

	1910-11.	1909-10.
Passenger traffic	£653,673	£603,396
Goods traffic	1,385,400	1,214,230
Animals	352,463	261,806
Luggage and parcels	144,658	132,716
Warehouse rents	43,355	49,178
Miscellaneous	54,637	48,184
Total receipts	£2,634,186	£2,300,510
Total expenditure	1,392,318	1,300,317
Net earnings	£1,241,868	£1,000,193

To this balance of £1,241,868 must be added Buenos Ayres and Pacific Company (Chacarita branch), £1,490; interest, exchange, and transfer fees, £29,874; balance from 1909-1910 £103,538; deduct interim dividend at 6 per cent. per annum on ordinary stock to December 31, 1910, £292,430; interest paid and accrued on Government 5 per cent. loan of 1888 and on company's 4 per cent. debenture stock, £289,166 (less rentals and annuities received from Buenos Ayres Great Southern and Central Argentine Railway Companies, £148,186)—£140,980; on company's 5 per cent. preference shares, £15,000; on $\frac{1}{2}$ per cent. preference shares, £114,855; on 4 per cent. extension shares, 1912, £80,000; on 4 per cent. extension shares, 1913, £37,767; Buenos Ayres Midland Railway, payments made under the working agreement, £11,012; bill stamps, £233; income-tax, £7,340; together, £699,617, leaving a disposable balance of £737,153.

Of this available balance on net revenue account of £737,153 the board proposes to transfer £120,000 to the general reserve fund, £10,000 to the staff pension fund, £5,000 to the benevolent fund, and to pay a balance dividend of 4 per cent. on the ordinary stock (less income tax), which will absorb £367,162, and a bonus of $\frac{1}{2}$ per cent. (less income tax), which will absorb £45,895, carrying forward a balance of £189,096.

The number of passengers carried during the year was 9,072,163 (against 7,489,501 in the previous year); the gross weight carried, 2,576,226 tons (against 2,233,913 tons); the train miles run 4,065,074 (against 3,970,091); the receipts per train mile, 12s. 11 $\frac{1}{2}$ d. (against 11s. 7d.); the expenses per train mile, 6s. 10 $\frac{1}{4}$ d. (against 6s. 6 $\frac{1}{2}$ d.); the net profit per train mile, 6s. 1 $\frac{1}{4}$ d. (against 5s. 0 $\frac{1}{2}$ d.); average receipts per passenger, 1s. 5 $\frac{1}{4}$ d. (against 1s. 7 $\frac{1}{4}$ d.); average receipts per ton of goods, 10s. 9d. (against 10s. 10 $\frac{1}{2}$ d.); length of line worked, 1,586 miles (against 1,365 miles); ratio of working expenses to receipts, 52.86 per cent. (against 56.52 per cent.).

The increase in the gross receipts of the line for the year is £333,676, equal to 14.50 per cent., and the increase in the net profit is £241,675, or 24.16 per cent. The receipts from passenger traffic show an increase of £50,277 or 8.33 per cent.; from luggage and parcels an increase of £11,943, or 9.00 per cent.; from animals an increase of £90,657, equal to 34.63 per cent.; and from goods traffic an increase of £171,170, or 14.10 per cent.

The report shows the satisfactory results of the year's working, notwithstanding the failure of the maize crop. This crop was almost destroyed by the prolonged drought at the end of 1910 and the beginning of 1911, but, as anticipated in the half-yearly report, the abundant wheat crop and the development of other sources of traffic more than counterbalanced the loss of the maize. During the financial year good progress has been made with the various extensions and 221 miles of line have been opened to public service. On July 1 the extension of the Trenel branch (26 miles) was opened. The extensions still under construction are:—Bagual to Rio Salado, 53 miles, Rio Salado to Colonia Alvear, 69 miles, La Zanja to

Gonzalez Moreno, 45 miles, and all these are expected to be completed during the current year. A concession has been granted to the company for a line starting from a point on the La Zanja-Gonzalez Moreno Line 20 kiloms. south of Meridiano 5° Station. This line will run in a south-westerly direction, about midway between the lines to Toay and Telen, for a distance of approximately 150 kilometres, thus opening up a large undeveloped district between the two above-mentioned lines. At the last general meeting full particulars were given of the proposed modifications in the concession for the underground line from the Once to the Docks, which at that time only required the President's signature to become law. This was subsequently given, and since then considerable progress has been made with the preliminary works. The plans of the goods tunnel to the docks, of the underground interchange station with the Anglo-Argentine Tramway Co. at the Once, and of the connection with the B.A. Western main line, have been completed and have been submitted to the Government for approval. The Board have also received an expert report upon the proposed electrification of the suburban section of the railway, and this report is now under consideration. It is hoped that the above-mentioned works will be put in hand very shortly. The capital in hand will be sufficient to meet the expenditure on the above-mentioned works for some months to come, but later on additional capital will be required for these and for a considerable quantity of rolling stock for which orders have been placed. Resolutions will therefore be proposed at the forthcoming general meeting to increase the capital of the company from £20,000,000 to £22,000,000, but the Board do not propose, in the event of the resolutions being passed, to make any issue of capital for at least six months. During the year Mr. Woodbine Parish, one of the directors, visited Buenos Ayres, and made a thorough inspection of the company's property. The Board acknowledge the services of Mr. Brian, the legal representative; of Mr. Lertora, the general manager, and of the staff of the railway generally.

MINNEAPOLIS AND ST. PAUL RAILWAY.

In their report for the year ended June 30 the directors state that the gross earnings of the entire system amounted to \$21,972,577; operating expenses, \$14,998,338; net earnings, \$6,974,239; income from other sources, \$994,082; total income, \$7,938,322. After deducting fixed charges, taxes, etc., there remains a surplus of \$1,600,147. Compared with the previous year, the Soo line gross earnings show a reduction of \$2,271,271; this is accounted for by the fact that last season's grain crop in North Dakota and portions of Minnesota was almost a total failure, and resulted not only in a large loss of grain tonnage but also, on account of the reduced purchasing power of rural districts, in a considerable reduction in general business. Two thousand miles of the company's lines are located in what may be termed the grain district of the North West, and crop conditions are naturally very promptly reflected in its earnings. The operating expenses show an increase of \$257,672, very largely accounted for by the maintenance of equipment. The gross earnings of the Chicago division are substantially the same as for the previous season. Its operating expense figures show an increase of \$726,395. For the purchase of additional locomotives, caboose cars and steel passenger equipment, additional equipment trust notes were issued to the extent of \$1,190,000. To provide funds for the completion of terminals, for the purchase of additional equipment, betterment of the property and the construction of additional lines it was found necessary to issue an additional \$6,562,200 of the company's authorised capital; this was offered for subscription to the shareholders by circular letter of April 17, 1911, and the entire issue was subscribed for.

MANILA RAILWAY.

The report for the year ended December 31, 1910, states that the revenue of the company shows net receipts from the holdings in the Manila Railroad Company of New Jersey, U.S.A., of £164,778 and from interest and transfer fees of £7,202, making a total of £171,980. After deduction of London expenses (£5,164) there is a balance of £166,816, out of which there has been paid and has accrued to December 31, 1910, interest on the A and B debentures of the company £154,972, leaving a net balance for the year of £11,844, which, added to the balance carried forward from 1909, of £33,083, amounts to £44,927, which it is proposed to carry forward. No further progress can be reported in respect of the claims of the old company against the Spanish Government; these, however, have been fully provided for. A resolution will be submitted with the object of converting the preference shares of the company into preference stock.

CENTRAL URUGUAY NORTHERN EXTENSION RAILWAY.

The capital expenditure to June 30, 1911, was £1,642,845, and the receipts, £1,027,150 viz., ordinary shares, £1,000,000; 5 per cent. debenture stock, £27,150.

The gross revenue for the year ended June 30, 1911, amounted to £106,455 (against £91,330 for the previous year), the expenses to £55,880 (against £50,232), and the net profits to £50,576 (against £41,098). Adding the balance from previous year, £1,055, and Government guarantee, £24,747, the total net revenue was £76,368, which was disposed of as follows:—Interim dividend, £21,250; debenture stock interest, £31,357; interest, £924; income-tax, £440; balance dividend of 4s. 3d. per share (making 8s. 6d. per share, or 4½ per cent. for the year), £20,010; balance to be carried to next account, £2,380.

CENTRAL URUGUAY EASTERN EXTENSION RAILWAY.

The capital expenditure to June 30, 1911, was £2,491,440, and the receipts on capital account amounted to £2,060,660 viz., ordinary shares, £800,000; 5 per cent. preference shares, £800,000; 5 per cent. debenture stock, £1,060,660.

The revenue account for the year ending June 30, 1911, shows gross receipts amounting to £218,078 (against £189,028 for the previous year), expenses amounting to £106,150 (against £92,346), and a net profit of £112,829 (against £97,582). Adding the balance from previous account, £1,460, Government guarantee, £11,020; interest, £8,970; income-tax balance, £2,360; the total net revenue was £137,540, from which is deducted an interim dividend of 4s. 3d. per share to December 31, 1910, £17,000; debenture interest paid and accrued to June 30, 1911, £48,978; 5 per cent. preference shares, dividend accrued to June 30, 1911, £40,000; leaving a balance of £31,561, out of which the board propose to pay a balance dividend of 6s. 3d. per share (making 10s. 6d. per share, or 5½ per cent. for the year), carrying forward to next account £8,020.

CENTRAL URUGUAY RAILWAY OF MONTE VIDEO.

The expenditure on capital account to June 30, 1911, amounted to £4,715,095, while the receipts had been £4,830,200—viz., ordinary stock, £2,000,000; 5½ per cent. preference shares, £500,000; permanent 6 per cent. debenture stock, £1,000,000; 4 per cent. "Western Extension" debentures, £980,200; 6 per cent. second debenture stock, £250,000.

The revenue accounts for the year ended June 30 show receipts to have been as follows:—

	1910-11.	1909-10.
Passenger traffic	£280,700	£245,563
Goods	540,500	520,010
Animals	135,491	113,193
Luggage and parcels	45,791	43,308
Telegraphs, sundries, and wharfage	14,840	15,099
Total receipts	£1,017,403	£937,182
Less traffic receipts corresponding to extension companies	406,648	359,693
	£610,755	£577,489

The expenditure on revenue account during the same period was as follows:—

	1910-11.	1909-10.
Maintenance of way, works, etc.	£148,390	£135,620
Locomotive expenses	168,512	140,380
Carriage and truck repairs	33,195	27,201
Traffic expenses	138,816	130,795
General charges	42,699	42,262
Telegraphs and sundries	7,917	7,119
Total expenditure	£539,499	£483,362
Less expenses of working extension companies	218,889	195,403
	£320,610	£287,959
Net earnings	£290,145	£289,530

To this balance of £290,145 must be added interest on 6 per cent. debenture stock of Western Extension Railway, £33,505; profits on remittances, interest, transfer fees, etc., £4,313; together with £8,584, balance from last account, making a total of £336,607. Deducting interim dividend to December 31, 1910, £50,000; interest paid and accrued, £141,317; North Eastern Railway rent, £56,000; amount payable to Uruguayan Governments, £1,880; Central Uruguay Western Extension Railway, reserve for advance under guarantee, £9,201; reserve for advance for purposes of sinking fund, £9,138; a balance is left of £69,071. Out of this available balance the board pro-

pose to transfer £10,000 to the general renewals fund and pay a balance dividend of 2½ per cent. upon the ordinary stock, making, with the interim dividend paid in April last, 5½ per cent. less income-tax, for the whole year ended June 30, 1911, carrying forward a balance of £7,279.

BUENOS AYRES GREAT SOUTHERN RAILWAY.

The expenditure on capital account to June 30, 1911, amounted to £44,069,034, whilst the receipts to the same date were £48,404,198 viz., ordinary stock, £21,000,000; 4 per cent. extension shares, 1912, £2,500,000; 5 per cent. preference stock, £6,133,110; 5 per cent. preference shares, £1,780,528; 4 per cent. debenture stock, £12,700,000; 4½ per cent. debenture stock (Saladillo), £1,032,930; 4½ per cent. Buenos Ayres Western Railway annuity account of Brandzen branch, £242,600. The revenue receipts for the year ending June 30 are summarised hereunder.

	1909-1910.	1910-1911.
Passengers	£1,478,820	£1,900,130
Parcels, special trains, etc.	314,959	332,333
Goods	2,180,935	2,205,092
Live stock	340,102	159,228
Sundry receipts	288,818	390,791

Total receipts	£4,601,924	£4,988,380
The revenue expenses for the same period were as under:—		
Permanent way and works	£422,070	£490,290
Locomotive maintenance	157,898	131,427
Coaching stock	92,099	99,980
Goods stock	125,199	122,779
Locomotive running	660,250	758,093
Vehicle running	25,990	20,238
Traffic expenses	602,539	635,982
General charges	193,284	192,413
Miscellaneous expenditure	203,030	207,365
3 per cent. tax payable under Mitre law	54,541	58,572

Total expenditure	£2,510,752	£2,694,027
Net earnings	2,085,172	£2,294,353
Balance from 1909-10		124,649
Interest on reserve funds, etc.		21,554
Profit on remittances, transfer fees, etc.		21,058
Interest on investments in allied companies		92,217

Total net revenue	£2,527,431
Interim dividend—3 per cent. on ordinary stock to December 31, 1910	£630,000
Interest on 4 per cent. debenture stock paid and accrued	508,240
Interest on 4½ per cent. debenture stock (Saladillo Branch)	40,482
Interest on 5 per cent. preference stock	300,000
Interest on 4 per cent. extension shares, 1912; revenue proportion	27,648
4½ per cent. annuity account of Brandzen Branch	10,917
Proportions of earnings under working agreements	49,250
Income-tax	29,192

Total prior charges £1,598,729

Leaving a disposable balance of £928,702

Of this available balance on net revenue account of £928,702 the board propose to pay a balance dividend of 4 per cent. (less income tax) on the ordinary stock, absorbing £791,000, making with the interim dividend paid in April last 7 per cent. for the whole year ended June 30, 1911, carrying forward a balance of £137,702.

The average number of miles of line open for traffic working throughout the year, including the lines worked under agreement, has been 3,041 (against 2,770). The working expenses amount to 54.01 per cent. of the gross receipts (against 54.60 per cent.). The number of passengers carried during the year was 22,231,112 (against 18,906,505), the receipts being £1,600,036 (against 1,478,820). The receipts from luggage and parcels amount to £319,060 (against £301,670). The goods dealt with during the year amount to 5,276,651 tons (against 4,582,536 tons), the receipts being £2,205,093 (against £2,180,935). The number of animals carried during the year amounted to 6,741,556 (against 4,971,826), the receipts being £450,227 (against £340,192).

The report states:—

"The results of the working of the railway for the past year may be accepted as satisfactory, notwithstanding the partial failure of the grain crops in the south of the Province on account of drought, and the board think that there is cause

for congratulation that they are able to recommend a dividend at the same rate as for last year, carrying forward a somewhat larger balance, more particularly in view of the greater demand upon the net revenue of the company to the extent of £180,000 in consequence of the conversion of £6,000,000 of four per cent. extension shares 1910 into ordinary stock. The details of the cost of working indicate by the percentage of the expenses to the gross receipts, the constant care and watchfulness displayed by the management over the spending departments of the railway, and the comparison with the figures of the previous year (since when the average length of line has increased by 274 miles) is even better when the increased contributions to the renewal funds of about £40,000, and the higher cost of coal, amounting to nearly £50,000, are taken into consideration. There is a further development in the passenger and general goods traffic, the reports from which sources show increases of £122,116 and £70,877 respectively. These consistent increases, to which attention has repeatedly been called during recent years, are perhaps the most satisfactory features of the company's working, and there is every indication that this business will continue to expand.

"Increases are also shown in all other classes of goods traffic with the exception of maize, linseed, posts, hides and skins. Prospects for the coming year are encouraging, for not only has the rainfall been largely in excess of that recorded during recent years, and an increased area sown for the next crop, but since the date of his annual report the general manager advises us by telegraph that rains have fallen over the whole of the districts served by the railway. Thus, there is reason to hope that, if nothing unforeseen occurs, an abundant cereal harvest will be secured during the coming season. Practically the whole of the extension programme authorised by the shareholders in October, 1908, has now been completed, with the exception of the line from Neuquen to Chili, the studies in connection with which are still being carried out. In addition to the lines constructed under the original extension programme above referred to, other short branches from Saladillo to the south-west, and from Dorrego to the east, have been built. Altogether a total length of 603 miles of new line has been completed and brought into service since the shareholders' authority was obtained in October, 1908. In addition to the extension programme referred to in the preceding paragraph, concessions have been obtained for extensions from Rio Colorado to San Antonio, 152 miles; Juancho to Vivotatá, 49 miles; and Olavarría to Balcarce, 130 miles; and during the past year concessions have also been granted by the executive government, under the 75 Kilometre Law No. 5703, for a branch from Barrow in a north-westerly direction, 37 miles; and two short connecting lines, of three miles each, from Mar del Plata and Quequen to ports which the Government are proposing to construct at these points. The total length of these new extensions amounts to 374 miles, or, taking into consideration the branches from Saladillo to the south-west, 35 miles, and Dorrego to the east, 46 miles, not included in the extension programme authorised in 1908, an aggregate additional length of 455 miles. In order to provide funds for the foregoing lines and their equipment, and for other works which the board have in view to cope with the growing requirements of the railway, it is proposed to take powers at the forthcoming meeting to create £3,000,000 of capital to be issued as and when the board decide the money is required. The 200,000 five per cent. preference shares of £10 each issued in October last will, in accordance with the terms of the issue, be converted into and rank *pari passu* with the existing five per cent. preference stock of the company, after the payment of the dividend to June 30 last, and the certificates will be ready for exchange on the 30th instant."

THE A.S.R.S. CONFERENCE.

The annual meeting of the Amalgamated Society of Railway Servants was opened on Monday last at Carlisle. In the annual report presented by the Secretary, Mr. J. E. Williams, reference was made to the National Insurance Bill, which left the right of choice of "approved societies" entirely in the hands of the workmen. In the opinion of the Secretary, "the effect of this will be considerably to weaken the hold of the railway companies in compelling their servants to belong to their various benefit societies." Statistics bearing upon the growth of the home railway systems stated that the gross receipts last year were £123,925,565, and the working expenses £76,569,676, or some thousands less than in 1907, whilst the net receipts are nearly two and a half millions more. The Secretary added: "Although the total number of employed shows a large

decrease, the companies have in no way suffered. The tables show that in almost every phase of railway work the traffic has considerably increased. This undoubtedly has been brought about by the economies adopted by the companies in the building of bigger engines, the doubling of roads, etc., thereby doing away with the congestion of traffic. Practically every railway company in the United Kingdom at their half-yearly meetings reported enormous increases in their dividends." In reviewing the recent railway strikes, the report complains that the attitude of the railway companies was "one of absolute defiance," and that "they refused to grant what has long been recognised in connection with other industries—viz., the right of the men to have the direct assistance of their unions in negotiations."

At the opening meeting the delegates were welcomed by the Mayor and the Hon. Robert Denman, M.P. for the city. The latter emphasised the deduction to be derived from the recent strike—viz., that the State could not allow a fight to a finish.

Mr. A. Bellamy, Stockport, was re-elected president, and in his presidential address he said that recent occurrences had pointed to the growth of the idea of the sympathetic strike and shown the increased solidarity of the labour forces. One trade union for all railway workers was the end to which their exertions should be directed.

A unanimous vote was given on Tuesday for a resolution submitted by Mr. W. Benton (Leeds), declaring that while the recommendations of the Parliamentary Committee on railway amalgamations and working agreements were in mitigation of the present situation in regard to the condition of employees, no satisfactory solution of the position could be found outside national ownership and control of railways. Mr. J. Thomas, M.P., assistant secretary, said when the question came before Parliament the workers generally must see that the discussion should not be conducted alone by railway shareholders, directors and mineworkers. If the State was to have hung round its neck all the Stock Exchange manipulations of the past it would be the working classes themselves who would be to blame. The appended resolution was also carried:—"That this Congress is of opinion that the Railway Eight Hours Bill introduced by Mr. Hudson, M.P., is of primary importance to the railway workers in view of the increasing pressure of work on the railways, and we urge on the branches the necessity for making this a test question at all Parliamentary elections."

On Wednesday a resolution was passed condemning the Government for permitting Royal Engineers to run trains in Ireland during the strike, and calling for immediate nationalisation, or for the withdrawal of the Engineers, the alternative being the consideration of a general railway strike throughout the United Kingdom. Bitter attacks were made on the Government for their conduct in connection with the railway strikes. The Insurance Bill was also declared unsatisfactory for railwaymen unless the Government accepted the Labour party's amendments, though Mr. Thomas, M.P., said there was much in the Bill which would be beneficial to railwaymen.

The conference on Thursday passed a resolution viewing with apprehension the action of the Government during the general strike, especially with regard to the calling out of the military. Mr. Thomas, M.P., referred to Mr. Winston Churchill's utterances at Dundee on Tuesday:—"Strikes cannot, must not, should not take place." (Cries of "Shame!") The Home Secretary spoke evidently with Cabinet authority, which indicated that the railwaymen's only weapon, the strike or collective bargaining, was to be taken away, but that there would be a certain *quid pro quo*. The Government had failed to appreciate the fact that railwaymen were not asking for preferential treatment.

During a discussion relating to a resolution on the Midland strike settlement strong complaints were made that the Midland Railway Company are not acting in accordance with its terms, and it was decided to wire at once to the Board of Trade, asking them to enforce the settlement on the Midland Railway. Mr. Williams, general secretary, said there was some clandestine agency at work on the Midland fomenting unrest. He exonerated the general manager (Sir Guy Granet), but blamed officials.

New "Atlantic" Locomotives. Mr. Dugald Drummond, the chief mechanical engineer of the London and South Western Railway, is putting on the road five "Atlantic" engines of a new type, designed and built by him in the Eastleigh shops. They are intended for the fast and heavy non-stop passenger trains between Waterloo and Bournemouth. The North British Railway have also received six "Atlantic" type engines from Messrs. Robert Stephenson and Co., Ltd., Darlington. The engines will work between Edinburgh and Perth, Carlisle and Aberdeen.

DIVIDEND ANNOUNCEMENTS.

WEST SOMERSET MINERAL RAILWAY. At the rate of 5 per cent. per annum for the half-year ended June 30.

TOURNAI TO JURISSE AND LAMDEN TO HASSELT RAILWAY. At 6s. 6 $\frac{1}{2}$ d. per share of variable revenue, 6s. per share of fixed revenue, and 6s. per share of preference shares.

NATAL ZULU RAILWAY. The directors have declared a dividend of 1 $\frac{1}{2}$ per cent. (2s. 6d. per share), less income-tax, for the past half-year, making 2 $\frac{1}{2}$ per cent. for year, carrying £430 forward. A year ago the dividend was at the same rate and £270 was carried forward.

UNION-CASTLE MAIL STEAMSHIP COMPANY. The council have declared an interim dividend of four shillings per share, free of income-tax, the same as a year ago, on the ordinary shares on account of the year 1911. The dividend warrants will be posted on November 2.

VAL DE TRAVERS ASPHALTE PAVING. The directors have resolved to pay an interim dividend at the rate of 5 per cent. per annum, 6d. per share, free of income-tax, for the six months ended June 30 last, payable on and after October 16. A year ago the dividend was at the same rate.

UNITED RAILWAYS OF THE HAVANA AND REGIA WAREHOUSES, LTD.—The board recommend a dividend of 4 per cent., less income-tax, on the ordinary stock, to transfer £15,000 to reserve account, £25,000 to general renewals reserve account, to provide for the retirement of rolling stock, and to carry forward £12,701. A year ago the dividend was at the same rate and £12,550 was carried forward.

WESTERN RAILWAY OF HAVANA.—The accounts for the year ended June 30, 1911, after providing for interest on debenture stock, interim dividend, taxes, etc., show a balance of £70,442. Out of this the board propose to pay a balance dividend of 8s. per share, less income-tax, making, with the interim dividend paid in April last, 7 per cent. for the year, transferring £10,000 to general reserve fund, and carrying forward £16,442. A year ago the dividend was at the same rate, nothing was placed to reserve, and £10,797 was carried forward.

CENTRAL URUGUAY NORTHERN EXTENSION RAILWAY. After providing for the debenture interest and interim dividend paid in April last, the balance of net revenue for the year to June 30 amounts to £22,390, out of which the board propose to pay a balance dividend of 4s. 3d. per share, making, with the interim dividend, 8s. 6d. per share, less income-tax, for the year, equal to 4 $\frac{1}{2}$ per cent., carrying forward £2,379. A year ago a dividend of 3s. 6d. per share was paid, making, with the interim dividend, 7s. 3d. (3 $\frac{1}{2}$ per cent.) for the year, free of income-tax, carrying forward £1,054.

BUENOS AYRES GREAT SOUTHERN RAILWAY.—After providing for the interest on the debenture and preference stock and 4 per cent. extension shares, 1912, and all other charges during the year, there remains an available balance on net revenue account of £928,702, out of which the board propose to pay a balance dividend of 4 per cent., less income tax, on the ordinary stock of the company, making, with the interim dividend paid in April last, 7 per cent. for the whole year ended June 30 last, carrying forward a balance of £137,702. A year ago the dividend was at the same rate and £124,640 was carried forward.

CENTRAL URUGUAY EASTERN EXTENSION RAILWAY. After providing for debenture interest, dividend on the 5 per cent. preference shares, and the interim dividend on the ordinary shares paid in April last, the balance of net revenue for the financial year to June 30 last amounts to £31,561, out of which the board propose to pay a balance dividend of 6s. 3d. per share on the ordinary shares, making, with the interim dividend, 10s. 6d. per share for the year, equal to 5 $\frac{1}{2}$ per cent., less income-tax, carrying forward £8,019. A year ago a dividend of 5s. 9d. per share was paid, making, with the interim dividend, 9s. 6d. (4 $\frac{1}{2}$ per cent.) for the year, free of income-tax, carrying forward £1,460.

BUENOS AYRES WESTERN RAILWAY.—After providing for the interest on the Government 5 per cent. loan of 1888, and on the company's 4 per cent. debenture stock, and on the 5 per cent. and 4 $\frac{1}{2}$ per cent. preference shares, 4 per cent. extension shares 1912 and 1913, and on all other charges during the year, there remains an available balance of £737,153 on net revenue account. The board propose to pay a final dividend of 4 per cent., less income-tax, on the ordinary stock, making 7 per cent., and a bonus of $\frac{1}{2}$ per cent., less income-tax, for the year, transferring £120,000 to the general reserve fund, £10,000 to the staff pension fund, £5,000 to the benevolent fund, and carrying forward a balance of £180,006.

CENTRAL URUGUAY RAILWAY OF MONTE VIDEO.—After providing for the interest on the debenture stocks, the rent of the North Eastern line, the dividend on the 5 $\frac{1}{2}$ per cent. pre-

ference shares, the interim dividend on the ordinary stock, and all other charges, there remains an available balance on net revenue account of £209,071, out of which the board propose to transfer £10,000 to the general reserve fund, and to pay a balance dividend of 2 $\frac{1}{2}$ per cent. upon the ordinary stock, making, with the interim dividend, 5 $\frac{1}{2}$ per cent., less income-tax, for the year, carrying forward £7,279. A year ago the dividend was 2 $\frac{1}{2}$ per cent., free of income-tax, making, with the interim dividend, 5 per cent. for the year, and £8,584 was carried forward.

CENTRAL ARGENTINE RAILWAY.—The directors have decided to recommend, subject to audit of the accounts, the payment of the following dividends, less income tax, for the six months ended June 30, 1911:—On £33,200 7 per cent. preference shares of £10 each a dividend of 7s. per share, making, with the interim dividend paid in April last, the full per cent. for the year; on £4,304,300 consolidated 7 per cent. preference stock a dividend of 3 $\frac{1}{2}$ per cent., making, with the interim dividend, the full 7 per cent. for the year; on £22,186,050 consolidated ordinary stock a dividend of 3 $\frac{1}{2}$ per cent., making, with the interim dividend, 6 per cent. for the year; on £2,317,000 consolidated ordinary stock (converted "new" shares, 1911) a dividend of 3 $\frac{1}{2}$ per cent. For the year ended June 30, 1911: On £811,800 deferred stock a dividend of 6 per cent., the same as for a year ago.

DISCUSSION ON RAILWAYS AT THE SOCIETY OF ENGINEERS.

At the meeting of the Society of Engineers on Monday last, Mr. C. Reginald Enock, F.R.G.S., a member of the Society, a great traveller, and an engineer, read a paper on "The necessity for safer, quicker and cheaper railways, with some proposals therefor." The paper gave rise, as indeed it was intended to do, to an excellent discussion. In this most of his proposals were rather fiercely criticised. Mr. Enock was very positive in his statements, and this naturally raised the opposition of those who did not agree with him that "the railway is still too slow, too insecure, and too costly." The speakers in the discussion (in which Mr. Ackworth took part) had no difficulty in proving that to mitigate the first two objections the third would have to be enormously aggravated—in fact all the author's suggestions tended in that direction. The buffer or telescopic carriages, with enormously strong springs to allow for what is so often called "contact" instead of impact, which he proposes putting at each end of an ordinary train and in the middle of long ones, would be costly and add sensibly to the weight to be hauled; the additional expert lookout man recommended, who would ride on the front of the engine, would also be an expensive and useless luxury; Mr. Enock's light railway, however cheaply constructed, if built as an addition to railways in being would give increased accommodation which might be provided at a much smaller cost on existing lines. Mr. Enock's contention that our railways were too slow—their average speed all round being 43 miles an hour—was also challenged, figures being quoted to show that the English service was not only the fastest all round in the world, but the most comfortable and generally efficient in the opinion of those who had studied the subject thoroughly. It was pointed out that to ensure greater security, the Man not the Machine being at fault (as Mr. Rayner-Wilson suggested two years ago, human nature would have to be altered; this the author proposed to do by increasing wages all round (while trotting out the old "chestnuts" as to the average pay of railwaymen), a costly and fatuous proposal in the present financial condition of the railway companies. One suggestion made was received with general approval. It was that the Government, the manufacturing companies and the railways should combine to bear the cost of an experimental line, similar to the Zossen, on which trials of all kinds would be made. The author suggested Dartmoor or the Yorkshire moors as an available place, but it was pointed out that there are many purely strategical lines still required which might well be used for that purpose. One speaker mentioned incidentally that, like other monorail systems, the Brennan had not proved a commercial success and had been rejected as a cheap system for adoption on the Great Australian transcontinental line.

A Pleasure Cruise Cancelled.—In consequence of the state of war existing in the Eastern Mediterranean the directors of the P. and O. Company have considered it prudent to cancel the proposed cruise of their steam yacht "Vectis" to Constantinople. The vessel was to have left Marseilles for Turkish and Grecian ports on October 12, but will now be despatched instead from London, on October 25, for Lisbon, Tenerife, and Madeira.

GENERAL NEWS.

THE ROYAL COMMISSION'S REPORT.

Although the Royal Commission of Inquiry regarding the working of the Conciliation Scheme of 1907 only concluded the hearing of evidence on Tuesday last, various forecasts of their report are already appearing in the daily newspapers. As in the main these forecasts agree, it is possible that they are near the truth. It is said that the Commission will favour recognition of the trade unions, but in a much modified form. One union spokesman will be allowed for the men of each railway company, this man to be elected by the executives of the Amalgamated Society of Railway Servants, the Associated Society of Locomotive Drivers and Firemen, the Railway Workers' Union, the Pointsmen's and Signalmen's Union, and the Railway Clerks' Association. The last-mentioned body will thus come into the general arrangements for the first time. It is also believed that the Commission will recommend one Conciliation Board for each railway, and as to appeal Sir T. R. Ellis and Mr. Beale are opposed to a National Board and prefer the new body which the Government proposes to set up for dealing with disputes in all industries. Mr. Henderson and Mr. Burnett, on the other hand, favour a National Board, while Sir David Harrel, the chairman, has not yet given his decision.

RAILWAY CONTRACTS.

The North British Locomotive Company of Glasgow have received an order to construct fourteen express locomotive engines and tenders for the Buenos Ayres Pacific Railway. The engines are to be of a powerful type, being eight-wheels coupled. This order is in addition to one for six engines and tenders for the same railway placed in Glasgow a short time ago.

Horseley Ironworks Company has received a contract of the value of £30,000 for bridgework to be used in the construction of the Chili Longitudinal Railway (Southern Section), which is being carried out by the company of which Mr. J. Norton Griffiths is the head.

Port Argentine Great Central Railway Company has placed a contract with a Paris syndicate of contractors for the construction of docks, quays, railways, etc., at the new port to be known as Port Argentine, in the province of Buenos Ayres, and with the Tilbury Contracting and Dredging Co., Ltd., of London, for the dredging of an approach channel $9\frac{1}{2}$ miles long in the Samborombon Bay.

TO STOP TRAINS AUTOMATICALLY.

It is reported that before a party of railroad and newspaper men at Quebec, recently, Alphonse Demers, a mechanic in the employ of the Intercolonial Railway at Chaudiere, demonstrated the work of an apparatus he has invented to stop automatically a railway train inside of 100ft. The appliance comprises a lever installed on the ties of the road bed, and a special mechanism attached to the tender. When the lever on the track touches the appliance on the fast-running locomotive, a signal is whistled in the cab, indicating that the train is nearing a semaphore or a place of danger, and if the driver does not hear the signal, being sick, asleep, or dead at his post, the mechanism of the tender, striking another lever, installed some 100ft. further, automatically shuts the throttle and sets the emergency brakes, stopping the train inside 100ft. It will cost only \$25 to provide a locomotive with the appliance.

GREAT WESTERN CONCILIATION BOARD.

In the week following the general railway strike meetings of the Conciliation Boards of the Great Western line were held in accordance with the terms of settlement "for the purpose of settling forthwith the questions at present in dispute so far as they are within the scope of such Boards." In the result practically no matters were brought forward which could rightly be termed disputes, bearing in mind the terms of the award and of the agreement signed by representatives of the company and of the men in March last. Somewhat extensive applications were, however, made on behalf of the several grades for increases in the rates of wages and reductions of hours of duty. In regard to these the company pointed out that a full programme of demands had been submitted to arbitration as recently as May, 1909, and that the resultant award—which

was binding on both parties—was operative until June 28, 1913, but a promise was made, the "G.W.R. Magazine" states, to review the whole of the circumstances as represented by the men and to convene further meetings as soon as possible.

THE MIDLAND ARBITRATION.

It is reported that, pending the issue of the report of the Railway Commission, the arbitration proceedings between the Midland Railway and a section of its servants on certain points on which the Central Conciliation Board were unable to agree have been postponed indefinitely.

A SOCIETY FOR NON-UNION RAILWAYMEN.

A meeting to protest against the tyranny of trade unions has been held at Widnes, the principal speaker being Mr. Mark Judge, a London architect. The following resolution was carried with slight opposition: "That the continued attempts of coercion on the part of trade unions make it imperative for workers who desire to remain free to organise in self-defence, and it is resolved to establish a society, called the Lancashire Railway Society of Free Workers, for the purpose of maintaining the principles of personal responsibility, and especially to protect, by every means in its power, the rights of individual members to live and work in freedom so long as they do nothing to interfere with the enjoyment of a like freedom by all others." Thirty members joined the society.

At a meeting held at the Whitehall Rooms, London, there was formed the committee for promoting the formation of societies of free workers. The executive comprises Lord Avebury, Sir George Darwin, K.C.B., Col. W. R. Davidson, C.B., the Earl of Dysart, Mr. Edwin Evans, Mr. Mark H. Judge, and Mr. C. F. Ryder (chairman). The aim of the committee is to establish county societies of free workers on the lines of the Lancashire Society founded at Widnes at the meeting referred to above. The office is at 7, Pall Mall, S.W.

ESCALATORS AT LONDON STATIONS.

The moving staircase which has long been a feature at the Earl's Court Exhibition has now been introduced at London railway stations. Two escalators have been installed at Earl's Court station by the District Railway for the rapid transference of passengers between its own line and that of the Brompton and Piccadilly Railway. The escalator underwent a Board of Trade inspection on Tuesday, and on Wednesday was opened for the use of the public. Four escalators will also be installed in the extension of the Central London Railway to Liverpool Street station. In addition, it is contemplated that the long wind-swept passage running from the District Charing Cross station to the Embankment station of the "Bakerloo" should be converted into a moving tunnel way, which will make the journey from one station to the other effortless. In the opinion of the traffic manager of the Central London Railway these moving stairways are far better than lifts for tube railway work, and no new tube station will be constructed without them. The escalator has the appearance of an ordinary stairway, four feet wide, which moves noiselessly onward and upward until, when near the top, the step on which the passenger stands falls off in its rate of rise, allowing the step in the rear to gain on it, when the upward movement ceases and the steps move forward horizontally in the form of a platform, from which, with the aid of a travelling hand-rail, even the most nervous of passengers can step without fear of shock or accident. Should the machinery by any chance fail the escalator can still be used as an ordinary stairway.

MORE TRAMWAY RIVALRY FOR LONDON LINES.

The City of London Corporation is to be recommended by their Improvement and Finance Committee to approve of the Bill of the London County Council for the extension of the Farringdon Road tramway to the north side of Ludgate Circus, and from the City boundary at Bishopsgate Street to a point near the Great Eastern Railway Hotel at Liverpool Street Station. The first-mentioned extension will compete with the underground line of the Great Northern Railway from Snow Hill to King's Cross, and the second extension may draw further traffic from the Great Eastern. An article in the current issue of the company's magazine indicates how the Great Eastern Railway ultimately triumphed over tramway and motor omnibus rivalry after failure had met their first attempt to meet it. In 1906 a census was taken of the number of passengers travelling and the seats provided in the Walthamstow and Enfield lines, when

it was found that during "rush hours" there were 37,000 more seats than passengers, and in any half-hour there was an excess of seats. The train service had been increased, and by the ingenuity of Mr. J. Holden, late locomotive superintendent, the carriages were widened so as to provide 20 per cent. additional accommodation; later the platforms were lengthened to admit of additional carriages being added to the trains. The loss of passengers continued to such an extent and became so serious that the company had ultimately to consider the question of competing on more even terms. After a very exhaustive inquiry the directors decided to reduce the fares to a figure more nearly approximating to the rates charged on the road vehicles, the superior speed and accommodation provided by the railway being considered sufficient to induce tramway travellers to return to the rail. Success has attended this arrangement, for much of the traffic has been regained.

"CAB" SIGNALLING ON THE GREAT WESTERN.

The directors of the Great Western Railway Company have received through the Board of Trade the medallion and honours diploma which were awarded for the Great Western exhibit of audible cab-signalling apparatus at the Brussels Universal Exhibition of last year. This exhibit is now on view at the Crystal Palace in connection with the Festival of Empire. It is a full size model of the cab of a locomotive fitted with the audible and visible arrangement of signalling in use on the Great Western Railway. Visitors are invited to make a complete inspection of the apparatus, which is designed to supplement or to take the place of distant semaphore signals. It gives two distinct audible signals—a steam whistle to indicate to the driver that he may expect to find the stop signals ahead of him at danger, and the ringing of a bell indicating to the driver that he may expect to find the stop signals ahead in the "all right" or clear position.

The sections of the Great Western line on which the system is in operation are as follow:—

Henley Branch. (Double Line.) In operation since January 1, 1906.

Fairford Branch. (Single Line.) About 22 miles in length. Worked on the Electric Train Staff system without semaphore distant signals. In operation since December 1, 1906.

Lambourn Valley Branch. (Single Line.) About 12½ miles in length. Electric Train Tablet system without semaphore distant signals. In operation since September, 1909.

Slough and Reading. Four Track Main Line, equal to 70 miles. In operation since December, 1908.

Slough and Portobello Junction (Westbourne Park). Four Track Main Line, equal to 68½ miles. In operation since May, 1911.

The total number of engines fitted with the apparatus up to the present is 36. From the statistics which have been kept it is found that no cases of false "clear" signals have been received, and that the number of incorrect signals (*i.e.*, "danger" when it should have been "clear") average one in every 1,782 successful operations, thus substantiating the claim made for the apparatus that it can never err except on the side of safety. The patentees of the apparatus are the Railway Audible Signal Company, Limited, 31, Budge Row, London, E.C.

IRISH STRIKE SETTLED.

As the result of the prolonged negotiations, the strike on the Great Southern and Western Railway was settled on Wednesday. The terms, which are practically those offered by the company last Saturday, are embodied in the following official statement:—"The strike on this line has to-day been definitely settled, a deputation from all departments having accepted the directors' offer of yesterday—namely, the board undertake to take back at once all the locomotive and permanent way men and 90 per cent. of the traffic men. The company must have an absolute withdrawal of the manifesto put forward in Checker O'Meara's letter of the 15th of September, with an expression of regret for leaving work without notice, and an understanding to handle all traffic offered and to obey all the commands of the officers. All promotions made to stand and men taken to be retained in the service. This undertaking was signed on behalf of the traffic and permanent way men by Checker Joseph O'Meara, and on behalf of the locomotive men by Driver John Byrne. Work on the line and at the various works will be resumed as quickly as possible. The board will grant the men taken back credit for their past services."

The strikers on the Midland line are being taken back on

the same terms, and those on the Great Northern are being reinstated as necessities of the line demand.

It will be remembered that the strike began on the Great Southern and Western on September 16th, when some men in Dublin declined to handle goods from a timber firm who had a dispute with their employees. This railway has been practically paralysed since then, but the attempt of the Executive of the Amalgamated Society of Railway Servants on September 21 to extend the strike all over Ireland was a failure. The settlement now arrived at was the outcome of an interview between a deputation from the men themselves with the directors, the trade union being altogether excluded.

THE NORTH WALL DISPUTE.

A deputation representing the Dublin employees of the London and North Western Railway on Thursday waited on Mr. Burgess, the Dublin manager, and informed him that the whole of the men at North Wall were prepared to resume work immediately in their former positions without penalty. Mr. Burgess stated that he could not agree to the demands, but he was prepared to reinstate as many of the men, which would be the large majority, as was warranted by the requirements of the company, provided the men complied with the following conditions: an expression of regret for leaving work without notice; an undertaking to handle all traffic of every description in the future and to obey all orders, seniority not to be interfered with unless circumstances compelled it; the position of the men for whom employment cannot be found at present to be considered as soon as opportunity offered. After full discussion by the men the items were agreed to by the deputation on their behalf. The carters' strike at North Wall, on the Midland Railway of England, was settled on Thursday, the majority of the men being reinstated.

THE SYMPATHETIC STRIKE DISAPPROVED BY LOCOMOTIVE MEN.

On Thursday the Executive Committee of the Associated Society of Locomotive Engineers and Firemen issued the following notice to their members:—"We, the Executive Committee, wish to lay before you our views on this matter. We would remind you that as a result of the terms of settlement of the national railway dispute on the 16th of August of this year we agreed to a Railway Commission to inquire into the working of the Railway Conciliation Scheme of 1907, and to report what amendments (if any) were necessary. After the acceptance by us of the Commission we could not without prejudice to the best interests of the whole of our members in these islands have advised them to withdraw their labour in support of any labour dispute not directly affecting their conditions of service. Further, we wish to state that we dissociate ourselves from sympathetic strikes. We believe that the continual growth of the spasmodic and unauthorised strikes will undermine and destroy the best results which trade unionism and collective bargaining have in the past achieved. We wish to place on record that this Committee is unanimous that no withdrawal of labour can be sanctioned except upon constitutional lines."

PERSONAL.

Mr. R. H. McCarthy, C.M.G., has been elected a director of the Salvador Railway Company, Limited.

Mr. Edward Snowball, engineer, late of the North British Locomotive Works, Glasgow, left personal estate valued at £15,045.

Mr. C. Campbell, senior assistant superintendent, has been appointed by the Great Indian Peninsular Railway Co. as telegraph superintendent, in succession to the late Mr. J. E. Neale.

Mr. George F. Bury, Vancouver divisional superintendent to the Canadian Pacific Railway Co., has been appointed Vice-President and General Manager, to fill the vacancy caused by the retirement of Sir William Whyte.

Mr. A. B. Coulter, who has been appointed Liverpool agent to the Great Eastern Railway Co., entered the company's service at Hertford goods office in 1880, and has since served in the district goods managers' offices at Cambridge and Ipswich, and as assistant cattle and south country canvasser for the Liverpool Street goods office. Since 1900 he has also discharged the duties of agricultural show traffic canvasser.

Mr. D. Ross Johnson, who has been secretary to the Indian Railway Conference Association, has been appointed general traffic manager of Bristol docks at a commencing salary of £1,000 per annum by Bristol Corporation. Mr. A. Harvey has been appointed secretary at £600, and Mr. R. H. Jones as chief clerk to the traffic manager, at a salary of £300, rising by annual increments of £50 to £400.

Ex-Railwaymen as Mayors.—Alderman N. Green, who is to be Lord Mayor of York during the coming year, was in early life in the service of the Lancashire and Yorkshire Railway Company. At the age of 25 he was offered an appointment as district superintendent of a portion of the Buenos Ayres and Rosario Railway, an offer he did not accept. Mr. R. E. Highton, who has accepted the Mayoralty of Workington for the fifth time, started his career as a clerk on the Cookermouth, Keswick, and Penrith Railway, and rose to be managing-director of the local iron and steel works company.

Mr. J. I. Berry. Secretary of the Great Indian Peninsula Railway Company, was made the recipient of a silver inkstand on Monday last, in the presence of the London staff. The gift, which was suitably inscribed, had been subscribed for by them, on the occasion of the completion of his fiftieth year of service with the company. Mr. Gore Browne, the accountant, in making the presentation on behalf of the staff, asked Mr. Berry to accept the offering as a mark of their esteem, and congratulated him upon the occasion. Mr. E. W. Montgomery, the registrar, added his appreciation. Mr. Berry, who seemed much moved by the proceedings, warmly thanked each member of the staff, telling them that, as fifty years ago he had come to the company as a junior clerk, he understood and sympathised with the work in all departments, and was at all times ready to lend a willing ear to their aspirations for advancement.

Dinner to Retiring Great Northern Officers.—At the Trocadero Restaurant, recently, a dinner was given to Mr. H. A. Ivatt, Locomotive Engineer, Mr. A. Ross, Engineer, and Mr. M. C. Lomax, Assistant Secretary, on their retirement from the service of the Great Northern Railway Company. The chair was taken by Mr. Oliver Bury, the General Manager, and there was a full attendance of chief officers and heads of all the leading departments in the service, except in one or two cases of unavoidable absence. The toast of "The Guests" was proposed by Mr. Bury in an interesting speech, in which he gave expression to the pride felt by the company in the positions to which both engineers had attained in their respective professions. At the close of his speech, on behalf of those present, he made a suitable presentation to each of the retiring officers. Appreciative speeches were also made by Mr. W. J. Grinling and Mr. E. H. Burrows, who emphasised the strong bond of sympathy which had existed between the retiring officers and the staff. The toasts were replied to characteristically by the three guests. The toast of "The Chairman," proposed by Mr. C. L. Edwards, was received with enthusiasm.

RAILWAY NOTES.

A Railway Bill to be Blocked.—Glasgow Trades Council has asked the Labour members to block all Caledonian Railway Bills in Parliament until the company has remedied the overcrowding of the workmen's trains.

Alleged Shortage of Trucks.—Bristol Chamber of Commerce has asked the President of the Board of Trade to receive a deputation respecting the difficulties experienced in the transport of goods as a result of the shortage of trucks at the city and port.

G.E.R. and Road Motors.—The light two-wheel parcel vans and some of the horse goods vans of the Great Eastern Railway, are likely to disappear before long. The company is running several covered motor vans supplied by McNameara, Ltd., contractors.

Contract for a Branch Railway in Uganda.—A contract has been signed by Messrs. Pauling for the construction of 110 miles of railway to connect the Great Sodo Lake at Magadi with the Uganda Railway at Ulu. The work is to be completed in eighteen months.

A Reduction in Assessments.—The North Eastern Railway Company some time since served notice of appeal against the assessments of their railways and stations in the Knaresborough Union. After negotiations with Mr. T. Hornsby, of York, the Assessment Committee on Thursday agreed to reduce the present assessments, amounting to £25,744, to £20,337 rateable value.

Titanium Alloy. Two new booklets, "Titanium, the Best Rail Ever Rolled," and "Titanium in Iron," have been issued by T. Rowlands and Co., Stirling Chambers, Sheffield. It is claimed for titanium alloy that it renders iron more homogeneous, more fluid, more uniform, closer grained; that it cools more slowly, and settles more quietly in the mould; that shrinkage is never increased, and in hard or poor iron is usually decreased; and that iron treated with this alloy shows an increase in tensile and breaking strength, and a most remarkable increase in compressive strength and resistance to abrasion or wear.

Immingham Dock.—The Great Central Railway Company's proposed new by-laws at these docks have called forth a protest from the Humber Coal Exporters' Association. It appears that in order to induce traffic to the new dock, the company are offering "preferences" to the colliery companies and exporters who shall guarantee to send not less than 300,000 tons a year, with further advantages when the export guaranteed is 400,000 tons. The company is also offering inducements to shipowners to use the dock for weekly and regular steamship service.

Paddington Station Extension.—Rapid progress is being made with the preliminary works for extending Paddington Station precincts on the arrival side. There are to be three additional platform lines, each 800 ft. long, and a central carriage road. An additional span of similar design to those existing will replace the present "ridge and furrow" roofing. A great deal of property has been acquired and removed for the purpose of remodelling and extending the permanent way to enable the rolling stock to enter and leave the station without fouling the main and relief lines.

Railway Classes at the School of Economics.—The lectures on railway and cognate subjects for railway students for the session 1911-12, at the London School of Economics, began on Thursday evening last with the first of fifteen lectures to be given by Mr. A. L. Bowley on "Methods and Applications of Statistics." The other lecturers will be Messrs. L. R. Dicksee, H. W. Disney, E. Lewis, H. Marsh (late principal claims assessor, London and South Western Railway), A. E. Newhook (assistant accountant, London and South Western Railway), W. A. Robertson, W. T. Stephenson, and E. Cleveland-Stevens.

Liquid Fuel for Engines.—Since Mr. J. Holden, late locomotive superintendent of the G.E.R., designed the "Holden" burner and used petroleum in a number of locomotives on that line, the use of liquid fuel does not appear to have made progress on British railways, although it is largely used in other countries where supplies have been available through proximity to the oil fields. In the introduction to a booklet entitled "Liquid Fuel; A Practical Proposition," the British Petroleum Company observe that the application of this fuel has never been thoroughly appreciated in this country, partly due to lack of enterprise in drawing attention to its practicability, while supplies were precarious, storage limited, and prices high and somewhat erratic. This unsatisfactory condition of affairs has now been entirely eliminated, and the company's faith in the future success of the fuel is such that they have provided huge storage at London Docks and nine provincial ports. They have standardised the fuel into three brands. A point is made of the fact that every British battleship and cruiser built during the last few years uses liquid fuel in the auxiliary engines, and also as an auxiliary to coal for the main boilers, while many destroyers use it solely and it is being introduced for submarine use.

A Convincing Reason

why the typewriter purchaser should select the

“REMINGTON”

has always been furnished by the unique Remington strength and reliability.

Eighteen additional reasons are furnished by the eighteen original improvements found in the latest Remington Models (Nos. 10 and 11.)

Let us send you descriptive booklet.

REMINGTON TYPEWRITER COMPANY,

100, Gracechurch Street, LONDON, E.C.

Telephone No. Avenue 5555 (4 lines).

The British Standard Brake Block

NOW UNIVERSALLY ADOPTED BY THE LEADING RAILWAY COMPANIES.

WHY?

Because we cut down your present cost 40% to 60%.

THEREFORE

Shift the responsibility on to us.

Our Brake Shoes last $2\frac{1}{2}$ times the life of the ordinary cast iron Block, with equal braking effect, and slightly less wear on the wheel tyres.

By our new design and blending of metals the Shoe can be completely worn out without danger.

One Shoe only, interchangeable and reversible for all classes of Carriages, Wagons, Vans, etc.

Don't theorise: get the facts from the list of Railways we now supply.

Our Representatives, with suitable samples for trial, are at your command.

The National Rail & Tramway Appliances Co. Ltd.,
12-18, TAYLOR STREET, LIVERPOOL.

COMPANY NOTICES.

The Buenos Ayres Great Southern Railway Company Limited.

NOTICE.

THE Buenos Ayres Great Southern Railway Company, Limited, hereby give notice to the holders of the Ordinary Stock Warrants to Bearer that should the Board's recommendation to pay a balance dividend for the half-year ended 30th June, 1911, of 4 per cent. (less income tax) on the Ordinary Stock be accepted by the Company in General Meeting convened for Wednesday, the 18th October, 1911, Coupon No. 8 will be payable on and after the 19th inst. at the banking house of Messrs. Glyn, Mills, Currie and Co., 67, Lombard Street, London, E.C.

Notice is also given to the holders of Stock Warrants to Bearer that Coupon No. 8, representing interest for the half-year ended 30th June, 1911, in respect of the 5 per cent. Preference Stock, will be payable (less income tax) at the same date and place.

All Coupons will be retained three clear days for verification.

By Order of the Board,
A. GIET, Secretary.

The Great Western of Brazil Railway Company, Limited.

NOTICE is hereby given that the Share Transfer Books of the Company will be closed from the 16th to the 31st October (both days inclusive) for the purpose of preparing the Dividend Warrants on the Share Capital of the Company in respect of the half-year ended 30th June, 1911.

By order of the Board,
H. HARPER,
Acting-Secretary.

Offices of the Company,
River Plate House,
Finsbury Circus, E.C.

TENDERS INVITED.

South Indian Railway Company.

THE South Indian Railway Company, Limited, are prepared to receive Tenders for the Supply of—

1. Carriage Fittings: Hardware, Screws and Sundries.
2. Two Locomotive Tank Engines (Metre Gauge).

Specifications and forms of Tender may be obtained at the Company's offices.

Tenders, addressed to the Chairman and Directors of the South Indian Railway Company, Limited, marked "Carriage Fittings," or "Locomotives," as the case may be, must be left with the undersigned not later than 1 o'clock p.m. on Wednesday, the 25th October, 1911.

The Company is not bound to accept the lowest or any Tender.

A charge, which will not be returned, will be made of 20s. for each copy of specification No. 1, and 40s. for each copy of No. 2.

Copies of the drawings may be obtained on payment at the office of Robert White, Esq., M.I.C.E., Consulting Engineer to the Company, 3, Victoria Street, Westminster, S.W.

By order,
V. E. DEBROE, M.I.C.E.,
for Managing Director.

Company's Offices,
91, York Street, Westminster, S.W.,
13th October, 1911.

Glasgow and South Western Railway.

TENDERS FOR STORES.

THE Directors of this Company are prepared to receive Tenders for the Supply of—

1. Bricks, Fireclay Sewage Pipes, etc.
2. Brooms, Brushes, etc.
3. Canvas, etc.
4. Cordage, Ropes, and Twines.
5. Carriage Furnishings.
6. Carriage Trimmings and Laces, etc.
7. Colours, Paints, etc.
9. Drysalteries.
10. Files and Steel.
11. Gas and Water Fittings.
12. Glass.
13. Hinges.
14. India Rubber (Vulcanised) and Engine Packings.
15. Iron and Steel.
16. Iron Castings (for Locomotive Department).
17. Iron Chain.
18. Lamp Fittings.
19. Lamps and Tinware.
21. Leather Furnishings.
22. Locks.
23. Nails and Tacks.
24. Oils.
25. Screws and Cotter Pins.
26. Shovels and Spades (Steel).
27. Sundry Furnishings.
28. Tools.
29. Tool Shafts and Handles.
30. Varnishes.
31. Waste.
32. Wick Cottons.
33. Wire.

The Contracts extend to Six or Twelve Months from 1st December next.

Detailed Schedules and Specifications can be obtained on application to R. F. Harrison, Stores Superintendent, Kilmarnock.

Sealed offers, marked "Tenders for Stores," to be lodged with the Undersigned, on or before Saturday, 21st Current.

The Directors do not bind themselves to accept the lowest or any Tender.

F. H. GILLIES, Secretary.
Company's Office, St. Enoch Station,
Glasgow, 9th October, 1911.

City of Toronto, Canada.

SEALED Tenders will be received by registered post only, addressed to the Chairman of the Board of Control, City Hall, Toronto, Canada, up to 12 o'clock noon on Wednesday, November 1st, 1911, for the Construction of Three Miles of Reinforced Concrete Subway and Subway Stations.

No Tender will be received for less than one-half mile sections.

Envelopes containing Tenders must be plainly marked on the outside, "Tenders for Proposed Subway."

Plans and specifications may be obtained on application to the Department of Railways and Bridges, City Engineer's Office, Toronto; also on file for inspection at the following points:—

1. N. B. Colcock, Ontario Govt. Agent, 163, Strand, London, W.C.
2. Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C.
3. "Canadian Engineer," B33, Board of Trade Building, Montreal.
4. "Canadian Engineer," Room 404, Builders' Exchange Building, Winnipeg.
5. "Engineering News," 220, Broadway, New York.
6. "Engineering Record," 239, West 39th Street, New York.
7. "Engineering Contracting," 537, S. Dearborn Street, Chicago, Ill.

Each tender must be accompanied by a marked cheque for Two Thousand (\$2,000) Dollars for each one-half mile section tendered on.

The lowest or any Tender not necessarily accepted.
G. R. GREARY (Mayor),
Chairman, Board of Control.

Great Northern Railway Company (Ireland).

THE Directors of the Great Northern Railway Company (Ireland) are prepared to receive Tenders for the Supply of the undermentioned stores for Twelve months, from the 1st January to the 31st December, 1912.

	No. of Form.

THE PROMOTION OF INDUSTRIAL PEACE.

One of the most interesting—and, it is to be hoped, the event will show one of the most important—steps ever taken in this country for the settlement of labour disputes, is the appointment by the Government of an Industrial Council representative of both employers and workmen. The labour question has become so intolerable—partly through the federation of trade unions and partly owing to the passing by the present Government of the Trade Disputes Act—that it was absolutely necessary some steps should be taken for the prevention of strikes and for the settlement of them when they do occur. Among the branches of industry in this country which have suffered and are suffering from the effects of labour unrest and strikes, the railways are conspicuous. Even now we have a Royal Commission trying to patch together a new peace in the railway world. The formation of the Industrial Council is purely an experiment, but everyone must wish well to it. The credit for the idea belongs to Sir Charles Macara, President of the Federation of Master Cotton Spinners' Associations. When he proposed an advisory board or council, the Government promised to give earnest attention to any feasible and properly supported plan which might tend to prevent or shorten industrial warfare. The support came in the form of a petition signed by some 1,500 prominent men in industrial life. The Board of Trade, after consultations with the parties, issued invitations to leaders of employers and employed to become members of the proposed Council, and the result is seen in the official list now issued. It will be observed that the names, which we publish in this issue, include many of the foremost men in the leading industries of the country, as well as leaders in most if not all of the principal trade unions. The only fault, under this head, is that no representation appears to be given to non-union workmen. To find the best men to represent the interests of the vast mass of unorganised labour in the country may be difficult, but the attempt should be made. Moreover, there is nothing to prevent it being made, as the official announcement says that additions may be made to the list. It will be noticed that Sir Charles Macara is a member, while railway interests are represented by Mr. G. H. Claughton, chairman of the London and North Western Railway Company, and Mr. J. E. Williams, general secretary of the Amalgamated Society of Railway Servants. Crowning the whole is the fact that the chairman of the new Council is Sir George Askwith, Controller-General of the Labour Department of the Board of Trade, whose extraordinary success as a conciliator in trade disputes makes him pre-eminently fitted for the position. The whole chance of the Council, indeed, lies in the personality of its members. The Government have recognised that in this country at least there is little use in attempting compulsion for the settlement of trade disputes. Voluntary methods alone are to be tried. The reference to the Council is purposely couched in vague and general terms, so that the Council may have the freest possible hand. It has been established "for the purpose of considering and of inquiring into matters referred to them affecting trade disputes, and especially of taking suitable action in regard

to any dispute referred to them affecting the principal trades of the country or likely to cause disagreements involving the ancillary trades, or which the parties before or after the breaking out of a dispute are themselves unable to settle." The desire is to supplement the operations of the Board of Trade under the Conciliation Act of 1896. It is plain that the Board of Trade arbitration machinery will not be interfered with. If parties desire to go to arbitration they can do so, but apart from that they will have this new influential Council, which will, when called upon, investigate cases and make recommendations. The hope is—and with a Council constituted as this one is the hope does not seem vain—that neither employers nor workmen will lightly set aside any proposals for settlements of disputes put forward by the Council, but will accept them, it may sometimes be with modifications. Indeed, to reject a proposed settlement put forward by the leaders of the most powerful organisations on both sides would alienate public opinion from those who rejected the advice. Two possible difficulties remain. One is that the Council may sometimes be unable to agree on proposals. The other is that workmen may sometimes, as did the railway trade unions, agree to a scheme, and thereafter tear it up. Time will show what success can be gained, but in the meantime the scheme is well worth a trial.

MEXICAN RAILWAY REPORT.

The report of the Mexican Railway for the half-year ending on June 30th last is peculiarly interesting in several respects. To begin with, it shows the best dividend result so far as the ordinary stockholders are concerned since 1890—the year in which, by the way, the competition of the Inter-Oceanic first came into play. Since then, of course, the fortunes of the company have undergone remarkable changes. Not only did the dividend on the 6 per cent. Second Preference Stock entirely disappear, but at one time the payment on the 8 per cent. First Preference Stock declined to even as low as $\frac{1}{2}$ per cent. per annum. The recovery in the position of the company for the most part dates back to the time when the Mexican currency was established on a gold basis. It has already been so marked as to replace the whole of the dividend of 8 per cent. on the first Preference and 6 per cent. on the Second Preference, and now for the past half-year a distribution at the rate of $2\frac{3}{4}$ per cent. per annum is to be made on the Ordinary Stock. In fact, in round figures the total recovery in the dividend payments for the Preference and Ordinary stockholders of the line represents a sum of £300,000 per annum. The accounts for the past half-year are specially interesting on account of the experience they afford of the substitution of oil for coal as fuel. The conversion of the engines for this purpose was carried out on the main line by the middle of May last, and by the beginning of the current half-year the locomotives on the branch lines were also using oil fuel. Judging from the accounts, the results have already been quite satisfactory, for a reduction in the fuel bill of \$22,000 is shown, in spite of the largely increased traffic handled. The gross receipts of the half-year advanced by \$145,700 (Mexican currency), of which \$123,000 were derived from passenger traffic. On the other hand, the working expenses were reduced by \$27,500, mainly on account of the economy in fuel referred to. The net income was an advance of \$173,000 (Mexican currency), or, say, £17,300, and after meeting interest, &c., the increase in the sterling balance of net revenue was £16,100, which not only provides the full 6 per cent. on the Second Preference, but raises the Ordinary dividend from $\frac{3}{4}$ per cent. per annum to $2\frac{3}{4}$ per cent. It is reassuring to shareholders to learn from the report that the damage done to the line during the revolution was quite insignificant, and the traffic was only delayed for a few days. The sterling value of

the dollar was well maintained in the half-year, having been 24.536d. against 24.55d. in the corresponding half of 1910. During the months of July and August, the receipts and expenses, as advised by telegraph, showed some reaction. Gross receipts fell by about \$156,000 in the two months, and in spite of a saving of \$112,000 in expenditure, the net receipts are of course lower by about \$44,000 (Mexican currency), equal to, say, £4,500. The report has made a very favourable impression, and certainly the economies lately effected are a very encouraging feature. The hope is also expressed, and has already been reflected in recovering quotations for Mexican Railway securities generally, that in spite of the changes of Government in Mexico, the railway policy will not only be maintained upon the old lines, but applied in a more thorough going way, and this being so, the outlook for the railways must be regarded as satisfactory.

EFFECT OF RECOGNITION ON THE NORTH EASTERN.

There were rumours during the inquiry of the Royal Commission on Railway Conciliation that Mr. Butterworth, the North Eastern general manager, would speak highly of recognition. But those who feared that his evidence would prejudice the opposition of the remainder of the railway companies against recognising the unions, and weaken their defence, had an agreeable surprise. Of their conciliation scheme Mr. Butterworth spoke very highly. It differs from what is generally known as the Board of Trade scheme—with which, by the way, the Board of Trade, according to Mr. Marwood's evidence, do not care to be too closely identified—in some respects. The principal differences are that on the North Eastern Railway there is only one composite board and there is no compulsory reference to arbitration. It may also be remarked in passing that the witnesses of the A.S.R.S. favoured this type of conciliation board. One reason for this, no doubt, is that two good society men from the traffic, another two from the locomotive, and a third two from the permanent way staff will put up a better fight than four or five men of one grade at the sectional boards. There is also a third difference, which is that the North Eastern conference deals not only with hours and wages, but conditions of service. It is true that the constitution only provides for "free discussion"—and on this point Mr. Butterworth observed that if they were tied more strictly as to what would happen after discussion the question would become more crucial. But the inclusion of conditions of service gives the North Eastern officials plenty of work; and one of Mr. Butterworth's complaints was the amount of correspondence from the local secretaries. The results of that company's recognition of the A.S.R.S. has undoubtedly been very disappointing. This feeling is indicated throughout the evidence. In one place, Mr. Butterworth observed that it was a matter of legitimate disappointment that the trust they had placed in the union was not sufficient to keep them free from trouble. In referring to the strike at Hull the witness said it was an old-fashioned barbarous way of dealing with labour matters and one would have hoped that having recognised the union and having a conference like the North Eastern had, that sort of thing was a feature of the past. In this very strike at Hull, and in the previous one at Newcastle, a number of the branch secretaries were on strike, and Mr. Butterworth did not think it a right position that officials of a union recognised by the company should be out on strike, especially in a strike not recognised by the union. Two examples of attempted interference with discipline were given, and in one of these Mr. Butterworth was told by some members of the deputation that the matter was out of the men's hands. It was immaterial what the man thought as to the justice or injustice of his

punishment. "You have got to satisfy the society of that now." The calling-out of the North Eastern men at the National Strike had, apparently, caused great concern. The witness said: "It only brings out the difficulty and, as we think, the unfairness of our position, that all our men were brought out on a quarrel which was none of ours and to secure a point which we had long conceded." The Irish strike had been another warning, which "makes us additionally frightened because it shows us the sort of risks we run." This is particularly distasteful because the trouble had arisen over the handling of "blackleg" traffic. The witness said: "It is a terrible warning to us to know that a responsible body like the executive of the Amalgamated Society is prepared to press for action on these lines." The attitude towards non-unionists was shown to be developing in a way that North Eastern officials regard as very serious, and which alters the relations to the unions at once, because they ask not only that the company bargain with them, meet them, and be friends with them, but ask that the companies be enemies with, and, in fact, wipe out of existence, everybody else. An important point, although, perhaps, one of sentiment, made by Mr. Butterworth was that dealing with the unions takes the officials out of close touch with the men. This is a pity, as the traditions of railway service are very good, and the attitude of the management towards the men has always been one of great interest and of friendly relations. "We are all in one service. We do not talk of an employment; we talk of being in a service."

Weekly Traffic Summary.

The traffic receipts for the week ended October 8, as officially published by the fifty-one principal railways of the United Kingdom, amounted to £2,310,579, which was earned on 20,400 miles, being at the rate of £113 5s. 3d. per mile of line open. For the corresponding week of 1910 the receipts of the same lines amounted to £2,240,709, with 20,346 miles open, or £110 2s. 7d. per mile. There was thus an increase of £69,870 in the receipts, an increase of 54 in the mileage, and an increase of £3 2s. 8d. in the receipts per mile. Thirty-three of the returns distinguish between the receipts from passenger and goods traffic, and these show an increase of £1,312 (or a decrease of 1s. 4d. per mile) in the passenger receipts, and an increase of £64,812 (or £3 2s. 1d. per mile) in the receipts from goods traffic. The aggregate increase of the thirty-three railways for fourteen weeks in the passenger receipts has been £56,171, while the aggregate decrease in the goods traffic was £126,139. The aggregate receipts of the fifty-one railways for fourteen weeks (July 2 to October 8) amounted to £33,702,330, in comparison with £33,826,201 in the corresponding period of last year—a decrease of £123,871. Owing to the recent strike on the Irish railways the traffic receipts of the Great Southern and Western Railway were not published for this week separately, and are consequently omitted. The returns of this railway for the three weeks ended October 6 show a decrease of £63,345, making the aggregate decrease to date £57,315.

Egyptian Railways and American Coal.—The threat of a national stoppage in this country is said to be the reason for the general manager of the Egyptian State Railways applying to Cardiff on Monday last for from 30,000 to 40,000 metrical tons of American coal to be delivered at Gabbari, Alexandria, from the end of November. The Egyptian Railways have recently asked for tenders from South Wales for 305,000 metrical tons of Monmouthshire or similar quality, to be delivered from December 1 next, but nothing is so far definitely known as to the allotments, although there is little doubt that Watts and Co., Pyman, Watson and Co., and W. Milburn and Co. have secured the bulk of the contract, at prices averaging about 13s. 8d. f.o.b.

The Bank return this week showed a position rather stronger than was generally expected. As much as £1,067,000 left the Bank for foreign places, chiefly in South America and the Mediterranean, and only £39,000 was returned from the provinces. The active circulation of notes, however, contracted by £440,000, so that the Reserve is not more than two-thirds of a million less. The payment of the quarterly dividends is reflected in the diminution by £1,000,000 of Government securities, but other securities are little changed. Public deposits are £4,891,000 less, and the demands of the Government on the money market are likely to be heavy for some months to come. Other deposits have increased by £3,120,000 to £45,987,000, which had the effect of removing what slight tendency towards hardening was observable in rates for loans and discounts before the figures were known. As the result of all changes, the ratio of Reserve to liabilities has risen nearly half per cent. to 51.9 per cent., or about five points above the level which obtained at the corresponding date last year. The Reserve also is nearly three millions higher, so that the position is one of marked strength.

In face of the perturbations of foreign and domestic politics, accompanied, as happily may still be said to be the case, by expanding trade, it is well that our central institution has thus husbanded its resources. The fact has been one among those which assisted in the return to

greater activity and rising prices which took place on the Stock Exchange towards the middle of the week. Up to that time the pressure exercised by the evidence of labour unrest, and the anxieties attending the development of hostilities between Italy and Turkey, positively paralysed business, and prices crumbled away day by day without any transactions to speak of. The change of tone when it did take place was not ushered in by any striking event. As is so often the case, no assignable cause could be given for the alteration of sentiment except that, on further consideration, the reasons for despondency no longer appeared so formidable as at first when compared with the continuing evidence of growing trade. The traffic receipts of our railways gave renewed and telling testimony with regard to that on Wednesday. A marked revival in the ordinary stocks of these companies was the conspicuous feature of the improvement, but the influence of traffic receipts on this advance is not easy to trace. The advance was ascribed to the new departure of the Cabinet in respect to the means adopted for dealing with labour disputes. If that were the case, the Southern lines, being least in danger from this cause, should benefit least, but here again the usual list which appears at the end of this article affords little corroborative evidence. This market is still more influenced by the state of the accounts open than by the logic of the facts presented by the trade and prospects of the several companies. Last Saturday the flatness of Consols and other British Government stock depressed all markets. The Moroccan difficulty was again in evidence, and its influence appeared in the dulness of the market for foreign Government stocks. American rails fell, Foreign rails were generally dull, and our Home railway shares did not escape the depression. When the markets opened on Monday, no appreciable improvement in tone could be detected. British Government stock again declined, giving the cue to other markets; numerous sales were effected in Home rails in view of the settlement, and purchasers were very shy, so another decline occurred here.

United States railways were irregular, with a preponderance of declines. Canadian railways showed little movement. A rise in Entre Rios was the most enlivening feature among foreign rails. The next day was the first of a new account, but a further decline in Consols seemed an ill omen for its development. However, the progress of the settlement disclosed a paucity of stock in most departments, and "taking in" was not always easy. The Contangos on Home rails ruled $4\frac{1}{2}$ to $5\frac{1}{2}$ per cent., but somewhat lighter on the heavy stock. On Americans the charge fell off to 4 per cent. in many cases, while 5 per cent. was the average rate on foreign rails. On Wednesday Consols recovered $\frac{1}{8}$ th, and Foreign Government stocks rose all along the line. In Home rails such a rise took place as embraced every active stock in the list. The advance here was still more remarkable the following day, when there were more than half-a-dozen advances of a point and more recorded. American, Canadian, and Mexican rails also improved, and many foreign railways were included in the advance, everything pointing to general causes being at work to the exclusion of particular merits or defects.

On Friday the growing seriousness of the news from China gave pause to the rising tendency exhibited in the stock market. Foreign Government stocks, from which the other departments now generally take their cue, flinched very appreciably in face of the likelihood of a rebellion of the first magnitude in the Chinese Empire, and the stocks derived from that quarter naturally fell. Dulness ensued throughout the markets and Home Rails responded with characteristic alacrity. The falls in this department, though small in proportion to the previous rises, comprised the whole active list with the same uniform impartiality, the fact being that the political forces now influencing the general level of prices are so important that they dwarf all other considerations.

The movements of the week are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.

New London and South Western Locomotives.—The new locomotives which Mr. Dugald Drummond, chief mechanical engineer of the London and South Western Railway, has designed for the fast and heavy non-stop passenger trains between Waterloo and Bournemouth, are of the four-cylinder, six-coupled type. In our last issue these were described as of the "Atlantic" type, but no "Atlantic" type engines have been constructed by the London and South Western Railway and it is improbable that this type will ever be adopted on this line.

SOME MODERN AMERICAN CARS.

An example of latest American practice in passenger carriages is afforded by a number of vehicles recently delivered by the American Car and Foundry Company for the Missouri Pacific-Iron Mountain system. These include eleven coaches for the Missouri Pacific Railway and one chair car for the St. Louis Iron Mountain and Southern Railway. The general appearance

bottom chord angles on the outside extend continuously for the full length of the girder, while the inside bottom chord angles are likewise continuous except that they terminate at a point just forward of the draft gear at either end of the car. The ends of the centre sill are cut out in such a manner as to permit the bottom portion to extend underneath the buffer, which latter is further supported by angle connections with the centre sill. The side sills are each composed of $\frac{1}{2}$ in. web plate having for

View of Passenger Coach.

Plan of Chair Car.

and methods of construction are shown by the accompanying illustrations, for which we are indebted to the *Railway and Engineering Review*, of Chicago. The bodies for both styles of car are similar in appearance.

In the case of the coaches, the underframe consists of a centre sill of the double-girder fish-belly type, each girder being

its top chord member a 3 in. by 3 in. by 5-16 in. angle turned toward the centre of the car, and for its bottom chord member, a 4 1-16 in. by 10.3 lb. "Z" section. The two cross bearers on each car are built up of 5-16 in. web plate with 3 in. by 3 in. by 5-16 in. angle top and bottom chord. The top cover plates are $\frac{1}{4}$ in. in thickness and 10 in. wide and extend the entire width

Interior of Coach.

Interior of Chair Car.

built up of a 5-16 in. web plate having a 3 1/2 in. by 3 in. by 3/4 in. top chord angle and two bottom chord angles of the same size. The top cover plate is 26 in. wide by 1/4 in. in thickness. The web plates of the girders are spliced at the centre with 5-16 in. plates on either side. The cover plate is applied in three pieces with the splices between the cross bearers and the bolsters. The top and

of the car, while the bottom cover plates are 8 in. wide and 5-16 in. in thickness; 3 in. by 3 in. by 5-16 in. angles are used in the connections between the cross bearers and the centre sills. The body bolsters are of a construction similar to the cross bearers, having two 5-16 in. web members, reinforced top and bottom by means of 3 in. by 3 in. by 5-16 in. angles with a 1/4 in.

top cover plate extending the full width of the car, and $\frac{3}{4}$ -in. bottom covers. A properly machined cast steel filler is placed between the centre sills to afford a proper bearing for the centre plate and the adjacent structural members. Provision is made for the use of the Woods roller side bearings, in addition to which a jacking block is placed on the side sill Z-bar at the ends of each bolster. Seven-inch channel end sills are used, these being placed between the centre and side sills and provided with a 12-in. by 5-16-in. bottom cover plate extending the full width of the car. The end posts are securely kneeed to these plates and are riveted to the channel which also carries the furring to which the vestibule finish is secured. The buffer beams are of cast steel.

The floor beams are of 4 in. by 5.25 lb. channels extending longitudinally and supported at intervals by channels of the same section extending crosswise of the car. One-eighth-inch black steel sheets are secured to these floor beams; bolted to

Section through Underframe.

these sheets are a series of $1\frac{1}{2}$ in. by $3\frac{1}{2}$ in. nailing strips, on the edges of which cleats are nailed for the purpose of holding the hair felt insulation. This latter is of 1 in. thickness, is glued to the steel floor sheets and is packed underneath the cleats on the sides of the floor nailing strips. The sub-floor is of 13-16 in. yellow pine laid crosswise of the car, while on the top of this is a course of yellow pine of the same thickness running lengthwise of the car. Between the two courses, there is placed a layer of Neponset paper.

The side sill furring, the side plates, and the side posts are of yellow pine, the latter being tenoned into the side plate and side sill furring and bolted to the side sills. The end plates are likewise of yellow pine and are reinforced by $\frac{1}{2}$ in. Z-bars secured to the end post reinforcing channels, while for the corner posts $3\frac{1}{2}$ in. by $3\frac{1}{2}$ in. by 7-16 in. angles are used. The end posts are of $\frac{1}{2}$ in. by $5\frac{1}{2}$ lb. channels to which suitable furring strips are

Half Cross Section of Passenger Coach:

Side Framing of Car.

attached. In the roof structure there are eleven main carlines of 2in. by 5in. iron, faced on either side by carlines of ash. The intermediate carlines are of cottonwood. The deck sills and the deck plates are of 3in. by 5½in. and 2½in. by 4½in. yellow pine respectively. The roof boards, 1½in. by 2½in. in size, are likewise of yellow pine and are blind-nailed and face-screwed to the carlines. The roof boards are covered over

of Cuban mahogany throughout, plain in design, but of neat appearance. The end doors and window frames are likewise of mahogany with double sash in two parts. Pantasote curtains are used. The headlining is of three-ply poplar veneer, painted green with a simple border of gold. Thirty-eight Scarritt improved high-back seats and five stationary seats, all of which are upholstered in Chase crimson mohair plush,

afford a seating capacity for 86 persons. The seating capacity of the chair car, which is fitted with Searritt twin reclining chairs, is sufficient to accommodate 66 persons.

The trucks are of the Commonwealth Steel Company's 4-wheel cast steel pedestal type, with Midvale Steel Company's 30-in. rolled steel wheels on M. C. B. standard axles with 5½-in. by 10-in. journals. The trucks are fitted with Symington journal boxes, the Chicago Railway Equipment Company's diamond special brake beams, Christie automatic adjustable brake heads, and Streeter steel back brake shoes. The Westinghouse L. N. air brake equipment is provided, and is adjusted to give a braking power equal to 60 per cent. of the light weight of the car on the basis of 50 lbs. cylinder pressure. The American Brake Company's form "K" slack adjuster suitable for Westinghouse 18-in. cylinders is applied. The heating of the cars is effected by means of the Gold Car Heating Company's duplex steam heat system used in conjunction with a Baker double coil heater of the American Car and Foundry Company's design and manufacture. The cars are lighted by means of Pintch gas, having six Safety Car Heating and Lighting Company's single mantle centre lamps suspended from the roof of the car. In addition to this the coaches are wired in conduit for the possible future application of electric lights. Other equipment includes the Westinghouse friction draft gear; the Simplex passenger car coupler; the Forsyth buffing mechanism; Acme improved fire-proofed diaphragm and vestibule curtains; American Car and Foundry Co.'s standard steel trap door with lifting and operating device, and the same company's standard steps with Mason carborundum treads.

TO PREVENT LABOUR DISPUTES.

A NATIONAL INDUSTRIAL COUNCIL.

The Board of Trade last Tuesday night sent out the following official announcement:—

His Majesty's Government have recently had under consideration the best means of strengthening and improving the existing official machinery for settling and for shortening industrial disputes by which the general public are adversely affected. With this end in view consultations have recently taken place between the Prime Minister and the President of the Board of Trade and a number of representative employers and workmen specially conversant with the principal staple industries of the country and with the various methods adopted in those industries for the preservation of peaceful relations between employers and employed.

Following on these consultations, and after consideration of the whole question, the President of the Board of Trade, on behalf of His Majesty's Government, has established an Industrial Council representative of employers and workmen. The Council has been established for the purpose of considering and of inquiring into matters referred to them affecting trade disputes, and especially of taking suitable action in regard to any dispute referred to them affecting the principal trades of the country, or likely to cause disagreements involving the ancillary trades, or which the parties before or after the breaking out of a dispute are themselves unable to settle.

In taking this course the Government do not desire to interfere with but rather to encourage and foster such voluntary methods or agreements as are now in force or are likely to be adopted for the prevention of stoppage of work or for the settlement of disputes. But it is thought desirable that the operations of the Board of Trade in the discharge of their duties under the Conciliation Act, 1896, should be supplemented and strengthened, and that effective means should be available for referring such difficulties as may arise in a trade to investigation, conciliation, or arbitration, as the case may be.

The Council will not have any compulsory powers.

The following gentlemen, in their individual capacity, have accepted Mr. Sydney Buxton's invitation to serve on the Council:—

EMPLOYERS' REPRESENTATIVES.

Mr. George Ainsworth (Consett), Chairman of the Steel Ingot Makers' Association.

Sir Hugh Bell (Middlesbrough), President of the Iron, Steel, and Allied Trades Federation, and Chairman of the Cleveland Mine Owners' Association.

Mr. G. H. Claughton (London), Chairman of the London and North Western Railway Company.

Mr. W. A. Clowes (London), Chairman of the London Master Printers' Association.

Mr. J. H. C. Crockett (Northampton), President of the Incorporated

Federated Association of Boot and Shoe Manufacturers of Great Britain and Ireland.

Mr. F. L. Davis (South Wales), Chairman of the South Wales Coal Conciliation Board.

Mr. T. L. Devitt (London), Chairman of the Shipping Federation, Limited.

Sir T. Ratchitt Ellis (Wigan), Secretary of the Lancashire and Cheshire Coal Owners' Association, and Joint Secretary of the Board of Conciliation of the Coal Trade of the Federated Districts, etc.

Mr. F. W. Gibbins (South Wales), Chairman of the Welsh Plate and Sheet Manufacturers' Association.

Sir Charles Macara (Manchester), President of the Federation of Master Cotton Spinners' Associations.

Mr. Robert Thompson, M.P. (Belfast), Past President of the Ulster Flax Spinners' Association.

Mr. Alexander Siemens (Woolwich), Chairman of the Executive Board of the Engineering Employers' Federation.

Mr. J. W. White (Sunderland), President of the National Building Trades Employers' Federation.

WORKMEN'S REPRESENTATIVES.

Mr. Hon. Thomas Burt, M.P. (Newcastle), General Secretary of the Northumberland Miners' Mutual Conciliation Association.

Mr. T. Ashton (Manchester), Secretary of the Miners' Federation of Great Britain and General Secretary of the Lancashire and Cheshire Miners' Federation.

Mr. C. W. Bowerman, M.P. (London), Secretary of the Parliamentary Committee of the Trades Union Congress, and President of the Printing and Kindred Trades Federation of the United Kingdom.

Mr. F. Chandler (Manchester), General Secretary of the Amalgamated Society of Carpenters and Joiners.

Mr. J. R. Clynes, M.P. (Manchester), Organising Secretary of the National Union of Gas Workers and General Labourers of Great Britain and Ireland.

Mr. H. Gosling (London), President of the National Transport Workers' Federation and General Secretary of the Amalgamated Society of Watermen, Lightermen, and Watchmen of River Thames.

Mr. Arthur Henderson, M.P. (Newcastle), Friendly Society of Ironfounders.

Mr. John Hodge, M.P. (London), General Secretary of the British Steel Smelters, Mill, Iron, and Tinplate Workers' Amalgamated Association.

Mr. W. Mosses (Manchester), General Secretary of the Federation of Engineering and Shipbuilding Trades and of the United Patternmakers' Association.

Mr. W. Mullin, J.P. (Manchester), President of the United Textile Factory Workers' Association and General Secretary of the Amalgamated Association of Card and Blowing Room Operatives.

Mr. E. L. Poulton (Leicester), General Secretary of the National Union of Boot and Shoe Operatives.

Mr. Alexander Wilkie, M.P. (Newcastle), Secretary of the Shipyard Standing Committee under the National Agreement of 1909 and General Secretary of the Ship Constructive and Shipwrights' Society.

Mr. J. E. Williams (London), General Secretary of the Amalgamated Society of Railway Servants.

Additions may be made to the above list.

The members of the Council will, in the first instance, hold office for one year.

Sir George Askwith, the present Comptroller-General of the Labour Department of the Board of Trade, has been appointed to be Chairman of the Industrial Council with the title of Chief Industrial Commissioner, and Mr. H. J. Wilson, of the Board of Trade, to be Registrar of the Council.

The step taken by the Government, it will be seen, is an important one. The new Advisory Council, as it may be called, will be a separate department of the Board of Trade, and will have the advantage of being wholly divorced from politics. The augury of success arises from the importance of the names of the members and from the fact that Sir George Askwith is at the head.

TRANSFER YARDS FOR SMALL LOTS OF FREIGHT.

To overcome the difficulty of dealing with small lots of freight originating at widely separated points, billed for an equally scattered number of places, the Pennsylvania Railroad have established transfer yards, which have been largely instrumental in the development of the fast freight service. Pitsburgh is the point where most of these transfers are made by the Pennsylvania, and with the exception of two through trains that run from New York to Chicago, all trains are broken up there and the goods re-assorted. In this way all the freight for a certain section, or a certain city, no matter where it originated, is collected here and placed in cars destined for that territory. The changes are made with remarkable swiftness, and the attendant delay is inconsiderable.

SOLIDIFIED PETROLEUM AS FUEL FOR LOCOMOTIVES.

The reference in our last issue to a pamphlet issued by the British Petroleum Co., Ltd., dealing with the use of petroleum as a fuel for railway locomotives, has led to some inquiries from a correspondent as to the progress of the proposal for marketing petroleum in solidified form. Probably the latest information on this subject is to be found in a paper by Mr. J. Tarbottom Armstrong and read not long ago at the Cannon Street Hotel to an interested audience presided over by Sir Frederick Fryer. The author said that while his paper was not based upon commercialism, he could assure his hearers "that we are so far beyond the experimental stages as to justify the statement that the simplicity of manufacture and the very low cost of operation are two of the potent factors that will render solidified petroleum not only a factor, but one, in my opinion, of the most important features governing modern progress." Of the total consumption of fuel 2 per cent. only is represented by oil, and in the opinion of the author "by the use of solidified petroleum there will follow an industry very much less under the thumb of the monopolist, and docketed of many of the present facilities for 'cutting' in prices.

LOW COST OF MANUFACTURE AND HIGH CALORIFIC VALUE.

"The average daily production of oil is now placed at 213,000 barrels and the consumption at 192,000 barrels, so that there is an average daily surplus of about 20,000 barrels. So far as production itself is concerned, oil can already be produced sufficiently cheaply in nearly every field now working, but it is mainly the cost of transportation that limits its use, and leads to the necessity for fixing prices that scare the present coal user from altering, at considerable expense, his present devices unsuitable for a liquid. As by a general consensus of opinion, oil has advantages over coal, the superiority must be largely increased surely when oil is available in both forms, liquid and solid; and this is now the position, with a process available for solidification of all hydro-carbons such as crude oil, petroleum and its products, such as residual oil, kerosene, benzine, benzol, etc. It may, too, be noted that whatever the comparative advantages claimed for liquid oil over coal may be, these only receive strong confirmation when contrasting liquid and solidified petroleum, and on this point it is not too much to say that the solid will have an advantage over the liquid form in all cases except those where actual fluidity is a distinctive recommendation or where a company has provided already such costly preparations as pipe-lines, storage tanks at the various spots of discharge (terminating only at sale site), special steamers, and special railway wagons. Solidified petroleum has now been manufactured in square blocks ready for transit anywhere by any existing conveyance, costing little per ton to manufacture. It burns very slowly and gradually, with a quiet flame smoking at the top if burnt in the open air, and under boilers if care is taken by different means to give free access of air to the flame the smoke is practically eliminated. If exposed to cold, to heat, or to rain, in short, to any condition of the weather, there is no deterioration or appreciable alteration of weight. Boiling water has not the slightest effect upon it. Every ton of this oil fuel consumed means about two tons less good coal required from South Wales or elsewhere (in some instances, indeed, one ton of oil has done more work than three tons of Welsh coal); but this is not the only advantage, for the solidified oil will produce about 80 per cent. of the calorific value, whilst with coal the fuel in part passes away unconsumed in the form of smoke. This is quite an important fact to be borne in mind in comparing one with the other. Besides this, there is the great economy in space—roughly speaking, about one half, another very salient fact.

THE PROPERTIES OF SOLIDIFIED PETROLEUM.

"Though not exhaustive, nor, at this stage, too technical, as I propose to enlarge on these points at a future date, the following gives a popular summary of the different properties of this solidified petroleum:—(1) The heating power has, by official tests in some of the best laboratories, proved to be of the most satisfactory character. (2) From this it follows that warships or other vessels carrying solidified petroleum as fuel, and using the same cubical space as with coal, could make longer journeys or attain superior speed, and touch at fewer ports for renewal of the fuel supply.

(3) Moulded in regular form, the solid blocks can be stored without wasting any space. (4) Such blocks can become hard, with a crushing strength of at least 99.89 kilos per decimeter. (5) They do not develop any inflammable gases, even in the heat of a stoke-hold. (6) These blocks do not require any appreciable alteration of the fire grates or the bunkers, which is absolutely necessary when using liquid petroleum. (7) They burn slowly without exploding, spitting, or dropping, and so completely as to leave practically no ash behind. (8) The blocks resist all weather influences, such as rain, heat, and cold; so that they can be stored in the open air without deterioration. (9) They burn perfectly in open fire grates. (10) They do not emit the same degree of smoke that coal does. (11) No risk or loss in transport. (12) No danger in storing. (13) No loss of petroleum at the oilfield on account of insufficient labour, or storing receptacles, as all, or parts, of the oil can be solidified, since but little labour is required to do this. (14) No necessity for reconstructing the furnace or bunkers, or with but little expense in any case. (15) Risk of fire, as in case of liquid fuel, practically eliminated. (16) When solidified, one of the different sorts of oil now obtainable evaporated 16 lb. to 18 lb. of water to the pound of oil, whilst only 7 lb. to 10 lb. of water was evaporated to the pound of coal. The manufacture is simple and inexpensive. The cubic space of one ton of liquid oil is 1.6, and it is the same with solid petroleum, also the same density (0.8), and it does not evaporate at 212 deg. F."

OIL ON AMERICAN, AUSTRIAN, AND RUSSIAN RAILWAYS.

Dealing with the use of oil fuel in the United States the lecturer observed that "the chief uses for it so far have almost been confined wholly to locomotive purposes, and those only near the oilfields. In the year 1906 the total consumption amounted to 15,577,677 barrels, or 2,596,279 tons. In the year 1907 it had increased to 18,855,002 barrels. In 1908 it amounted to 19,889,070 barrels, or 3,314,845 tons. There was still a further increase in 1909, approximating roughly to about 20,000,000 barrels, or 3,333,333 tons. The use of this amount of oil and the progressive growth in the same were partly accounted for by the improvement in the methods of burning it, but these are still far from efficient. Per mile of railway it was originally 3.93 barrels, but of late this has been reduced to 3.60 barrels. Although this substantial economy has been effected, there is still much room for improvement in this matter. Whether it will ever reach a perfect economical consumption remains to be proved. It must be understood that very few of the railway companies in America have so far adopted this fuel; practically only those that are near the oil-producing localities, as previously stated. There has lately been a conference of the Austrian Ministry of Labour in Vienna, and it has been agreed to extend the adoption of oil on some of the State railways, the present Government having contracted for the purchase of 1,500,000 tons of crude oil over a period of about five years. Whilst this, to a great extent, is satisfactory, it is significant that the difference made in the increase in the sale of oil is nothing to what it might and would be if adequate means of transit and certainty of supply could be immediately arranged. Both advantages are possible at any moment by the use of solidified petroleum. The Mid-Asiatic Railway handled in 1900, for their own consumption of fuel oil and to mills and factories, etc., outside of themselves, a tonnage of 92,193. A year later this had increased to 107,750, and it had a further increase in the following year to 132,366 tons. Then factories and mills outside of the railway took so much more that it more than doubled—viz., 285,918 tons—and from what is known, it is still increasing.

THE OUTLOOK ON BRITISH RAILWAYS.

"But, supposing the State Railways of Russia traversing Central Asia took thousands of tons, what is that when we consider that the British railways, leaving out altogether works and factories, themselves consume 12,500,000 tons of coal a year, and supposing they replace a quarter of this figure by solidified oil, might we not expect a veritable boom in the oil trade? The source of the oil used by the Russian line and the Orenburg-Tashkend line is no less than 2,800 miles distant—viz., the Baku wells. It follows, therefore, that a solidified petroleum that has stood all necessary and possible tests, and that gives greater calorific value, weight for weight, than the best English coal,

must be a very valuable commodity for an Empire like Russia, and means a fortune to the pioneers who introduce it into that country. The oil fuel question is of paramount importance to our own railways, but there is, when we come to examine the question, little wonder that these are not using even so small a quantity as 1,000,000 tons a year, seeing that they are now consuming 12,500,000 tons of coal. One thing is certain; railway investors would benefit if oil could be used, and the railway companies would gladly take up the use of oil if it were not for the capital it would take to put up tanks everywhere to store it, to alter all their engines for the burning of liquid oil, building tank trains to take it about, etc. But is there any railway in this country that would be able to find the necessary capital for all this, so long as oil in the liquid state only is available for use? With solidified petroleum this vast expenditure is not necessary, the present truck remains as available for solid oil as it is for coal, trifling alterations only being wanted in fire grates; hence its use could be started at once."

DIVIDEND ANNOUNCEMENTS.

MISSOURI, KANSAS AND TEXAS RAILWAY.—A dividend of 2 per cent. per annum has been declared on the preferred stock.

RIO CLARO SAO PAULO RAILWAY.—The directors have declared an interim dividend at the rate of $1\frac{1}{2}$ per cent. per annum for the six months ended the 30th ultimo. A year ago an interim dividend at the same rate was paid.

CANADIAN NORTHERN RAILWAY.—The directors have authorised the payment of interest on the income charge convertible debenture stock of the company, at the rate of 5 per cent. per annum, for the half-year ending June 30, 1911.

ANTOFAGASTA (CHILI) AND BOLIVIA RAILWAY.—An interim dividend of $2\frac{1}{2}$ per cent., less income-tax, has been declared on the deferred ordinary stock in respect of the profits of 1911. A year ago an interim dividend at the same rate was paid.

NITRATE RAILWAYS.—An interim dividend on the ordinary (unconverted) shares and the preferred converted ordinary shares at the rate of 3 per cent., less income-tax, payable on November 2. A year ago the dividends were at the rate of $3\frac{1}{2}$ per cent.

MADRAS AND SOUTHERN MAHARAJA RAILWAY.—The accounts for the half-year ended June 30 have been received from India. The directors recommend a distribution of 58. per cent., in addition to the guaranteed dividend of $3\frac{1}{2}$ per cent. per annum, making a total distribution of 2 per cent. for the half-year, less income-tax. The distribution a year ago was at the same rate.

CORDOBA AND ROSARIO RAILWAY.—The directors have decided, after transferring £5,000 to special repairs and renewals account, to pay 2 per cent. on the income debenture stock, making, with the interim paid on June 1, 4 per cent. for the year ended June 30, 1911, and that a dividend of £3 per cent. be paid on the 6 per cent. first preference stock, making, with the interim dividend paid on June 1, £6 per cent. for the year; £4 per cent. on the 4 per cent. second preference; and £3 per cent. on the ordinary stock.

ENTRE RIOS RAILWAYS.—The directors recommend a final dividend at the rate of $2\frac{1}{2}$ per cent. on the first preference stock, making 5 per cent. for the year, and dividends of 4 per cent. on the second preference stock, and $1\frac{1}{2}$ per cent. on the ordinary stock, placing £25,000 to reserve and renewals fund, and carrying forward £10,170. A year ago the distribution was at the rate of 5 per cent. on the first preference stock, and 1 per cent. on the second preference stock, £25,000 was placed to reserve and renewals fund, and £10,836 was carried forward.

Northern Assurance.—The directors have decided to declare an interim dividend, payable on November 3, of 38. per share, less income tax, being at the rate of 15 per cent., on account of the year 1911. A year ago the same dividend was paid.

Exhibition Awards.—The Grand Trunk and Grand Trunk Pacific Railways have been awarded four Grand Prix at the Festival of Empire Exhibition at the Crystal Palace; the former for Arts and Crafts, and the latter for the same entries, and also for engineering, lighting, and transportation, building and trades.

Bombay, Baroda and Central India Railway.—In accordance with a judgment of the Court of Chancery on July 26, 1911, the remaining assets of the old company will be divided among the holders of the consolidated stock registered in the books of the company on November 30, 1905. A dividend of 68. 4d. per £100 (free of income tax), will accordingly be paid on November 7, 1911.

MEETINGS AND REPORTS.

FORTHCOMING MEETINGS.

- Oct. 16 (*Mon.*)—**Central Uruguay of Monte Video Railway** (Annual), River Plate House, E.C., at 12.
 Oct. 16 (*Mon.*)—**Central Uruguay Northern Extension Railway** (Annual), River Plate House, E.C., at 12.15.
 Oct. 16 (*Mon.*)—**Central Uruguay Eastern Extension Railway** (Annual), River Plate House, E.C., at 12.30.
 Oct. 17 (*Tues.*)—**Buenos Ayres Western Railway** (Annual), River Plate House, E.C., at 12.
 Oct. 18 (*Wed.*)—**Buenos Ayres Great Southern Railway** (Annual), River Plate House, E.C., at 12.
 Oct. 18 (*Wed.*)—**Dundalk, Newry, and Greenore Railway** (Half-yearly), Euston Station, N.W., at 11.
 Oct. 18 (*Wed.*)—**Quebec Central Railway** (Annual), 5, Great Winchester Street, E.C., at 12.
 Oct. 19 (*Thurs.*)—**Mexican Railway** (Half-yearly), River Plate House, E.C., at 2.30.
 Oct. 20 (*Fri.*)—**Demerara Railway** (Half-yearly), Cannon Street Hotel, E.C., at 12.
 Oct. 20 (*Fri.*)—**United Railways of the Havana and Regla Warehouses** (Annual), Winchester House, E.C., at 12.
 Oct. 20 (*Fri.*)—**Western Railway of Havana** (Annual), River Plate House, E.C., at 12.30.
 Oct. 24 (*Tues.*)—**Cordoba and Rosario Railway** (Annual), Winchester House, E.C., at 2.30.
 Oct. 25 (*Wed.*)—**Entre Rios Railway** (Annual), River Plate House, E.C., at 12.
 Oct. 25 (*Wed.*)—**Kilsyth and Bonnybridge** (Half-yearly), St. Vincent Street, Glasgow, at 2.30.
 Oct. 26 (*Thurs.*)—**Grand Trunk Railway** (Half-yearly), City Terminus Hotel, Cannon Street, E.C., at 12.
 Nov. 1 (*Wed.*)—**San Paulo (Brazilian) Railway** (Half-yearly), Terminus Hotel, Cannon Street, E.C., at 1.

(Reports, Traffic Returns, Prospectuses, and all other items of financial intelligence should be sent as early as possible to the Editor of THE RAILWAY TIMES, 12, Norfolk Street, London, W.C. Telephone, 2948 Gerrard. Telegraphic address, Altimetry, London.)

MANILA RAILWAY.

The ordinary general meeting was held on Monday at Winchester House, Old Broad Street, E.C., Mr. C. J. Cater Scott (Chairman of the company) presiding.

The SECRETARY (Mr. I. Mackenzie) having read the notice convening the meeting and the auditors' report,

The CHAIRMAN said that they had improved a little this year as they were holding the meeting rather more than a fortnight earlier than last year. He admitted that it was too late in the year, and he had hoped at one time that the directors would be able to meet the shareholders before the holidays, but they only received the Manila accounts, which had to go to New York first, in the early days of August, which made it impossible to hold the meeting before the end of August. The directors would not have been studying the convenience of shareholders if they had called the meeting for a time when many would be absent.

The accounts of the Manila Railroad Company—the American company—which were submitted were in the form which had been finally adopted; such would be the form which would be presented, he hoped, for many years to come, and the shareholders would then be able to form their own comparison and see for themselves how their property was progressing. He explained last year that, in consequence of the arrangement which came into force on January 28, 1910, the Manila Railway was divided into two systems—a northern system, the bonds of which were dependent on the earnings of the company only, and a southern system the bonds of which had a guarantee of interest by the Philippine Treasury authorised by an Act of Congress at Washington. The accounts as presented to the shareholders had been made up in the necessary form to give effect to that arrangement. In the American accounts which had been submitted to the shareholders it would be seen that they were made up under the headings of three different groups. The first group of 122 miles comprised the old Manila-Dagupan line, the second group of 95 miles consisted of the extensions made by the old English company, and the third group of 50 miles had been constructed for account of the American Railroad Company, and that road would eventually extend to about 150 miles. For the purposes of comparison so that the shareholders might see how the property was progressing, he proposed to lump groups one and two together, because those were completed,

and they would be able to compare like with like. Those two groups had together 217 miles, and their gross revenue in the year 1910 was \$2,377,603, an increase of \$330,000 over the previous year. The expenses were \$948,706, or \$48,000 more than in the previous year, and the net operating revenue was \$1,428,897, showing an increase in the net operating revenue of \$282,000, or rather more than £28,000, and he thought that anyone reading those figures would see that they had made very distinct progress during the past year, and that it augured well for the future. In connection with those two groups, the passengers carried in 1910 numbered 2,394,000 against 2,021,000 in the previous year. The goods carried amounted to 381,600 tons against 276,900 tons in the previous year. The ratio of working expenses to revenue was 40 per cent. in 1910 against 44 per cent. in 1909, and the net earnings per mile of traffic in 1910 amounted to £650 against £540 in the previous year, which he ventured to think was most satisfactory. (Hear, hear.) Coming to No. 3, he could give no comparison because that was a mileage which was constantly changing. The larger portion of it was brought into operation in 1910, and, of course, with little bits of mileage running nowhere in particular, many of them incomplete, good results could not be expected. Moreover, in that year the expenses on those 59 miles were heavy, owing to washouts, and the result of the operations was a loss of £3,428. Too much must not be thought of that, but there was one very important thing they had learned—viz., that those small feeder lines which were being constructed were of the greatest benefit to the main line, as the old main line of 122 miles increased \$234,000, or nearly £24,000 in the year, nearly all of which was profit. Turning to the southern lines, the workings of these were only for the last five months of 1910. Previous to that a certain amount was in operation, but by the scheme of construction until those lines were bonded and the guaranteed bonds were issued, construction account was credited with the surplus earnings. For the first five months a profit was shown of \$67,410, or getting on for £6,800. That did not quite cover the guaranteed interest during that period, but against that those 60 miles of line had been burdened with very considerable expenses which, as further miles were brought into operation, would be spread over the increased mileage so that the percentage of working expenses would be reduced. When the shareholders looked at the published accounts and heard what he had to say, he thought they would agree that they could look forward with confidence to the operation of the southern lines in the future. They had received this year from the American company the full amount of the interest on their 1st and 2nd mortgage bonds amounting to £164,392, and there was a small amount of a little under £200 on account of arrears. He alluded to that small amount because last year their earnings fell short of their interest by £23,302, so that the American company was very nearly £24,000 better in earnings for 1910 than in the previous year. They had received rather more in interest, £7,125 against £3,293, for money used in construction by the company for account of the American company, and that meant that the total accounts had amounted to £171,980 against £143,557 last year, or an increase of £28,423. On the debit side of the account the charges were very slight. They had a small increase of £286 in the London office expenses due to their having increased the staff, and there was also a small increase for bankers' charges on payment of coupons, etc. The result of the revenue account was that they had a balance brought down of £166,815 against £136,939, or £27,876 more than last year, which enabled them to provide for the full interest paid and accrued on the A and B debenture bonds amounting to £154,971, that being £11,000 more than in the previous year, and to increase the carry forward from £33,000 to £44,000.

Turning to the balance sheet of this company, there was an item to credit—discount and expenses on sale of \$2,000,000 guaranteed bonds of the Manila Railroad Company—which required a little explanation. When the northern lines were divided from the southern lines they had spent a considerable amount in construction on the southern lines, and the terms of the arrangement were that for the money so expended they should receive the actual cost in 4 per cent. guaranteed bonds of the Philippine Railway, and in the course of 1910 they received \$2,000,000 (United States currency) of such bonds, which the directors had to sell as the money was required for construction, and the loss of £75,000 meant the difference in the cost of construction, as shown by the bonds received and the price at which they were realised, that was the difference between par and about 82 per cent. at which they were sold. During the year 1911 they would have to receive a further amount of something like \$600,000 (United States currency)

which would have to be dealt with in the same way, and he thought roughly that the amount of £75,000 would be increased to about £100,000 when all the bonds for construction prior to January 28, 1910, would have been received. For construction subsequent to that date in the south, this company, as contractors, was to add 15½ per cent. for contractors' profit, so that for £100 cost the company was to receive £115 10s. of which the Government would give 95 per cent. in guaranteed bonds, and the Manila Railroad Company of America 5 per cent. in mortgage bonds and stock, so he did not think there would be much loss, if any, on the realisation of the southern bonds in the future. He thought it was not unreasonable to hope that bonds with a substantial guarantee, which were earning money—independently of the guarantee—were certainly worth more than the price of 86-87, at which they stood, and any surplus over that amount would be available for writing off some of the amount which stood as loss on the realisation of the \$2,000,000 bonds, and on the realisation of any further amount this year. As regards the estimated earnings for the current year of 1911, he would take groups 1 and 2 together, and take group 3 separately. Up to September 30 last the actual earnings were £200,720 as against £180,677 at the same date last year, or rather more than a ten per cent. increase realised to date. On that basis, taking the same increase for the rest of the year, the net earnings of the 217 miles comprised in those two groups should be £156,000 as against £141,000, and, adding the interest to be received from the American company for money employed in construction, the credit balance for those two groups of northern lines should amount to £179,000. In dealing with the southern lines, and allowing for the extra mileage brought into operation in the current year, the published figures to the end of September were £63,624 gross, or about double those for the corresponding period of last year, and from information received within the last few days from Manila, the estimated net earnings of the southern lines this year would be £30,700. The charge for interest on the guaranteed bonds issued against them amounted to £24,000, so that there would be £6,700 surplus to go to the credit of the southern lines. That would make a total available income of the Manila Railroad Company of £185,700, and, after providing for the same debenture interest in this company as in 1910—£155,000—there would be a surplus of £30,700. If, at the end of 1911, it was found after providing for the interest due on the debentures and the bonds that there was a surplus of anything from £25,000 to £30,000, they would have to consider whether there should not be a dividend paid to the preference shareholders. (Hear, hear.) With reference to construction, the total length of the northern lines as contemplated was 367 miles. On December 31, 1910, 276 miles were in operation and 90 miles to construct. The advice to June last gave 308 miles in operation, and 59 miles to construct, of which from 17 to 20 miles were under construction. As to the construction in the north, they were all very anxious to complete those lines at the earliest possible moment, as it would be much more simple to operate them, and until they were completed it would be impossible for the shareholders to realise the full benefit from them, but then there was the money difficulty. Under the arrangement with the Government, a certain mileage of the southern lines had to be completed every year, as had been done, and the only capital available was the money in hand, and which might be required to complete the northern section. As each section of 20 miles was completed, bonds amounting to about £140,000 were received, which had to be sold and the money put back into construction, which meant that they had something like £500,000 locked up in the construction of the southern lines. If, from this amount the money necessary to complete the northern lines was withdrawn they would either have to restrict their building in the south or bring it to a standstill, in which case they would cease to fulfil their obligations under the concession, and they would be seeking trouble with the Philippine Government and with the authorities at Washington. It was, therefore, impossible for them to curtail the work on the southern lines, and he hoped shortly to submit a scheme to arrange temporary borrowings which would enable them to complete the northern lines and also proceed with the construction of the southern lines which, as contemplated to-day, consisted of 469 miles. At the end of 1910 they were operating 60 miles, and, at June 30, 117 miles, therefore there were 352 miles to construct, about 50 of which were well in hand. When the arrangement was made with the Philippine Government it was not contemplated building further than Lucena and then linking the northern and southern lines by means of a steam ferry service. The Government did not like the idea, and it was decided to build a link-line from

Lucena to Talcauayan Bay, thus linking the southern-central and southern districts. Mr. Higgins informed the board that the company would be able to cross the divide between Lucena and the east coast at an elevation of approximately 250 feet, that although there was likely to be some heavy construction work, the cost would not be prohibitive, and that the road would pass through some large tracts of fine timber and a country which, when populated, would be capable of a very high agricultural development. After complimenting Mr. Higgins and his staff for the manner in which the work was being carried out, the Chairman moved "That the report of the directors and statement of accounts for the year ended December 31, 1910, be, and the same are hereby approved."

Admiral Sir CYRIL A. G. BRIDGE, G.C.B., seconded the motion, and it was carried unanimously.

The re-election of Mr. R. B. Phillpotts as a director was duly passed, and the retiring auditors, Messrs. Deloitte, Plender, Griffiths and Co., were re-elected.

The resolution, "That on and from January 1st, 1912, the whole of the preference shares in the charge of the company be converted into stock, to be called five per cent. non-cumulative preference stock," was passed, and with a vote of thanks to the Chairman, the proceedings terminated.

QUEBEC CENTRAL RAILWAY.

The following summary shows a comparison of the revenue account for the year ended June 30, 1911, with that of 1909-10:—

	1910-11.	1909 10.
Gross earnings	\$1,208,949	\$1,105,867
Working expenses	820,803	759,559
Net operating revenue	\$388,146	\$346,318
Interest earned	7,911	5,075

Net income \$396,057 .. \$351,393

There was brought forward from the previous account £46,593, which, added to the net income, as above, makes an available balance of \$442,650. After deducting the interest on 4 per cent. debenture stock, \$117,742, and interest on 3 per cent. debenture stock, \$49,348, there remains a balance of \$275,560. The interest on the 7 per cent. income bonds amounts to \$115,145, leaving a surplus of \$160,415. Out of this surplus the directors recommend the payment of a dividend on the share capital at the rate of 3 per cent. per annum (15s. per share), leaving \$77,005 to be carried forward. The report states:—"The directors, having been approached by the Canadian Pacific Railway Company, entered, in August last, into a provisional agreement to lease (subject to the shareholders' approval) the railroad and all its assets to that company for a term of nine hundred and ninety-nine years. A circular letter was sent to the security-holders and the Press. Bills will be presented to the Dominion Parliament and Quebec Legislature, and, if passed, special meetings of the various classes of security-holders will be summoned to consider and, if thought fit, sanction the lease. Matters may be sufficiently advanced to enable the special meetings to be summoned early next year, but the date of such meetings cannot, of course, be fixed until the necessary parliamentary sanction has been obtained in Canada."

UNITED RAILWAYS OF THE HAVANA AND REGLA WAREHOUSES.

The capital account shows a total expenditure to June 30, 1911, of £9,742,377, of which £280,232 was expended during the past year. The receipts to same date amounted to £13,022,608—viz., ordinary stock, £4,760,000; deferred ordinary stock £493,434; 5 per cent. cumulative preference stock, £1,770,000; 5 per cent. A irredeemable debenture stock, £380,000; 5 per cent. consolidated irredeemable debenture stock, £1,425,900; 5 per cent. irredeemable debenture stock (1906), £2,676,200; 4 per cent. debentures and debenture stock, £1,280,424; 4½ per cent. debentures to bearer, £988,750, and 5 per cent. irredeemable debenture stock (1906) retained to be issued on surrender of bonds of the old company still outstanding for conversion into this stock, £147,900.

The gross receipts for the year ended June 30, 1911, amounted to £1,222,710 (against £1,244,962), and the expenses to £739,744 (against £681,289), leaving a balance of £491,975 (against £563,673). The ratio of expenses to receipts was 59.76 per cent. against 54.72 per cent. To the balance of £491,975 there has to be added the profit on Regla warehouses, differences in exchange transfer, etc., fees, and there has to be deducted the payment in respect of the Marianao Railway leased to this company. These adjustments having been

made, there remains a total of £443,031. After payment of interest on debenture stocks, dividend on preference stocks, taxes, stamp duties, etc., providing for expenditure in connection with additional rolling stock under the hire-purchase arrangement, adding interest and dividends on investments, the value of the coupons on the bonds of the Havana Central Railroad Company exchanged for 4 per cent. debentures and debenture stock of this company, and the amount brought forward from last account, there remains an available balance of net revenue of £243,101. Out of this sum the board recommends a dividend of 4 per cent. on the ordinary stock (absorbing £100,000), and after placing £15,000 to reserve and £25,000 to general renewals, carrying forward £12,701. The reserve account now stands at £300,000. The reserve for general renewals amounts to £75,000; this reserve will be debited with approximately £25,000, in respect of rolling stock to be retired. The insurance fund amounts to £10,000, an amount of £5,000 having been transferred thereto from the reserve for fire insurance premiums account.

The report states:—"During the year under review an arrangement was completed with the Government of Cuba whereby this company exchanged its land and property at Villanueva, in the centre of the city of Havana, for other land and property belonging to the Government, known as the Arsenal, situated on the Bay of Havana, and under an agreement with the Havana Terminal Railroad Company, that company agreed to erect and equip on the Arsenal site a modern terminal station and provide the terminal facilities which have been urgently needed by this company for a number of years. Rapid progress is being made with the construction of this station, and when it is completed this company will enjoy the facilities which the volume of its traffic demands."

MEXICAN RAILWAY.

The capital account to June 30, 1911, shows an expenditure of £9,196,136, whilst the receipts have been £9,238,450, as follows:—Ordinary stock, £2,254,720; first preference stock, 8 per cent., £2,554,100; second preference stock, 6 per cent., £1,011,000; perpetual debenture stock, 6 per cent., £2,000,000; second debentures, 4½ per cent., £494,000; subvention money, £772,339; sale of land, etc., at Vera Cruz, £145,331; 4½ per cent. second debenture redemption account, £6,000.

	1911.	1910.
Passengers	\$1,129,383	\$1,025,749
Merchandise and live stock	2,079,499	2,073,562
Pulque	220,492	203,810
Luggage and sundries	346,012	329,477

Total receipts \$4,375,377 .. \$4,229,598

The working expenses for the same period were as under:

	1911.	1910.
Maintenance of way and structures	\$312,693	\$310,758
Maintenance of equipment	359,933	374,389
Conducting transportation	1,301,495	1,322,589
General expenses	173,277	157,299

Total expenses \$2,147,398 .. \$2,165,026

Net earnings \$2,237,979 .. \$2,064,572

As shown above, the gross earnings of the line in the half-year amounted to \$4,375,377, or an increase of \$145,779 compared with the corresponding half of 1910. The receipts from passengers and luggage increased \$104,216 and from expenses \$18,781, making a total increase of \$122,997 from passenger train traffic. The receipts from foreign goods decreased \$12,819, but national goods showed an increase of \$35,429. Sunday earnings also increased \$172. Working expenses were less by \$27,525, partly due to the increased use of fuel oil. The net revenue was \$2,237,979, or \$173,304 more than in the first half of 1910. This, at the average exchange of 24.536d., produces £228,785. Adding to this £2,084 from interest and fees in London and £1,857 balance brought forward, and deducting £129 for difference in exchange, there is a total in net revenue account of £232,597, which is greater by £16,108 than the amount at the close of the corresponding half-year of 1910. The sum at the disposal of the company, after payment of £60,000, interest on debenture stock, and the provision of £12,750 for interest and sinking fund on the 4½ per cent. second debentures is £159,848, which will suffice for the payment of the full dividends for the half-year on the first and second preference stocks, absorbing £102,164 and £30,359 respectively, leaving a balance of £27,325. This will suffice for the payment of a dividend, less income tax, at the rate of 2½ per cent. per annum on the ordinary stock, absorbing £26,775, and leaving a balance of £550 to be carried forward.

The number of passengers carried was 732,939 (against 710,979; the average fare \$1.54 (against \$1.44); the quantity of goods carried, 425,753 tons (against 414,298 tons); the average freight per ton \$6.81 (against \$6.95); the number of traffic train kilometres run, 1,211,268 (against 1,196,894); the length of line open, 516 kilometres; the ratio of working expenses, including general charges, 48.85 per cent. (against 51.18 per cent.). The extension of the Zacatlan branch (2 ft. 6 in. gauge) from Aserradero to Chignahuapam was opened on January 1 last, and the traffic resulting has been satisfactory. The conversion of the engines to oil burners was carried out as the working of the traffic permitted, and the whole of the locomotives employed on the lower and mountain sections of the main line were burning oil by the middle of May. The remainder of the engines working on the main line, Puebla, and Pachuca branches were all using oil at the commencement of July of the current half-year. The last reports state that the company has in stock about three months' full supply of oil. The damage done to the line during the revolution was quite insignificant, and the traffic was delayed on a few days only. The Board much appreciate the admirable tact and courage shown by the officials in Mexico during a time of considerable difficulty.

ENTRE RIOS RAILWAY.

The capital account to June 30, 1911, shows total expenditure £6,020,905, while the receipts have been £6,015,449—viz., ordinary stock, £1,583,140; preference stock, £2,427,309; 4 per cent. debenture stock, £1,305,000, and 5 per cent. debenture stock, £700,000. The expenditure during the past year amounted to £331,802 less sundry credits, £2,304, thus reducing the actual capital expenditure for the year to £329,408.

The accounts for the year ended June 30, 1911, show that the gross receipts amounted to £478,730 (against £405,761), the working expenses to £254,253 (against £226,360), and the net receipts to £224,477 (against £179,401). Adding the balance from previous year, £10,836; sundry credits, £10,528; exchange account, £363; profits on land sales, £12,931; and amount transferred from income-tax reserve account, £12,536; and deducting interest paid and accrued during year ended June 30, 1911, on £1,305,000 4 per cent. debenture stock, £51,357; interest paid and accrued during the year ended June 30, 1911, on £700,000 5 per cent. debentures, £30,833; amount written off investments, £3,988; bill stamps, £15, and interim dividend on first preference stock at 2½ per cent., £42,331, together £128,524, there remains a disposable balance of £143,147. Out of this the directors have decided to place a sum of £25,000 to reserve and renewals, together with the £12,536 brought in from the income-tax reserve account, and to recommend a final dividend of 2½ per cent. on the first preference stock (making 5 per cent. for the year), and dividends of 4 per cent. on the second preference stock, and 1½ per cent. on the ordinary stock, carrying forward a balance of £10,170.

The number of passengers carried was 312,003 (against 313,773); the quantity of freight carried was 515,927 tons (against 453,415); the total number of animals carried was 411,111 (against 428,820); ratio of working expenses to receipts, 53.11 per cent. (against 55.70 per cent.); number of train miles, 818,841 (against 734,235); receipts per train mile 11s. 8½d. (against 11s. 0½d.); expenses per train mile, 6s. 2½d. (against 6s. 2d.); length of line open, 688 miles (against 675 miles).

The report states:—"In consequence of drought the yield of the crops of the past year was considerably below what may be reasonably expected in an average year, but the development of traffic as the result of railway connection with Buenos Ayres justifies the recommendation of the payment of the first dividend on the ordinary stock of the company. The latest advices in regard to the prospects for the coming harvest are satisfactory. An increase of land under cultivation over that of last year is reported. The replacing of the original 47½lb. rails on the principal routes with those of 75lb. is being actively proceeded with. In the year under review an additional length of 36 miles of line was relaid, and materials for a further 44 miles of track are now being delivered. During the past eight years the sum of £117,000 has been transferred from revenue to the reserve and renewal fund, of which sum £65,100 has been spent during the years up to June 30th, 1911, mainly on improving the track, leaving a balance of £51,900 to the credit of the fund, and by adding to this the amounts referred to above this fund will now have to its credit a total of £80,436. In July last meetings were held by the various classes of stockholders, and resolutions were duly

passed increasing the capital of the company. The borrowing powers of the company as extended provide for a sum not exceeding the capital of the company for the time being issued. The construction of the extension from Elisa to San Salvador, a distance of 38½ miles, has been completed during the year, and the line has now been opened provisionally for traffic. With this extension the total length of the company's system is 726 miles. The board are advised that the definite opening of the line and the payment of the subvention of \$280,295 gold by the Government may be expected shortly. The acquisition of land by the company in the vicinity of the port of Ibicuy has proved a profitable investment, the net receipts from sales of building sites to June 30, 1911, having amounted to £12,130. Buildings are springing up on the sites that have been sold, and the company remains with a large area for further development. The National Government have been negotiating recently with the board for the sale of the line constructed by the Government between the port of Diamante and the company's station at Crespo, and for the works already executed and materials acquired for the further extension beyond the company's station at Hasenkemp. An *ad referendum* contract has been signed and has been ratified by the Senate, and is now under consideration of the Chamber of Deputies. To meet the increasing traffic, orders have been placed for 22 locomotives, 21 passenger cars, 6 brake and postal wagons, and 414 30-ton wagons. A large proportion of these have been shipped, and the balance should arrive in time for the harvest. The board have appointed their esteemed colleague, Dr. Norberto R. Fresco, as chairman of the local committee in Buenos Ayres. Mr. William Thompson, who has been the traffic manager of the company since its inception in 1891, has been appointed general manager."

CORDOBA AND ROSARIO RAILWAY.

The capital account shows a total expenditure to June 30, 1911, of £2,901,429 (including rebates on issues of capital, £153,743), whilst the receipts have been £3,042,981—viz., 4 per cent. first debenture stock, £830,000; 4 per cent. second debenture stock, £887,711; 4 per cent. income debenture stock, £41,420; 0 per cent. first preference stock, £600,000; 4 per cent. second preference stock, £432,000; and ordinary stock, £251,850.

The accounts for the year ending June 30, 1911, show gross receipts amounting to \$3,660,243 (against \$3,228,709), and expenses amounting to \$2,123,465 (against \$1,977,339), leaving a profit of \$1,536,778, equal to £134,165. Adding balance from last year, £739, transfer fees, £134, balance of interest account, including interest on investments, £1,860, the total net revenue is £136,808. Interest on 4 per cent. first debenture stock absorbed £33,200; interest on 4 per cent. second debenture stock, £35,508; interim payment of 2 per cent. on the 4 per cent. income debenture stock, £828; interim dividend of 3 per cent. on the 6 per cent. first preference stock, £18,000; amount transferred to special repairs and renewals account, £5,000; leaving a balance of £44,361 available for distribution. The directors propose to pay 2 per cent., less income tax, on the 4 per cent. income debenture stock (with interim payment making 4 per cent. for the year); 3 per cent., less income tax, on the 6 per cent. first preference stock (with interim payment, making 6 per cent. for the year); 4 per cent., less income tax, on the 4 per cent. second preference stock; and 3 per cent. less income tax on the ordinary stock, leaving £607 to be carried forward.

The number of passengers carried during the year was 203,169 (against 204,026); the quantity of goods carried, 980,134 tons (against 776,901 tons); the train mileage, 793,449 (against 659,581); the receipts per train mile, \$5.20 (against \$4.90); the expenses per train mile, \$3.02 (against \$3.00); the profit per train mile, \$2.18 (against \$1.90); the ratio of working expenses to receipts, 58.01 per cent. (against 61.24 per cent.); the length of the line worked, 180 miles in both years.

The report states:—"The figures for the year under review constitute a record in the history of the company as regards both gross and net revenue, due to the development of trade and general traffic. The increase in gross receipts is \$431,534.10 or 13.37 per cent., and in expenses \$146,126.45 or 7.39 per cent., leaving a net increase of \$285,407.65 or 22.81 per cent. There was an increase of 203,233 tons or 26.16 per cent. in the tonnage of goods carried, substantial increases being shown in nearly every item of traffic, the most important being in fruit and vegetables, cereals, flour and bran, hay, firewood and coal, sugar, lime, bricks, sand and general goods.

The available rolling stock was taxed to the utmost to deal with traffic requirements, only a portion of the new stock ordered in 1910 having been delivered and put into service before the close of the financial year. Although this new stock, when all erected, will materially facilitate the movement of the present volume of traffic, more rolling stock will shortly be required. The increase of \$140,120.45 shown in the working expenses, is principally due to the heavier traffic dealt with and the consequent heavier repairs to the permanent way and rolling stock. In addition to 200 wagons which it is intended to provide during the current financial year, the growing traffic of the railway will necessitate the early provision of further accommodation, such as new stations, sidings, goods sheds and depots. The Government having ordered the installation of a block system of signals, the expenditure in this connection will also have to be met during the current year. It is estimated that the total amount thus required will not exceed £100,000, to provide which an issue of second debenture stock will shortly be necessary. Additional working capital is also required. The manager states in his report that an increased tonnage from the sugar crop in the North is assured, and that general traffic prospects are excellent. Some slight damage has lately been caused to wheat and linseed by frosts; maize has also suffered from the same cause, but the area damaged is to be re-sown. The connection with the Cordoba Central Buenos Ayres Extension Railway has proved of material benefit to this company's business, and when that line is fully opened, which it is expected will be very shortly, this benefit will be enhanced. The board regret to announce that Mr. J. Henry Whittle, one of the original directors of the company, has found it necessary to resign his seat owing to ill-health. It is not proposed to fill the vacancy at present."

Lynton and Barnstaple Railway.—The report for the half-year ended June 30 last shows a working profit of £441, to which must be added balance from previous account, £3,349, together £3,790.

Kilsyth and Bonnybridge Railway.—The accounts for the half-year ended July 31, 1911, show a balance of net revenue available for division of £2,171, out of which the directors recommend a dividend at the rate of £2 10s. per cent. per annum, absorbing £1,650, leaving to be carried forward £521.

Dublin and Kingstown Railway.—For the half-year ended August 31 last a dividend at the rate of 7½ per cent. per annum was declared on September 26 at the half-yearly meeting held at Dublin. The balance available for dividend was £15,083, including £2,114 from the previous account. The amount now carried forward is £2,207.

Southport and Cheshire Lines Extension Railway.—The half-yearly meeting took place in Southport, Mr. J. E. Rayner presiding. The Chairman, in moving the adoption of the report, said that with reference to the Seaforth and Sefton line so far as this company was concerned the matter stood exactly where it did six months ago. The making of the line was one of those things which could not be put off indefinitely, because the construction of the dock at the north end of Liverpool, which was to act as the great feeder for the Seaforth and Sefton line, was making very rapid progress, and the railway company, for their own purposes other than those of the Extension line, would be bound before long to take very active measures in the construction of the new line. The directors of the Extension Railway thought that their position now, from some points of view, was more hopeful than it had been for some time past; and he would be very much astonished if, during the next twelve months, they had not a very different story to tell.

New York, Ontario, and Western Railway. The annual report covering the twelve months ended June 30, 1911, states that the operating revenue for 1911 is \$0,205,702.30, against \$8,578,782.97 for 1910, and operating expenses \$6,531,610.17, against \$5,882,146.90, leaving a net operating revenue of \$2,764,083.22, as compared with \$2,696,636.07. Outside operations resulted as follows:—Revenue—1911, \$206,045.84; 1910, \$190,754.17. Expenses—1911, \$258,655.46; 1910, \$243,596.61. Deficit—1911, \$52,609.62; 1910, \$43,842.44. Thus the total net revenue for 1911 is \$2,741,473.60, against \$2,652,793.63 in 1910, leaving, after deducting taxes accrued, an operating income for 1911 of \$2,496,483.46, against £2,441,100.44 in 1910. As regards other income, the figures are: Interest on securities owned, \$367,720.17; rentals received, \$16,413.39; total other income, \$384,142.56. Gross corporate income for 1911 is \$2,880,626.02, as compared with \$2,844,417.20 in 1910. Deductions for 1911 amount to \$1,737,689.99; 1910, \$1,531,610.72. Surplus—1911, \$1,142,936.03; 1910, \$1,312,797.48. Local passenger receipts were \$1,410,368.43, compared with \$1,365,981.93; through passenger and immigrant receipts were

\$2,725,070, compared with \$2,120,205.23; mail and express receipts \$215,472.23, compared with \$2,083,107. The net financial result of the year's operation is less favourable than hoped for, due to several causes, of which the principal was the increase in rates of wages and decreased hours of service of employees. The increased cost of operation from that cause amounted to about \$25,000, and no corresponding increases in freight rates having been permitted, the surplus was depleted to that extent. The usual dividend of 2 per cent. upon the common stock was declared at the close of the year and paid to all stockholders on August 14.

Dominion Atlantic Railway.—The report for the year ended June 30, 1911, states that the gross revenue was £260,754, and expenditure £210,848, leaving net revenue £49,906. There has been a healthy increase in passenger business during the year, to which both railway and steamers have contributed. Freight business, however, shows a large decrease, there being a shrinkage of £20,474 in earnings under this head. The principal cause of the decreased freight earnings was the failure of the apple crop, which alone accounted for a falling off of nearly £15,000 in receipts. Both in quantity and quality the crop was the poorest the province has had for many years, it being only about one-third of that of the previous year. With their receipts for apples thus reduced the spending power of the population in the territory served by the company was severely curtailed, with the result that the earnings in nearly all other commodities were adversely affected. The balance available for the year, including £1,597 brought forward from last year, is £42,503. Against this interest charges amount to £44,048. The sale of the investments held by the company, which stood in the books at £17,500, realised the sum of £16,280, and there is thus a loss of £1,220. The total deficiency on net revenues account is £2,764, and this has been charged to suspense account, which now stands at £33,030. The proportion of working expenses to gross receipts during the year was 84.3 per cent., or an increase of 5.6 per cent. compared with the previous year. By the sale of the company's investments a reduction of £16,280 was effected in the amount of temporary loans. A further sum of £9,000 was contributed from the general funds of the company. This item now stands at £73,720, compared with £90,000 at June 30, 1910. The directors have arranged with the Canadian Pacific Railway Company to lease this company's railways and their appurtenances to that company for a term of 99 years upon the terms and conditions contained in lease which will be submitted for approval. As practically the whole of the preference and ordinary stocks of the company are now held in Canada, the head office of the company has been transferred to Montreal.

Rio Claro San Paulo Railway.—An extraordinary general meeting was held in Cannon Street Hotel, London, on Monday, Mr. John Carrington presiding, to consider a scheme for extending the powers of the company, and for re-arranging, increasing, and converting the nominal and loan capital. The chairman said that if the shareholders agreed to the scheme their present capital would have the additional security of an issue of £125,000 of £1 deferred shares (which were to be offered at 22s. 6d. per share.) The present dividend of 13½ per cent., instead of being a falling amount, would be continued in perpetuity, and all the difficulties with the debenture stock-holders would disappear, for in the event of a liquidation they would be paid off at £120 or a premium of 20 per cent. Parliamentary sanction would be needful. He moved a resolution in accordance with the object of the meeting. Lord St. Davids, a director, replying to questions, said that the directors, in the event of any underwriting, would be willing to allow the shareholders to participate in it on the same terms as other people. There would be no issue of 2nd debentures made over the heads of the shareholders. The shareholders, if they did not want a scheme, could, of course, wind up the company and divide the assets, but there was the debenture question as to whether they could pay off the debentures at par or a premium. To fight out the matter might entail a loss of £120,000 of their assets. The subdivision of the shares was, he contended, an up-to-date policy that should enhance their value. He pointed out that the investment of the £125,000 of deferred share money would yield a good return, for the issue was at half-a-crown per share premium, and they already knew that the shares would be well applied for, and they would make a good margin of profit. He would be quite willing for the meeting to appoint a committee to discuss the question with the board and call a future meeting. The chairman withdrew the resolution and put a motion that the scheme should be referred to a committee to report to an adjourned meeting, which was agreed to.

GENERAL NEWS.

SOUTH AFRICAN RAILWAYS.

The railways open to traffic on December 31 last totalled 7,041 miles, and revenue had increased by £1,899,600, as compared with 1909, according to the report of the general manager of the South African Railways. Of this increase minerals, principally coal, were responsible for £1,538,143, and passengers for £310,150. The working expenditure had increased by £899,184. Revenue had contributed £525,000 for betterment during the first seven months of the Union. The goods and mineral traffic, the latter principally consisting of coal, totalled 10,708,737 tons, an increase of 1,773,271 tons as compared with the previous year. The maize carried totalled 176,021 tons. The report advocates an extension of the employment of white labour as far as practicable.

INDIAN RAILWAY CONFERENCE.

The annual conference of the chief officers of railways has been sitting in Simla, and, according to the *Times of India*, it has been urging that Section 72 of the Railways Act be so amended as to relieve the railways from responsibility for the safe custody of goods after twenty-four hours. The Government of India, on the other hand, are of opinion that the remedy lies in the hands of the railway administration and that a penal rate of demurrage shall be sufficient to make the consignees remove their goods within a proper time limit. The conference has been of opinion that the experiment has failed and approached the Railway Board last year for an amendment of the law. They have been informed that the system of penal rate has not had a fair trial, and the Railway Board are not prepared to take any legislative action.

CANADIAN TRANS-CONTINENTAL RAILWAY COMMISSION.

Mr. S. N. Parent, chairman of the National Trans-continental Railway Commission, a former Liberal Premier of Quebec, announces his resignation, and adds that possibly three other commissioners will follow his example, all having received their posts under Sir W. Laurier's Government as political appointments. The Toronto correspondent of *The Times* says:—"The feeling is that the position of the enterprise is a danger to the new Cabinet. The railway has been enormously costly, and the common conviction is that there has been much waste and jobbery in its construction. It is expected that the new Government will appoint an investigating Commission and make an extensive inquiry into the cost and methods of construction and endeavour to escape all responsibility for what has been done. There is a general expectation that in view of the cost of the eastern section the Grand Trunk Railway will insist upon revision of the terms of rental, and that unless better terms are given it the Grand Trunk Company will not consent to work the section between Winnipeg and Moncton."

THE ECONOMY OF THE NEW CREWE ENGINES.

Nearly one hundred men were discharged on Monday last from the London and North Western Railway works at Crewe, and notice was given to a further 97 men. This will complete the discharges, and the works will be put on full time next week after two years' short time. A prominent official is reported as having stated that the company has been turning out apprentices at a faster rate than they could employ them as journeymen. The men who are being discharged are mostly young hands who have not long been out of their time. It is stated that there are fewer journeymen by 1,500 employed than about five years ago. Asked what were the causes of the shortage of work, the official stated that there were twenty fewer engines yearly being built on the London and North Western Railway than formerly. The gigantic engines turned out recently did a great deal more work than the old type. As in the construction of each engine about £1,000 is paid in wages to workmen, this item alone meant less work and £20,000 a year less in wages. The men, who received 14 days' notice instead of a week, are also to be given free passes to travel to other large centres of engineering in search of work. In addition, the officials have circularised employers of such labour as theirs asking if they can find places for any extra hands.

COLONIAL RAILWAY DEVELOPMENTS.

Some of the younger men among British railwaymen might have their attention directed to the activity of Canada, Australia, and New Zealand in railway construction. The great works in progress in Canada are common knowledge, but not so much is known here concerning the other countries named. A few days ago a Melbourne telegram announced that a Bill providing for a local loan of £2,000,000 for railways and public works passed the Legislative Assembly. The Government of New South Wales has submitted proposals for the construction of new branch railways and other public works at an estimated cost of £8,000,000. According to the *New South Wales Railway Budget*, there is being constructed for the Government of South Australia at Islington and Gawler £400,000 worth of new rolling stock, as part of requirements represented by 50 broad-gauge locomotives, 73 carriages, 300 16-ton, and 700 12-ton wagons, and a number of vans and trucks. There were added to the stock of the New Zealand Railways last year fourteen engines, twenty-six carriages, seven brake vans, and 836 wagons. This made the total 479 engines, 1,166 carriages, 174 brake vans, and 17,680 wagons. Tenders are being invited for ten more engines, and material will be ordered from England for the construction of ten more engines, each weighing 94 tons. These are to be built at Addington. Material has also been ordered for ten more engines which will be constructed at Hillside.

PROFOUND DISENCHANTMENT IN NATIONALISATION.

Mr. W. M. Acworth, one of the committee of governors on railway subjects at the London School of Economics and Political Science, and a former lecturer to the class, is the Conservative candidate at the by-election at Keighley, caused by the death of Sir John Briggs, against whom he fought at two elections. Addressing the first meeting in the present campaign on Tuesday, Mr. Acworth, in dealing with the railway troubles, remarked that this was one of those questions which, as in America and France, would also here come to be one of the most important in the country. It was a subject to the study of which he had devoted a good part of his life, and he did not wish to express any opinion at present, except this, that he believed we should come before very long to the railways being taken over by the State. (Hear, hear.) He never had wished for it, and he had never thought it would be in the public interest. Countries which had taken over their railways had experienced a profound disenchantment. The workmen had found that they had not got what they expected, and the traders and passengers had found the same, while the taxpayer found he had got to foot a bill that he hadn't got to pay before. However, if the subject had to come up in Parliament, he should like to have a hand in it.

Mr. Acworth also spoke on Home Rule, remarking incidentally that as one of the members of the Irish Railways Commission he had during the past few years seen a good deal of Ireland, and he believed honestly that if the subject of Home Rule could have been left alone for a few years it would have settled itself.

RAILWAYMEN AND THEIR HOURS.

The Board of Trade's report on their proceedings under the Railway Regulation Act, 1893, as affecting the hours of labour on the railways was issued as a White Paper on Tuesday. It shows that during the year ended July 27 last, there were 11 cases of complaint, increasing the total number since the Act came into operation to 913. The figure (11) compares with four last year and ten in 1909. As the result of inquiries, the Board found that in the case of signalmen on the City and South London Railway there was some cause for complaint, but satisfactory alterations in hours had since been made. Representations made by enginemen at Andover Junction employed by the Midland and South-Western Junction Railway were found to have justification, and the Board consequently asked the company to reduce the booked hours in certain cases and ensure, as far as possible, that these should not be exceeded. In the case of dissatisfaction on the part of the North Eastern Railway signalmen at Stockton no intervention was found necessary. Long hours, resulting from holiday arrangements, formed the subject of inquiry in the case of Midland Railway signalmen, and it was found that during the summer and autumn certain men at unimportant 10 hours signal-boxes worked for 12 hours. On the attention

of the Board being called to it the practice was stopped. Certain shunters in the London district of the Great Eastern Railway having complained of being employed as fogmen after their ordinary day's work was over, the company replied that this was owing to their being the only men available, but in future extra platelayers would be employed during the foggy weather. In the case of shunters at South Leith goods yard (North British Railway) it appeared to the Board that long hours had been worked in some cases owing to the prevalence of illness among the staff, and the company replied that they would endeavour to keep hours within the booked time.

GRAND TRUNK APPOINTMENTS.

The directors of the Grand Trunk Railway of Canada have sanctioned the following appointments: Mr. William Wainwright, vice-president; Mr. M. M. Reynolds, vice-president in charge of financial and accounting departments; Mr. Howard G. Kelley, vice-president in charge of construction, transportation, and maintenance; Mr. J. E. Dalrymple, vice-president in charge of traffic; Mr. R. S. Logan, vice-president in charge of land, tax, claims, and mails.

The following announcements are also made:—Mr. H. R. Safford to be chief engineer, with headquarters at Montreal; Mr. John W. Loud, freight traffic manager, retires under the provisions of the Pension Fund. Mr. E. H. Fitzhugh, having been elected president of the Central Vermont, Southern New England, and Montreal and Southern Counties Railway, relinquishes his duties in connection with the position formerly held, to devote his time to the affairs of the companies named. He will also perform such duties in connection with other subsidiary lines of the Grand Trunk system as may be assigned to him. Mr. J. E. Dalrymple is also appointed fourth vice-president of the Grand Trunk Pacific Company in charge of traffic, with headquarters at Montreal. Mr. D. E. Galloway is appointed assistant to president, vice Mr. R. S. Logan, promoted. Mr. Charles M. Hays, president, having been elected chairman of the board of directors, Mr. John Pullen has been elected president, in charge of all the affairs of the company.

Mr. Wainwright was born at Manchester, England, in 1840, and became a junior clerk on the Manchester, Sheffield, and Lincolnshire Railway in 1858, at the age of 18. He became secretary to the general manager, and in 1862, at the invitation of the then chairman, Sir E. Watkin, who was also superintendent-commissioner of the Grand Trunk, he went to Canada as a senior clerk and shorthand secretary in the chief accountant's office at Montreal. He has since risen step by step. Mr. Pullen was born at Shepton Mallet, England, in 1863, and emigrated as a boy. In 1877 he entered the department of the assistant general freight agent of the Grand Trunk as office boy. Later on, like Mr. Wainwright, he found the acquisition of shorthand, then an uncommon attainment, of great advantage to his progress.

A YEAR'S RESULTS OF WORKMEN'S COMPENSATION.

A Blue-Book was issued on Wednesday giving statistics of compensation and of the proceedings during 1910 under the Workmen's Compensation Act, 1906, and the Employers' Liability Act, 1880. In a prefatory note, Sir Edward Troup, Permanent Under Secretary of State in the Home Office, explains that in seven great groups of industries—mines, quarries, railways, factories, harbours and docks, constructional works, and shipping—the number of employers included in the returns was 134,820, and the aggregate number of persons employed coming within the provisions of the Compensation Act was over seven millions, of whom nearly five millions come under the heading "factories." In these industries in 1910 compensation was paid in 3,510 cases of death and in 378,340 cases of disablement. The average payment in case of death was £153, and in case of disablement £5 14s.

The annual charge for compensation, taking the seven groups of industries together, averaged 7s. 8d. per person employed. It was lowest in the case of persons employed in factories, being only 4s. 3d. per person; in the case of railways it was 8s.; it rose to 10s. 3d. in quarries, to 12s. 5d. in shipping and to 12s. 10d. in constructional work. It was highest in mines, 20s. 2d., and in docks, 20s. 6d. It is, Sir Edward points out, noteworthy that in the coal mining industry the charge arising under the Act works out at about 0.9d. only per ton of coal raised.

The total amount of compensation paid under the Act in the seven groups of industries during the year was £2,700,325, as compared with £2,274,238 in the previous year. When, however, to this is added the cost of management, commission,

legal and medical expenses, etc., the total charge borne by the seven industries probably amounts to nearly £4,000,000.

RAILWAY STATISTICS.

The tables under the heading of railways refer only to persons actually employed on railways and the clerical staff. The returns relating to the other classes of workers are included under one or other of the remaining groups of industries. The returns in respect of the clerical staff show, as would be expected, very few cases of compensation. Only three fatal cases and 63 disablement cases (including one case of industrial disease—telegraphist's cramp) were returned, in respect of 67,233 employees, with total compensation of £1,272. In respect of the other railway workers, numbering 374,240, the returns show 410 fatal cases, with compensation £63,392—average £154; and 21,369 disablement cases, with compensation £111,123—average £5 4s. Of the disablement cases, 2,077 were cases in which the payment of compensation was continued from the previous year, leaving 19,292 in which the first payment of compensation was made during 1910.

PERSONAL.

Mr. R. Borlase Matthews is relinquishing his work as a consulting engineer to become manager to Ozonair, Ltd.

Colonel H. Plews, who retired from the position of general manager of the Great Northern Railway of Ireland on October 1, will continue to be connected with the company as a director.

Mr. Charles Cudbird, stationmaster at George Lane, South Woodford, who jumped on to the line and saved a lady who had fallen in front of an on-coming train at George Lane, South Woodford, was on Tuesday presented with an Edward Medal by the King at Buckingham Palace.

Mr. J. McCormick, general manager of the Tasmanian Railways, retired from that position on October 1 upon the newly-appointed sole commissioner taking up his duties. It is expected that he will receive the appointment of engineer-in-chief, which carries with it supervision over all State works.

Mr. John Black, the new superintendent of the line, North British Railway, took a leading part in effecting the economies on the system of the company to counteract some of the new forces which have for some time been eating into railway profits, and has an intimate knowledge of the intricate conditions of service of the various grades of workers.

L. and Y. Railway Appointments.—The position of chief traffic manager held by the late Mr. J. Wharton on the Lancashire and Yorkshire Railway has been abolished, the work being separated between the goods and passenger departments respectively, Mr. Herbert Marriott being appointed chief goods manager and Mr. Arthur Watson superintendent of the line.

Sir Ernest Paget, in consequence of his recent illness, has decided to resign the chairmanship of the Midland Railway Company. Sir Ernest, who was appointed a director in 1870, was for many years deputy-chairman, and he was elected chairman in 1890. He is, it is stated, to retain his seat on the board. Besides being chairman of the Midland Railway, Sir Ernest is a director of the Forth Bridge, Somerset and Dorset, and Tottenham and Forest Gate Railway Companies.

Mr. J. F. McIntosh, locomotive superintendent of the Caledonian Railway, on the occasion of the royal journey from Balmoral to the south on Monday, waited on the King at Perth by command and received the honour of being appointed a member of the Victorian Order in recognition of his many services and intimate relationship in connection with the royal journeys in Scotland. Mr. McIntosh, who has been chief mechanical engineer to the Caledonian Railway since 1895, completes his jubilee of service with the company in February next.

Mr. W. R. Bailey has been appointed Irish traffic superintendent of the Lancashire and Yorkshire Railway Company, in succession to the late Mr. W. F. Copeland. Mr. Bailey graduated in the Irish office of the London and North-Western Railway Company, where he spent sixteen years, under the late Mr. Skipworth and Mr. Burgess. He then entered the service of the Lancashire and Yorkshire Railway Company, being appointed agent at Drogheda and Dublin, and when the company bought the Drogheda steamers he was entrusted with their management.

A Midland Clerk's Gallantry.—Sir Guy Granet, on behalf of the directors of the Midland Railway Company, on October 6, presented a handsome clock to Mr. A. H. Kellett, a clerk in the accountants' department at Derby, in recognition of a conspicuous act of gallantry. Mr. William Curzon, J.P., was crossing the metals from one platform to another at Derby station, instead of using the bridge. Being deaf, he failed to hear the approach of a train. His view being also obstructed,

he was in danger of being knocked down, when Mr. Kellett rushed up and dragged him into a place of safety. Mr. Curzon was struck by the incoming engine, but was not injured, and he has since made Mr. Kellett an acknowledgment of his bravery.

Mr. Alex. Ross, who has retired from the position of chief engineer of the Great Northern Railway Company, intends to engage in consultative practice in Westminster. In addition to the maintenance and reconstruction of the way and works, Mr. Ross has carried out numerous extension works, such as the Leen Valley extension railway, the connecting line through Nottingham, numerous heavy widenings to the North of London and throughout the line, and the southern portion of the Enfield to Stevenage loop line. He was also engineer for the northern portion of the Great Northern and City Railway and for the four-tunnel station underneath the Finsbury Park Station of the Great Northern Railway, and for that portion of the Great Northern, Piccadilly, and Brompton tube lines from Finsbury Park to Surrey Street, Strand. Among other works for which he has been responsible may be noted the fine steel viaduct, with swing span in the centre, crossing Breydon Water, outside Yarmouth.

RAILWAY NOTES.

Belgian Railway Contracts.—The Belgian Government have decided to spend £3,000,000 on railway equipment, and foreign, as well as Belgian, tenders are to be invited.

Tenders for Cars Required.—Tenders have been asked for by the Grand Trunk Railway System for ten 30-ft. and ten 40-ft. steel underframe flat cars. These cars cost approximately about \$1,000 each.

Melbourne Suburban Railways and Electrification.—Victorian Parliamentary Standing Committee on Railways recommends the electrification of Melbourne suburban railways, at a cost of £2,227,050. There are 218 miles of line.

A Queensland Contract.—The Queensland Government has accepted the tender of George Wills and Co. for the supply of 50,209 tons of steel rails and 3,598 tons of fish-plates, the price for the whole contract being £386,402. This material will be for use in connection with the railway construction works in the west and north.

Light Railways Order.—The Board of Trade have recently confirmed the under-mentioned Order made by the Light Railway Commissioners:—Leek, Caldon Low and Hartington Light Railways (Borrowing Powers) Order, 1911, amending the Leek, Caldon Low and Hartington Light Railways (Borrowing and Further Powers Amendment) Order, 1906.

Fruit Growers and Railway Rates.—At a meeting of the National Fruit-growers' Federation at 2, Gray's Inn Place, London, on October 5, the report of the committee on railway agreements and amalgamations urging, amongst other things, important alterations in reference to owners' risk and other clauses in the railway rates, was adopted, and the president (Mr. C. S. Martin) and the secretary were appointed delegates to attend a special conference to the President of the Board of Trade on the subject.

Scottish Railway Rates Advanced.—The Scottish railway companies intimate increases in through rates for merchandise to the Western Islands and to Irish ports, owing, it is stated, to the increase in freight rates previously intimated by the shipping companies. The increases in the through rates to Ireland range from 5d. to 1s. 3d. per ton. To the Western Islands the advances range from 2s. 2d. to 15s. per ton, according to distance and class of merchandise, with corresponding advances in the case of small packages.

Fire Extinguishers and Tools for L. and N.W. Trains.—The guard's vans of the main line passenger trains on the London and North Western Railway are being fitted with a glass case containing fire extinguishers, two saws, a pick-axe and a crow-bar, in order to lessen the danger from fire after a collision and to enable passengers to be released from wrecked coaches. It will be remembered that in his report on the Hawes Junction disaster Major Pringle, Board of Trade inspector, suggested that axes, saws, sledge-hammers, crowbars, and fire extinguishers should form part of the equipment of a train.

The L. and N.W. Electric Line to Watford.—Eighteen new bridges have been erected in connection with the construction of fifteen miles of double electric track between Euston and Watford, and near Bushey the Colne is being crossed by a viaduct. At the present time Willesden, Sudbury and Wembley, Harrow, Pinner, and Bushey are the only points of stoppage. New stations will be provided at Harlesden, Stonebridge, Wembley, North Wembley, and Kenton, between Willesden and Harrow. A commencement has been made with the extension of the branch line from Watford to Rickmansworth.

The Proposed Mid-Lincolnshire Light Railway.—At a meeting held at Sleaford, to consider the best means of securing the construction of the proposed Mid-Lincolnshire Light Railway from Sleaford to Kirkstead, Mr. E. H. Godson explained that the cost of construction would be £95,000, and if only £20,000 could be raised in the district through which the line will pass, financiers in London had offered to provide the remainder of the money required. A resolution pledging support to the scheme was carried, and a large number of applications were made for shares.

A Society for Non-Union Railwaymen.—A meeting to protest against the tyranny of trade unions recently took place at Widnes, the principal speaker being Mr. Mark Judge, a London architect. The following resolution was carried with slight opposition: "That the continued attempts of coercion on the part of trade unions make it imperative for workers who desire to remain free to organise in self-defence, and it is resolved to establish a society, called the Lancashire Railway Society of Free Workers, for the purpose of maintaining the principles of personal responsibility, and especially to protect, by every means in its power, the rights of individual members to live and work in freedom so long as they do nothing to interfere with the enjoyment of a like freedom by all others." Thirty members joined the society.

VICTORITE TREAD

(REGD.)

As used in

**THEATRES,
SCHOOLS,
HOSPITALS,
ASYLUMS,**

And other

PUBLIC BUILDINGS.

It is the most EFFECTIVE TREAD, and gives an
ABSOLUTELY SURE FOOTHOLD.

The great advantage of this TREAD is that the material, which prevents the possibility of slipping, is brought over the nosing of the step. It is here where many treads fail.

**IS BRIGHT AND CLEAN IN APPEARANCE, OF GREAT
DURABILITY AND INEXPENSIVE.**

Full particulars and prices on application.

Specialists in Architectural Stone Dressings,
Staircase Work, and Granolithic Paving (in situ).

The British Standard Brake Block

NOW UNIVERSALLY ADOPTED BY THE LEADING
RAILWAY COMPANIES.

WHY?

Because we cut down your present cost 40 to 60.

THEREFORE

Shift the responsibility on to us.

Our Brake Shoes last $2\frac{1}{2}$ times the life of the ordinary
cast iron Block, with equal braking effect, and
slightly less wear on the wheel tyres.

By our new design and blending of metals the Shoe
can be completely worn out without danger.

One Shoe only, interchangeable and reversible for all
classes of Carriages, Wagons, Vans, etc.

Don't theorise: get the facts from the list of Railways
we now supply.

Our Representatives, with suitable samples for trial, are
at your command.

The National Rail & Tramway Appliances Co. Ltd.,
12-18, TAYLOR STREET, LIVERPOOL.

Telephone: 1198 Royal.

NATIONALISATION OF RAILWAYS.

Our views in regard to nationalisation of railways are well known to our readers—the step referred to would be an excellent thing for the shareholders, but probably a misfortune from the point of view of the general public. Although the question is not at the moment one of practical politics there is no doubt that the course of events is doing much to force it upon public attention. It is rather a curious feature that every section of the community which has a grievance against the railways is inclined to point to nationalisation as the means of removing the alleged grievances. Among the men in particular of late there has been a good deal said about the advantages of State acquisition of the railways, and at the annual meeting of the Amalgamated Society of Railways Servants a resolution in favour of this step is a regular feature. The railway employees have of course held the view that a change from private to State ownership would tend to raise wages, reduce hours, and otherwise improve the conditions of employment for the simple reason that they will probably find the State railway system more susceptible to political pressure than the existing system. Traders and the public generally when they have complaints to make in regard to rates, fares, train services, etc., are also inclined to turn to nationalisation as the remedy for their ills. Of late, the acquisition of the railways has even been urged as a means of avoiding strikes—a ridiculous suggestion in view of the fact that only last year the French State Railways had to face a serious and general strike, whilst experience has shown that there are more troubles on the State lines than on those which are privately owned. Moreover, the evidence in regard to recent labour troubles goes to prove that the difficulties would have been aggravated rather than diminished had the railway system belonged to the State. One striking feature of the discussion in regard to the advantages of nationalisation deserves special notice at the present time. No one appears to have come forward, and pointed out its great advantages from the standpoint of railway shareholders themselves. On the contrary there has been some inclination to make this matter a fogey with which to frighten railway stockholders, and with which to depress prices. The question is of course a big one and full of complexities, but we are satisfied that the threat of nationalisation possesses no terrors for British railway proprietors generally. On the contrary, we hold strongly to the opinion that a purchase of the railways upon the terms already laid down in the Act of 1845 would place railway proprietors in a far more fortunate position than they occupy to-day. The terms of purchase laid down in that Act are briefly as follows:—Twenty-five years' purchase of the average annual net profits for the three years preceding the date of purchase, plus in every case where dividends are less than 10 per cent. an addition in respect of prospects, to be decided by arbitration in the event of disagreement. It may be recalled, moreover, that about ten per cent. of the railway system of the country, including some of the most important sections of our trunk lines, are not even capable, as the law stands, of being taken over by Parliament, and that in regard to this particular mileage the purchase would have to be effected by bargaining between the

Government and the companies concerned. The terms of purchase provided for in the Act of 1845 are perhaps not altogether applicable to the conditions of to-day, but a revision of those terms would certainly not be wholly or necessarily adverse from the railway standpoint. Those critics who are inclined to raise the bugbear of nationalisation might bear in mind that in the case of the London Docks, the Telephone Company, and the London Water Companies the purchase made on behalf of the public certainly involved no misfortunes to the former proprietors. On the contrary, in each of these recent instances of purchase by the public of private undertakings, the proprietors had every reason to be satisfied with the results, and the circumstances point to the railway companies being treated with at least the same fairness in the event of their purchase by the State becoming a matter of public policy. Whilst, therefore, we steadily maintain that it is not in the interests of the public that the transfer should be made, we think it is contrary to all the facts of the case to suggest that such a step need alarm railway proprietors, but we do think that as the prospect of such acquisition draws nearer it is the emphatic duty of the directors and officials of the railways to make the best of the opportunities which the companies still possess, and that so far as profits and dividends are concerned they should in no way hide their light under a bushel. In the same way it is the duty of those responsible to take every step which is possible to improve existing results. The success which has already attended the policy of co-operation and amalgamation should certainly encourage the companies to go on along these lines, particularly after the emphatic endorsement of that policy which was given by the Board of Trade Committee appointed to investigate the question. It may be pointed out that the Government can hardly fail to support such a policy, and that indeed they have already encouraged it to a very large extent, because it smoothes the path towards nationalisation, and there can be no doubt that there are advocates of such a policy occupying prominent posts in the present Government. Looking at the matter broadly it would appear that, in market phraseology nationalisation of our railways would be a "bull" point and not a "bear" one as is generally suggested. Indeed, it only shows the extent of the uncertainty created in this department that such a prospect should be regarded as necessarily adverse.

THE MAINTENANCE OF SLOPES.

One of the difficulties which every railway engineer encounters is that of preventing or stopping land slides or "slips" and subsidences, and many are the expedients devised to meet and overcome these evils. Every traveller must have noticed in places strange looking trenches, filled with material foreign to the cuttings in many of their slopes. Where the earth is disturbed in any ground the strata of which dip towards the railway, much trouble is experienced in maintaining such slopes, and, unless water is kept out of them, this trouble lasts for years and is a source of enormous expense. Embankments on similar ground are also apt to slip about in a seemingly unaccountable way; also, where heavy banks are taken across marshy or peaty ground the weight of them often raises earth-waves extending over a great distance from the centre, what time they sink and settle into the soft stuff and squeeze it out on either side. If these movements take place during construction they cost a lot of money in making good, or in clearing away subsidences; but if the evil is not attacked at the root the action continues after the line has been opened, and then interruption to traffic is added to the other disadvantages. The *causans* of the evil in every case is—water. Where permeable soil overlies an impermeable stratum and the latter does not lie in horizontal layers, a movement of the top

soil is bound to take place if its angle of repose is disturbed in any way, and such movement becomes irresistible if water is allowed to lubricate the impermeable substratum. On the other hand, when absolutely dry, the joint between the slippery surface and its load is a source of strength rather than otherwise, owing to the friction between the two dissimilar surfaces. It follows that in all such cases if the water be intercepted before it has a chance of doing any mischief, not only will any slip be prevented, but it will, in the course of a very short time, be absolutely stopped. Similarly, with banks on soft ground, if they be counterbalanced by subsidiary mounds on either side, the water in the subsoil will not be squeezed out and the embankment will stand, or rather float, as it were, in a manner very similar to what occurred in crossing Chat Moss. It stands to reason that if these lower banks on either side be constructed first, the high and heavy central embankment will have to lift them bodily, and if they are properly proportioned no such action will happen. Both in the case of banks, and cuttings care should naturally be taken to prevent the water falling on their surface from sinking down to the substratum. If the soiling and turfing has resulted in a close growth of grass, nothing further may be needed; otherwise catch-water shallow drains would have to be laid all over the surface. In any case the deep trenches filled with burnt clay or chalk, which so commonly meet the eye, are about the worst means that could possibly be devised to meet the evil, as they most assuredly aggravate it. These propositions are only put forward as a slight indication of what can and has been done in many instances where slips and subsidences had had serious consequences; but each individual case must be studied on its merits. If engineers were to do this wherever the geological features pointed to any danger of the kind indicated, much heartburning and anxiety might be avoided by acting on the principle that "prevention is better than cure."

Weekly Traffic Summary.

The traffic receipts for the week ended October 15, as officially published by the fifty-two principal railways of the United Kingdom, amounted to £2,296,288, which was earned on 21,521 miles, being at the rate of £106 14s. per mile of line open. For the corresponding week of 1910 the receipts of the same lines amounted to £2,166,321, with 21,467 miles open, or £100 18s. 3d. per mile. There was thus an increase of £129,967 in the receipts, an increase of 54 in the mileage, and an increase of £5 15s. 9d. in the receipts per mile. Thirty-four of the returns distinguish between the receipts from passenger and goods traffic, and these show an increase of £30,789 (or £1 7s. 2d. per mile) in the passenger receipts, and an increase of £96,896 (or £4 9s. 6d. per mile) in the receipts from goods traffic. The aggregate increase of the thirty-four railways for fifteen weeks in the passenger receipts has been £67,646, while the aggregate decrease in the goods traffic was £67,244. The aggregate receipts of the fifty-two railways for fifteen weeks (July 2 to October 15) amounted to £36,409,558 in comparison with £36,460,777 in the corresponding period of last year—a decrease of £51,219.

New Midland Railway Chairman.—The Midland Railway Board, at their meeting on Friday, elected Mr. George Murray Smith, of Gamley Hall, Market Harborough, chairman of the company, in the place of Sir Ernest Paget, who has resigned.

The Western Works of the Canadian Pacific.—The prolonged rivalry among the towns in Alberta as to which would be selected as the site for the new western works of the Canadian Pacific Company has been ended by Sir T. Shaughnessy's announcement that the works will be built at Calgary. When completed, the workshops will provide employment for five thousand men.

The Bank return this week, as on the previous Thursday, showed a better position than was expected. On balance £633,000 in gold went abroad, but the stock of coin and bullion is down only £597,000. Some coin and £511,000 in notes have returned from circulation, so that the reduction in the reserve is no more than £86,222. The total now stands at £27,141,000, and the ratio at 52.40 is nearly four points higher than last week. A year ago, with the Bank Rate at 5 per cent., the reserve amounted to £22,802,000, and the proportion was 46.49 per cent. The Government seems to have repaid £500,000 on deficiency bills, and Public Deposits show an advance of £283,900. Other, or private, deposits are consequently lower by nearly a million. The position thus continues to be satisfactory, and the apprehension of an early increase in the Bank Rate, aroused by the recent large withdrawals of gold for Brazil and Egypt, is at present un-called for. The probability is that the Bank will continue for some time to obtain a good proportion of the gold arriving from the mines, and in that case the position will continue to be one of sufficient strength without recourse to a higher rate. Monetary conditions are, in fact, very favourable, and as soon as international relations assume a more normal aspect they will become a much more important factor in the stock markets than has been the case for some time.

On the Stock Exchange the week has been marked by nothing more interesting than the gentle ebb and flow with which the markets have been familiar for some

weeks. While sentiment has a stronger tone, there is no energy in the speculative section, for the small but steady stream of investment purchases is not sufficient to keep prices at the higher levels to which they occasionally rise. There is no doubt that in various markets good bargains can be found, and business has not on the whole been at all bad; but it is speculation that exercises an effective leverage on prices and in the meantime the speculator is very wisely acting on the rule that discretion is the better part of valour. Those who venture do so have an eye for squalls, and are prudently content to take small profits. No one anticipates that the clouds that overshadow Continental bourses will increase in volume, but they at least obscure the outlook and instil caution. In the Home Railway market this influence is reinforced by anxiety caused by outbursts on the part of those firebrands, the Labour leaders, and by some apprehension of a possibly unfavourable effect of the report of the Royal Commission of Inquiry into the conditions of railway employment.

Against these influences the excellent traffic returns of the past few weeks have been powerless to move prices appreciably. In normal conditions such increases as have lately been recorded would have infused such enterprise into the railway market that the levels ruling before the strike would be quickly recovered. In the circumstances, however, it is on the whole satisfactory that no great change has taken place: we are by no means beyond the danger zone, and while the investor may wisely seize the opportunity, the market is all the better for the comparative absence of the speculator. Home Rails, when once the labour question shows evidence of being settled, at least for the time being, will go ahead; but to await that time some patience may be required, and in the interim it is just possible that accidents will occur.

Movements during the week have not been important. On Saturday last business in the Home Railway market was insignificant and changes in prices were slight, although in some cases there were movements of ¼, but Canadas put on 1½ and Trunks were firm. Monday brought more activity. Consols closed ¾ up, and the rise encouraged the Home Railway market, in which there was a fair amount of buying. Great Centrals went ahead, the 1904 preference adding 2, while the preferred put on ½. Trunks went up ½ and Mexican ordinary jumped 1½. On the following day reaction supervened, but the declines were not serious. Canadas receded, but Grand Trunks remained steady, the report containing nothing to affect holders. Mexicans receded in spite of a good traffic return, even when compared with the results for the week of the wash-out a year ago. The Buenos Ayres and Pacific dividend of 2 per cent., making 3½ per cent. for the year, was liked, and the price rose 1½. On Wednesday markets were colourless. Kentish rails, however, were active and other Southern lines shared in the movements. Foreign and Colonial rails moved irregularly. A demand for Southern Rails was again a feature on Thursday and York deferred and Great Centrals were good. Entre Rios among foreign rails put on 1½ and Central Uruguay ½.

On Friday Consols were notably strong, but the Home Railway market was uneven. After their recent rise, Southern stocks went back and anxiety over the report of the Royal Commission checked business. Great Northern deferred and South Western deferred received support, however, and the former rose ½ to 49½. The outlook for this stock is beginning to be better appreciated and it is only a question of time when it will command much higher prices. Americans were higher and Union Pacifics at the close showed an improvement of 1½. Steels also were good. Canadas at 236½ showed a rise of ½, but Grand Trunks were inactive. Among foreign lines Entre Rios, Central Argentine and Buenos Ayres and Pacific all rose sharply.

The movements of the week are set forth in the following table:—

Australian Railway Bill.—In the House of Representatives, on October 3, the Bill providing for the construction of a trans-continental railway from Kalgoorlie (Western Australia) to Port Augusta (South Australia) was read a second time without a division. Mr. Fisher (the Commonwealth Prime Minister) announced that the line would be constructed partly out of revenue and partly out of a loan from the note issue trust funds.

FUTURE MANAGER OF THE L. & S.W.R.

Official confirmation was given this week to the announcement that Mr. Herbert Ashcombe Walker, who latterly has held the position of assistant to Mr. Frank Ree, the general manager of the London and South Western Railway Company, as well as that of goods manager for the southern section of the London and North Western Railway Company, has been appointed as general manager to the London and South Western Railway Company, to succeed Sir Charles J. Owens when he retires on January 1 next. Sir Charles, who followed Sir Charles Scotter as manager in 1898, received the honour of knighthood in 1902, and has been connected with the company since 1862. In July, 1897, he was promoted to the position of assistant general manager, and under his rule the company has seen the full development of the extensions of its activities inaugurated by the late Sir Charles Scotter. In addition he has carried through the important extensions of the docks at Southampton. That the coming vacancy is to be filled by the selection of an officer from another railway system is probably due to events which have occurred since the general railway strike in August last. Mr. Walker was the first witness who appeared before the Railway Inquiry Commission to state the case for the companies. He thus came prominently before the various chairmen and managers of the companies. Mr. Walker's evidence and examination occupied a day and a half, and he was followed into the witness seat by Sir Charles Owens.

Mr. Walker, who is a native of the metropolis, is 43 years of age, and he will be the youngest railway manager in the United Kingdom. He was educated at North London Collegiate School, afterwards abroad, and then by private tutor. In 1885, at the age of 17, he entered the service of the London and N.W. Railway Company as a clerk in the district superintendent's office at Euston, and two years later he was transferred to the office of the superintendent of the line. In 1889 he was appointed one of the outdoor assistants to the superintendent of the line, occupying this position for four years, during which he acquired a knowledge of the various details of railway work. He was next appointed, in 1893, assistant district superintendent of the North Wales division of the line with headquarters at Chester, from which he was transferred ten months later to a similar position at Euston. In this capacity he officiated until 1902, when he was made district superintendent of the southern division of the line at Euston until 1909. Then he became assistant to the superintendent of the line, and in the following year outdoor goods manager for the whole of the London and North Western line south of Crewe.

The future South Western manager has also acted as one of two superintendents of each of two lines jointly owned by the L. and N.W. and Midland Companies—namely, Enderby Branch Railway and Ashby and Nuneaton Railway.

In 1902 Mr. Walker visited America to enquire into various phases of railway work there, and he made several reports, which have been published. The chief of these were on "The Method of Dealing with Luggage in the United States" and "Accidents and Casualties in the United States and the United Kingdom." The latter report had considerable effect upon the discussions which were taking place at the time on the subject of automatic couplings in this country.

North Wales Winter Health Resorts.—In order to correct the erroneous impression that North Wales is unfit for delicate people in the winter months, and with a view to bringing to public notice the advantages of the district as an ideal winter resort, the London and South Western Railway Company's publicity department has issued a fifty-page guide book, which may be obtained at any of the stations, or from the enquiry office at Euston. The publication is profusely illustrated. The medical and meteorological evidence should convince the reader that North Wales has strong claims to be regarded as a winter sanatorium for the relief of pulmonary and other disorders, one possessing the advantage of unique scenic attractions. The quoted statistics of temperature, rainfall, and sunshine relate to a long period of years, and the medical testimony is that of Dr. J. Lloyd Roberts, the medical officer of health to various sanitary authorities on the North Wales coast, whose endeavour it has been to show that the climate is superior to any in Great Britain in all health-giving and restoring qualities, and that, consequently, there is no necessity to go out of the United Kingdom in search of health.

REPORT OF THE ROYAL COMMISSION ON THE RAILWAY CONCILIATION SCHEME OF 1907.

PROPOSED NEW SCHEME.

NO RECOGNITION OF THE UNIONS.

The report of the Royal Commission appointed to investigate and report on the working of the Railway Conciliation and Arbitration Scheme of 1907 was issued on Friday evening. The Commissioners after reviewing the events leading up to the Agreement of 1907, and referring to the evidence given before them by representatives of the trade unions and the railway companies, continue as follows:—

COMMENTARY ON EVIDENCE.

Recognition.—The most important, if not the main, efforts of the companies and the men were directed to the question of "recognition," and, beginning with this question, we now proceed to make some commentary upon the evidence given by both sides.

The position in which the question of recognition was left at the date of the 1907 agreement is not clear. The negotiations resulting in that agreement were conducted through intermediaries; there were no direct negotiations between the companies and the men. Whatever may have been understood by the companies we have no evidence before us to enable us to say that the men understood it to be an essential condition of the agreement that the question of recognition should not be raised during its term.

The representatives of the men ask for recognition; the companies strongly object to it in any shape. The exact meaning of the term, as it would be applied in practice is not quite clearly conveyed by either of the parties. The unions do not all express the same views; some desire the presence of a trade union official to help the men in advocating their case before the officers of the company or before the directors; others think that their purpose would be served by the admission of the union official to help the men before the conciliation boards. The existing practice is that trade union officials are admitted to plead before the arbitrator.

The apprehensions of the companies are that recognition, as they interpret it, would seriously affect discipline and interfere with management if men, in approaching their officers or directors on any subject of grievance or complaint, had the right to bring a union official with them.

We think that with their great responsibilities the companies cannot and should not be expected to permit any intervention between them and their men on the subjects of discipline and management.

The trade unions press strongly for recognition as representatives of the men. No doubt, in some matters and on some occasions, friendly relations between companies and the representatives of unions have been both convenient and useful. The witness who appeared before us on behalf of the Great Western Railway gave an illustration of the valuable results which attended his collaboration with the trade union official who had conducted the case of the men before the arbitrator. In that instance many vexed points of interpretation were settled quite satisfactorily, and in our opinion a more general adoption of this method of negotiation would be helpful to both parties.

In our amended scheme we have provided that the members of each Board shall be at liberty to select a secretary from any source they may think proper. We mention this in connection with the subject of recognition as it may be regarded as pertaining to it.

Allegations of Evasion of Settlements.—The examples of regrading the establishments of trip rates and the other methods of management, by which the men were alleged to have been deprived of the beneficial effects of awards, are not numerous. Some of the companies did take this action, but, assuming that, in doing so, they acted in good faith and were within their rights, the carrying out of these economies at the very time the awards came into operation was, in our opinion, unfortunate and calculated to excite feelings of disappointment and irritation.

SUGGESTED AMENDMENTS OF SCHEME.

In our opinion amendments to the Scheme of 1907 should aim at promptness of settlement, uniformity of procedure, and finality of decision, and the machinery should be such as is calculated to secure the confidence of those whose interests are involved in its operations. It is with this object in view that we make the following suggestions:—

Preliminary Procedure.—Taking in the order of sequence the various steps by which the men can ask for a consideration of matters which, in their opinion, demand rectification, we have, first, the approach to the company. In our opinion it is of the utmost importance that this preliminary procedure should not only be maintained but facilitated, and every effort be made by both the companies and the men to adjust matters of difference before the next step is taken.

Sectional, but no Central Boards.—All questions affecting hours, wages, or conditions of service, not settled by negotiation between the parties concerned, should, in our opinion, be referred to a Board of Conciliation constituted on lines similar to the Sectional Boards in the Scheme of 1907, and sufficiently comprehensive to include all grades engaged in the manipulation of traffic. The Sectional Boards are representative, and we are of opinion that, with some alterations and addition, these Boards can be made to fulfil the conditions and to carry out the principles of the Scheme of 1907. Having regard to the additional powers which we propose shall be exercised by Sectional Boards, we think an entirely new election of members for the men's side of the Boards should be carried out forthwith. We think the Central Board is redundant, and we propose that it should be abolished.

Grouping of Grades.—To the form of election to sectional boards no exception has been taken, save, perhaps, in the grouping of the grades forming the sections. While sympathising with the desire of certain grades to reduce the number of other grades grouped with them, we believe that the number of sections on any one railway system should not exceed eight. All grades engaged in the manipulation of traffic and in the permanent service of the company should, we think, be included in some one or other of the sections. Any doubt or difference as to the inclusion of a grade should be decided by the Board of Trade, to which Department all differences and references on the subject of grouping grades and forming sections should be submitted for decision.

Procedure before Boards.—We propose to provide that any matter dealing with hours, wages, or conditions of service, except questions of, or bearing upon, discipline and management, if not settled by conference between deputations of the men and the company, shall be placed upon the agenda paper for reference to a Conciliation Board to be assembled under normal circumstances at intervals of six months. The agenda paper, to be issued fourteen days before the meeting of the board, should be agreed upon and signed by the secretary of the company's side and the secretary of the men's side of the Conciliation Board.

We propose that it shall be competent for either side of a board, by a 14 days' notice, to ask for a special meeting, submitting at the same time the matter to be placed on the agenda. If a difference should arise as to the necessity for such special meeting, the question should be referred to the chairman within the 14 days. If he should decide in favour of holding the meeting he should also fix the date upon which it should be held.

If a board be not able to come to an agreement either at first meeting or, if necessary, after adjournment for 14 days, on the application of either side of the board, then the chairman should be called in to preside over a re-assembled board and to give a decision which should be final.

Duties of Chairman.—An essential element in our proposed scheme is that a chairman, to be chosen from a panel to be prepared by the Board of Trade, should be available for each board, and that, as far as practicable, the same chairman should act for all the boards on a company's system during the entire period of office of those boards. He should be selected by the Conciliation Boards, or, failing agreement, by the Board of Trade. His fee and expenses should be paid by the Board of Trade under the provisions of the Conciliation Act, 1896.

We further propose that in the event of any difference arising between the secretary of the company's side and the secretary of the men's side as to the matters to be placed upon the agenda paper, reference should be made to the chairman, whose decision should be final. Any question of interpretation which cannot be settled by the board should be submitted to the chairman for decision.

Period of Settlements.—We think that agreements arrived at by a board should have force for 12 months, and be held to continue thereafter until amended, superseded, or nullified by agreement of a board or by decision of a chairman. Decisions by a chairman should have force for two years and thereafter continue in operation under conditions similar to the foregoing.

We propose that all existing agreements and awards should remain in force until July 1, 1912, and thereafter continue in operation under conditions similar to the foregoing.

We suggest that agreements arrived at by boards should be final, and that the provision in the scheme of 1907 for a

suspensory period, within which the companies or the men have the option of rejection, should be deleted.

Duration of New Scheme.—We propose that the amended scheme shall remain in force until November 6, 1914, and thereafter be subject to revision or determination, as regards any given company, by twelve months' notice by the company, or by a majority of the aggregate representatives of employees on all the conciliation boards for the company's system.

All agreements and decisions of the chairman in existence at the period of the determination of the scheme should remain in force for the full time for which they were made, and thereafter until amended, superseded, or nullified by agreement between the parties, or by such machinery for the settlement of differences as may be hereafter set up.

Men's Secretary.—It will be seen that our proposals contemplate final settlements at Boards by conciliation, if possible without a Chairman, but, if conciliation fail, then by bringing in a Chairman. The procedure in the matter of statements and advocacy will be to a great extent the same upon each occasion. At present the men can choose an advocate (not being counsel) to put their case before an arbitrator. We consider that it is of much importance to the men that the advocate before the Chairman should have had the advantage of a full knowledge of all the circumstances at the preceding stages of the Conciliation Board. We, therefore, consider that the men should be free, if they think proper, to combine in the same person the duties of secretary and advocate at all meetings of the Board, and, in furtherance of this object, we propose that the representatives of the men on each Board shall be at liberty to appoint as their secretary any suitable person, whether an employee of the company or a person from outside, but that he shall not have the power to vote unless he shall have been duly elected a member. This arrangement is not intended to prevent the men from obtaining the services of a special advocate before the Chairman.

Facilities to be provided by Companies.—We think that the men's secretaries while acting in the discharge of their secretarial duties should be offered the privilege of free travelling over the company's system. We also think that members of boards on the men's side should be tendered a like privilege on producing a summons to attend a meeting.

Offences against Discipline, etc.—Men charged with misconduct, neglect of duty, or other breaches of discipline should be permitted to state their defence, to call witnesses, and to advance any extenuating circumstances before their officers, prior to a final decision being arrived at. Where doubts arise, or where serious results to men are likely to follow, the cases should, we think, be placed before the higher officials of the company. Appeals after punishment lead to a difficult position, and the necessity for them should be avoided.

Conditions of Service.—We attach much importance to the subject of "conditions of service." Many misunderstandings would be avoided if each man in the permanent employment of a railway company could be given access to a statement of the exact conditions of his service. If this were done many vexed questions, small, perhaps, in themselves, but important to individuals, would be greatly minimised.

Applications to Board of Trade.—When the assistance of the Board of Trade is asked for, the request should be made by the secretary to the company's side and the secretary to the men's side of the board jointly. If a difficulty should arise as to the form in which the request is to be made, the matter should, we think, be referred to the chairman.

Text of Proposed New Scheme.—The above-mentioned proposals will be found incorporated in the proposed new scheme annexed to our report (see page 15).

OBSERVANCE OF SETTLEMENTS.

In other important industries experience has shown that conciliation on similar lines to those we recommend has satisfactorily settled differences between employers and employed, and we see no reason why it should not be equally successful on railways, provided that both sides are prepared to give it a fair trial. To make any scheme of conciliation effective there should be no organised stoppage of work until the conciliation machinery has been exhausted. No encouragement or assistance should be given to either side refusing to abide by the settlements during the periods of their continuance, and full and ample protection should be given to those who desire to observe them.

It is clear that however satisfactory machinery may be, however reasonable the settlement, all goes for nothing if a contract once entered into be not loyally observed.

Witnesses have suggested the applicability to railway employees of Section 4 of the Conspiracy and Protection of Property Act, the Canadian Industrial Disputes Investigation

Act, and the provisions contained in a Bill presented to Parliament by Mr. Crooks, M.P., and others. It is not for us to prescribe how the adherence to contracts can be encouraged, how the breach of them can be penalised. Men have the right to determine their engagement by giving a lawful notice, but in the exercise of their freedom in this respect they should not, in our opinion, be permitted to incite or coerce by threats, or by any form of intimidation, men who desire to give their labour.

MATTERS OUTSIDE THE SCHEME.

We confidently hope that the suggestions we have made and the amendments we propose in the scheme of 1907 may lead to the overcoming of many difficulties which may hereafter arise in negotiations and in arriving at settlements between the railway companies and their employees.

We cannot, however, overlook the fact that strikes have taken place under circumstances which had no connection with the contract for hours, wages, or general conditions of service, nor indeed with the concerns of either the strikers or their employers. The scheme of 1907 does not meet such cases, nor do we believe it can be made to meet them. We had proposed to make suggestions for the alleviation of such difficulties, but the recent establishment of the Industrial Council by your Majesty's Government renders our observations unnecessary.

CONCLUSION.

In humbly submitting these our views, we beg Your Majesty's gracious permission to travel for an instant out of the terms of our reference. The railway service of the United Kingdom is second to none. The public regards its railway system with pride and confidence. That system has been built upon great traditions and high ideals, and it is the privilege of every railway man in the Kingdom, of every class and grade, to participate in and to contribute towards the great trust with which he has been invested. We think we express the general opinion when we say that if railway men will only place the call of duty above and before other consideration they may confidently rely upon the British public to support them in any fair claim fairly put.

We desire, in conclusion, to place on record our indebtedness to our secretary, Mr. J. J. Wills, of the Board of Trade, for the valuable assistance which he has so indefatigably afforded us.

J. J. WILLS, Secretary,

SCHEME FOR DEALING WITH QUESTIONS AFFECTING WAGES, HOURS, OR CONDITIONS OF SERVICE OF RAILWAY EMPLOYEES ENGAGED IN THE MANIPULATION OF TRAFFIC.

STEPS PRELIMINARY TO THE BRINGING OF BUSINESS BEFORE CONCILIATION BOARDS.

Unless otherwise mutually arranged the procedure laid down in paragraphs 2-8 shall be adopted.

If the employees forming a grade, or combination of grades having a common interest, wish to bring to the notice of the company a matter affecting their rates of wages, hours of labour, or conditions of service, or (at this stage) any questions affecting the contractual relations between the company and its employees, a petition shall be presented signed by at least 25 per cent. of those concerned. The petition shall name a suitable number of employees of the company whom the petitioners desire to form a deputation. The company shall receive the deputation and shall give a reply to the petitioners within 28 days of its reception.

In the case of a matter which affects one or more individuals, as distinguished from a grade, or concerns one depot only, the application may be made, either orally or in writing, by those affected to the immediate superior of the men, and the company may designate a local superintending officer to hear the applicants, the reply of the company to the application to be made within 28 days of the conference with the applicants.

In the event of the company's reply in either case not being acceptable, or of no reply being received within the stipulated period, it shall be open to the deputation to require any question relating to rates of wages, hours of labour, or conditions of service, other than matters of management or discipline, to be referred to the appropriate Conciliation Board by written application to the secretary of the employees' side of that board.

In the event of the company proposing to reduce the rates of wages or to increase the hours of labour, or otherwise alter

the conditions of service of a class of employees, notice of the proposals shall be given in writing to the secretaries of the Conciliation Board or boards which include the grades affected. Such notice shall specify a period of not less than 28 days within which objection, if any, to the proposals must be made.

In the event of 25 per cent. of the employees concerned presenting within the specified period a petition stating their unwillingness to accept the company's proposals, a deputation of employees shall be received by the company to discuss the matters at issue, and the deputation shall notify their acceptance or otherwise of the company's original proposals, or such modification as may have been suggested meantime by the company, within 28 days of the reception of the deputation. If the company's original or modified proposals be not accepted by the deputation, it shall be open to the company to require the matter to be referred to the appropriate Conciliation Board.

For the purpose of the time-limits set out in the preceding rules the months of August and September shall not be counted.

Petitions and deputations from the employees and proposals by the Company shall, when practicable, be made at such dates as, failing agreements between the parties direct, will admit of the subjects of difference being placed on the Agenda of the next ordinary meetings of the Conciliation Boards.

ESTABLISHMENT AND CONSTITUTION OF CONCILIATION BOARDS.

There shall be established on each railway a suitable number of Conciliation Boards to deal with questions referred to them relating to the rates of wages, hours of labour, or conditions of service, other than matters of management or discipline, of all wage-earning employees engaged in the manipulation of traffic and in the permanent service of the Company.

Employees' Representatives.—For this purpose the various grades of the employees of the Company who have a common interest and are covered by this Scheme shall be grouped in a suitable number of sections, and the area served by the Company shall be divided, if necessary, for the purposes of election into a number of suitable districts.

The employees belonging to each section shall elect, from among themselves, one or more representatives for each district, such representatives to form the employees' side of a Conciliation Board to deal with matters coming within the scope of this scheme and affecting employees included in the section.

The grouping of grades into sections, the division of the company's system into areas, and the number of representatives of employees shall, in the first instance, follow the existing arrangements for sectional boards under the railway conciliation and arbitration scheme of 1907.

The first election of employees' representatives shall be held as soon as possible, and existing conciliation boards under the scheme of 1907 shall cease to exist from the dates of the declaration by the Board of Trade of the results of the elections of employees' representatives to the new boards to be established under this scheme.

All elections of representatives of the employees shall be held under the supervision of the Board of Trade, and the following rules shall apply:—

- (a) Candidates must be employed in the section and district for which they desire to stand.
- (b) Nomination papers proposing candidates for the various boards shall be sent to the Board of Trade not later than a specified day.
- (c) Each nomination paper shall be signed by not less than 20 adult employees belonging to the candidate's section and district.
- (d) The Board of Trade, after satisfying themselves that the nomination papers are in order, shall prepare voting papers and arrange for them to be circulated among the adult employees on a given pay day.
- (e) The Board of Trade shall receive and count the voting papers.
- (f) For the purpose of these rules "adult" means a person of not less than 20 years of age.

Company's Representatives.—The company shall furnish to the Board of Trade, not later than the date on which the men's voting papers are to be counted, a list for each Conciliation Board of the persons in the permanent employ of the company from among whom the company will select its representatives on the Conciliation Board. Such list must specify at least two persons who will have permanent seats on the company's side of the board. The remaining seats on the company's side may be filled by any of the persons named in the company's panel of representatives for the board in question, provided always that at no time shall the total number of representatives present on the company's side exceed the total membership of the employees' side of the board.

Publication of Names of Members.—The Board of Trade shall publish for each board, with as little delay as possible, the names of the members elected to represent the employees and the names of the persons forming the company's panel of representatives, specifying those of the latter who are to have permanent seats.

Term of Office.—The term of office of the first boards established under this scheme shall expire on November 6th, 1914. Should the scheme be continued, each subsequent board shall have a term of three years from the date of publication by the Board of Trade of the names of members of such board.

Casual Vacancies.—Casual vacancies on the employees' side of a Conciliation Board through death, resignation, or loss of qualification, shall be filled by co-optation by the remaining members of that side, the co-opted member to be a permanent employee of the company in the section and district represented by his predecessor. Similar vacancies on the company's side shall be filled by the company.

Modification of Sections, Districts, and Number of Representatives.—Any class of employees falling within the scope of this scheme, but not included at the outset in any Conciliation Board, may make application to the company, by means of a petition signed by at least 25 per cent. of their number, to be included in an existing board, or to have a new board established. The company shall thereupon arrange to receive a deputation of the petitioners with a view to the decision of the matter, which, in the event of no agreement being arrived at, shall be referred to the Board of Trade.

Any class of employees wishing to be transferred from one board to another existing board, or to a new board, may make application to the company by petition signed by at least 25 per cent. of their number, and the petition shall be dealt with in the manner indicated in the preceding paragraph.

All differences with regard to the definition or modification of sections, districts, or number of representatives of employees, which cannot be settled by agreement, shall be determined by the Board of Trade.

OFFICERS OF BOARDS.

Chairman.—There shall be for each Conciliation Board a chairman, who shall not be a director of any railway company in the United Kingdom or in the service of any such company. The chairman of a Conciliation Board shall be selected from a panel to be constituted by the Board of Trade.

As soon as the Conciliation Boards on a company's system have been established, and from time to time when necessary, the employees' side of each board shall select two of their number to be invested with plenary powers, who shall attend a special combined meeting with an equal or less number of representatives of the company for the purpose of selecting, from the panel mentioned in paragraph 22, the name of a chairman to be suggested to the Board of Trade for appointment. In the event of failure to agree, the Board of Trade shall nominate the chairman.

On each occasion that the services of a chairman are required at a meeting of a Conciliation Board, as provided in paragraph 41 of this scheme, he shall be appointed under the Conciliation Act, 1896, and the same chairman shall act for all the Conciliation Boards established on a company's system during the entire period of office of those boards whenever practicable.

Leading Members.—Each side of a Conciliation Board shall select its own leading member from among the members of the side. The leading members of the two sides shall, in the absence of the chairman of the board, preside alternately at the meetings, unless otherwise mutually arranged.

In case of emergency, and in the event of the secretary of a side not being available, the leading member of that side shall perform the duties of secretary.

Secretaries.—Each side of a Conciliation Board shall have a secretary, who may take part in discussions and act as advocate, if desired, but shall have no vote unless he is a member of the board.

The company's secretary of each Conciliation Board shall be appointed by the company from any source it pleases.

The employees' secretary shall be chosen by a majority of the employees' side of the Conciliation Board, who may select him from any source they please, and shall determine the length and conditions of his office, subject to the provisions of this scheme.

PROCEDURE.

Ordinary Meetings.—Every Conciliation Board shall hold two ordinary meetings a year, at intervals of six months.

The date of an ordinary meeting shall be fixed by the secretaries of the board, or, failing agreement, by the chairman.

At least 14 days' notice of the meeting shall be given by each secretary to the members of his own side.

The agenda shall be agreed upon and signed by the secretaries of the two sides of the board, and shall be issued 14 days before the meeting.

Special Meetings.—Either side of a Conciliation Board may, by letter addressed to the secretary of the other side, ask for a special meeting to be held within fourteen days, the request for a meeting to be accompanied by a statement of the matters to be placed on the agenda.

Should a difference arise as to the date of the special meeting, or as to the necessity of holding it, the difference shall be referred by the two secretaries to the chairman, within the fourteen days mentioned in the preceding paragraph. The chairman shall then fix the date of the meeting, if any is to be held.

No meeting shall be held in August or September, except by mutual consent.

Agenda.—Any difference arising between the two secretaries as to the matters to be placed on the agenda shall be referred to the chairman for his decision.

No question not on the agenda shall be brought up at any meeting except with the consent of both sides.

Method of Dealing with Applications.—No proposal for an alteration of rates of wages, hours of labour, or conditions of service, shall be entertained by a Conciliation Board until the proposal has been dealt with in the manner set out in paragraphs 1-5, and the company and the employees concerned have failed to come to agreement by direct negotiation.

In the event of such failure to agree on a matter competent to be dealt with under this scheme, the matter may be placed on the agenda for the next ordinary meeting of the appropriate Conciliation Board by the side representing the party which made the proposal, and it shall be considered at such meeting unless previously withdrawn or placed on the agenda for a special meeting.

In the event of the two sides failing to agree at the first meeting at which a matter is considered, it shall be open to either side to adjourn the meeting for 14 days. If no agreement is reached at the adjourned meeting, or if neither side asks for such adjourned meeting, the chairman of the board shall be called in to preside over a re-assembled board, and to give a decision on the matter, if the parties cannot be reconciled.

At meetings presided over by the chairman, either side may, if it desires, have the services of a special advocate, who is neither member nor secretary of the board, but counsel shall not be engaged.

Records of Proceedings.—A record of every meeting of the board shall be agreed upon and entered in duplicate minute books, one to be kept by each secretary and signed by both. Each secretary shall circulate a copy of the record among those represented by his side of the board, in such manner as may be determined by the side.

DECISIONS OF BOARDS.

Voting by Sides.—Each side of a Conciliation Board shall vote separately and, in the absence of the chairman, all decisions shall be arrived at by agreement between the two sides.

Function of Chairman.—At meetings at which the chairman is present he shall endeavour to bring the two sides into accord, and, failing this, shall, either at the meeting or within a reasonable time thereafter, give a decision on any matter still at issue.

Decisions to be Final.—All settlements arrived at, whether by agreement of the two sides or by the decision of the chairman, shall be final and binding, for their periods of operation, on both the company and the employees, the ratification of neither of these parties being required.

DURATION OF SETTLEMENTS.

Existing Settlements.—All settlements at present in operation, whether arrived at by agreement by Conciliation Boards under the Scheme of 1907 or by arbitration under that Scheme, shall remain in force until July 1st, 1912, and thereafter until they are varied, superseded, or nullified by decisions of Conciliation Boards or Chairmen under the present Scheme.

Notwithstanding the terms of any settlement by agreement or by arbitration under the Scheme of 1907, it shall be competent under the present Scheme to re-open, after July 1st, 1912, any question dealt with in those settlements.

Future Settlements Under the Present Scheme.—Settlements arrived at by agreement between the two sides of a Conciliation Board shall have effect for at least twelve months.

Settlements by decision of the chairman of a board shall have effect for at least two years.

In either case settlements shall be held to continue in operation beyond the minimum period above specified until they are varied, superseded, or nullified by decision of the Conciliation Board arrived at by agreement, or by decision of the chairman,

Settlements, whether by agreement or by decision of the chairman, may be varied at any time (before or after the expiration of the minimum periods above mentioned) by mutual consent of the two sides of the board.

DURATION OF SCHEME.

The present scheme shall remain in operation until November 6th, 1914, and thereafter be subject to revision or determination, as regards any given company, by twelve months' notice given by the company, or by a majority of the aggregate representatives of employees on all the Conciliation Boards for the company's system. The earliest date at which such notice may be given is November 6th, 1913.

All settlements in force at the period of determination of the scheme shall continue in operation for the period for which they were made, and thereafter until varied, superseded, or nullified by agreement between the company and the employees, or by such machinery for the settlement of differences as may be hereafter established.

CODIFICATION OF CONDITIONS OF EMPLOYMENT.

Lists showing the existing rates of wages, hours of labour, and all other conditions of service of the various grades of employees covered by this scheme shall be prepared as soon as possible by the company, and printed in a suitable form at its expense.

These lists shall form the basis of the contract between the company and its employees, and copies thereof shall be exhibited by the company without delay in places where they may readily be consulted by the employees concerned, in order that every employee may know precisely what are the conditions of his service.

EXPENSES.

Secretaries of Conciliation Boards shall be allowed free travelling on the company's system when engaged in the execution of their secretarial duties.

All members of a Conciliation Board shall be allowed free travelling on the company's system for the purpose of attending meetings of a board.

A statement of the results of the election of employees' representatives to a Conciliation Board, the agenda papers, the records of the proceedings, and the text of the agreements arrived at, having been prepared and signed by the two secretaries, shall be printed and posted up at the depots, stations, etc., in such a manner as to be accessible for examination by the employees of the company. Copies shall also be supplied to each member of the board. All this shall be done at the company's expense.

INTERPRETATION.

Interpretation of Settlements.—Any differences which may arise as to the interpretation of settlements, whether arrived at by agreement between the two sides of a Conciliation Board or by decision of the chairman, shall in the first instance be considered by the two secretaries, and in case of difference be referred to the board, which shall be summoned within 14 days.

Requests by employees for interpretation by a Conciliation Board shall be made through the secretary of the employees' side, who shall decline them or bring them before the board in accordance with general or special directions from the employees' side of the board.

Applications by the company for interpretation by a Conciliation Board shall be made through the secretary of the company's side of the board.

Any questions of interpretation, on which the board fail to agree, shall be dealt with at an adjourned meeting at which the chairman shall be present, the decision of the chairman on points of difference to be final.

Interpretation of Scheme.—If any question should arise as to the interpretation of this scheme it shall be decided by the Board of Trade.

Requests for interpretation of the scheme shall be signed by both secretaries of the board concerned. In the event of disagreement the chairman shall confer with the secretaries and settle the form of application to the Board of Trade.

The Closing of a North-Eastern Station.—Croft (Darlington) Rural Council have decided to apply to the Railway and Canal Commission for an order compelling the North-Eastern Railway Company to re-open their station at Eryholme, which has been for many years the junction with the Richmond branch and the main line.

Light Railways Act, 1896.—The Board of Trade has recently confirmed the undermentioned Order made by the Light Railway Commissioners:—Mid-Lincolnshire Light Railway (Extension of Time) Order, 1911, extending the periods limited by the Mid-Lincolnshire Light Railway Order, 1908, for the compulsory purchase of lands and for the completion of the railway and works thereby authorised and for other purposes.

MEETINGS AND REPORTS.

FORTHCOMING MEETINGS.

- Oct. 24 (Tues.).—**Central Argentine Railway** (Annual), River Plate House, E.C., at 12. Followed by an Extraordinary Meeting.
- Oct. 24 (Tues.).—**Cordoba and Rosario Railway** (Annual), Winchester House, E.C., at 2.30.
- Oct. 25 (Wed.).—**Entre Rios Railway** (Annual), River Plate House, E.C., at 12.
- Oct. 25 (Wed.).—**Kilsyth and Bonnybridge** (Half-yearly), St. Vincent Street, Glasgow, at 2.30.
- Oct. 26 (Thurs.).—**Grand Trunk Railway** (Half-yearly), City Terminus Hotel, Cannon Street, E.C., at 12.
- Oct. 27 (Fri.).—**Cuban Central Railway** (Annual), River Plate House, E.C., at 12.
- Oct. 30 (Mon.).—**Buenos Ayres Midland Railway** (Annual), River Plate House, E.C., at 12.
- Nov. 1 (Wed.).—**San Paulo (Brazilian) Railway** (Half-yearly), Terminus Hotel, Cannon Street, E.C., at 1.

(Reports, Traffic Returns, Prospectuses, and all other items of financial intelligence should be sent as early as possible to the Editor of THE RAILWAY TIMES, 12, Norfolk Street, London, W.C. Telephone, 2948 Gerrard. Telegraphic address, Altmetry, London).

BUENOS AYRES WESTERN RAILWAY.

The 22nd ordinary general meeting of the shareholders was held on Tuesday, October 17, at River Plate House, Finsbury Circus, E.C., Sir Henry Bell (chairman of the company) presiding.

The SECRETARY (Mr. F. Eustace Faithfull) having read the notice convening the meeting,

The CHAIRMAN, in moving the adoption of the report, said that, on examination of the report and accounts for the past year, several things must have struck the shareholders as outstanding features. First, the complete failure of the maize crop—a failure so general and disastrous, that while in the previous year they carried 423,500 tons of maize, this year they had only carried 163,000 tons, a shrinkage of no less than 61½ per cent., and of the amount appearing as carried this year, he had no doubt that the greater portion was grown the previous season. The extent of the failure of this crop might be best illustrated by the fact that whereas in the months of July and August, 1910, Argentina exported 768,600 tons of maize, this year, during the same period, less than 1,000 tons were exported, and it was doubtful if there was enough good grain in stock for seed purposes. Another outstanding feature was the large increase in wheat, and it was this splendid crop which had brought prosperity back to their customers and enabled them to make the dividend and reserve proposals which they submitted for approval to-day.

INCREASED PASSENGER TRAFFIC.

Another thing which was most noticeable in the report was the strides the passenger traffic had taken in the last two years. In the report previous to this one, they showed an increase of nearly a million passengers, which they thought was largely due to the Centenary Exhibition, which had brought many people to Buenos Ayres from all parts of the world, but this report was under no such influence, and far from showing a decrease, they showed an increase over the Centenary year of upwards of a million-and-a-half passengers. The cause of this increase was not far to seek. The cost of living in the city of Buenos Ayres was now so high that people were looking for desirable suburbs in which they might get larger and more comfortable residences for less than half the cost of those in the city, and they believed that this was resulting, and would result, in a great development of the suburban districts, which were some of the highest and healthiest round Buenos Ayres. As an instance of the enormous increase in house rents in Buenos Ayres during the last few years, their manager had sent them a comparative statement of the rents of some 20 houses in various streets in the city for the years 1900, 1905 and 1910. In 1900 the total rent of these houses was \$3,225 per month, in 1905 \$4,390, whilst in 1910 they had risen to \$6,465, and there was no indication of these rents coming down.

ELECTRIFICATION.

Before deciding to electrify the suburban lines, the board were determined to obtain the most expert advice obtainable as to the advisability of electrification and as to the system to be adopted, and for this purpose, with the approval of their consulting engineers, Messrs. Livesey, Son and Henderson, Messrs. Merz and McLellan, the electrical engineers who designed and carried out the electrification of the North

Eastern Railway suburban line at Newcastle, were asked to make a full report. Both Mr. Merz and Mr. McLellan have been in Buenos Ayres and know the conditions ruling there, and they had presented the board with a most interesting report, and in their opinion the cost of electrification would be more than justified by the results. There are in this report so many points requiring consideration and discussion, that it is almost impossible yet to give estimates of the cost, but in round figures it should be somewhere between three-quarters of a million and a million pounds. In one item we hope to effect an economy on the estimate by joining with our good friends, the Great Southern Railway, in the construction of a power house. They will require power for their shops at Banfield, and for other purposes, and as everyone knows, the more electricity that can be produced from one source, the greater the economy. This is almost self-evident, for to ensure, as far as human foresight can, a continuous supply, independent of accident, a large amount of spare machinery must be installed which must be kept ready for work at a moment's notice. Now, if we and the Southern each had our own power house, each of us would require an independent spare set; while jointly working, one spare set is ample for both. We have the offer of a most suitable site for the power house on the Dock Sud. The two essentials for an ideal site for a power house are coal and water facilities, and there we can get plenty of water and can get our coal landed direct from the ships without transhipment.

They would remember that in the year 1904 they carried out a most important work of lowering the line from the Once to Caballito, thereby doing away with a large number of level crossings which seriously hampered their train service. This work was devised and carried out by Mr. Simson, who was then their manager, with conspicuous success, and to enable them to run a fast and frequent suburban service, as they would do when they electrified it, it would be necessary to continue the low level for a considerable distance and thus avoid the numerous level crossings in the suburbs.

MORE CAPITAL REQUIRED.

In the capital statement on page 38 they would see that they still had a balance in hand of £1,171,616, which would keep them going for some months to come, but there would be heavy payments to meet for new rolling stock, and it would not last out until their general meeting next year, and in order to avoid troubling the shareholders to come together for the special purpose of creating new capital, they thought it better to ask them for powers now. He could not say exactly when it would be necessary to exercise these powers, as it depended on the progress made with their capital works; nor could he yet say the form which any issue they might have to make would take, but he thought they might rely on them not to issue it until it was required, and then in a form which would be palatable to the shareholders. It was stated in some papers that it would probably be in some preference form, so he thought he should say that no such proposal had ever been in their minds. (Hear, hear.) It would be seen that there was a very appreciable reduction in the ratio of working expenses to receipts, which, he thought, required some explanation, for he did not want them to expect that they would always be able to work at the low figure of 52.86 per cent. In the first half of the year the ratio of working expenses was 55.72 per cent., as compared with 60.26 in the half-year ended December 31, 1909, but there were peculiar circumstances which were responsible for this reduction, and they could not expect them to recur frequently. He could not do better than quote to them the remarks in the Manager's half-yearly report issued to them last April:—

"In the expectation of a lean traffic period, strict instructions were issued for every possible economy, consistent with efficient working and the proper upkeep of the property to be made, and not only did the measures taken answer this purpose, but we were also greatly helped by circumstances."

"Indeed, the recent renewals and strengthening of the track, coupled with the long spell of dry weather, and the fact that the men commenced to leave for the harvest much earlier this year, enabled us to reduce the number of men in the permanent way maintenance gangs, and we were also able to reduce the wages paid."

As they were all aware, the Great Southern Railway and their company were equally interested in the Buenos Ayres Midland Railway, which since July 1 last had been opened through out its whole length to public service. During Mr. Simson's recent visit to Buenos Ayres, he was glad to say he was able to arrange for a great improvement in the terminal facilities of the Midland Railway, for the distance of the terminus at Puente Alsina from the centre of the city was always likely to hinder the development of its traffic. He was glad to be able to say

that during the past year their relations with the Government authorities, both national and provincial, had continued to be of the most pleasant and satisfactory character.

During the past year, Mr. Woodbine Parish went out to Buenos Ayres to familiarise himself on the spot with all the extensions and alterations that had been made since his last visit, and he was sure the thoroughness with which he did so would be most useful to them. Mr. Simson was also in Buenos Ayres on behalf of the Great Southern, and his old staff, he was afraid, took advantage of his presence to burden him with many vexed questions which he settled to the company's great advantage.

Last year they informed the shareholders that they considered that income tax should be deducted from all future dividends, and that should they, in the future, have any extra good year, they should share in the prosperity. Their proposal now was, in redemption of that promise, that they should pay the usual 4 per cent. final dividend with a bonus of $\frac{1}{2}$ per cent., put £120,000 to general reserve, £10,000 to the staff pension fund and £5,000 to the benevolent fund, carrying forward a balance of £189,096, which was £25,459 more than they carried forward last year. (Cheers.)

RESERVES.

He had received a letter from a shareholder asking if it would be necessary in the future to carry such large sums to reserve, and he was sure that if he had been present and had heard how the shareholders approved of their doing so, he would not have asked the question, but as it had been raised, perhaps they would like to hear the board's views, which were that for a company such as theirs, where climatic variations meant a crop failure or success, it was the duty of the directors to provide in seasons of prosperity for the proverbial rainy day. (Hear, hear.) The general reserve fund was available for equalisation of dividends and other purposes, and the value of it was easily seen in the price of their shares, and after all the total reserve only represented one year's dividend at the present rate, and it was only logical that they should increase this sum as their capital increased. (Hear, hear.) He felt sure that it could not be too often nor too strongly brought before their notice, that the good results they were able to show were not gained by high tariffs (for in no case had their tariff been raised), but they were the looked-for result of the policy which, with the shareholders' approval, they had so consistently followed of anticipating and providing for all the reasonable requirements of the districts they served by developing by every means in their power all and every kind of traffic which these districts could provide, either by special rates or in some other manner, and not an inhabitant in their district could reasonably complain of the profits made, for they had arisen simply from the natural trade of the districts, fostered by the railway, and which, but for the railway, probably would not exist.

Having paid a high compliment to the efficiency of the staff, the chairman said he would now read them the telegram which they had received yesterday:—

"As the result of the general manager's inspection trip over the line, I am pleased to confirm the excellent prospects already reported. The wheat, oats and linseed crops are in splendid condition. The increased area sown with grain is estimated at 20 per cent. The authorities assure us that, with the efficient measures adopted, there will not, in spite of rumours to the contrary, be any undue shortage of labourers for harvest operations. No locusts have appeared in our districts though there have been reports of them in the northern part of the Republic, but it is generally considered that even should they come now, it is too late to cause any serious damage to wheat. The camps are looking well, although in some of the outside sections the grazing camps require more rain. The increase in passengers and in live stock has been well maintained, and there is every indication of its continuing satisfactory. General goods traffic also shows signs of improvement. The outlook is exceptionally bright, and, judging by the present position, there is every probability of another busy year. Our relations with the Government continue to be most cordial. There is on every side a general air of prosperity."

In conclusion, he mentioned that, in spite of the failure of the maize crop, which was usually their principal traffic at this time of the year, their receipts for the 14 weeks from July 1 show an increase of £39,893 over the corresponding period last year. (Cheers.)

Mr. J. WHITE TODD seconded the resolution, which, after a few congratulatory remarks by a shareholder, was carried unanimously.

On the motion of the CHAIRMAN, seconded by Mr. A. E. BOWERS, it was resolved to increase the capital of the company from £20,000,000 to £22,000,000 by the creation of 200,000 shares of £10 each.

The retiring director (Mr. Todd) and the auditors were re-elected, and the proceedings terminated with a hearty vote of thanks to the chairman and directors for their past services.

THE CENTRAL URUGUAY RAILWAY COMPANY OF MONTE VIDEO, LIMITED.

The ordinary general meeting of proprietors of the Central Uruguay Railway Company of Monte Video, Limited, was held at River Plate House, Finsbury Circus, London, E.C., on Monday, October 16, 1911, Mr. Frank Henderson (chairman of the company) presiding.

The SECRETARY (Mr. George R. Cable) read the notice convening the meeting, the minutes of the ordinary general meeting held on Tuesday, October 18, 1910, and the auditors' report.

The CHAIRMAN: As you are aware, the Central Uruguay Railway and allied extensions are practically worked as one railway so far as the handling of traffic is concerned, and as the conditions ruling in the country affect the whole combined system, my remarks will, generally speaking, apply not only to the Central Uruguay proper, but equally to the Northern and Eastern Extension Companies. For the first time in our history the gross earnings of the combined system have exceeded one million pounds sterling. To be precise, the figure is £1,017,403, while the receipts of the main line amount to £610,755, the increases, as compared with the year ended June 30, 1910, being £80,220 and £33,265 respectively. Notwithstanding the tramway competition the passenger traffic continues to develop, substantial increases being shown in the number of passengers carried and the receipts therefrom. It has been our policy in recent years to encourage the public to travel by running long distance excursion trains which have not only given favourable results, but also serve to educate the people in the matter of railway facilities and, we believe, help to foster the ordinary passenger traffic.

The total quantity of goods handled has considerably exceeded the tonnage transported in previous years, and the increases under the headings of "general goods" and "wool" are particularly satisfactory, and had it not been for the partial failure of the maize crop, the goods traffic would undoubtedly have been still more favourable. The total of the goods traffic on the main line was 910,001 tons, and on the combined system 964,026, being increases of 40,379 and 43,138 tons respectively, the receipts therefrom having been £330,786 and £540,565 or increases of £9,758 or 3.40 per cent. and £20,546 or 3.95 per cent. respectively.

The live stock traffic also shows increases both in the number of animals carried and the amount earned, and in this connection the erection of a new freezing establishment at Monte Video, and further "saladeros"—factories for the preparation of jerked or sun-dried salted beef—at Sant Anna, just over the Brazilian frontier, is an encouraging sign and leads us to look for greater development in the animal traffic in the future. The North Eastern Branch has shared in the general prosperity, and it is gratifying to know that agriculture is spreading along this line, and that so far as we can judge—having regard to the fact that it is worked as part and parcel of the main line—the Central Company are not now making any loss under their lease. The Western Extension also continues to make progress, although, owing to the fact that the districts in this part of the Republic were rather severely affected by a locust visitation and drought, the improvement shown is not on a par with the development in the traffic on the other sections of the Central Uruguay system.

The working expenses of the main line amount to 52.49 per cent. of the gross receipts, as against 49.86 per cent. last year, and in the case of the combined system, 53.03 per cent. compared with 51.58 per cent. The higher cost of coal was one of the chief factors in the increased working expenses, which were also adversely affected, to some extent, by the political disturbance which occurred in October and November last and interfered with the regular train service. Then again there is the increasing cost of labour, which seems to be universal, and from the effects of which, unfortunately, we are not free. The tendency in Uruguay is for wages and salaries to increase owing to the enhanced cost of living, and while every care is exercised with a view to economy in working, there is little prospect of any appreciable reduction in the ratio of the expenses in the near future, for, in the first place, the increasing cost of labour, and the unrest amongst the working classes, render it next to impossible to curtail expenditure, and, secondly, our coal bill is likely to be heavier owing to rising prices and higher sea freights. However, every effort is being made to keep the cost of working at the lowest figure.

The balance available on net revenue account, after deducting all fixed and other charges amounts to £69,070 16s. 9d., and as stated in paragraph 2 of the report, the board propose to appropriate this as follows—namely, to transfer £10,000 to the general renewal funds, and to pay a balance dividend of 2½ per cent., less income tax, which with the interim dividend paid in April last, makes 5½ per cent., less income tax, for the whole year, carrying forward a balance of £7,270 3s. 5d., which is slightly less than the amount brought forward from 1909-1910.

In order to cope with the growing traffic the board have found it necessary, during the last year or two, to add to the rolling stock, and £100,000 of 5½ per cent. preference shares and £96,982 of permanent 6 per cent. debenture stock were disposed of to provide funds to defray the cost of new locomotives, carriages and wagons which have been acquired. The preference shares were offered to the ordinary stockholders at par in February last, and the debenture stock has been sold in the market at the best price obtainable, as and when required. Renewals have been consistently carried out in accordance with a programme prepared in 1909. The relaying of the track out from Monte Video to La Cruz (kil. 131) with 80-lb. rails and new sleepers is in progress, and practically 100,000 sleepers have been replaced in the different sections of the line and sidings, in addition to which there has been written off against the renewal fund the inventory value of several obsolete engines and carriages which were beyond profitable repair, and the latter operation accounts in no small degree for the heavy charges against the renewal fund during the year. The board are convinced, however, that in dealing with the question of renewals, in accordance with the programme drawn up in 1909, they are acting in the best interests of the company, and they hope that before many years have elapsed the contributions to the fund will be sufficient to not only meet all current renewals, but also to gradually liquidate the debit, and put our renewal fund on the right side of the balance-sheet.

Work has at last been commenced on the short line which will connect the Central Uruguay system with the Brazilian Railways, and within the next few months an increase in the exchange of traffic between the two countries is anticipated as a result of this connection. As regards the Eastern Extension, the final section of the new line from Nico Perez to Treintay Tres was opened to public traffic on the 1st inst., the Government having consented to the use of a temporary bridge over the Olimar Grande River, pending the completion of the permanent bridge, which will be an important structure. The lines which have been constructed during the past few years on account of the Eastern Extension Company have been of a costly nature. In fact, experience shows that, owing to the configuration and geological formation of the country, railway construction in Uruguay is altogether a more difficult and expensive business than in the neighbouring Republic of Argentina. Notwithstanding this, however, the new line has been well built in accordance with the requirements laid down by the Railway Law, and the results so far obtained justify the board's action in undertaking the work.

The CHAIRMAN then read the following telegram, dated Monte Video, the 13th inst. :—

"Wheat well grown and promises exceptional crop. Increased area under cultivation, especially in Western camps. Weather conditions so far most favourable. Sheep in excellent condition. Good lambing season. Wool although light estimated (to be) slightly above the last year's record clip. Cattle and live stock are in good condition. Jerked beef factories will commence killing earlier this year. Merchandise traffic very good and steady. Prospects in general exceptionally bright. No locusts in country."

The presidential election took place on March 1 last, when Señor Batlle assumed office for the second time. The Government have certain colonisation schemes under consideration, and should these mature and immigrants of a suitable class be attracted to the Republic, the country must benefit considerably.

In concluding, the CHAIRMAN expressed the thanks of the board to Mr. Cat (the chairman of the local committee), to Mr. Bayne (the general manager), and to the other officers and staff generally for their services during the past year. The company's interests had been carefully looked after during what had, at times, been a very anxious period. They desired to acknowledge the loyalty displayed by all their officials and the rank and file generally, and also the secretary and staff in the London office, and to thank them for the zealous services rendered during the past year. He moved "that the directors' report and audited statement of accounts for the fiscal year ended June 30, 1911, now submitted be received and adopted."

Mr. WOODBINE PARISH seconded the motion, which was agreed to unanimously.

CENTRAL URUGUAY EASTERN EXTENSION RAILWAY.

Mr. Henderson, presiding at the meeting of the Central Uruguay Eastern Extension Railway, Limited, held after the meeting of the Central Uruguay Railway Company of Monte Video, said that the gross earnings were £218,079, as against £189,928, and the net profit was £112,820, as compared with £97,581 for last year. The balance on net revenue account amounted to £31,591. The districts served by the railway were being broken up for agriculture, so that the prospects for the future were more promising.

A resolution was then passed sanctioning an increase in the capital of the company.

CENTRAL URUGUAY NORTHERN EXTENSION RAILWAY.

At the meeting of the Central Uruguay Northern Extension Railway, Limited, which followed, Mr. Henderson said that the gross earnings were £109,454, as against £91,329 last year, and the net profit was £50,505, or an increase of £9,467 over the previous year. The balance available on net revenue account was £22,390, which enabled the board to recommend a balance dividend of 4s. 3d. per share, which, with the interim dividend, made 8s. 6d. per share for the year.

THE BUENOS AYRES GREAT SOUTHERN RAILWAY.

The ordinary general meeting of the company was held at the offices, River Plate House, Finsbury Circus, E.C., on Wednesday last; Mr. David Simson, M.Inst.C.E. (chairman of the company), presiding.

The SECRETARY (Mr. A. Giet) having read the notice convening the meeting.

The CHAIRMAN said: Ladies and gentlemen, I presume it will be your pleasure, as in previous years, to take the report as read. This report will, I hope, be accepted by you as very satisfactory, showing as it does gross receipts amounting to £4,988,386, which are much greater than anything earned in the past; and this notwithstanding what can only be described as a complete failure of the wheat crop in our principal grain district—that is to say, the district served by the Port of Bahia Blanca. So complete, indeed, was this failure, that in many places there wasn't enough grain left for seed for the new crop, and many thousands of tons of seed wheat had to be brought from other parts of the Republic to sow the crop now growing. The statistics of comparative tonnages of recent wheat crops grown in our districts, shown on page 27 of the report in your hands, are an eloquent testimony of this failure, since they show that in the year under review the wheat despatched from our stations was only about one-third of that despatched in 1908, the last year before the drought, in spite of the fact that the area shown was 15 per cent. greater in 1911 than in 1908. You will, perhaps, recollect that when I met you this time last year I hinted that unless we had very good crops during the year under review the earning powers of the railway might be somewhat strained to maintain the 7 per cent. dividend owing to the large amount of four per cent. extension shares ranking for dividend with the ordinary stock, and I confess that when, in November and the beginning of December last, telegrams began to come in advising us of the serious drought and its effects upon the crops, I became rather pessimistic as to the result. Fortunately, however, a larger proportion of the previous year's harvest remained to be carried during the period under review than in the previous year, owing to the holders of the grain keeping it back for speculative purposes. At the same time, the good crops on neighbouring lines, where the drought was not nearly so severe, caused upwards of 744,501 tons in all, or, say, 300,000 more tons from that source alone, to be sent to our ports, so that even from wheat we had an increase of some £33,000 in receipts. But, of course, so large a proportion of traffic from foreign lines meant a shorter average haul and consequent lower rate per ton; for instance, in 1907 it was 6s. 9d., against only 4s. 8d. this year. With anything like the crop we expected at the time of our meeting last year, this increase would have probably been some £250,000 more. The same thing happened in the case of oats and barley, where, though the drought caused the crop to suffer seriously in our zone, the increase in the receipts amounted to some £50,000. Potatoes, though the total yield was greater than in the previous year, were not an average crop owing to the drought, but even so they yielded some £25,000 towards the increased receipts, whilst the large movement in stone and lime, due principally to the public works being carried out by the National and Provincial Governments and the Municipalities, accounted for some £37,000 and wool £28,000.

INCREASED TRAFFIC RECEIPTS.

A notable feature was that in spite of the poor grain harvest in our districts—which is apt to have a direct effect upon the outgoing goods traffic—the receipts from this source were £77,000 greater than last year, which may be taken as a very satisfactory indication that the population in our districts is now altogether better off than it used to be, and that, consequently, its purchasing powers are not so immediately curtailed by the failure of a single crop. Of course, had the crops been average ones this increase in general goods would probably have been considerably greater.

There is an important increase of £119,000 in the receipts from live stock, though, as this is an expensive traffic to work, the net results are not anything like equivalent to a similar increase in gross receipts from general goods, or even cereals. A considerable part of this increase from live stock must be directly attributed to the drought, as owners had to be constantly changing their stock from one part of the country to another, and then bringing it back again. Incidentally, I may mention that the number of animals carried during the year is the highest on record, amounting as it does to 6,741,556. The greatest increase of all is in passenger traffic, where no less than £122,000 of increased earnings have been taken, and this in spite of the fact that a reduction in the number of long-distance second-class travellers might have been expected owing to many fewer Italian harvesters being required.

This increase is all the more notable when it is remembered that the previous year was an abnormal one for passenger traffic, owing to the Centenary celebrations, which naturally attracted large numbers of people from all parts of the country to Buenos Ayres.

The fashionable seaside resort, Mar del Plata, is becoming increasingly popular every year, as evidenced by the fact that 5,000 more return tickets were sold for it during the year. A very important factor is also the increasing suburban traffic, as owing to the scarcity of houses in the City of Buenos Ayres, and the consequent high rents, more and more people go every year to live in our suburbs, with the result that the suburban traffic is getting so large that the question of handling it economically and efficiently is beginning seriously to occupy the management and the board. Our traffic in this respect is also being increased by the new racecourse at Long-champs, situated on our line some 16 miles from Buenos Ayres. Turning now to the working expenses, I am able to testify, from the inspection of the whole system which I have recently made, that every care is being exercised in keeping them down, and if you deduct from the total increase of £177,275 the £93,517 due to increase in renewal fund contributions, the higher cost of coal, and the Mitre Law Tax, I think you will agree with me that the balance of £84,000 is fully justified by the increased length of line worked, and the greater total volume of traffic handled, particularly in view of the fact that so much of the grain traffic was short-haul traffic received from other railways, which is more expensive to work than that from our own districts, as also the large additional number of live stock trains. If a further proof is required of the care which is being exercised by the general manager and officers in this matter of working expenses, I may say that whereas the gross receipts have increased in the year under review by £734,371, as compared with the first year of Mr. Clarke's management—namely, that ending June 30, 1907—the expenses over which he and the officers have direct control, that is to say, deducting renewal fund contributions, credits for transport of company's material, and the Mitre Law Tax, have only increased £83,000, and this in spite of the fact that 515 more miles of line and fifty-seven more stations were in public service. (Applause.)

No effort is being spared to obtain further economies, and in this connection I may mention that Mr. de Candolle, who was lately our assistant manager, has recently returned from a special mission of some months' duration to the United States, where he has made a most careful study of the methods of American railways, with special reference to grain handling. We expect his report soon, and if we find that any of these methods are applicable to the conditions ruling in Argentina we may adopt them. We are also endeavouring to effect further economy in fuel and water by introducing the principle of super-heating in our locomotives, which has given good results in Europe. It will be a great thing if the result of the oil field which the Argentine Government is trying to develop in the south of the Republic is satisfactory, as the railways might then have at hand a means of reducing this important item in their working expenses.

THE EXTENSIONS.

As regards the extensions, it will be seen that with the exception of the line from Neuquen towards Chile—of which only some 20 miles have been finished—practically the whole

of the programme authorised by the shareholders in October, 1908, has now been completed, and some of the other lines since authorised as well. Altogether a total length of 603 miles of new line have been completed and brought into service since the shareholders' authority was obtained at that date; but, as reported at succeeding meetings, further concessions have since been obtained, amounting to 455 miles. I have recently gone over every yard of the line in question so far as opened to service, also those in construction as far as the rails are laid, and I have also fully discussed with our General Manager and Local Committee the other lines for which concessions have been obtained, and which have still to be built, and I am satisfied that they are all necessary, and should, sooner or later, give a good return upon the money invested in them. I do not exclude from this the extension from Neuquen towards Chile, the first section of which, or, say, 115 miles (of which 20 miles are already finished), we are under obligation to open to service by August, 1913, for, as I told you last year, and I have since confirmed my opinion after talking to our engineers on the spot, it will tap an enormous zone at present so inaccessible from the Argentine side that it has to be served by mules across the mountains from Chile. Also I believe that before it is open long a considerable traffic over it should develop from cattle fattened for the Chile market on the lucerne—or alfalfa as it is called out there—grown on the irrigated lands in the Rio Negro Valley. The surveys in the mountains are now so well advanced that they show quite a practicable pass, but as our lawyers informed me when I was in Buenos Ayres we have till 1919 to finish that section, we do not intend to spend much money on it till we see what the Chilian State Railways are going to do about meeting us at the Frontier. You will recollect that the approximate estimate given by my predecessor for the original programme was £5,500,000, and powers were granted to create £5,000,000, which has all been issued except £500,000. Therefore, in order to carry on the work of constructing and equipping these lines and other works which the board have in view to cope with the growing requirements of the railway, such as the enlargement of our terminal station in Buenos Ayres and the laying out of large sorting sidings at Tandil and elsewhere in order to handle the traffic more economically, we are asking you for further powers to create and issue £3,000,000, and if you accord them I may say that our present intention is to offer this to the holders of the ordinary stock of the company and the 4 per cent. extension shares, 1912, in November next, in the form of 4 per cent. extension shares convertible into ordinary stock at 30th June, 1914. The amounts to be called up will be £3 on allotment, payable 10th November, £3 1st April, £2 1st July, £2 1st October, and interest at 4 per cent. per annum will accrue from the respective dates. Also for the convenience of those who wish to pay in full they will be allowed to do so, but on allotment only, receiving full 4 per cent. from the due date of payment, and as the shares will be offered to the proprietors at par, the issue will not be underwritten. (Applause.) I need hardly assure you that in making this recommendation we feel satisfied that, given normal crops, there should be no danger of jeopardising the present dividend earning power of the company; but, on the contrary, its effect should be to strengthen and assure its future prosperity.

LOANS TO EMPLOYEES.

There is one investment of our funds of which I feel sure you will approve, and that is in loans to employees for building houses at 4 per cent. per annum, the amounts being repaid in monthly instalments deducted from their salaries over a period of ten years. This policy has been adopted by the board in common with those of several of the other principal railways out there, in order to help to cheapen the cost of living to our employees, of which house rent forms a very important item, as houses are most difficult to obtain and rents are exorbitant. The loans are only made to married men, and it is a condition that the houses built with the money so provided must be situated in our suburban zone, so that you will see that not only are we benefiting our employees, but also helping to establish a permanent population in our districts. The amount invested in this way at present is £64,000, and it is a condition that it must not at any one time exceed the sum of £100,000. Having now dealt with the results for the past year, you will doubtless expect me to say something about the future, especially in view of my recent visit with Mr. Baring to our property. We travelled over every single mile of line of the system by daylight, stopped at every one of the 300 stations outside of the suburban zone, and discussed with the stationmasters the prospects of their districts, and, as a result of this, and of the conferences I have had with our officials on the spot in connection with every matter of the smallest importance

connected with the working of the line, I am more satisfied than ever of the value of our property and its great potentialities—(applause)—which you will appreciate for yourselves when I tell you that some 15 per cent. of the stations we visited are situated in the middle of enormous blocks of land of thousands of acres in extent belonging to single owners which, hitherto, have been devoted almost wholly to pastoral purposes, but are now at last showing signs of being ploughed up, for the "estanciero"—as the owner is called out there—who used to be content with the results obtained from fattening sheep and cattle, now realises that owing to the great increases in the value of his land he is not getting more than 2 or 3 per cent. upon its capital value; whilst he runs a great risk, especially in the years of drought we have been having recently, of losing a large number of his stock, whereas he now finds that he can let the land to colonists for growing wheat and oats at a rate yielding a much higher interest, and with little or no risk. There is another reason which is forcing him to this conclusion to be found in the higher land tax now imposed, and there are not wanting signs that before long those who do not sell in lots the land in the neighbourhood of railway stations will be subjected to even higher taxation, as the Argentine authorities have evidently come to the conclusion that this is one of the principal causes of the slow increase of population in the country.

The great majority of the land in the district passed through by our system is well adapted to the growing of wheat and oats, and could easily carry several millions more of population as soon as there is sufficient land to be purchased in small lots of 100 to 200 acres for colonists, and when that happens—as it inevitably will before many years are passed—the Southern Railway ought to reap the benefit in enormously increased traffics. (Hear, hear.) In this connection I would call your attention to a very important work which was inaugurated by the President of the Republic while I was out there, and one which intimately—and I may say, solely—affects the zone served by our railway. I refer to the great system of drainage canals which have been in course of construction by the Province of Buenos Ayres during the last few years, and upon which nearly £3,000,000 have already been spent. Some 350 miles of canals varying in width from 16ft. to 60ft., have been constructed, their object being to drain away the flood water of the great areas of low and very flat land, where otherwise it is apt to remain for a long time doing a great deal of damage. Perhaps the district principally affected is that through the centre of which our new Chas de Ayacucho Extension passes, where thousands of acres were said to have been under water several feet deep during the floods of 1900. Another useful work is being carried out by means of the funds created by the Mitre Law, that is to say, the 3 per cent. of our net receipts, which is, in terms of that law, being applied to the improvement of the roads leading to our stations. I made careful inquiries when I was out there regarding the administration of this fund, and am satisfied that the money is being well spent, for, as you know, the great problem out there is the transport of the grain from the farm to the station, which often costs more than the railway freight from the station to the ports owing to the execrable roads, and anything done to improve that is a direct benefit to us in so far as it cheapens the cost of production. On every one of the new extensions we saw ploughing going on in all directions, and also on a large amount of virgin land on the older lines, and as, even up to the time of my visit in May and June last, since which it has rained a great deal more, as much rain has fallen in many parts of our district as in the whole of the previous year, everyone was very hopeful of the prospects of good crops, and up to date the outlook has become even more favourable. The area sown down under wheat, oats, and barley is estimated at 1,090,700 hectares, and even if you take the low average yield of a ton per hectare on this area, you will see what a large increase we ought to get over the small amount of 715,000 tons from our district last crop. There is another increasingly important crop in our zone, and that is the potato, which seems to grow very well in some of our districts, especially within a radius of 60 miles round Mar del Plata, and this traffic promises to attain very large proportions as time goes on. I may say that the area sown under potatoes this year is estimated at 65,800 hectares, as compared with only 40,450 in the crop just carried. The seed potatoes are brought every year from France, and consequently it is a profitable traffic to us, as not only do we have the carrying of the potatoes themselves to Buenos Ayres, but also the imported seed potatoes from Buenos Ayres to the district in question. I should mention that the potato market of Buenos Ayres is situated at our Casa Amarilla Station. Another traffic which is increasing by leaps and bounds is that of stone and lime. I visited every one of the quarries, which

are principally situated in the neighbourhoods of Tandil and Olavarría, and found the great majority of them in full work. This traffic must go on increasing, for, as you are aware, these are the only districts where stone can be found at a reasonable distance from the capital, and as the quarries employ a large amount of labour, they not only give us a large direct traffic, but also an indirect one in general goods out from Buenos Ayres and Bahía Blanca.

THE NEUQUEN EXTENSION.

I have hitherto been talking to you with regard to the main part of our system, but there is another zone which at one time was considered to be an arid desert, and is now, to all appearance, developing into a second Egypt. I refer to that part of the Neuquen extension between Chelforo and Neuquen, where even in the short period of two years which has elapsed since my previous visit, the advance is simply wonderful, as development is going on on all sides, although the barrage across the Neuquen River and the main irrigation canal leading from it have not yet been built. Even on the 20 miles constructed of the line from Neuquen towards Chili, irrigation has begun, the National Government having erected on the banks of the Limay River a pumping station fitted with three powerful centrifugal pumps, which are capable of irrigating at least 3,000 hectares, or, say, nearly 7,000 acres of land, and a canal some 9 miles long having already been built in connection with this pumping station, it is expected that a considerable part of the land in question will be under irrigation at once. Another pumping station on the Limay, above the Government one referred to, is also being built by private enterprise, which will probably irrigate at least an equal area, if not more. The crops at present being raised are chiefly alfalfa and vegetables and fruit, but some of the principal owners in the irrigated district told me that the land is very suitable for beetroot, and it is not impossible that in time a beet sugar industry may be started in this zone. The land is said to be also suitable for vine growing. The drought in our main zone caused the hay made from the alfalfa in the Rio Negro Valley to be in great demand, and during my inspection trip I repeatedly came across wagons of hay from Allen and other stations close to Neuquen in stations near to Buenos Ayres, although the distance by rail was in many cases 600 or 700 miles, and, as I have already said, it seems probable also that a large business may ultimately develop in fattening cattle for Chili, which would be a lucrative source of traffic for our extension from Neuquen westwards when it is built, even as far as Zapala, the end of the first section, as by that means the animals could be put off fat within easy reach of the mountain passes.

IRRIGATION.

With regard to the irrigation works which, as my predecessor told you two years ago, we had undertaken to carry out at cost price for account of the Government, I am pleased to say that the work of the main canal has now been commenced under the direction of an experienced engineer, whose services we have secured from the staff of the Egyptian Irrigation Department, and the work will be pushed on as quickly as possible, and should be finished in two or three years. This canal will enable nearly 200,000 acres in all to be brought under irrigation, and there is no doubt that by the construction of other canals lower down the river an even larger area could be brought under cultivation in the Rio Negro Valley. There are also signs that the owners of land adjoining the Rio Colorado—which is the river immediately north of the Rio Negro—are about to commence the irrigation of their land from it, either by gravitation canals or pumping. I made a careful inspection of our port at Bahía Blanca, and am satisfied that the facilities we now possess there for handling traffic are quite equal to the occasion for the present, but it may be necessary to amplify them before long, if agriculture continues to progress, as it is likely to do, if we have a good crop this year.

In connection with ports, I am pleased to tell you that the Southern Dock in Buenos Ayres—in which we are so largely interested—was doing exceedingly well when I was in Buenos Ayres, and there is every reason to believe that it will do better in the immediate future, especially when the extension of it, which is at present in hand, is finished, and the Transporter Bridge being built across the Riachuelo enables the dock to be approached directly by carts and foot passengers from the City, as at present there is no access to it except by rail or boat.

THE BUENOS AYRES MIDLAND.

Perhaps I ought to say something with regard to the Buenos Ayres Midland, in which we are jointly interested with our friends the Buenos Ayres Western Railway. It is now completely finished in accordance with the concession, from the suburbs of Buenos Ayres to Carhué, and I took the opportunity of my visit to the Argentine to inspect it, going over the whole of the line for that purpose. I am pleased to say that it seemed to

be thoroughly well built, and that the zone it passes through is an excellent one—to all appearance as good as any on either the Southern or Western lines—and though it will naturally take a little time to develop, I see little reason to doubt that if the crops are good for a year or two it should, before long, begin to show some results. I am pleased to say that our relations with the authorities continue to be most cordial, and I was very gratified by the friendly attention with which I was received both by the Minister of Public Works of the Nation and the provincial authorities at La Plata. (Applause.)

The Chairman then referred to the important services rendered by the staff, both at home and abroad, and concluded by reading the following telegram which had been received from the General Manager:—"Weather: Weather to date of cabling satisfactory. Wheat and Oats: Present condition of wheat and oats very good, over still larger area sown than last year. Traffic Receipts: Present low traffic receipts due to loss of maize crop and late shearing, but passenger traffic heavy, and with general goods traffic expected to improve in view of good prospects of coming harvest. Shearing has not yet begun in consequence of cold weather, but clip should be equal to last year. Lambing good. Live Stock: Movement in live stock continues. Potatoes: Much extended acreage potato. Extensions: Construction of extensions proceeding satisfactorily. Considerable area on new lines being ploughed for grain. Have recently visited Rio Negro Valley and find large area under cultivation, and everybody enthusiastic regarding development. Renewed confidence in camp districts in spite of depression last year owing to crop failure." Then we have a further telegram which stated:—"Minister of Public Works and Government Irrigation Committee accompanied Senor Guerico and myself, returning this morning from Rio Negro. The object of the visit was to give the Minister an opportunity of visiting irrigation works, and seeing personally recent progress and development in the valley of the Rio Negro. All returned most favourably impressed with the same, also with the condition of the crops in south of province."

Then we have another telegram, dated October 17, which says:—

"Traffic for week ended October 15, £95,000, being an increase of £4,003. The aggregate receipts to date are £1,247,062, being an increase of £20,802."

(Applause.)

The Hon. WINDHAM BARING seconded the resolution for the adoption of the report, which, after a short discussion, was carried unanimously.

The CHAIRMAN: I will now move:—

"That a balance dividend of 4 per cent. (less income-tax) be and the same is hereby declared on the ordinary stock of the company for the half-year ended June 30, 1911."

Sir HENRY BELL, Bart., seconded the resolution, which was agreed to unanimously.

On the motion of the CHAIRMAN, seconded by Mr. H. C. ALLEN, the meeting sanctioned an increase of capital to the extent of £3,000,000, by the creation of 300,000 shares of £10 each.

The resolution was agreed to unanimously.

The retiring directors and auditors were re-elected, and the proceedings terminated with a hearty vote of thanks to the chairman and directors for their past services.

QUEBEC CENTRAL RAILWAY.

At the annual general meeting on Wednesday, at Winchester House, E.C., Mr. E. Dent (chairman) stated that the gross earnings for the year to June 30 were \$1,208,949, an increase of \$103,682. The net operating revenue was \$388,146, against \$346,311. Adding to this the interest received, \$7,911, the total net revenue for the year amounted to \$396,057. After providing for the interest on the 4 per cent. and 3 per cent. debenture stocks and 7 per cent. on the income bonds, there remained a surplus of \$160,415, out of which the board recommended a dividend of 3 per cent. on the share capital, or 15s. per £25 share, which would leave a balance to be carried forward of \$77,005. The extension from St. George to St. Justine was opened for regular traffic on July 1, 1910, and on January 1 last a further extension from St. Justine to St. Sabine, about 1½ miles, was opened. This line had proved a valuable acquisition to the company's property. New industries were constantly being established along the line, and its traffic prospects were exceedingly hopeful. On the Chaudière Valley line all the work had been completed in connection with the diversion of the line between Beauce Junction and Beauceville. Contracts had been given during the year to a Canadian company for the construction of the new

Quebec bridge, but it would probably be five years before it was completed. The Canadian Pacific had approached the directors with a view to leasing the railway, and the board had entered into a provisional agreement for leasing the line and its assets for a term of 999 years. When the Bills had passed the Dominion Parliament and the Quebec Legislature the security holders would be asked, probably in the spring of next year, to sanction the lease. Under this scheme the 4 per cent. debentures would remain as they were, retaining all their rights, which meant that, at the option of the board, they might, after August 1, 1919, be repaid at 110 on six months' notice. Under the lease to the Canadian Pacific they would guarantee the interest on all the securities. The interest on the shares would be 4 per cent. for four years, and 5 per cent. per annum thereafter. It was impossible to say what the Quebec Central Railway would earn in the future, and the value of the shares with a 5 per cent. guarantee would be as high, if not higher, than if paying 6 per cent. without a guarantee. The guarantee of a powerful company like the Canadian Pacific would, no doubt, considerably increase the capital value of all the securities of the Quebec Central. That was shown by comparing the prices of the various securities at the present time with the prices at that time last year. He moved the adoption of the report and the payment of the dividend.

Mr. A. BREMER seconded, and the motion was adopted.

MEXICAN RAILWAY.

Mr. N. W. Yorke presided at the ninety-third ordinary general meeting of the Mexican Railway Co. held on Thursday, at River Plate House, E.C., and in moving the adoption of the report (which appeared in this journal last week) he remarked that the revolution while partially stopping traffic on the Northern railways resulted in the diversion of some quantity of traffic to Vera Cruz, thus giving the company some traffic which they would not otherwise have handled. They had been able to recommend the highest dividend declared for many years past. The principal cause for the increase in gross earnings was the increase in passenger earnings, which was higher by \$104,000. This was partly due to the new sleeping-car traffic, to which he alluded at the last meeting. The profit obtained therefrom had exceeded their most sanguine anticipations. Under more settled conditions he was hopeful that even better results would be obtained; but the good start that had been made reflected great credit on their general manager, who was responsible for the organisation of this new business. Their express business also showed a healthy increase of nearly \$19,000, and the profits now earned by this department thoroughly justified them in having taken this business, which in North America was usually given to outside contractors, into their own hands. As regarded goods traffic, though the tonnage of both national and foreign goods showed a large increase, the increase in money was comparatively small, namely, \$22,600. This was accounted for by the better class traffic having been replaced by mineral or other traffic of lower class. Pulque, which for several half-years, owing to the formation of a trust, had shown a decreasing tendency, showed this half-year the substantial increase of \$17,000.

ECONOMY DUE TO OIL FUEL.

The gross increase of \$145,000 had been earned with a decreased expenditure of \$27,500; but it should be remembered that the expenses of working the sleeping-car service were included in this expenditure, which, but for this, would have shown a considerably greater decrease. Substantial decreases were shown under the headings of repairs and renewals to locomotives and outside agencies, but the principal saving had been in fuel, owing to the partial use of oil instead of coal during the latter part of the half-year. The decrease in the fuel account, though satisfactory, was not so great as that which they were now realising, and hoped to realise in the future. The engines working the lower and the mountain sections of the line were converted to oil by the middle of May, but it was not until the commencement of the current half-year that the whole of the main line, with the Puebla and Pachuca branches, was working with oil. They must bear in mind, also, that in the half-year under review they ran some 28,000 more kilometres than in the corresponding half-year. Many works of extension and improvement had had to be suspended on account of the disturbed condition of the labour market. The capital account had been reduced this half-year by £64,000. On the other side of the balance-sheet special renewals account now stood at the high figure of £150,000. This had been increased by no less than £35,000 during the half-year. He hoped that before long

the allocation from revenue to this account would produce a sensible reduction, and, unless their plans were seriously modified, the whole of the account should be written off in about five years from now. The result of the large amount 'locked up' for the present in this account had been to materially reduce their cash balances, and he was afraid that they would have to look forward to charges for interest, which would go against the net revenue, for some few half-years to come.

A TRIBUTE TO THE OFFICIALS: THE OUTLOOK.

While they looked back with much regret on the termination of the régime of General Díaz, which brought many blessings in the shape of peace and prosperity to Mexico, they looked forward with great confidence to the inauguration of the new Government under Señor Madero. One of the planks in Señor Madero's political platform had been "the protection of foreign interests and a welcome to foreign capital"; and if the traditions of the Government of General Díaz in these respects were continued by the new Government—as he felt sure they would be—he did not think that they need have any fear as to the safety of their property. In the district which they served business was interrupted to a very slight extent, and the damage done to the line by the contesting parties was confined to one or two places. Nevertheless, the period was one of considerable difficulty and anxiety to their officials in Mexico and he hoped that he should carry the shareholders with him when he said that their thanks were due to them for the tact and courage with which they acted on more than one difficult occasion. (Hear, hear.) That the line suffered so little was, in his opinion, very largely due to the promptness and discretion with which they acted throughout the troubled time. With regard to the prospects of the current half-year, they would have noticed that the gross returns had shown considerable falling off, but that this decrease had been largely neutralised by the diminution of the working expenses. Apart from a decrease of £2,000 in the pay-roll in August, owing to a strike, the diminution in expenses was in great part due to the use of oil fuel. The prospects of a full supply of oil being forthcoming were excellent. As stated in the report, they had in stock three months' supply, and the contractors were now delivering oil at a greater rate than the company could accept it.

Mr. H. GOSCHEN seconded the motion, which was agreed to, and the dividends were duly declared. Mr. Vicente Vertiz was elected a director of the company, as representing the Mexican Government.

DEMERARA RAILWAY.

The 130th half-yearly ordinary general meeting of the shareholders was held yesterday, at the Cannon Street Hotel, E.C., Mr. R. A. ROBERTSON (chairman of the company) presiding.

The accounts showed that the receipts on capital account amounted to £604,700, and expenditure to £604,522, leaving a credit balance of £178. On revenue account the gross revenue was £23,211 (against £23,310), and the gross expenditure £15,648 (against £16,021), leaving £7,563 (against £7,289). Debenture interest absorbed £1,400, leaving a net revenue of £6,163, a decrease of £5,889. To this must be added Government subsidy, £6,250, and surplus forward from previous half-year £820, together £13,242. The directors recommend a dividend for the half-year at the rate of 2 per cent. per annum on the ordinary stock, carrying forward £754. The number of passengers carried during the six months was 309,374, an increase of 50,993, and the volume of goods was 25,225 tons, a decline of 7,733 tons.

The SECRETARY (Mr. H. G. McMurdie), having read the notice convening the meeting, the Chairman affixed the seal of the company to the register of shareholders.

The CHAIRMAN then said:—Gentlemen, in moving the adoption of the report, I may say that the half-year embraced in the accounts may be termed an uneventful one and we will not detain you more than a few minutes on this occasion.

The balance at the credit of capital on comparison with the accounts submitted in October last year show a small increase of £33 18s. 7d., representing the proceeds of land sales carried into the accounts last April.

The gross revenue for the half-year amounted to £23,211 7s. 6d., as against £23,309 13s., the falling off being therefore £98 5s. 6d. The gross expenditure amounted to £15,648 8s. 5d., showing a reduction of £372 10s. 5d. upon the corresponding figure of £16,020 18s. 10d. In result there is a balance of £7,562 10s. 1d., being £274 4s. 11d. more than in October last year when the amount was £7,288 14s. 2d.

In commenting upon the revenue accounts of the three sections and taking in the first instance the Demerara section I may remind you that the first half of the year 1909 showed exceptionally good returns owing to the large sugar

crop. The corresponding period in 1910 shows a large reduction in the goods traffic against 1909 and the accounts now before you show that the adverse influences were still in operation during the first half of this year. The tonnage of sugar carried was less than in 1909, and more than 2,000 tons less than what we carried in 1909. We do not regard this reduction as being in any sense permanent, but, as we have so often said on previous occasions, we must expect ups and downs according to the weather conditions. Another incidental factor operating against us in the half-year under review was the dryness of the season and consequently there was a very large falling off in the coal traffic to the estates. In result we find our goods traffic reduced by £556 14s. 10d. On the other hand, this section carried 21,208 additional passengers, and we have a fairly substantial increase in our receipts from this source amounting to £302 0s. 3d., which would have been greater had it not been for the low competitive fares which were and are still in operation between Georgetown and Plaisance. The other items on the credit side of the Demerara accounts show slight decreases, but call for no comment. On the expenditure side of the accounts, maintenance of way is practically the same. Locomotive power shows an increase of £111 16s. 9d. The increase is principally in fuel consumption which, again, was due mainly to the increased mileage. Carriage and wagon repairs are up £113 10s. 6d., there being special work done under this head. With the exception of an increase in rates and taxes all the other items show small increases, but call for no special comment.

Going on now to the Berbice Railway there is a satisfactory increase in the passenger receipts of £230 10s. As the number of passengers is practically the same as in the corresponding half-year, it is obvious that this increase is due to longer distances being travelled, and accordingly the traffic has been more remunerative. Goods traffic remains practically the same, but the item of live stock shows up rather better. On the expenditure side of the account, maintenance of way shows a slight decrease, locomotive and carriage and wagon repairs are slightly up, for the reasons already stated in the case of the Demerara section.

The passenger receipts upon the West Coast section show a falling off of £61 18s. 3d., notwithstanding an increase of 35,714 in the number of passengers carried. This, of course, is in consequence of the reduction in fares which was made when we had to meet the motor omnibus competition. We have thought it wise to continue the low fares in the meantime, partly for experimental purposes. The question of the permanence of the reduction, or the modification of it, is a matter which is receiving careful consideration, and the results are being watched with a view to arriving at a decision upon the policy to be adopted in future, and we would ask you to leave it in this position. On the expenditure side of the section of the railway there is a decrease in the item of maintenance of way due to the writing back to revenue in the corresponding half-year of the cost of a siding constructed some years before. Locomotive power shows a decrease of £682 7s. 10d., which is almost entirely represented by a new boiler for one of the engines which was charged in the corresponding half-year's accounts. After carrying in the various balances and the government subsidy to the net revenue account, and providing for debenture interest there is a credit balance of £13,242 3s. Out of this sum there falls to be paid a dividend for the half-year at the rate of 4 per cent. per annum on the 4 per cent. extension stock, and we recommend that the remainder should be dealt with in payment of a dividend at the full rate for the half-year on the 7 per cent. preference stock, a dividend at the rate of 3½ per cent. per annum on the preferred ordinary stock, and at the rate of 2 per cent. per annum on the ordinary stock, and in carrying forward £573 13s.

Before moving the necessary resolutions for carrying these recommendations into effect we wish to refer to the matter of Mr. Sells' appointment to the board, which you will see notified in the report, and which you will be asked to renew to-day. We need not say to you that it was only upon Mr. Sells' own strongly expressed wish that he should retire from the secretaryship that we accepted his resignation, and before doing so we asked him to continue his association with the company as a director. Mr. Sells completed thirty-one years' service with the company in March last. For nearly eighteen years he has acted as secretary, and along with Mr. Read and myself went through the very trying years which followed upon the failure to complete the new railways, and afterwards the resulting consequences of the addition of these to the old railway. We fully anticipate that you will be pleased and gratified at knowing that the company has the opportunity of retaining Mr.

Sells' services in another capacity, and that his intimate knowledge of the company's affairs will remain available to the shareholders. In room of Mr. Sells the directors appointed Mr. Henry G. McMurdie to be the company's secretary. Mr. McMurdie has been in the company's service for many years, and those of you who have come in contact with him will join with the board in congratulating the company in his appointment.

I beg to move: That the report of the directors and the half-yearly statement of accounts to June 30 last, which have already been circulated amongst the proprietors, be and they are hereby received and adopted. (Applause.)

Mr. E. B. READ: I beg to second the resolution.

Mr. CUFF congratulated the board on the fact that the competition with the Motor Omnibus Company was at an end, and suggested that, if possible, instead of bringing up the passenger fares to their original level, they should be increased half-way. He also congratulated the late secretary, Mr. Sells, on having been appointed as a director, and expressed his satisfaction that Mr. McMurdie had been elected as secretary.

The resolution was then put, and carried unanimously.

On the motion of the CHAIRMAN, seconded by Mr. G. J. WILDRIDGE, the following dividends were declared:—4 per cent. on the 4 per cent. extension preference stock; 7 per cent. on the 7 per cent. preference stock; $3\frac{1}{2}$ per cent. on the preferred ordinary stock; and 2 per cent. on the ordinary stock.

The CHAIRMAN proposed the re-election of Mr. H. Martin Sells as a director of the company.

Mr. READ seconded the proposition, which was carried unanimously, and Mr. Sells briefly returned thanks for the compliment paid him.

On the motion of Mr. CUFF, seconded by Mr. WALTERS, a vote of thanks was accorded to the chairman and directors for their past services, and the CHAIRMAN having acknowledged the same, the proceedings terminated.

UNITED RAILWAYS OF THE HAVANA AND REGLA WAREHOUSES.

The 14th ordinary general meeting of the United Railways of the Havana and Regla Warehouses Limited, was held yesterday at Winchester House, Old Broad Street, E.C., Mr. C. J. Cater Scott (chairman of the company) presiding.

The SECRETARY (Mr. W. J. Maslen) having read the notice convening the meeting and the report of the auditors,

The CHAIRMAN, in moving the adoption of the report and accounts, said he must frankly admit, on behalf of the board, that they did not at all represent what they would have wished them to be, and that the results were disappointing and very different from what they expected at the last meeting a year ago. At that meeting he said that the conditions for the planting and maturing of the cane crop had not been altogether favourable, and, as a result, Mr. Orr had made some reduction in his estimate. Two days before the meeting the island of Cuba was visited by a very severe cyclone which, happily, did little damage, but unfortunately at the very time they were holding their meeting that cyclone returned and did considerable damage, which made Mr. Orr make a further reduction in his estimate of the sugar crop, bringing it down to 575,000 tons, or 10 per cent. less than the previous year. But, unfortunately, Mr. Orr and also the other sugar planters of Cuba had under estimated the damage done by the unfavourable growing conditions, and also by the cyclones, with the result that Mr. Orr's new estimate was not by any means realised, and the actual tonnage carried was only 450,000 tons, as against 636,000 tons in the previous year, which was a bumper year. In spite of that the company was able to recommend a dividend of 4 per cent., to put £15,000 to the general reserve, and to carry £25,000 to the general renewal fund. They had practically earned 5 per cent. on the ordinary stock, but they only recommended a distribution of 4 per cent. That was not all they had done. During the 12 months they had continued the policy which they deliberately adopted some years ago of bringing the railway into a high state of efficiency. They had acted upon the principle that it was very much better economy to make good small defects as they arose, than to await the time when they became really serious. The result of the expenditure they had made during the past two or three years was that they had got a railway which was to-day superior to anything it had ever been before, and when they had got the full delivery of all the new cars they had ordered it would be well equipped to deal satisfactorily with their large and increasing general traffic, and to provide satisfactorily for all the requirements of the sugar planters even in the present year when they expected to handle a very large sugar crop.

Turning to the accounts, it would be seen that the total receipts for the year were £1,222,079. These returns were only £543 in excess of the weekly returns, which showed how very

careful the staff in Cuba made their weekly estimates. They did it with the object of letting each shareholder know exactly how the company was progressing. The total receipts were £22,000 less than a year ago. The difference was not great, and when they came to examine how the gross traffic was made up they would be struck by certain very considerable variations. First of all the passengers they had carried were 1,183,000 more than in the previous year, with an increase of £47,000 in money, and this was practically due to the electrification of the Mariano Railway, which had been converted from being practically a dead horse into a real live and efficient condition. In general goods they had carried 71,000 tons more, giving £35,000 more in money, and altogether these two sources of traffic gave an increase of £82,000. This was to be set against the shortage in the sugar crop. The gain on the passengers and general goods deducted from the loss on the sugar showed a difference of £29,000. Looking at these figures, he thought they might congratulate themselves on them, because, in view of the very serious shortage in the sugar crop, it was most satisfactory that the gains in other directions were almost sufficient to fill the gap. But—and there always was a "but" in these things—he must admit that if that was satisfactory from the shareholders' point of view, they would say that the increase in working expenses was unsatisfactory, that increase amounting to no less than £40,000. The ratio had increased from 54.72 to 59.76. With a shortage of crop it was inevitable that there must be an increase in the ratio of working expenses. When they found themselves threatened with a temporary loss of income in one year it was manifestly impossible to cut down expenses all round in proportion to the diminished crop. However, there were some points which made these figures more satisfactory, the increased maintenance charges having cost them £18,000 more, special work £6,000, making £24,000, so that half their increased cost of working represented money which had gone into the improvement of the line. The other half was made up of traffic expenses and general charges, chiefly in Cuba, £4,000, which represented a strengthening of the staff, which was absolutely necessary in order to ensure proper efficiency. With regard to the Havana Central Railway, that had made a big step forward, earning £104,758 against £70,927 in the previous year, an increase of nearly 50 per cent. During 15 weeks of the current year the gross traffic of the Havana Central showed a further increase of £10,147. Finally dealing with the prospects of the current year, the chairman said the estimated crop was 630,000 tons of sugar. Sugar was rising in price and the planters were going to get the benefit of it, so that this would mean an enormous amount of money would go into Cuba, more money would be spent, and the railway must benefit. He concluded by moving the adoption of the report and accounts.

Mr. E. M. UNDERDOWN, K.C., seconded the resolution, which was carried unanimously.

The retiring directors and auditors were re-elected, and the proceedings terminated with a vote of thanks to the chairman.

GRAND TRUNK RAILWAY OF CANADA.

The directors, in their report for the half-year ended June 30, 1911, give the following comparison of the half-year's revenue account with that of the corresponding half-year ended June 30, 1910:—

	1911.	1910.
Gross receipts	£3,561,182	£3,321,636
Deduct—		
Working expenses, being at the rate of 73.81 per cent., as compared with 73.94 per cent. in 1910:	2,628,205	2,456,065
Net traffic receipts ..	932,977	865,571
Balance of income from rentals, outside operations and car mileage	Cr. 22,431	Cr. 58,089
Total net revenue ..	955,408	923,661
Add—		
Amount received from the International Bridge Company ..	16,013	16,013
Interest on bonds of Central Vermont Railway	6,507	6,507
Interest on securities of controlled lines and on St. Clair Tunnel bonds acquired by the issue of Grand Trunk 4 per cent. debenture stock ..	62,510	62,483
Balance of general interest account	51,937	38,302
Net revenue receipts ..	£1,092,375	£1,046,966

The following are the net revenue charges for the half-year, compared with the corresponding period, viz.:—

	1911.	1910.
Rents (leased lines)	£77,603	£77,603
Interest on debenture stocks and bonds of the company ..	530,850	520,241
Interest on debenture stock and bonds of lines consolidated with the Grand Trunk Company	30,481	32,448
Canada Atlantic Railway deficiency	41,758	34,900
Detroit, Grand Haven and Milwaukee Railway deficiency	30,686	31,548
	<u>720,378</u>	<u>690,800</u>
Leaving a surplus of	£1,002,375	£1,046,990

Adding the balance of £9,105 at the credit of net revenue account on December 31, 1910, to the above surplus for the past half-year of £362,907, the total amount available for dividend is £372,102, from which the directors recommend the payment of the following dividends, viz.:—

Dividend on the half-year on the 4 per cent. guaranteed stock ..	£211,811
Do. do. first preference stock	85,421
Do. do. second preference stock	63,210
	<u>£360,442</u>

leaving a balance of £11,660 to be carried forward to next half-year's account.

GROSS RECEIPTS.

The following table exhibits a comparison of the receipts for the half-years ending June 30, 1911 and 1910:—

Description of receipts.	1911.	1910.	Increase.	Decrease.
Passengers	944,570	884,274	60,296	..
Mails and express	150,650	140,420	10,230	..
Freight and live stock	2,347,354	2,186,027	161,327	..
Other receipts	112,032	104,000	7,933	..
	<u>3,561,182</u>	<u>3,321,030</u>	<u>239,546</u>	<u>..</u>

TRAFFIC STATISTICS.

	1911.	1910.	Increase.	Decrease.
Passengers carried	5,170,916	4,730,401	180,515	..
Average fare per passenger ..	43.84d.	42.53d.	1.31d.	..
Tons of freight and live stock ..	9,050,209	8,832,332	217,877	..
Average rate per ton	92.26d.	59.44d.	2.80d.	..
Tons carried one mile	1,055,750,984	1,589,037,718	66,719,266	..
Earnings per train-mile	82.33d.	83.44d.	1.11d.	..

The average rate per ton mile on the entire freight business was 0.69 of a cent, compared with 0.67 of a cent in the corresponding half-year.

WORKING EXPENSES.

The working expenses, excluding taxes, amounted in the half-year to £2,580,641 or 72.47 per cent. of the gross receipts, as compared with £2,409,690 or 72.55 per cent.; an increase in amount of £170,951, but a decrease in the proportion to the gross receipts of 0.08 per cent. The following table exhibits a comparison of the revenue expenditure, including taxes, for the half-years ended June 30, 1911 and 1910:—

Description of expenditure.	1911.	1910.	Increase.	Decrease.
Maintenance of way, and structures ..	325,713	305,487	30,226	..
Maintenance of equipment	600,415	638,696	..	38,281
Traffic expenses	114,947	107,375	7,572	..
Conducting transportation	1,373,942	1,204,624	169,318	..
General expenses	90,524	93,508	3,016	..
Taxes	47,504	49,375	1,871	..
Total	<u>£2,628,205</u>	<u>£2,456,065</u>	<u>£172,140</u>	<u>..</u>
Percentage of gross receipts	73.81	73.04	..	0.13
Expenditure per train-mile	62.76d.	61.73d.	..	0.97d.

TRAIN MILEAGE.

The train mileage of the half-year compares with that for the half-year ending June 30, 1910, as follows:—

Description of mileage.	1911.	1910.	Increase.	Decrease.
Passenger	4,233,413	4,433,538	91,875	..
Freight	5,870,632	5,141,900	728,781	..
Mixed Trains	276,901	272,592	4,309	..
Total	<u>10,381,006</u>	<u>9,848,039</u>	<u>832,967</u>	<u>..</u>

From the foregoing statements it will be observed that the gross receipts for the half-year show an increase of £239,546, or 7.21 per cent.; the working expenses, including taxes, an increase of £172,140, or 7.01 per cent.; and the train mileage an increase of 832,967 or 8.72 per cent.

CAPITAL ACCOUNT.

The total charges to the capital account for the half-year amounted to £341,328. Of this sum £9,077 was discount

and commission on 1 per cent. consolidated debenture stock and 1 per cent. guaranteed stock issued during the half-year. The expenditure on capital account in respect of new works, new rolling stock, double track and land purchased was as follows:—New works, £112,705; new rolling stock, £205,683; double track, £2,820; land purchased, £11,031; total, £332,251.

ROLLING STOCK.

The equipment has been increased during the half-year by the purchase of 1,000 steel coal cars, the cost of which, amounting to £205,683, has been charged to capital account. During the half-year 18 Pacific type passenger engines, 5 first-class cars, 1 steam motor car, and 2 road levellers have been built in the company's shops, and 12 freight engines and 840 box cars were purchased on revenue account.

CANADA ATLANTIC RAILWAY.

The following summary shows the results of the half-year's working of the Canada Atlantic Railway compared with the corresponding period of 1910:—

	1911.	1910.
Gross receipts	£205,000	£192,977
Working expenses	188,098	199,590
Net traffic receipts	16,971	2,377
Balance of income from rentals, outside operations, and car mileage	7,025	4,580

Total net revenue .. £23,996 .. £28,003

The interest charges for the half-year were £65,753, against £63,020, so that there was a net revenue deficiency of £41,757, compared with £31,066 in 1910. The number of passengers carried during the half-year was 254,062, against 253,594, an increase of 468, or 0.18 per cent.; and the passenger receipts, including mails and express receipts, were £44,185, against £42,500, an increase of £1,625, or 3.82 per cent. The quantity of freight moved was 833,704 tons, against 749,176 tons in 1910, an increase of 84,228 tons, or 11.24 per cent.; and the receipts from freight traffic were £144,928, against £133,583, an increase of £11,345, or 8.49 per cent.

GRAND TRUNK WESTERN RAILWAY.

The following summary shows the results of the half-year's working of the Grand Trunk Western Railway compared with the corresponding period of 1910:—

	1911.	1910.
Gross receipts	£601,759	£613,457
Working expenses	549,482	509,571
Net traffic receipts	112,277	133,886
Balance of income from rentals, outside operations, and car mileage	Dr. 53,263	Dr. 55,872

Total net revenue .. £59,014 .. £78,014

The net revenue charges for the half-year were £92,187, so that there was a net revenue deficiency for the half-year of £33,173, which with the net revenue deficiency of £3,225 for the half-year ending December 31, 1910, makes a total deficiency for the year of £36,398, and deducting therefrom the credit balance at June 30, 1910, of £4,937, there remains a net revenue debit of £31,461 at June 30 last, which amount is carried forward to the current year. The number of passengers carried during the half-year was 995,116, against 991,153, an increase of 3,963, or 0.40 per cent.; and the passenger train receipts, including mails and express receipts, were £202,176, against £198,224, an increase of £3,952, or 1.99 per cent. The quantity of freight moved during the half-year was 1,941,374 tons, against 1,937,841 tons, an increase of 3,533 tons, or 0.18 per cent., and the receipts from this traffic were £444,898, against £430,419 in 1910, an increase of £14,479, or 3.36 per cent.

DETROIT, GRAND HAVEN AND MILWAUKEE RAILWAY.

The following summary shows the results of the half-year's working of the Detroit, Grand Haven and Milwaukee Railway, compared with the corresponding period of 1910:—

	1911.	1910.
Gross receipts	£205,050	£199,488
Working expenses	189,230	167,654
Net traffic receipts	15,820	31,834
Balance of income from rentals, outside operations, and car mileage	Dr. 18,524	Dr. 29,401

Total net revenue .. Dr. £2,704 .. £2,433

The net revenue charges for the half-year were £36,981, against the same amount in 1910, so that there was a net revenue deficiency of £39,685, as compared with £34,548 for the corresponding period of 1910. The numbers of passengers carried during the half-year was 373,757, against 371,303, an increase of 2,454, or 0.66 per cent.; and the passenger receipts, including mails and express receipts, were £55,511, against £54,685, an increase of £826, or 1.51 per cent. The quantity of freight moved was 1,192,105 tons, against 1,140,815 tons in 1910, an increase of 51,290 tons, or 4.49 per cent.; and the receipts from freight traffic were £129,825, against £127,616 in 1910, an increase of £2,209, or 1.73 per cent.

THE GRAND TRUNK AMENDMENT ACT, 1911.

A resolution accepting the Act and authorising the directors to exercise the powers conferred thereby will be submitted to the proprietors at the general meeting.

GRAND TRUNK PACIFIC RAILWAY.

The track has now been laid to Fitzhugh, a distance of 111 miles from Wolf Creek (the end of the Prairie Section), and 1,027 miles from Winnipeg and nearly 1,500 miles from Fort William on Lake Superior. Fitzhugh is within 18 miles of the summit of the Yellowhead Pass of the Rocky Mountains, and considerable grading beyond has been done as far as Tete Jaune Cache. From Prince Rupert on the Pacific Coast, the grading has been practically completed to Hazelton, a distance of 185 miles, and considerable work has been done between that point and Aldermere, a further distance of about 60 miles. The laying of the track east of Van Arsdol (the present end of track from Prince Rupert) has been delayed owing to certain difficulties in the construction of the tunnels and the proposed bridge 16 miles below Hazelton across the Skeena River. It is expected the tunnel work will be completed by November, and there is every probability that the bridge will be finished before June of next year. The contract for the remaining portion of the main line between Aldermere and Tete Jaune Cache, a distance of 410 miles, has been let. The whole of the main line has, therefore, now been contracted for.

BRANCH LINES.

The branch lines, Melville to Yorkton and Canora, and Melville to Regina (the capital of Saskatchewan), have been practically completed, and satisfactory progress has been made with the branches from Regina to the United States boundary, Regina to Moose Jaw, Biggar to Calgary, Tofield to Calgary, and the Prince Albert and Battleford branches. In all, over one thousand miles of branch lines are under construction in the Provinces of Manitoba, Saskatchewan and Alberta.

CENTRAL ARGENTINE RAILWAY.

The report for the half-year ended June 30, 1911, shows that the net revenue account was as follows:—

	1911.	1910.
Gross receipts	£5,420,448	£4,747,666
Working expenses .. (55.51%)	3,009,077	(58.19%) 2,762,227
Net receipts for the year ..	£2,411,371	£1,985,439
Less to renewals fund ..	112,000	—
	£2,299,371	£1,985,439
Interest on investments ..	22,909	18,732
Interest during construction ..	75,429	47,122
Registration fees	1,370	1,107
Remittance Exchange account ..	11,232	11,635
	£2,410,311	£2,064,035
Less—		
Debenture stock interest ..	£412,393	£338,327
Western annuity	90,787	90,787
Interest (on outstanding bills)		
Andine account and general ..	30,138	26,130
interest	465	592
Bill stamps		
	£533,783	£455,836
Balance of net revenue for year	£1,876,528	£1,608,199
Add—		
Balance brought forward ..	79,829	131,709
	£1,956,357	£1,739,908
Deduct—		
Interim dividends paid ..	716,950	698,451
in April		
Balance	£1,239,407	£1,041,457

Out of the balance of £1,239,407 the directors recommend payment of the following dividends (subject to income-tax), for the six months ended June 30:—On the 33,209 7 per cent. preference shares, 7s. per share, making the full 7 per cent. for the year; on the consolidated 7 per cent. preference stock, 3½ per cent., making the full 7 per cent. for the year; on the consolidated ordinary stock, 3½ per cent., making 6 per cent. for the year; on 1911 consolidated ordinary stock, 3½ per cent.; for the year ended June 30, on the deferred shares 6 per cent. These dividends will absorb £1,070,373, and leave £169,033 to be carried forward.

The report states:—"In May last a petition was presented to Congress by the company for concessions amounting to 1,393 miles in length, all of which were sanctioned, and the period fixed for their completion is ten years. The object of the new lines is to secure to the company fresh zones, and of the branches, to protect its existing territory and to afford better and more direct means of communication between the important pastoral and agricultural districts served by the railway and the various ports. During the year 313 miles of new line have been opened. The directors have accepted with great regret the resignation tendered by Mr. Walter Morrison as from June 30 last of the seat on the board which he had so ably occupied for nearly forty years. Mr. Morrison desired to be relieved from the duties which his directorship involved, and the board, reluctantly falling in with his wishes, appointed Sir Archibald Williamson, Bart., to the seat thus vacated, subject to confirmation at the meeting."

Seaboard Air Line Railway.—The results of the operations for the year ended June 30 last are: amount applicable to interest, \$6,436,000, sufficient to pay the fixed interest charges of \$3,358,000 and leaving a balance of \$3,078,000, equal to nearly two and a-half times the full 5 per cent. adjustment income bond interest of \$1,248,000. After payment of this interest, a balance is left of \$1,829,000, which is equal to 4 per cent. on the preferred and over 2 1-3 per cent. on the common stock.

Western Railway of Havana.—The accounts for the year ended June 30, 1911, show gross receipts £259,151, an increase of £10,887, and working expenses £140,810, a decrease of £3,062, leaving net receipts £118,341, an increase of £13,949. To this must be added amount brought forward from June 30, 1910, £10,797; transfer fees, etc., £61; difference in exchange, £1,398; net revenue Hacendados warehouses and other properties, £2,784; together, £15,040. From this sum have to be deducted taxes, etc., £5,189; interest on debenture stock, £24,750, interim dividend, £33,000; leaving a disposable balance of £70,442. The directors propose to pay a balance dividend of 8s. per share (subject to income-tax), making 7 per cent. for the year, to transfer £10,000 to the general reserve fund, and to carry forward £10,442. The report states:—"The gross receipts per train mile are 12s. 1d. as against 11s. 8d. in 1909-1910, while the expense of working is 6s. 7d. as against 6s. 9d. The ratio of expenses to receipts is 54.34 per cent. as compared with 57.95 per cent. in the previous year. The foregoing results may be regarded as satisfactory. Notwithstanding the unfavourable outlook in the first half of the year, and the adverse effect upon the company's business of a severe cyclone in October last, the gross receipts show an increase of £10,887. The damage resulting from the cyclone severely strained the resources of the tobacco planters, but fortunately, with a brisk demand and good prices for the leaf, the industry has received a welcome impetus and the railway has benefited in consequence. The working expenses, which show a decrease of £3,062, include the cost of repairing damages caused to the company's property by the cyclone and other extraordinary items of expenditure amounting to £7,540. The new locomotive shops have been equipped with modern machinery and appliances, and are now in full operation. These improved facilities are already producing considerable economy in the cost of repairs, and, to an appreciable extent, have contributed towards the reduction in working expenses above referred to."

Brechin and Edzell District Railway.—The report states that after providing for payment of interest and other expenses, there is a balance at credit of net revenue account of £513, which the directors recommend to be carried forward to next half-year.

Victorian Railway Recommendations.—The Parliamentary Standing Committee on Railways in Victoria recommends extensions of steam lines and the construction of new lines at a total estimated cost of nearly £840,000.

PERSONAL.

Mr. A. C. Swales, who has been appointed secretary of the Junior Institution of Engineers, is at present engineering assistant to the City Engineer of Leeds, and was for four years hon. secretary of the Yorkshire Association of the Institution of Civil Engineers. Last year he was awarded a "Miller Prize" by that Institution for his paper on "Cement and Concrete."

Mr. Alfred Aslett, secretary and general manager of the Furness Railway, has arranged, with the concurrence of the board, to take an extended holiday in India. He left London yesterday morning by the 11 a.m. express for Dover and Calais, and travels thence to Marseilles, joining the "Morea," of the P. and O. line, for Bombay. Mr. Aslett's special object is to visit his nephew, Mr. Alfred H. Aslett, district engineer, Dinapore. He will also have an opportunity of witnessing the Delhi Durbar. He proposes to return from Bombay on December 30.

DEATH OF MR. PHILIP KINGDON.

We regret to report the death of Mr. Philip Kingdon, the outdoor assistant superintendent of the London, Brighton and South Coast Railway Co., who died suddenly in the train on Wednesday evening, October 18, when returning home from business. During the day he seemed to have been in his usual health, but appears to have hurried to catch the 3.20 p.m. train from London, and shortly after the train had started the occupants of the compartment were startled to find that he was dead, and the train was stopped specially at Old Kent Road Station. It was customary for unusual events to be immediately reported to Mr. Kingdon, and as the body was not identified for some time a telegram announcing his death was addressed to him at his private residence. He was 41 years of age and leaves a widow and one child. The inquest on his body was held at Camberwell on Thursday, October 19, when evidence showed that he had suffered for some years from valvular disease of the heart and a verdict of "natural death" was returned.

Mr. Kingdon was generally popular among the staff throughout the line and was held in high esteem by the general office staff. By his amiable disposition he had endeared himself in the hearts of his more intimate friends and colleagues. He commenced his railway career with the London, Chatham and Dover Railway at Victoria, in 1888, under Mr. William Forbes, who was then the Continental traffic manager. In 1897 he retired from that company to take up an important position in British Guiana, which he relinquished owing to indifferent health. On his return to England he joined the Brighton Railway under his old chief, Mr. William Forbes, and in 1902 was appointed district superintendent Western Division, headquarters at Sutton. In 1907, upon the appointment of Mr. Finlay Scott as superintendent of the line, Mr. Kingdon was promoted to be his outdoor assistant at London Bridge.

THE LATE MR. JOHN CONACHER.

A notable figure in the railway world has passed away in the person of Mr. John Conacher, who died at his London residence, at the age of 60, on Wednesday. He entered the service of the Scottish Central Railway at the age of sixteen, and for some time was engaged in the head offices in Perth. On the amalgamation of the Scottish Central with the Caledonian Railway Mr. Conacher worked for some time in the Glasgow audit office, and then entered the service of the Cambrian Railways, where his promotion was rapid. At the age of twenty-two he was appointed accountant, and in 1885 secretary and general manager. In this capacity he effected much-needed reforms and economies. When, on the death of Mr. John Walker, the directors of the North British Railway were looking for a successor, their choice fell upon Mr. Conacher at a critical time in the company's history. The great railway strike had just ended, and the Caledonian and North British Railways had been for some time engaged in fierce rivalry. When Mr. Conacher took up the duties of general manager in 1891 he resolved that the wisest policy was the development of the company's existing resources and the improvement of the rolling stock. The company had entered into the heart of the West Highlands, and he realised that if the West Highland Railway was ever to come within sight of success it must find an outlet on the West coast. Accordingly, he advocated and carried out the Mallaig extension, and in this policy he has been justified by the experience of the working

of the West Highland line. It would be inexpedient to discuss the differences that arose at this time within the board on questions of policy. It is sufficient to say that, as a result of difference of opinion, the Marquis of Tweeddale, chairman, and Sir Charles Tennant, vice-chairman, resigned. Being closely associated with them in policy, Mr. Conacher did not feel justified in continuing to be manager, and resigned his appointment amid many expressions of regret and appreciation, both in Scotland and across the Border. The severance from the North British did not end Mr. Conacher's activities. He immediately received the appointment of general manager to the London Metropolitan Electric Supply Company, and, at the same time, his services as arbitrator were in great request in many of the large undertakings in England. So widely known had his business capacity and knowledge of railway matters become that the Secretary of State for the Colonies (the Earl of Elgin) asked Mr. Conacher to prepare a report for an intercolonial conference held in South Africa in 1907, at which representatives of the Cape Colony, Natal, Transvaal, and Orange River Colony met to consider the general situation with regard to the South African railways consequent upon the changes effected by the South African war. The report by Mr. Conacher on the general position of the South African railways was made the basis of discussion. The statement prepared by him was an elaborate one, and involved minute and careful investigation in South Africa of the claims and possibilities of the existing railways. In thanking him for his labours the Earl of Selborne wrote: "The document should be of very great value to the forthcoming railway conference." Mr. Conacher was also consulted by the Government in regard to the railways in Uganda and Nyassaland. In 1909 he was unanimously elected chairman of the Cambrian Railways, and he also became managing director of the Barry Line in South Wales. Mr. Conacher was a retiring man. He never sought promotion, but it came to him in full measure. For many years he was an elder in St. Columba's Church (Church of Scotland), London. He was a governor of the Royal Scottish Corporation, and took a deep interest in the fortunes of his fellow countrymen in London. By his many friends he was greatly beloved for his generous nature and uprightness. Mr. Conacher leaves a widow, three sons, and two daughters. A memorial service will be held at 2 p.m. on Monday at St. Columba's, Pent Street, and the interment will take place at Highgate.

UNDERGROUND ELECTRIC RAILWAYS OF LONDON.

The Underground Electric Railways Company of London, Ltd., have issued the following comparative statement of receipts and expenses of the Associated Companies for September:—

Metropolitan District Railway.					
	Month of September.	Inc.	July 1 to Sept. 30.	Inc.	
	1911.	1910.	1911.	1910.	
Gross receipts	£56,429	£54,480 +	£1,949 ...	£169,698	£163,852 + £5,846
Working expenses	28,200	28,031 +	169 ...	85,443	84,213 + 1,230
Net receipts	£28,229	£26,449 +	£1,780 ...	£84,255	£79,639 + £4,716
London Electric Railway.					
	Month of September.	Inc.	July 1 to Sept. 30.	Inc.	
	1911.	1910.	1911.	1910.	or Dec.
Gross receipts	£55,933	£54,460 +	£1,473 ...	£167,376	£164,924 + £2,748
Working expenses	31,143	30,458 +	685 ...	91,653	91,631 + 22
Net receipts	£24,790	£24,002 +	£788 ...	£75,723	£73,293 + £2,430
London United Tramways.					
	Month of September.	Inc.	July 1 to Sept. 30.	Inc.	
	1911.	1910.	or Dec.	1911.	1910.
Gross receipts	£30,428	£29,528 +	£900 ...	£100,580	£94,531 + £6,049
Working expenses	18,067	20,250 -	2,183 ...	55,726	61,039 - 5,313
Net receipts	£12,361	£9,278 +	£3,083 ...	£44,854	£33,492 + £11,362

A Compliment to the Grand Trunk Pacific.—The Canadian Railway Commission, headed by Judge Mabey, Chairman, visited Prince Rupert, and made a trip over the hundred miles of the Grand Trunk Pacific, east of Prince Rupert, which is now in operation. General Superintendent Mehan was the recipient of many compliments as to the physical conditions of the new road bed. On the return trip, the party ran over 35 miles an hour over some portions of the line, and the going was remarkably steady. When the Government accepted the road there was an order limiting the speed of trains to 12 miles an hour, but, after having seen the road, the Commission intend to make an order permitting the speed of trains to be increased to 35 miles an hour. This is in a line with the entire construction of the Grand Trunk Pacific Railway, which is being built as a permanent road from the start.

A RECORD AUSTRALIAN REVENUE

The annual report of the Victorian Railway Commission shows the highest gross revenue figures ever reached by the railways—viz., £4,896,000, being an increase of £452,000, while the working expenses only increased £280,000. The surplus, after paying all charges, amounted to £283,000, being an increase of £128,000. The net revenue, after payment of expenses, pensions, and gratuities, is equivalent to 4.24 per cent. of the railway debt.

DIVIDEND ANNOUNCEMENTS.

TALM. RAILWAY.—After providing £11,998 for redemption of debentures and setting aside the sum of £20,000 to general reserve account and £5,000 to reserve for renewals, casualties, etc., as well as providing for all other charges, the balance now available is £63,086, out of which the board recommend the payment of a further dividend of 4s. per share, making 7s. per share, or 7 per cent., and a bonus of 2 per cent., making together 9 per cent. for the year, and carrying forward the sum of £18,086 to the next account. The distribution a year ago was at the same rate and £9,094 was carried forward.

MOLD AND DENBIGH JUNCTION RAILWAY.—The directors announce a distribution at the rate of 2½ per cent. per annum for a half-year on account of the interest due on the B debenture stock.

ROYAL MAIL STEAM PACKET COMPANY.—The directors recommend out of the profits of the current year an interim dividend at the rate of £5 per cent. per annum on the preference stock.

BUENOS AYRES AND PACIFIC RAILWAY.—The directors recommend a final dividend of 2 per cent. on the ordinary stock, making 3½ per cent. for the year ended June 30. A year ago the distribution was at the rate of 3 per cent. per annum.

NORFOLK AND WESTERN RAILWAY.—The directors have declared a quarterly dividend of 1 per cent. upon the adjustment preferred stock of the company, payable at the office of the company, Arcade Building, Philadelphia, Pa., on and after November 18th, 1911, to the adjustment preferred stockholders as registered at the close of business, October 31st, 1911.

ANGLO-CHILIAN NITRATE AND RAILWAY COMPANY.—The directors have resolved to pay an interim dividend on account of the current year of 5s. per preference share, 5s. per fully-paid ordinary share, and 2s. 6d. per partly-paid ordinary share, all free of income tax, being at the rate of 5 per cent. per annum on all classes of shares, payable on November 4th.

THE WINNING OF IRON FOR AMERICAN RAILWAYS.

The latest step in that remarkable development of transportation on the Great Lakes which has made them the largest freight route in the world, carrying nearly half the world's output of iron, has just been announced by the Pennsylvania Railroad. Contracts have been let and work started on a gigantic ore handling plant at Cleveland, Ohio. The plant will be located on the lake front, a short distance from the mouth of the Cuyahoga River. It is expected that this will handle two large carriers a day, or from 25,000 to 30,000 tons. Its four unloaders are to be equipped with 17-ton buckets. The largest in use at the present time hold 15 tons. The capacity of the weighing lorry will be 50 tons, which is 15 tons greater than that of any previously built, and that of the receiving hopper will be 65 tons. The motor equipment will be heavier and the speed of operation higher than on anything yet attempted. In connection with this improvement an area of 43 acres is being reclaimed by filling in between the Government harbour line and the shore. This will provide a frontage on the lake of about 2,000 feet. The work includes the construction of a reinforced concrete dock 1,000 feet in length, foundations for ore handling machinery, a 15-ton ore bridge, a power house of 2,200 kilo-watts capacity, a haulage system for handling cars under the machines, a yard development for loaded and empty cars, and an under-grade crossing of the Lake Shore and Michigan Southern Railway. Great strides have recently been made by the iron industry in the lake country, and the Pennsylvania has been constantly making improvements to keep pace with them. From the ore fields, where steam shovels that scoop up from four to eight tons at a time are constantly lifting their giant arms, each one digging from 4,000 to 8,000 tons a day, over 800 vessels are engaged in this traffic. They can transport more than 3,000,000 tons in a single trip, and practically all of it goes to Erie ports to make rail connections. The mechanism for handling cargoes at the receiving end is noteworthy. The vessel is run under a huge unloading machine that thrusts steel arms down into 20 or more hatches and the cargo is emptied with a

rapidity that seems little short of miraculous. One boat discharged 8,514 tons at the Pennsylvania's docks in three hours and forty minutes. With the completion of the Pennsylvania's new plant at Cleveland, records like this will cease to be cause for wonder.

THE TELEWRITER AND RAILWAY COMPANIES.

Mr. E. W. Edwards, who presided at the second ordinary general meeting of the National Telewriter Co., Ltd., on Monday last, stated that improved instruments were now being installed, and the number of subscribers at the City and West End exchanges had steadily increased. Permission had recently been obtained from the Postmaster-General to install telewriters at the offices of the principal cable companies to enable them to receive cablegrams direct from their clients. The rapid growth of the exchange system would depend upon the extent to which written communication for the transmission of orders, etc., was appreciated by business houses, and the more this practice was recognised the easier it would become to enrol fresh subscribers from sources such as the railway companies, carriers, theatres, box-offices, etc., and any centres where the volume and nature of the inquiries were such as to render a written record desirable or advantageous. Instruments had been installed on the Italian State railways, from whom a second order had been received, marking the introduction of the telewriter into foreign railroad practice.

RAILWAY NOTES.

Westinghouse Brakes on Queensland Goods Trains.—A Westinghouse brake inspection car has been provided on the Queensland Railways for the instruction of enginemen in the use of this brake, which is now being fitted to the goods stock.

A New Steamer for the G.W.R.—The Great Western Railway Company has placed a contract for the construction of a twin-screw Channel steamer with Swan, Hunter, and Wigham Richardson, Ltd., Neptune Works, Newcastle-on-Tyne.

Electrical Signalling Installation at Nuneaton.—The whole of the signalling at Nuneaton Station is to be electrically worked, a contract for the new installation having been placed at £18,000. Plans have been settled for the erection of new station buildings, and contractors have been asked to submit estimates.

Stationmasters as Meteorologists.—The North British Railway Co. has made it compulsory upon each station-agent to maintain a weather record. The stationmasters must record, with accuracy, such particulars regarding weather as will have a bearing upon demurrage, siding claims, etc.

Car Orders in the United States.—On account of the cheapness of steel, the railway companies in the United States are placing orders for cars. The Missouri Pacific Railroad has ordered 3,000, and the Baltimore and Ohio is making inquiries for six thousand.

The West Country Riviera

For Autumn Holidays.

Sidmouth, from Peak Hill.

For a delightful holiday at this time of the year the West Country Riviera, extending from the border of Dorset along South-East Devon to Exmouth, is unrivalled. The lovely "garden coast," with the picturesque red cliffs, is extremely beautiful just now when autumn tints impart the wonderful colour schemes which make its scenery famous. Here and there mid hill and dale are ideal sheltered retreats, the better known being Lyme Regis, Seaton and Sidmouth, the latter, according to Ruskin, "being unequalled for transporting landscape and coast scenery." Budleigh Salterton is noted as possessing what is said to be the finest seaside golf course on the South Coast.

Illustrated Guides to these and other holiday resorts in Devon, Cornwall and the Sunny South, together with all information as to Cheap Tickets, Trains, etc., free, upon application to Mr. HENRY HOLMES, Supt. of the line, Waterloo Station, S.E.

CHARLES J. OWENS, General Manager.

CORRIDOR RESTAURANT-CAR TRAINS
in principal services from London (Waterloo).

A Convincing Reason

why the typewriter purchaser should select the

“REMINGTON”

has always been furnished by the unique Remington strength and reliability.

Eighteen additional reasons are furnished by the eighteen original improvements found in the latest Remington Models (Nos. 10 and 11.)

Let us send you descriptive booklet.

REMINGTON TYPEWRITER COMPANY,

100, Gracechurch Street, LONDON, E.C.

Telephone No. Avenue 5555 (4 lines).

The British Standard Brake Block

NOW UNIVERSALLY ADOPTED BY THE LEADING RAILWAY COMPANIES.

WHY?

Because we cut down your present cost 40% to 60%.

THEREFORE

Shift the responsibility on to us.

Our Brake Shoes last $2\frac{1}{2}$ times the life of the ordinary cast iron Block, with equal braking effect, and slightly less wear on the wheel tyres.

By our new design and blending of metals the Shoe can be completely worn out without danger.

One Shoe only, interchangeable and reversible for all classes of Carriages, Wagons, Vans, etc.

Don't theorise: get the facts from the list of Railways we now supply.

Our Representatives, with suitable samples for trial, are at your command.

The National Rail & Tramway Appliances Co. Ltd.,
12-18, TAYLOR STREET, LIVERPOOL.

TENDERS INVITED.

India Office—London.

THE Secretary of State for India in Council is prepared to receive Tenders from such Persons as may be willing to supply:—1. Rails and Fishplates. 2. Electric Cranes, &c. The Conditions of Contract may be obtained on application to the Director-General of Stores, India Office, Whitehall, S.W., and Tenders are to be delivered at that Office by Two o'clock p.m., on Tuesday, the 31st October, 1911, for No. 1, and on Tuesday, the 11th November, 1911, for No. 2, after which times, respectively, no Tender will be received.

W. G. BUTLER.

Director-General of Stores.

India Office, Whitehall,
28th October, 1911.**Royal Siamese State Railways.**

H. R.H. the Minister of Public Works for Siam is prepared to receive Tenders for the Supply of Locomotive Engines, Tenders, and Spare Parts. Plans, Specifications and Forms of Tender may be obtained from the Siamese Legation on payment of £1, which sum will not be returned. Tenders, addressed to H. Gattias, Controlling Engineer, Southern Line Department, Royal State Railways, Bangkok, Siam, will be received up to Ten a.m. on 20th January, 1912, after which time no Tender will be accepted. P 204

By Order.

PHYA SATHIEN TAPANAKITCK.

Under Secretary of Public Works.

The South Indian Railway Company.

THE South Indian Railway Company, Limited, are prepared to receive Tenders for the Supply of:—

1. Locomotive and Engineering Stores, comprising Copper Plates, Steel Boiler Plates, Steel Tyres, Steel Axles, Locomotive Duplicate Parts, Wheels and Axles for Carriages and Wagons, Laminated Springs, Volute and Helical Springs, Brass Boiler Tube and Screw Couplings. 2. Cast-iron Sleepers. About 3,020 tons for 50 lb. rails. 3. Steel Fishplates. About 510 tons for 50 lb. rails. 4. Fishbolts and Nuts. About 78 tons for 50 lb. rails. 5. Coiled Steel Keys. No. 96,000 for 50 lb. rails. 6. Ties, Bars, Gibs and Cotters. About 371 tons. 7. Locomotive Engines and Tenders (Broad Gauge).

Specifications and Forms of Tender may be obtained at the Company's Offices.

Tenders addressed to the Chairman and Directors of the South Indian Railway Company, Limited, marked "Tender for Locomotive and Engineering Stores," or as the case may be, must be left with the undersigned not later than One o'clock p.m., on Wednesday, the 8th November, 1911.

The Company is not bound to accept the lowest or any Tender.

A charge, which will not be returned, will be made of 10s. for each Copy of Specifications No. 2 and 7, 20s. for each copy of Nos. 1, 3 and 6, and 10s. for each copy of Nos. 4 and 5.

Copies of the drawings may be obtained on payment at the Office of Robert White, Esq., M.I.C.E., Consulting Engineer to the Company, 3, Victoria Street, Westminster, S.W.

By Order.

V. E. de BROE, M.I.C.E.,

for Managing Director.

Company's Offices,
91, York Street, Westminster, S.W.,

Steel Material,
Girders Bridges.

in accordance with the specifications, which may be seen at the offices of the Company. The charge for the specifications will be one guinea each, and is not returnable.

Tenders must be sent in addressed to the Secretary not later than 2 p.m. on Tuesday, the 7th day of November, 1911, marked "Tender for Steel Material" or "Girders Bridges," as the case may be.

The Directors do not bind themselves to accept the lowest or any Tender.

H. BONHAM-CARTER.

Secretary.

Company's Offices,

91, York Street, Westminster, S.W.,
17th October, 1911.**South African Railways.**

THE High Commissioner for the Union of South Africa is prepared to receive Tenders for the Supply of approximately:—

- (1) 650 tons Steel Fish Bolts and Spring Washers.
- (2) 60 tons Steel Creep Washers.
- (3) 3,300 tons Steel Coach Screws
- (4) 465 Sets Points and Crossings to connect with 80lb. Rails.

Forms of Tender and all particulars may be obtained on application at the Office of the High Commissioner (Stores Department), 100, Victoria Street, Westminster, S.W.

Tenders are to be delivered in sealed envelopes addressed to the High Commissioner for the Union of South Africa, 72, Victoria Street, Westminster, not later than noon on the 1st day of November. The High Commissioner does not bind himself to accept the lowest or any Tender.

THE RAILWAY TIMES

Established in 1837.

PUBLISHED EVERY SATURDAY.

Annual Subscription (post free), 25 shillings.

NOTICES.

All communications for the following issue should be received not later than 6 p.m. on Friday.

New Advertisements or changes in copy for the inside pages must be received not later than 6 p.m. on Friday. Advertisements for the cover must be received by noon on Thursday.

Advertisements of which proof is desired should reach us by the second post on Wednesday.

Money Orders, Cheques, etc., should be drawn in favour of THE RAILWAY TIMES, and should be crossed "National Bank."

Telegraphic Address: "Altmetry, London." Telephone No.: 2948 Gerrard. Offices: 12, Norfolk Street, London, W.C.

THE REPORT OF THE ROYAL COMMISSION.

We were able in our last issue to publish the main features of the Report of the Royal Commission appointed on August 22nd to investigate the working of the Railway Conciliation and Arbitration Scheme of 1907, "and to report what changes (if any) are desirable with a view to prompt and satisfactory settlement of differences." The discussion upon the report which has proceeded during the past week enables us to deal more usefully with the conclusions arrived at by the Commissioners. To begin with, emphasis should be laid upon the fact that it is a unanimous report, and in that respect rather an exception so far as the recommendations of Royal Commissions go. In the second place, labour interests were exceptionally strongly represented in the persons of Mr. Arthur Henderson, M.P., and Mr. John Burnett. Mr. Henderson is a Labour Member of Parliament, and was Chairman of the Labour Party in the House of Commons from 1908 to 1910, whilst Mr. Burnett was General Secretary to the Amalgamated Society of Engineers from 1875 to 1880, and was afterwards appointed the first Labour correspondent to the Board of Trade, and though he retired in 1907 he has since been engaged in conciliation work. It may be added further that Sir Thomas Ratcliffe-Ellis, another Commissioner, has had extraordinary experience in connection with conciliation in the coal industry. The conclusion at which the Commissioners arrived was certainly not likely to be biased in favour of the companies; indeed, fears were rather in the opposite direction. Considering how largely the fortunes and policy of the railway companies were left in the hands of the Commission it is a great relief and also a striking testimony to the strength of their position that the report does not vary the fundamental conditions laid down by the Conciliation Scheme of 1907. "Recognition," as such is not conceded, but provision is made that the men, as members of any sectional board, shall be free to appoint as their Secretary any suitable person, whether an employee of the company or a person from outside. This applies to the Sectional Board, for it is proposed that the Central Boards provided for in the scheme of 1907 shall be abolished. A useful further concession to the men is that secretaries in the discharge of their duties should be offered the privilege of free travelling over the companies' systems, and that members of the Boards should be afforded a like privilege when attending a meeting. In regard to matters of management and discipline the Commissioners point out that with their great responsibility "the companies cannot and should not be expected to permit any intervention between them and their men." On the other hand, it is recognised that men charged with misconduct, etc., should be permitted to state their defence prior to a final decision being arrived at. In regard to conditions of service also it is suggested that many of the misunderstandings would be avoided if the companies provided a statement of the exact conditions of service. Arrangements are also made for the appointment of Chairmen of the Sectional Board, whose decision in the event of disagreement shall be final. Agreements arrived at by the Conciliation Boards

shall have force for at least twelve months, or if arrived at by the decision of the Chairman, for two years. All existing agreements and awards, unless previously varied by voluntary agreement of the men and the companies, are to remain in force until the 1st July next, and the new scheme in its entirety is to hold good until November 6th, 1914. These and various other changes which it is hoped will facilitate the working of the Conciliation arrangements of 1907 are incorporated in the proposed new scheme, which is drafted by the Commissioners and appended to their report. In the course of their observations the Commissioners point out that conciliation on similar lines has been successful in settling differences between employers and employed in other industries, and they see no reason why it should not be equally successful on railways, but, as they state, no scheme of conciliation can be effective if there is an organised stoppage of work before the machinery has been exhausted. They make the very emphatic statement that "it is clear that however satisfactory the machinery may be, however reasonable the settlement, all goes for nothing if a contract once entered into be not loyally observed." They also point out the fact that whilst the men have the right to withdraw their labour by giving lawful notice they should not, in the Commissioners' opinion, "be permitted to incite or coerce by threats or by any form of intimidation men who desire to give their labour." It is not surprising that remarks like these have proved distasteful to the extreme agitators, and no words have been spared by such persons in condemnation of the report. Once more the extreme agitator has in this respect only shown his utter irresponsibility in taking up this attitude, and also his utter disregard of the true interests of the men whom he purports to represent. Indeed, it is suggested that if only "recognition" had been granted, although other conditions might have been less satisfactory to the men, the report would probably have been more palatable to the extremists among the men's spokesmen. The companies at a meeting of railway chairmen on Wednesday decided that, having regard to the pledges given by them in August, no present action on their part is called for. The attempt of certain of the men's leaders to disclaim any liability to abide by the findings of the Commissioners' report is a matter which can be left to them and to the Board of Trade to settle, but in passing it may be noted that such efforts have still further discredited the extremists. There can be no doubt that the companies are in a stronger position than ever, and that their action in agreeing to the Royal Commission so readily and in submitting to its recommendations has ranged the public, the Government, and, we believe, the great majority of the men themselves, on the side of the railways. Perhaps the most striking paragraph in the whole of the Commissioners' report, however, was the concluding one in which they make the following suggestive remarks:—"The railway service of the United Kingdom is second to none. The public regards its railway system with pride and confidence. That system has been built upon great traditions and high ideals, and it is the privilege of every railwayman in the Kingdom, of every class and grade, to participate in and to contribute towards the great trust with which he has been invested. We think we express the general opinion when we say that if railwaymen will only place the call of duty above and before every other consideration they may confidently rely upon the British public to support them in any fair claim fairly put." Whilst we think the companies are to be congratulated upon the strength of their position and upon the way in which their attitude has been vindicated by the Commissioners, we would point out that there is on the part of the public and the shareholders a desire that justice should be done to the men, and that wherever wages are admittedly too low a generous policy should be

adopted, irrespective of arbitration awards, etc. By so doing, the companies will still further reduce the influence of the professional agitator, and secure the peaceful working of the railway system upon which the prosperity of the whole country depends. The Government have already indicated their intention to assist the railways in securing higher rates in order to provide higher wages wherever necessary, and we are satisfied that the public and the shareholders will be ready to accept their share of the burdens. It is an absurdity to suppose that the interests of the shareholders differ from those of their men, and we may state that in the whole of our experience we have never yet heard of any protest by a shareholder against improved conditions granted to the men at a meeting or otherwise. If the situation is now handled in a statesmanlike way by the companies and the Board of Trade, we hope that the last will have been heard of vexatious agitation for some time to come.

ABOLITION OF THE SECOND-CLASS.

The second-class in railway working is dying hard, but there is no doubt that the final struggle will soon be over. The announcement that the London and North Western, the Lancashire and Yorkshire, and the Cambrian Railway Companies have resolved to abandon the use of second-class carriages brings us almost within sight of the end, for the only British lines of importance which after January 1st next will be running "seconds" will be the London and South Western, the London and Brighton, and the South Eastern and Chatham. It is only a few months since the Great Western Railway dropped the second-class. It is now a long time since the Midland Railway first broke the ice. It was the pioneer in running third-class carriages on all trains, and some three years later—namely, on January 1st, 1875—it abolished the second-class. That step caused quite a sensation at the time, and it was much criticised in many quarters. The Midland Company, however, stood firm, but for several years the number of companies which gave up the second-class was very small. Partly owing to the spread of democratic ideas and partly to the improvement made in third-class accommodation, the railway companies found as time went on that the revenue from second-class fares was by no means elastic, and, indeed, frequently showed a falling off. That circumstance, when it arose, was sufficient to decide the fate of the second-class, because the saving which could be made by the companies by the change was obvious. During the years when a considerable proportion of the companies still had second-class carriages there was much inconvenience in the case of through trains from the lines of one company to those of another. That, however, is now practically gone. With only two classes there is less trouble to the passengers in finding their places in the trains, and in this way time is saved at every station. As for the companies, they have only two sets of fittings to maintain instead of three, the booking and ticket arrangements are simplified, and there is a great saving of time, work and money in marshalling trains. The gains in these and other directions have been more than sufficient to counterbalance the loss from the fact that many, if not most, of those who would travel second-class now go third, not first. Another feature of value to the companies is that for a given passenger traffic it is possible to run shorter trains. The second-class carriages were usually but poorly filled, and the former second-class passengers can well be accommodated in a shorter train. The time must soon come when the nomenclature will be altered, by changing the name of third-class to second-class. That will be the final stage after the old second-class has become only a memory.

The Bank return this week is a very satisfactory statement, and the conditions that have caused this to be the case have been an important factor in bringing about the improvement in tone and the increase of business which have been manifested on the Stock Exchange during the last few days. The changes recorded in the return are not great, although this is a period of the year when large movements are not unusual. Only £288,000 left the Bank for abroad, and some £393,000 came in from the provinces in cash. The note circulation was barely altered—an increase of £35,000 only. Thus the Reserve is £70,000 up, though this is a time of year when a considerable reduction would have been quite in accordance with custom. Other Deposits are £820,000 lower, bringing this item to £44,232,000, which is by no means incompatible with fairly easy conditions on the Money Market. The fact that Other Securities are down £337,000, in spite of the addition of £553,000 to Public Deposits, certainly offers little indication of money being in heavy demand, and rates for discount have tended rather to weakness during the week. No alteration was made in Government Securities, and the ratio of Reserve to liabilities is raised nearly a half per cent. to 52.80.

It has been evident for some weeks that a large and influential body of the speculative fraternity, supported or followed by an appreciable fraction of the investing public, are so impressed with the continuing evidence of growing trade that they are ready to purchase domestic stocks of every kind, and the shares of Home railways in particular, in order to participate in the larger dividends they infer to be now earned and to enjoy the benefit of the higher prices which may be expected to ensue. During this time the simile suggested has been that of a hound straining at a

leash—the leash being represented by the vague menace of monetary troubles impending owing to war scares on the Continent and labour scares at home. All through the account just ended there have been indications that the leash was giving, and towards the middle of the week it seems to have broken suddenly. At any rate, the rise in Home rails was an especially prominent feature on Thursday and Friday. There are, however, plenty of reasons for deprecating a headlong course in any department of the Stock Market. The causes which led to the recent hesitations are by no means removed, and may again at any moment make themselves inconveniently felt. Meanwhile, the list of making-up prices for the last account is a goodly sight. The solid lift in all foreign Government securities, accompanied by steady advance of British Government stocks and Colonial securities, afford a good foundation for improvements in subsidiary stocks. Rises of 7 in South Eastern deferred and 5 in Chatham second preference are indications of the potentialities contained in Home rails. Americans also were higher on the accounts, and foreign railways recorded numerous advances.

The movements of the week have been to a great extent governed by the fluctuation of opinion as to the purport and probable outcome of the Railway Commission's report. Last Saturday, when it first appeared, the market hardly had time to decide what to make of it, but prices were put up fractionally, for the most part as a precaution by the jobbers in case the views of the public should be so favourable as to cause a rush of eager buyers on Monday. As the result of Sunday contemplation, however, the general conclusion seems to have been that paper profits had best be snapped up before the close of the account. Consequently, Home rails fell on Monday and the following day as well, in spite of the firmness of Consols and International. On Wednesday a change ensued and these stocks, aided by another batch of exceptionally good traffic returns, rose buoyantly. Government stocks advanced at the same time, which further strengthened the general tone of the market. Argentine rails were also in favour. The next day the same conditions continued, the advance in Home rails being even more pronounced and unanimous. No fewer than five additions of two points and fifteen of one point or more enlivened the active list of these stocks.

On Friday the rise in British Government stock continued, and Home rails followed suit at a rather less fevered pace than before. Other departments of the market also responded to the more hopeful feeling that now characterised dealings. The discordant note, however, was sounded from New York, owing to the action of the United States Government directed towards the dissolution of the Steel Trust, the stock of which fell 7½ to 53. American rails suffered in consequence, and the decline extended to Canadian railways, most of which were lower on the day. The Argentine lines continued in favour, and many advances were recorded in other foreign railway stocks. United Havana were quoted ½ higher at 84-85 ex dividend, which leaves them, after the deduction of four points for the distribution, rather better than when we first drew attention to their merits at the beginning of the month. The events reported from Tripoli, and those also received from China, had no discernible influence.

The movements of the week are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.

Weekly Traffic Summary.

The traffic receipts for the week ended October 22, as officially published by the fifty-two principal railways of the United Kingdom, amounted to £2,267,882, which was earned on 21,521 miles, being at the rate of £105 7s. 7d. per mile of line open. For the corresponding week of 1910 the receipts of the same lines amounted to £2,154,737 with 21,467 miles open, or £100 7s. 5d. per mile. There, was thus an increase of £113,145 in the receipts, an increase of 54 in the mileage, and an increase of £5 os. 2d. in the receipts per mile. Thirty-four of the returns distinguish between the receipts from passenger and goods traffic, and these show an increase of £21,270 (or 18s. 3d. per mile) in the passenger receipts, and an increase of £90,239 (or £4 3s. 1d. per mile) in the receipts from goods traffic. The aggregate increase of the thirty-four railways for sixteen weeks in the passenger receipts has been £88,916, while the aggregate increase in the goods traffic was £22,995. The aggregate receipts of the fifty-two railways for sixteen weeks (July 2 to October 22) amounted to £38,677,440 in comparison with £38,615,514 in the corresponding period of last year—an increase of £61,926.

BANK RETURN.

The return of the Bank of England for the week ended Wednesday, October 25, compared with that for the previous week, shows the following changes:—

MELBOURNE SUBURBAN RAILWAYS AND ELECTRIFICATION.

As briefly mentioned in our issue for October 14, a report was submitted to the Victoria Legislative Assembly on September 13, recommending the electrification of the Melbourne suburban railways, comprising 218 miles of line, and the metropolitan tramways. The report has been prepared by the Metropolitan Traffic Commission, who advise electrification of the suburban railways, with the reservation that the work shall be commenced only after an exhaustive inquiry by Mr. Merz or some other eminent authority as to whether the direct current or single phase alternating current system should be adopted. The estimated cost of electrification, according to the figures of Messrs. Merz, M'Lellan and E. P. Wilson, for the same mileage as given by Mr. Merz in 1908, is £2,172,800. Special works and improvements are necessary on the Caulfield and Camberwell lines. The headway of suburban passenger trains between Flinders Street and Spencer Street station to Williamstown, Essendon and Coburg has been reduced at the busy hours to two minutes, which is the minimum possible. The Commission considers that the lines on the viaduct should be immediately duplicated. The Railway Commissioners estimate the cost at £110,000. The duplication of the line from South Yarra to Caulfield should be proceeded with immediately, and the line should also be regraded so as to do away with level crossings. The estimated cost of quadruplication and regrading is £311,000.

The Commission recommends that an up-to-date State power supply be established, capable of providing all the electricity required for railways, tramways and public and private purposes at low rates. Referring to this branch of the question, the report says that the use of electric power in factories is only in its initial stage in Melbourne, and lighting has not yet been extended to its full, whilst the railways and tramways use practically no power. Seeing that the railways and tramways follow very nearly the same routes, and that the factories and electric lights are in close proximity to those routes, there are exceptional opportunities for co-ordinating the various services so that the loss in transmission and capital expenditure on lines may be reduced to a minimum.

If the recommendations be adopted the State will manage the railways and supply electric power in bulk; a tramways trust, the tramways; and the municipalities will distribute current for lighting and power. It is recommended that the central power-house, high tension transmission lines and converter stations be under the control of the Railway Commissioners.

In order to avoid competition between the railways and tramways the Railway Commissioners are to be empowered to object to proposed new routes or fares, or existing fares, or proposed alteration of fares, the issue to be settled by a supreme court judge sitting with two assessors.

In view of recent developments the Commission recommends that the best expert advice be obtained as to which system is more suitable for Melbourne suburban railways, and as financial considerations will largely determine the system to be adopted, that alternative tenders be obtained for the installation and guaranteed performances of the direct and alternating current systems before arriving at a final decision. Finally they advise that the leading railway officers visit Europe and America from time to time to study and report on the latest methods and developments.

MEXICAN RAILWAY COMPANY.

The Mexican Railway Company, Limited, has issued the following estimated revenue statement for the month of September:—

	Month of Sept mber.	July 1 to September 30.	
	1911.	1910.	Dec.
Gross receipts	\$646,700	\$727,000	\$81,303
Expenses	316,800	362,300	45,500
Net earnings	\$329,900	\$364,700	\$35,800

Increased Wages for Irish Railwaymen.—All grades of servants in the traffic department of the Midland Railway, Irish section, have been informed that as a result of Conciliation Board negotiations, increases of pay, ranging from 1s. to 3s. per week, had been granted by the directors, to take effect in the fortnightly pay ending the 18th inst. Concurrently a circular was issued by Mr. Cowie, secretary and traffic manager, further intimating that a bonus of a full week's pay would be given to every employee in the traffic and permanent way departments for their loyalty during the strikes.

THE ROYAL COMMISSION REPORT.

ITS RECEPTION BY THE COMPANIES AND THE EMPLOYEES.

DID THE MEN AGREE TO ABIDE BY THE RECOMMENDATIONS?

The report of the Royal Commission on the Railway Conciliation Scheme of 1907, which was published in our last issue, provided a leading topic of discussion during the first half of the week. At meetings of the men's unions held in all parts of the Kingdom general dissatisfaction was expressed at the failure of the Commission to recommend recognition in the form asked for by the representatives of the unions who gave evidence. The meetings formulated demands for unqualified recognition, an eight-hour day, and a 30s. minimum wage, and the joint executives were requested to at once convene a national conference to draw up a programme for immediate submission to the companies. Some meetings have favoured an immediate general strike. Among the more moderate trade union leaders not connected with the railways there is an opinion that the men have secured a substantial advantage. Mr. T. Burt, M.P., considers that "the Commission are right in excluding questions of discipline and railway management from controversy. The report ought to make for industrial peace, and in a great measure satisfy the workers on the railways. I think the men have gained a very important point in what has been determined regarding recognition."

The unanimity of the Commissioners was strikingly demonstrated on Tuesday by the action of Mr. A. Henderson, M.P., one of their number. Mr. Henderson, as a Labour representative, also took a leading part in the negotiations carried on at the Board of Trade for the settlement of the strike.

THE ATTITUDE OF THE COMPANIES.

A meeting of the chairmen of the railway companies of Great Britain was held on Wednesday to receive the report of the Commission. Having regard to the pledges given on their behalf in August last, it was resolved that no present action on the part of the railway companies was called for.

A "high railway authority," in an interview with a Press representative summed up the companies' view in these words: "As fair a conclusion as the Commissioners could possibly have arrived at."

The attitude of the Commission is generally commended by the companies. "The Commission," it is said, "has appreciated the impossibility of conceding such a measure of 'recognition' as would admit of interference with management or administration. Recognition is to be restricted to the consideration of hours of labour, rates of wages, and certain other conditions of service. The men ate to be represented in argument before the Sectional Conciliation Boards, but the companies are to have a free hand in all matters affecting the public safety—where administration and discipline are involved. 'Recognition' in the railway service is thus differentiated from recognition in other branches of industry, for the reason that the interests and well-being of the public enter so largely into the business."

As to the formation of the sectional boards it is declared on the part of the companies that "If the Board of Trade adopt the report, there will have to be new elections to the sectional boards. 'Recognition' before these boards is all the unions could hope for. They have always disclaimed the desire to have a voice in matters of administration and discipline, and why, therefore, they should declare themselves disappointed with the report it is difficult to say."

Lord Claud Hamilton, chairman of the Great Eastern Railway Company, stated on Saturday night that he was not in a position to express any opinion until he had consulted with his colleagues. Generally speaking, he opposed any outside interference with discipline, and objected to recognition of the unions. The view had also been expressed on the part of the companies that the report should sound the doom of so-called "peaceful" picketing, the Commissioners having found in favour of full and ample protection for those who desire to observe the settlements of disputes, and most emphatically against the exercise of threats or any form of intimidation.

Lord Faber, who is a director of the London and North Western Railway Company, has observed that he thought the report provided a very fair scheme, which should do justice to both sides expeditiously. It was a great advance over the old system. "There is no reason," added Lord Faber, "why masters and men should not work together perfectly fairly and happily under the new system. The real cause, in my opinion,

of the troubles that have arisen up to now has been that the aspirations of the men have been aimed too high, although it is to be granted at once that in some cases wages require adjustment. Such procedure as 'peaceful picketing' ought not to be continued; but, on the other hand, there should be no delays in listening to well-founded grievances of the men. The men can now be represented both on the sectional boards and the Conciliation Boards by any secretaries whom they may appoint."

As to the general attitude of the companies towards the new scheme, Lord Faber declined to venture an opinion; but, speaking personally, and for himself alone, he said he thought the railway companies' boards should be able to work under the proposed new agreement. "The masters have," his Lordship added, "a valuable concession in their powers to raise rates within certain limits without necessarily having to give any other reason but the demands of labour for higher wages." In conclusion Lord Faber remarked: "On the whole, I look forward with hope to the railway position."

VIEWS OF RAILWAY MANAGERS.

The railway managers located in London prefer to be silent, recognising that "it is vital in these matters that the companies should speak with one voice."

Mr. A. Kaye Butterworth, general manager of the North Eastern Railway, interviewed at York, said he was not prepared to discuss how the N.E.R. Company might be affected by the report before consulting his directors, but he stated that in the terms of the settlement of the recent strike of the N.E. men, the company resolved to reserve to themselves the right to adopt the procedure recommended by the Commission if they felt so disposed. Before any step of that sort was taken, however, an opportunity would be afforded the men of discussing the proposal with the company. Speaking generally, he thought the recommendations were an improvement on the 1907 scheme.

The general manager of the Taff Vale Railway Company, Mr. A. Beasley, in an interview on Saturday, said that everyone whose opinion was of real value fully expected the commissioners to report that the railway companies could not be expected to permit intervention between them and the men in matters that affected management or discipline. "Some of the trade union witnesses themselves," added Mr. Beasley, "admitted in evidence that this could not be expected. With regard to the abolition of the central boards, most of the witnesses advocated the abolition of either the central or the sectional boards, while some of the witnesses wanted a national or supreme board that everyone could go to. I see, however, that the commission have rejected the latter proposal. In general the new scheme is very nearly what I myself suggested in answer to questions put to me. The suggestion I made was that there should be one board for a small company like the Taff Vale, which, as regards its importance and extent, might be pretty much the same as a section of a larger railway, and that there should be an outside chairman of that board to decide questions in dispute. My suggestion was that the chairman should always sit with the board, but there is not much real difference in the recommendation."

A COMMISSIONER'S SUGGESTION AND EXPLANATION.

After the expression of the views of the men had gone on for three days, Mr. A. Henderson, M.P., one of the Commissioners, made the following statement to an interviewer:—"It would be a great misfortune if either the companies or the trade societies refused to give a trial to the new conciliation machinery recommended by the Royal Commission. It would be especially regrettable if this policy were adopted as the result of too narrow an interpretation of any of the recommendations. So anxious am I to avoid such a disaster that, in order to satisfy both parties as to what the report really means, I would venture to make the unusual suggestion that the companies and the executives of the unions should meet in conference and ask the Commissioners to elucidate any points upon which doubt exists. This is, perhaps, an unprecedented course, but anything is better than that a serious misunderstanding should arise as to the meaning of the report."

"On the question of recognition, I notice that Mr. J. E. Williams, the secretary of the Amalgamated Society of Railway Servants, gave it as his first opinion—an opinion since modified—that recognition had not been advanced one iota. I admit that the report does not deal with recognition in such definite language as to make it an imperative command upon the companies. But if the intention of the Commission be carried into effect a substantial measure of recognition ought soon to be in operation."

"To begin with, there may be 250 sectional boards on the

entire railway system of the country. If the men choose, every one of these boards may have an executive official of one of the unions as its secretary. All cases on behalf of the men not settled between them and the officials of the company immediately responsible, must pass into his hands and be placed upon the agenda paper for the next meeting of the Conciliation Board. At such meeting he has a perfectly free hand to press the men's case.

"One of the strong points made against the report is the stereotyping of the present wages and working conditions till July 1 of next year. I notice that Mr. Thomas urges that nothing can be done until that date, and then only by a cumbersome procedure. That was not the intention of the Commission, and their recommendation was that the workmen's representatives on the new boards should be elected as soon as possible. The Commission hoped that the boards would be elected forthwith, that the grievances of the men would be considered by the companies, and if not settled immediately, sent to the board, and if necessary to the chairman for his decision. If as a result of this procedure any changes of rates of wages or other working conditions were made, the Commissioners proposed that they should come into operation immediately on the expiration of the old agreements and awards on the date named—July, 1912."

Mr. Henderson expressed his conviction that the misunderstanding on these two points had not a little to do with prejudging the scheme in the minds of many of the men.

Mr. J. H. Thomas, M.P., has declined to make a comment respecting Mr. Arthur Henderson's defence of the report.

DECLARATIONS BY UNION OFFICIALS.

It is expected that the four executives of the railway trade unions will meet at Unity House on Monday next to decide what action shall be taken to give immediate effect to the desires of the men and their leaders. It is said that a resolution will be moved in the following terms:—

"That this meeting of the Joint Executive Council expresses its disappointment with the result of the Railway Commission, refuses to accept its findings, and will proceed to discuss other means of securing what we have fought for—namely, full recognition of the societies by all railway companies."

The Associated Society of Locomotive Engineers and Firemen, however, with other of the men's societies, excepting the Amalgamated Society of Railway Servants, think that two good points have been gained in the abolition of the Central Board and the maintenance of the Sectional Boards. The abolition of the Central Board is just what locomotive men and firemen in particular have wanted for some time, because while it was in existence the grievances of all grades were grouped before the Central Board with what they thought were disastrous results. On the other hand, the Amalgamated Society of Railway Servants, which represents all grades, thinks it to its interest to have the various grades grouped. The two societies, however, are at one in condemning the other recommendations of the report.

Mr. J. H. Thomas, M.P., organising secretary of the A.S.R.S., said on Saturday:—"The report is bitterly disappointing. It perpetuates the bad points of the 1907 scheme, and what it gives with one hand it takes away with the other. Those papers which declare it does not give recognition are quite correct. It is true that a secretary may be called in from any outside source, but under the 1907 scheme that could be done before an arbitrator who constituted the final tribunal. Under this new scheme the sectional boards constitute the final authority, so we are no better off."

"Then there is the position of the men with regard to improved conditions—just consider it. They struck in August to end their grievances. Under this new scheme present arrangements are to last until July next year. Then only negotiations for improvement will be started, and these have still to proceed by a cumbersome process. When the sectional boards meet they may come to a deadlock, and then an equal number from each side have to select an independent chairman, whose decision shall be final. It is quite possible they will find the appointment of a mutually satisfactory chairman a difficult process, and all the time the men are waiting. It seems certain it will be at least another twelve months before they can hope to get any remedy. We cannot consider this satisfactory."

"The joint executives of the four unions will be called together to discuss the report, and at present we are deliberating as to what action we might take in Parliament. For the moment I can say no more. But we are, as I said, bitterly disappointed."

Mr. Lowth, secretary of the General Railway Workers' Union, stated: "The form of recognition given is of no use. It is quite as irritating as the present method. The report is certainly unsatisfactory to us."

Mr. Williams, general secretary of the A.S.R.S., was the chief speaker at a meeting of railwaymen at Sheffield. Mr. Williams said there were some small improvements in the report of the Commission. The question of recognition had been extended considerably, though not to the point they had a legitimate right to anticipate. He could not conceive how the Commission that conceded recognition, even to the extent it had done, could so stultify the operation of the recognition by the conditions imposed. It would be absolutely impossible to get 25 per cent. of the permanent way men to signify their acquiescence to any proposed changes, as the men could not be reached in the time allowed them. It would be an absolute disgrace if they permitted 100,000 men to go on working for less than £1 a week until next year. But in dealing with their troubles they had to think as well as act.

A resolution was passed refusing to accept the findings of the Commission, and asking the joint executives to at once convene a national conference to draw up a programme for better conditions of employment and to submit it immediately to the railway companies for adoption.

The *Railway Review*, the organ of the unions, observes that the report suggests that greater use should be made of the usual channels, and the journal proposes that "the men should test these sources at once. A programme of improved conditions should be prepared in every centre, and presented immediately, in order to ascertain how far the railway companies are prepared to respond to the requests of the men. At the worst, they can only be met by refusal, and the programmes will already have fulfilled the necessary conditions for presentation to the new boards in July next." On the point of recognition the writer considers that some measure of disappointment is certain, but he adds that until the men and their representatives clearly state what meaning they attach to the term 'recognition,' and are united in its pursuit, the reality is pretty certain to evade them. The new scheme is better than the old one."

THE REPUDIATION BY THE EMPLOYEES.

In the House of Commons on August 17 the Prime Minister made the offer of a Commission, which was refused; but the same evening Mr. Lloyd George repeated Mr. Asquith's offer. He added that "the proposal is not at all a mere attempt to lure out of their hands the great weapon of striking, but it is merely an attempt for the moment to see whether we cannot arrive at the facts which must alone be the basis of safe negotiations—to arrive at them promptly, without loss of time in such a way that the men, if not satisfied with the recommendations—and they are not bound by the recommendations—can still fall back upon the powerful weapons in their hands."

The disaffected leaders suggest that this is a matter for the Board of Trade to thresh out with Mr. Lloyd George, upon whose assurance, and at whose earnest entreaty, they consented to a truce. The contention of the Board of Trade, however, that the leaders of the men consented to abide by the findings of the Commission was supported by the attitude and utterances of some, at least, of the men's leaders. The Board of Trade statement that assurances had been given by both parties that they would accept the findings of the Commission also appeared in the men's organ a few days later, and until now it has never been repudiated.

An interesting position has been reached in regard to the acceptance of the proposals of the Commission by the men.

In the same announcement the Board of Trade also remarked:—

Mr. Claughton and Sir Guy Granet further stated that the recommendations of the Commission would be loyally accepted by the railway companies, even though they be adverse to the contention of the companies on any question of representation."

Mr. Williams, of the A.S.R.S., interviewed respecting the first-mentioned statement, said:—"I never saw the statement. We cannot be responsible for what appears in the newspapers. At such a time as that, when we had the management of that great dispute on our hands, we had no time to look at the newspapers." In reply to a remark that the public would think it extraordinary that no official of his society should have read through the Government's proposals for the appointment of a Commission affecting the railwaymen of the kingdom, Mr. Williams said:—"I cannot help that. No such undertaking was given, and we were not aware that any such statement was officially made."

Mr. A. Bellamy, president, Amalgamated Society of Railway Servants, said:—"No pledge was given by the men to accept the Commission's report. The only pledge given by the men is Clause 5 of the settlement."

Mr. J. H. Thomas, Amalgamated Society of Railway Servants:—"No such agreement was arrived at."

Mr. T. Lowth, secretary, General Railway Workers' Union :—"No assurance was given by our side that the report of the Royal Commission would be accepted by us when the settlement was arrived at."

Mr. S. Chorlton, Signalmen's and Pointsmen's Society :—"I have no recollection of any of the men's representatives making a promise of the kind you allude to."

Mr. J. Ramsay MacDonald, M.P. :—"The men did not agree to accept any report the Commission issued. The Government specifically stated that they reserved the right to accept, reject, or amend."

Mr. Appleton, secretary of the General Federation of Trade Unions, in conversation with a reporter, insisted that this was not the time to repudiate the Board of Trade announcement that both sides had agreed to abide by the findings of the Commission. "Such repudiation as is now offered," he said, "cannot be effective. The leaders of the men should have made their protest immediately the Board of Trade announcement became public."

PROPOSED GOVERNMENT ACTION.

Tuesday was the first day on which the House of Commons sat after the recess, and among the first business was a number of questions to ministers on current railway matters.

Mr. Charles Bathurst (Wilton—U.) asked the President of the Board of Trade whether he realised that the encouragement recently given by the Government to amalgamations of and working arrangements between British railway companies and the consequent withdrawal of competition had caused apprehension among farmers and smallholders as to the possibility of an increase in the rates charged for consignment of agricultural produce proving destructive to their industry; and whether prior to the introduction by the Government of legislation to repeal Section 1 of the Railway and Canal Traffic Act, 1894, and thereby further to increase the burden thrown upon agricultural industry, he would take steps to ascertain the effect of such legislation upon agricultural production and employment in rural districts.

Mr. Buxton (President of the Board of Trade)—There is no intention to propose legislation to repeal Section 1 of the Act of 1894. I hope next session to introduce a Bill to deal with certain matters referred to in the report of the recent Committee on Railway Amalgamations and Agreements, and, incidentally, to carry out the assurance given by the Government at the time of the railway dispute settlement. I shall, of course, be glad to consider any representations bearing on this matter from any source, but I wish to take this opportunity of correcting a misapprehension which apparently exists as to the nature of the assurance I have referred to. There is no proposal to permit a railway company to increase its maximum charges, or to dispense with the obligation to justify an increase within the maximum if challenged. All that is proposed is to make it clear that in such an event an increase in the cost of labour, owing to improved conditions for the staff, would, if established, be a valid justification for a reasonable increase of charges.

Mr. Remnant (Holborn—U.)—May I ask the right hon. gentleman whether, at the time that statement was made, both sides agreed to be bound by the result of the Conference?

Mr. Buxton—That does not arise.

Mr. Clynes (Manchester, North-East—Lab.)—Has one effect of the amalgamations and working arrangements referred to in the question been a considerable reduction in the number of railway servants without any corresponding increase in the wages of those who are left?

Mr. Buxton—I do not think that arises out of the question. If my hon. friend gives me notice, I shall be very glad to answer that.

Mr. Cooper (Walsall—U.) asked the Prime Minister when the Government were first informed of the dissatisfaction of the Trades Unions with the Conciliation Board Act of 1907.

Mr. Buxton, who replied, said: It is not possible to fix the first date at which any criticisms of the Conciliation Scheme of 1907 came to the notice of the Board of Trade, but various suggestions for future amendment in points of detail were put before them by deputations from certain Railwaymen's Unions towards the end of last year.

Mr. Cooper—Is the House to understand that the Government were quite aware, previous to the railway strike of last August, of the dissatisfaction of the workers on the railways with the Conciliation Board Act of 1907?

Mr. Buxton—There are various questions in reference to it which have been brought to the notice of the Board of Trade and to which they have given their best attention.

MR. HARDIE'S ALLEGATION.

In the House of Commons on Thursday, Viscount Wolmer (Newton—U.) asked the Prime Minister whether the Government promised that the Royal Commission appointed to investigate and report on the working of the Railway Conciliation and Arbitration Scheme of 1907 should be so constituted that a report making recommendations in a certain direction should be assured.

Mr. Asquith—No, sir.

Viscount Wolmer—Is the right hon. gentleman aware that Mr. Keir Hardie has made allegations to that effect?

Mr. Asquith—I know nothing about it. The allegation is totally unfounded. (Ministerial cheers.)

Mr. Keir Hardie (Merthyr Tydvil—Lab.) made a personal explanation on the matter. He said he presumed that what Lord Wolmer referred to was a statement contained in a pamphlet written by himself, in which it was stated that the Commission as to the railway dispute would be loaded so as to make sure of its findings being in favour of the men. He (Mr. Keir Hardie) gathered from the men that the Government was in favour of recognition, and he assumed from that that in appointing the Commission they would follow the usual precedent of appointing men who were known to be of like mind. (Laughter and "Oh.") The Unionists appointed a Commission in 1905 to consider the state of the law as it had been affected by the Taff Vale decision, and in constituting that Commission they appointed members who were known to be in favour of the policy which the Government of that time favoured. (Opposition cries of "No, no.") The Government, in appointing a Committee or a Commission, if it had an opinion of its own, naturally took steps to secure that opinion having effect. (Laughter and "Oh.") The term "loaded" was apt to be misunderstood as having some sinister meaning. (Opposition laughter.) All that he intended to convey by the word was that the Government itself being in favour of recognition, was appointing members of the Commission who were known to hold the same opinions. The report of the Commission, however, showed that that was an erroneous impression. (Opposition laughter.)

"PEACEFUL PICKETING."

Sir F. Banbury intends to introduce a Bill in the House of Commons next week to amend the Trade Disputes Act, 1906. No progress can, in the state of business, be made with it this year. Mr. Basil Peto is to question the Prime Minister on Monday on the subject of picketing and on his views as to a memorial from 65 associations of employers proposing a change in the law.

THE IRISH RAILWAY STRIKE.

Mr. Birrell, Chief Secretary for Ireland, replying to Earl Winterton (Horsham—U.), said that the Lord Lieutenant was in Dublin for seven days during the recent railway strike, and the Chief Secretary for two days.

Answering further questions by Earl Winterton, Mr. Birrell said that no statement was issued to the press by the Under-Secretary for Ireland during the railway strike. Some newspaper persons intruded themselves on the Under-Secretary's notice and asked for certain information, which he gave them. Next day he saw an interview which was alleged to have taken place between these gentlemen and himself—it was a wholly garbled version of what never took place. (Loud laughter.) This garbled version of an alleged interview now appeared in the noble lord's question as a statement issued to the press. No such statement was ever issued.

LABOUR TROUBLES TO BE DISCUSSED IN PARLIAMENT.

In the course of a debate in the House of Commons on Tuesday on a motion for taking all the time of the House for Government business during the remainder of the session,

Mr. Asquith, the Prime Minister, said that as regarded the administrative action of the Government in the labour troubles, he was most anxious that the House should have an opportunity, if it desired, of entering upon these matters. It was difficult to promise a specific time for discussion when they had no notice as to the manner in which it was to be initiated and the form it was to take. Mere discussion in the air was a very unsatisfactory thing. If those interested in initiating discussion would give notice to the Government of the form in which they desired it to be put forward there would be no indisposition on the part of the Government to give a day for the purpose. He thought, however, that in the interests of everybody concerned before such discussion was initiated full time should be given for the consideration of the report in all

its bearings. As it was not a matter either of legislation or administration, it was not therefore a matter where the Government as a Government were directly concerned. It was a series of recommendations made by an authoritative and impartial body to the railway companies on the one side and the employees on the other, and primarily therefore it was a matter for these interests to consider how far they were prepared to adopt it. He was not sure whether Parliamentary discussion at this stage was desirable, but if on consideration there was a general disposition in the various quarters of the House to have the matter ventilated it would be impossible for the Government to refuse the opportunity.

The *Railway Review*, the organ of the Amalgamated Society of Railway Servants, alluding to the repudiation by the men's representatives of the statement published by the Board of Trade, that both sides agreed to accept the findings of the Railway Commission, in this week's issue publishes the following:—

"An effort is being made to discredit the railwaymen in certain quarters by the suggestion that they gave their word that they would accept the findings of the Royal Commission, whatever they might be. As a proof of this the official announcement of the Board of Trade on the settlement in August is quoted. This says: 'Both sides agree to accept the findings of the Commission.' It is unfortunate that this statement was not challenged at the time, as it was certainly not correct. No such undertaking was given, nor, so far as we can learn, was it asked for. It was apparently assumed, and one of the men's witnesses before the Commission stated it as a fact—but he had no authority for doing so. There would and could have been no motive for deciding to call the joint executives together if this had been the understanding. The matter is one which will require the most careful deliberation, and we have no doubt the meeting will realise the gravity of the crisis."

ALLEGED PREFERENTIAL RAILWAY RATES.

After a three days' hearing the Railway and Canal Commission on October 20 reserved judgment in an application by Messrs. Chance and Hunt, Limited, chemical manufacturers, at Oldbury and Wednesbury, who allege that the defendants, the Great Western Railway Company, charged the applicants for station accommodation terminals and cartage—services which they did not require, and had also given undue preference to a number of competing firms. The applicants further said that they were owners of canal wharves at Oldbury and Wednesbury, from which, for the convenience of the defendants, they despatched goods in their own tank wagons, and the defendants illegally charged for the wagons as well as for the goods. The amount in dispute was about £7,500, and it was estimated that during the same period £2,500 had been overpaid by customers. The London and North Western, the Midland, and the North Staffordshire Railway Companies were included as defendants, and the applicants asked the Court to make orders against the defendants for damages in respect to the alleged overcharges; for rebates to be granted in respect to the terminal and other services; and for discontinuance of the alleged undue preferences.—The defendants denied all the allegations, and said they gave the applicants very favourable terms.

RAILWAY CONTRACTS.

The Great Central Railway Company have placed an order with Earle's Shipbuilding Company, Hull, for two new steamers specially adapted for the ferry traffic between Hull and North Lincolnshire.

Victoria Railways Department has accepted the tender of Siemens Bros. Dynamo Works for a 5-ton electric crane at £144 5s.

Messrs. Logan and Hemingway, who have already in hand the contract for the major portion of the new line which is to link up the Hull and Barnsley Railway at Gowdall with the Rotherham, Maltby, and Shireoaks line at Micklebring, have secured the contract for the shorter northern section, which will be about 8½ miles in length. This will leave the Hull and Barnsley main line at Gowdall, and proceed by way of Pollington and Sykehouse to Throp-in-Balne, where it will join the section now in process of construction.

The Railway Clearing House.—Mr. H. A. Watson, general superintendent of the North Eastern Railway, has been appointed chairman of the Superintendents' Conference for the ensuing year, and Mr. Henry Evans, goods manager of the Midland Railway, has been appointed chairman of the Goods Managers' Conference.

RAILWAY STUDENTS' UNION OF THE LONDON SCHOOL OF ECONOMICS.

PRESIDENTIAL ADDRESS BY MR. SAM FAY.

At the opening session of the Railway Students' Union of the London School of Economics on Tuesday last, Mr. Sam Fay, general manager of the Great Central Railway, delivered his presidential address, the full text of which we give below:—

First of all I must take this the earliest opportunity of thanking you for the honour you have done me by the invitation to succeed Sir George Gibb as president of your union. Believe me, I value highly the compliment you have paid me and, although I can scarcely hope to emulate a practised speaker like Sir George in the way of a presidential address, yet I will ask you to extend to me your indulgence in venturing to follow his lead.

A presidential address in the ordinary course as delivered to a students' association of any sort usually takes the form, more or less, of a homily or advice as to the life work of the members of the union or association, but for two reasons, if not for others, I will refrain as much as possible from inflicting advice upon you. I will explain why:—If you were in middle age I might venture to admonish you. If you had passed that stage like myself I should not hesitate, because I should know that you would badly need it, and, that recognising your need, you would probably take it very kindly, but most of you are only just over the threshold of the career you have chosen. You are in that delightful time through which those who are now engaged in the administration of railways have passed. The delightful time which has been described as "the cocksure age." Any advice therefore would, I think, be superfluous.

Secondly, advice of any value at all can only be given as the result of experience. I feel that my 40 years of railway life can be of little guide to you, and I will give you the reason. The problems I have had to solve, the difficulties I have met, are very unlikely to be repeated in the instance of any member of your union. The hackneyed phrase "the world is ever changing" is accentuated in these latter days, in that greater change takes place now in, say, five years than was the case in 10 years or even more 40 or 50 years ago. In nothing is this more apparent than in matters affecting the transportation industry. The problems you will have to solve, the obstructions you will meet, will differ widely from those in the days of construction; in the years of growing competition between the railways and the strengthening of Government control which have been, one may say, the principal movements in my time. Any experience of my own, whilst perhaps interesting as a mere matter of history, would not be of much assistance to you in the time before you. For these reasons I would rather, in any remarks I make, indicate a particular line of thought in connection with some sections of railway enterprise, than dogmatise.

WORK OF THE FUTURE—THE PHYSICAL ASPECT OF RAILWAYS.

Let us look at what is ahead. Let us forecast, if we can, the railway work of the future. Let us take first the physical aspect of the railways. These is little prospect of any extensive opening out of new competitive routes in this country, and but for a few comparatively short lines here and there the railway system may be considered complete. In the towns, more particularly in the great industrial centres, the lines are being hemmed in more and more by factories, works and buildings. Hemmed in as completely and as effectively as were the old canals hugged by manufactories which sought their banks for the facilities they afforded. History repeats itself over and over again; the cities of the world have grown and decayed as they were favourably or unfavourably situated along the great highways of trade. On a smaller scale this has been the case in our own island. The great inland manufacturing towns could not live, their industries could not exist, their population could not be fed but for the main lines of railway running through them, and the very agency by which they grow and thrive threatens to become more or less stifled by the pressure of their enterprise and of their development upon a necessarily circumscribed area.

In view of the continuous increase, more particularly of heavy and slow moving traffic, it is obvious that some great change must take place, before many years are over, in traffic operation, and in addition there must be extensive avoiding lines, so-called. To knock down large works and disturb existing business houses on any large scale is quite out of the question. In some instances sections of existing lines may have to be given up entirely to goods and mineral trains, in others the reverse may be the more desirable course, and the passenger services may be continued by means of the existing

lines and others built for goods and mineral business. But before the large, the very large, capital expenditure necessary to carry out these extensions is sanctioned, the exercise of all possible ingenuity will be expected from those who are responsible for traffic manipulation.

This is one of the problems that you as the rising generation will have to tackle. Science in the shape of improved signalling and locomotive power will come to your aid, as science always does, but you must let science know exactly what you want and in what direction help is to be applied.

The invention of the steam railways has proved to be one of the greatest institutions which man's inventive genius has brought to the human race, but I do not see much prospect of a greatly increased efficiency from the steam locomotive engine apart from the economy to be effected by super-heated steam, quite a recent invention, by the way, as applied to the locomotive. Super-heated steam takes the shape really of turning the steam engine into a gas engine, the saturated steam hitherto used being so heated as to become a gas upon its entry into the cylinder. This has been the only really notable improvement in the locomotive since Stephenson's time. True, engines have grown in size; they have been glorified, so to speak, by paint, powder and puff, but their economical efficiency has been increased by little. They have kept scores of draughtsmen constantly employed in tracing alterations and "claimed" improvements. The funnel has changed in shape with the regularity almost of ladies' head-gear. Hundreds of patents have been registered and have died at the retiring age of their parents.

For all these, the stores which the locomotive consumes in coal, water and oil produces no better economical result comparatively than older engines. I am not saying this by any means for the purpose of disparaging the locomotive engine. It has been a wonderful and faithful servant; it transformed the face of the earth in the nineteenth century, and its presence has brought about a demand that will before many years are over become a necessity for something more easily handled in station and yards; something more facile; something always ready; a machine that will respond at a touch; a machine that will not require water or coal at the moment when it is most wanted; a machine that will not eat or drink when it is doing nothing in the shape of earning sovereigns. Some more perfect agency that will meet the conditions and congestions for which the invention of the steam locomotive is responsible.

The near future may see electricity or some other power so developed and cheapened that from central stations it may be distributed over the railway lines, furnishing not only power for locomotive purposes and heat and light for stations and depôts, but may at the same time in the best possible form meet the needs of communities and of manufacturers and industries right and left of those lines throughout the length and breadth of the land. This is one line of thought for you on the physical side of the railway.

RAILWAYS AND THE STATE.

Now for a moment or two let us look at the relationship of the railways to the State and the public. I have been a fairly diligent student of railway history, and spent many hours as a young man in the National Library looking up early records, and although I had a fair notion of what was meant by the oft-quoted critic's prayer: "Oh, that mine enemy would write a book," I did venture in 1880 to write a history of the South Western. Since that time I have for other reasons had to dive into history, more particularly that appertaining to evidence of various Commissions and Committees appointed by the Government of the day. Through the mass of detail contained in those reports there have always appeared to me to be two great interests looming up and directing the course of legislation, the direction of railway enterprise and the relationship between the public and the companies.

At the inception of steam railways the landowning element was paramount in Parliament. The law, the power to make or mar the new means of transport, was in their hands and they and their satellites did not scruple to make use of their advantage even to the breaking point. The prices paid for land and compensation in various forms; the surveyors', land agents', lawyers' and promoting engineers' charges, and the costs of obtaining Acts from Parliament were such that between them they managed pretty well to smash up the growing edifice in less than 20 years of its foundation. The railway mania of 1845 called a halt. Subsequent Commissions drew attention to these things, but practically nothing was done to stop abuse. The extravagant capital expenditure imposed by the then governing class remains and interest upon it must always remain as a charge upon the people and industries of this country.

Following the land-owning legislature came the trading and

the manufacturing Member of Parliament. He became the growing political force and quickly called attention to the need for moderation of charges in his own particular interest. Competition and the benefits thereby accruing to traders was the burden of his song and competition was encouraged in every way. The antipathy between exorbitant capitalisation with its consequent liability to meet interest upon it and low charges for the use of railways was lost sight of, and the piling up of capital continued without check, less only the reduction brought about from time to time by the purchase of small lines by large companies at scrap price. Enquiries, followed by Parliamentary action, have been undertaken from time to time to regulate or stereotype rates and charges. Imperial and local burdens have been increased, but still the interest upon the inordinately high capital remains and, as I have said before, must remain.

An effect of legislative action in one direction and inaction in another, which should not be overlooked, was the construction of through and branch lines in a vast network throughout the country. Many of these would certainly not have been made had there been a fixed design of railway construction for national purposes as a whole. No doubt from a public point of view this is all to the good, disastrous as the result may have been in many cases to individual investors in railway securities.

Contemplation of the two great factors I have named which have influenced legislative and administrative action is, I think, necessary to arrive at a clear conception of the present situation and its probable future drift.

DANGER OF UNINFORMED PUBLIC OPINION.

The dangers to railways as well as to business and all who live by railway enterprise lies more in uninformed public opinion than in any mistaken action that may be taken by the railway companies. Time was when railways were looked upon as private properties run for private gain only, but I doubt if any railwayman to-day, excepting perhaps some back number who is hanging on to remind us of our past, regards railways as private in the sense that a shopkeeper's business is private. The railways are private on the financial side alone. The shareholders who have found the capital expect their dividends in the same way as holders of Consols would expect interest if the Government took over the railways and issued Consols on account of the purchase, but even on the financial side they are controlled by specific Acts of Parliament. They are public in that everybody has a right to use them upon terms not exceeding charges fixed by legislation. They are common carriers. They assume serious public responsibilities and their acts and duties are regulated by the legislature. The work of their officers and servants is public work in precisely the same sense as is the work of officers and servants of the Post Office.

Railways are always open to public criticism, but I do not think they are criticised more in this country than elsewhere. Rowland Hill stated in a minority report to the Commission of 1865, that while railways have notoriously conferred enormous benefits upon the public they have not been consoled by public gratitude, their services being little commended whilst their failures are visited with severe animadversion and made ground of heavy penalty.

This goes to show that railways have always been looked upon as miserable sinners. Even miserable sinners may by supplication, by sound reasoning on economic principles, by giving a searchlight view of the relations that exist between the railways and the public, at any rate mitigate, if not entirely dispel, any unreasoning hostility to the industry you and I serve. In the days to come you will doubtless have to meet waves of organised prejudice.

This is the second line of thought I would commend to your consideration; the desirability to prepare and equip yourselves to meet future lack of confidence in the fairness of the railways by clear ideas of their duties as well as their rights, so that when a vociferous propaganda is upon you you may demonstrate beyond doubt that the interests of the railways and the people served by them are identical. That injury to one reacts upon the other. That a brick cannot be thrown at a neighbour's greenhouse without risk to the gardener. That every missile hitting a railway bruises also the employee as well as the manufacturer who supplies its stores, whilst at the same time it tends to adversely affect public facilities. That there is nothing to fear from a thorough discussion nor from frank recognition by the public and the companies of their interdependence. That the subject should be treated and discussed upon business lines and not as a political question. That you are prepared to remedy abuses if such are found to exist. That the division of values as between the public, the shareholders and the employees, whilst not necessarily equal, should, in all circumstances, be equitable. That with everything required

by railways fluctuating in price the immutability of rates and charges must now and again bump up against the flexible cost of wages and material, or to put it another way, the flexible will bump up against things that are fixed and immutable.

Now let us give a moment to one or two other questions. I had thought of devoting some time to the subject of the relationship between railway companies and their employees, but have come to the conclusion that under the existing circumstances, when things are more or less in the melting pot, it would be better to defer any suggestions on that controversial subject except to say that there is no question upon which you can more profitably employ your study than that of the proper relationship between the railways and the staff.

STATISTICS.

I should like to say just a word upon statistics. I understand you are more or less fed up on statistics and think it is well that you should be so fed up because your digestion will then be the more likely to reject any particular type likely to be of questionable value. I, too, have been fed up on statistics, and have coughed up a good many of them. It really matters very little what I may say or what Mr. Acworth and others who have given much time and thought to the study of railway figures may pin their faith upon. What will happen, I doubt not, when you come to make practical use of statistics is that you will discard all those you may discover to be of no practical value. What is important is that the figures you use should represent facts and facts alone. They should not contain estimates nor figures prepared to make up a predetermined result. There is a lurking lie in most figures, and you will soon discover that unless you eliminate all untruths you will be woefully misled when you apply and act upon them in railway business. Good reliable statistics are absolutely necessary in railway management, but you will not, I feel sure, seek to compile masses of figures simply for the sake of gloating over them.

ADVANTAGES OF THE RAILWAY STUDENT OF TO-DAY.

Gentlemen, you have discovered ere this that the field of your activities is wide enough for the appetite of the most avaricious worker. You will gather, if you have not already done so, that the railroad is a school in which one's education is never completed. You have distinct advantages over the generation whose places you will fill in that you have at this admirable institution an opportunity of theoretical training until recently denied to railway men. The assistance given by the companies in this direction has in the past been pitiful, and those companies who complain most of the dearth of capable men are those who have done the least to train their staff to meet official vacancies; but a new spirit has been awakened, and in addition to what is being done here, at some of the provincial centres work has been started, modelled on the lines of the London School of Economics, which will doubtless prove invaluable to railwaymen who are unable, by reason of their location, to avail themselves of the assistance this institution offers.

Here in the railways is a vast organisation entering into the daily life of the community, transporting the people both of high and low degree from place to place with speed and in safety. Conveying raw material to the manufacturer; the finished article to the ports and the home retailer; providing the means by which the daily food reaches the people's homes and administering to their wants in a great variety of ways. In addition to operating railway lines this organisation commands long lengths of canals, a fleet of some 200 steamships, many well-equipped hotels, some of the most important docks in the country, numbers of wharves and warehouses outside the railway limits, and over twenty thousand horses and road vehicles. There is no business in which more people are fundamentally interested than that of railways, and yet until just recently no real attempt was made to train men for the work of supervision in this all-important service to the nation. However, as I have already said, a new spirit has been awakened and many minds are bent upon schemes and systems of training to make up, if possible, for neglect in the past. What is needed is to give numbers of men the opportunity of study to fit themselves for the higher offices regardless of their present positions. The railway service is one of the most democratic the world can show despite evidence of stray instances of nepotism here and there, and this is proved by the record of the men who have risen from the lowest ranks to the highest. It follows Napoleon's dictum, "an open career for the talented."

Modern conditions demand a speeding-up on railways as in other walks in life. It is necessary that the staff should be equal to, if not that they should compete with, the chief industrial establishments, and this will be equally essential if the

railways are owned by the State, because the State would fail hopelessly if it had not trained men to follow in the footsteps of those who are now supervising railway work. I commenced by saying I would not dogmatise and yet here I find myself departing from the precept I myself laid down.

I have referred to the advantages of study which you enjoy. I have endeavoured to faintly sketch future probabilities as well as the opportunities the railway service offers. At the same time I know those who enjoy the training you have here and elsewhere will not get all the prizes in the service. There will be men in the future as in the past who by reason of force of character and talent, and without special training, will forge ahead; yet I am convinced that the work you are putting in here and the similar efforts your colleagues are making in other parts of the country will well repay you and them, and that you will have every reason in your later years to be glad and to thankfully acknowledge the help your studies have been to you in your life's work.

DIVIDEND ANNOUNCEMENTS.

ALBERTA RAILWAY AND IRRIGATION.—The directors recommend a dividend of 5 per cent. upon the share capital.

LAUDER LIGHT RAILWAY.—The directors recommend a dividend at the rate of 1 per cent. per annum, carrying forward £192.

CATHCART DISTRICT RAILWAY.—The directors recommend a dividend at the rate of 2½ per cent. per annum, carrying forward £369.

GREAT WESTERN OF BRAZIL.—An interim dividend at the rate of 6 per cent. per annum, less income tax, on both the preferred and ordinary shares.

ST. LOUIS SOUTH WESTERN RAILWAY.—After providing for dividends amounting to 4 per cent. on the preferred stock, there remains a credit balance of \$5,110,718.

BOLIVAR RAILWAY.—At the rate of 5 per cent. on the preference shares for the year ended June 30, placing £5,675 to reserve for renewals, and carrying forward £4,981.

INDIA GENERAL NAVIGATION AND RAILWAY.—The directors have declared an ad-interim dividend of 2½ per cent. on the preference and 2½ per cent. on the ordinary shares, payable on November 20. This is the same as last year.

SOUTH INDIAN RAILWAY COMPANY.—The directors have decided to recommend payment on January 1, 1912, of the guaranteed interest of 1½ per cent. and the guaranteed surplus profits of ½ per cent., or 2 per cent. in all, for the half-year to December, 1911.

KENT AND EAST SUSSEX RAILWAY.—The directors have declared a dividend at the rate of ¾ per cent. per annum on the ordinary shares for the half year ended June 30, placing £30 to the reserve and £30 to the depreciation and renewal of rolling stock fund, leaving £24 to be carried forward.

BURMA RAILWAYS.—The directors have resolved that a final distribution of £1 5s. per cent. be recommended on account of surplus profits for the year ended June 30, which, with the ordinary dividend of 15s. per cent. paid on July 1, is equivalent to £2 per cent. for the year. The total surplus and guaranteed interest thus make a total yield for the year of £4 10s., less tax.

GREAT INDIAN PENINSULA RAILWAY.—The revenue accounts having been passed by the Government for the half-year ended June 30, the directors propose to recommend that a dividend of 11s. per cent. be declared out of surplus profit for the year ended June 30, on the 3 per cent. stock in addition to the guaranteed interest, making a total distribution of £2 1s. per cent. for the half-year, less income-tax.

Railway Classes at the School of Economics.—The Committee of Governors on Railway Subjects at the School of Economics and Political Science (London University), comprises Sir Charles J. Owens (L. and S.W.R.), Mr. W. M. Acworth, Mr. Dent (S.E. and C.R.), Mr. Fay (G.C.R.), Sir George Gibb, Sir W. Guy Granet (M.R.), and the members of the Council of Management. The subjects of the lectures are:—"Railway Rates and Fares," "Railway Organisation," "Railway Economics—Operating," "Railway Economics—Commercial," "European Railways," "The Law of Carriage by Railway," "The Railway (Accounts and Returns) Bill, 1911," "Claims for Compensation on Railway Companies," "Railway Agreements and Amalgamations," "Accounting and Business Methods," "Economic History," "First Principles of Statistics," "Mathematical Methods of Statistics."

MEETINGS AND REPORTS.

FORTHCOMING MEETINGS.

- Oct. 30 (Mon.).—**Buenos Ayres Midland Railway** (Annual), River Plate House, E.C., at 12.
- Nov. 1 (Wed.).—**San Paulo (Brazilian) Railway** (Half-yearly), Terminus Hotel, Cannon Street, E.C., at 1.
- Nov. 1 (Wed.).—**Taltal Railway** (Annual), River Plate House, E.C., at 12.30.
- Nov. 2 (Thurs.).—**Buenos Ayres and Pacific Railway** (Annual), Winchester House, E.C., at 12.
- Nov. 2 (Thurs.).—**Villa Maria and Rufino Railway** (Annual), Dashwood House, E.C., at 2.30.
- Nov. 3 (Fri.).—**Bahia Blanca and North Western Railway** (Annual), Winchester House, E.C., at 11.30.
- Nov. 20 (Mon.).—**Bahia Blanca and North Western Railway** (Extraordinary), Winchester House, E.C., at 12.30.
- Nov. 20 (Mon.).—**Buenos Ayres and Pacific Railway** (Extraordinary), Winchester House, E.C., at 12.

(Reports, Traffic Returns, Prospectuses, and all other items of financial intelligence should be sent as early as possible to the Editor of THE RAILWAY TIMES, 12, Norfolk Street, London, W.C. Telephone, 2948 Gerrard. Telegraphic address, Altimetry, London).

GRAND TRUNK RAILWAY OF CANADA.

The ordinary half-yearly general meeting of proprietors of this railway company was held at the City Terminus Hotel, Cannon Street, E.C., on Thursday, October 26; Mr. ALFRED W. SMITHERS (Chairman) presiding.

The CHAIRMAN: The secretary will read the notice convening the meeting.

The SECRETARY (Mr. H. H. Norman) read the notice accordingly.

The CHAIRMAN: Ladies and gentlemen, the report of the working of the Company for the half-year ending June 30 last has been sent to you, and with your permission, before moving its adoption, I will give you, as shortly as I can, a review of the position and prospects of your property at the present time. I said last year at this time, that when all the railways of the world are being pressed by high prices for all they use, and by the cost of high wages, it is something if the management is able to maintain the position already won. I was, happily, able to tell you on that occasion that we had not only been able to do that, but that we were able to pay in full the half-year's dividend on the second preference stock, which we had not been able to do in the first half of the year since 1907. Ladies and gentlemen, although we have been unable to make an advance on that improvement, I am glad to say that, notwithstanding the heavy increase in expenses, we have been enabled to maintain it, and we have been able to do this owing to the very satisfactory increase in the gross earnings. The increase in the gross earnings of the Grand Trunk proper for the half-year was, in round figures, £239,000. The increase in the working expenses was £172,000, but to this has to be added increased charges for interest, increased debits on the Canada Atlantic Railway and the Detroit Grand Haven and Milwaukee Railway owing to increased working expenses, and, in the case of the Canada Atlantic Railway, of a small increased interest charge. You will see in paragraph 7 of the report what are the principal items which have gone to make up the increase in working expenses. There is an increase under the head of "Maintenance of Way and Structures" of £30,000 odd, and an increase of £7,500 under the head of "Traffic Expenses," which amounts are almost exactly balanced by a decrease of £38,000 odd in "Maintenance of Equipment." The large increase of £172,000 you will see comes under the last three headings in the table—"Conducting Transportation," £168,000; "General Expenses," £3,000; and "Taxes," £1,100. Of the amount of £168,000 under the head of "Conducting Transportation," the large sum of over £100,000 has gone directly in wages, and the balance, which has gone in increased fuel and other supplies, as detailed in the accounts, has been also swelled indirectly by the increased wages, which is the main element in the increased cost, not only in working the railway directly, but in the many and various supplies a railway has to purchase. We can only be thankful that again the growth of prosperity in Canada has enabled us to meet these additional heavy charges without going back on the

position we have already secured. Indeed, the percentage of working expenses, on the whole, are a trifle under what they were in the corresponding half-year of 1910. You will observe that 18 Pacific-type passenger engines, 5 first-class cars, 12 freight engines, and 840 box-cars have been built or purchased at the cost of revenue during the half-year. On capital account the expenditure amounts to £332,000, the chief items being £112,000 for new works and £205,000 for new rolling stock. Of the amount of £112,000 for new works, the principal charge is £82,000 for the grade separation from Toronto to Mimico, a work forced upon us by the ruling of the Railway Commission. The item of £205,000 for new rolling stock is for 1,000 new 50-ton steel coal cars.

The Grand Trunk Western net revenue balance at June 30, 1911, shows a deficiency of £31,000, but as this arose from the exceptional conditions caused by the strike, we felt quite justified in carrying the amount forward, and we expect the balance will be easily liquidated out of the Grand Trunk Western earnings during the current year. Already in the first two months a balance towards this result of £13,200 has been accumulated. In the Act to which you gave your assent at the last general meeting, guaranteeing the bonds of the Grand Trunk Western Company, by an oversight in drawing up the Act only the interest was guaranteed, and not the principal, as was intended. This has now been formally remedied by an Amending Act, to which you will be asked to give your assent to-day. Of course, the Grand Trunk Western Railway is an integral part of your system, connecting it with Chicago, and it is to our interest to finance it on the best possible security, and to effect this it is necessary to do what was always intended.

With regard to the issue of scrip certificates in exchange for registered certificates of the ordinary stock of the Company, we shall be prepared to issue them on January 1 next. (Hear, hear.) The certificates will be on the Montreal register, and stamp duty will be payable on them before they can be negotiated in this country. Shareholders who are desirous of making the exchange may deposit their registered stock certificates at the office of the Company, Dashwood House, New Broad Street, on or after January 1 next, and the new certificates, which will be prepared in Montreal, will be ready in about a month from the date of deposit.

PROGRESS OF THE GRAND TRUNK PACIFIC.

Ladies and gentlemen, I left London on July 29, to accompany Mr. Hays on our annual tour of inspection of your property, and I returned to London on October 10; the time occupied, of course, increases every year with the extension of the properties in which you are interested. We started our journey this year from Portland, from that point to Montreal, from Montreal to Ottawa, Ottawa to North Bay, via Scotia Junction, North Bay to Cochrane, which is the nearest point on the Government portion of the Transcontinental Railway to the Grand Trunk system at North Bay. We travelled on the new line, which is being constructed by the Government, 55 miles west of Cochrane, and 25 miles east. From Cochrane east towards Quebec the line is laid for about 95 miles and graded for another 55 miles further. From Cochrane west—and this is rather important—towards Lake Superior Junction the line is laid for about 135 miles, and from Lake Superior Junction east towards Cochrane the line is laid for 50 miles and graded for another 100 miles, leaving a gap of about 200 miles to connect Lake Superior Junction with Cochrane, and thence via the Temiskaming and Northern Ontario Railway with the whole of the Grand Trunk system. This, I think, will be accomplished at all events by the year 1913. After spending considerable time inspecting various points on the Grand Trunk proper, we went by steamer up Lakes Huron and Superior to Fort William, where, as you know, we shall bring the produce of the North-west over the Grand Trunk Pacific Railway during the season of navigation. I explained last year our position at Fort William, and the expectation then held out that we should be able to locate new industries there already bids fair to be realised. Our branch line from Fort William to Lake Superior Junction is in good order, and the Government section between that point and Winnipeg, which we took over under special arrangement with the Government last year, is now in a much improved condition, and the soft spots which were troubling us last year have filled in, and we travelled over the line in quite a satisfactory manner. The Union Station at Winnipeg is completed,

and Mr. Chamberlain, the vice-president and general manager of the Grand Trunk Pacific Railway, and his officers, occupy the offices on one side of the building, and the Canadian Northern officers occupy the other side. We went from Winnipeg to Edmonton, and from Edmonton to Vancouver via Calgary. The crops everywhere were showing a most wonderful growth, but were retarded as to ripening owing to the rather wet summer which has prevailed this year over the North-west. There is a notable increase in the number of cattle, and we saw none which were not fine animals, and in fine condition. From Vancouver we went by steamer to Prince Rupert. The inhabitants of Prince Rupert have been very busy erecting houses and other buildings, and also road making, the latter a big task, but nothing daunts their energy, and I have no doubt that by the time the Grand Trunk Pacific Railway gets through a very considerable city will greet the eyes of the first arrivals by train. Last year we went east from Prince Rupert 60 miles on the new line; this year we went 100 miles to Van Arsdol. A tunnel partly constructed beyond this point had to be abandoned, and a new one is in course of construction. When this is completed in November next, the rail will be laid through to the crossing of the Skeena River below Hazelton. From Van Arsdol we went by steamer up the Skeena River, the grade of the new railway being in sight all the way, following the north bank of the river, and only waiting for the steel to be laid, which will be done as soon as the tunnel is through. The bridge across the Skeena below Hazelton is a work of some difficulty, but Mr. Stewart, the contractor, thinks it will be completed about next May. After crossing the river at this point the line runs nearly to Hazelton, and then follows the Bulkley River, which falls into the Skeena close to Hazelton. The distance from Van Arsdol, the present end of track, to Hazelton is 85 miles, from Hazelton to Aldermere the distance is 60 miles, on which considerable work has been done. From Aldermere to Tête Jaune Cache is a distance of 410 miles, and the contract for this section was let to Messrs. Foley, Welch and Stewart during our stay at Winnipeg, thus putting the whole of the line under contract. From Hazelton, which is an old and important post of the Hudson Bay Company, we returned to Prince Rupert and Vancouver; visited Victoria, the capital of British Columbia, where we met Mr. McBride, the Premier of that important province. From Victoria we made our way back to Calgary and Edmonton. From Edmonton we proceeded westerly on the Grand Trunk Pacific Railway to Edson. Last year the line at this point was in a very soft condition, but it is now in good order, and we travelled well all the way. Since last year the line has been continued to Fitzhugh, the second divisional point west of Edmonton, 105 miles west of Edson, 1,027 miles from Winnipeg, and nearly 1,500 miles from Fort William. Between Edmonton and Fitzhugh the line crosses, on big steel bridges, the Pembina River, Wolf Creek, McLeod River, Prairie Creek, Fiddle Creek, Rocky River, the Athabasca River, and the Snaring River. Fitzhugh is just at the commencement of the Yellow Head Pass, and 18 miles from the summit. We arrived there on a Saturday evening, and at 6.30 on the following morning we started to drive along the contractors' trail to the summit, which necessitated a climb of nearly 1,000 ft. along the side of the pass, from which we could see the grade of the new line winding round the base of the mountains on the other side of the valley. We arrived about mid-day at the engineers' camp one mile beyond the summit, which is 3,750 ft. above the sea level. This is the highest point the railway will have to cross. The rise is so gradual that the trains will reach the summit without the ascent being noticeable to passengers. From the summit to Tête Jaune Cache considerable work has been done, and the contractors expect the line will be laid to that point in the spring of next year, leaving the 410 miles of which I have already spoken to be built to complete the whole of the line from Tête Jaune Cache to Aldermere. We returned next day to Edmonton, and the following morning started for Tofield, where we went down 100 miles of our new branch to Calgary, 50 miles further than last year. There are about 90 miles more to construct, and the work is being pushed on as rapidly as possible. We next went along the Prince Albert branch for 20 miles. Proceeding along the main line to Melville, we travelled up to Yorkton and Canora branch. Last year we travelled on this branch as far as Yorkton, 25 miles from Melville, the second divisional point from Winnipeg on the main line. This year we continued

over the completed portion to Canora, a further 30 miles. This branch is in good order, and passes through a fertile country, which is being gradually filled up by settlers. Returning to Melville, we went down the Regina branch. Last year we were able to go about 25 miles on this branch, this year we were able to travel all the way to Regina, a distance of 96 miles. Regina is the capital of Saskatchewan, with a population of nearly 20,000. It is a beautiful city, and bids fair to grow rapidly. This branch passes through a rich country, with good crops, and for about 15 miles the line runs through the beautiful Qu'Appelle Valley, rich in lakes and beautiful foliage. Our arrangements for passenger and freight terminals in this city are, I think, excellent. We returned to the main line, and thence to Winnipeg, and on to Chicago, whence we proceeded to Detroit over the Grand Trunk Western Railway, and then over various branches of the Grand Trunk proper to Toronto and Montreal.

To sum up, the new work which I have described, and which has been done since my visit last year, amounts to about 300 miles on the main line completed or graded, and over 400 miles on the branch lines. On the new lines which are ready for carrying traffic in the North-west, we continue running a local service on construction account to accommodate the public to the utmost of our power. It can, of course, only be a local service, as the same condition still cuts us off from our connection with the East—viz., the non-completion of that portion of the Transcontinental line which is being constructed by the Government, between Lake Superior Junction and Cochrane, which will connect the Grand Trunk Pacific Railway with the whole of the Grand Trunk system and its network of lines throughout Ontario and Quebec. I hope this connecting link will be finished within a year or eighteen months, and only when that connection is made shall we be in a position to realise some of the hopes which we entertained when we commenced this important addition to the Grand Trunk system. The development of Canada, up to date, since we began operations, justifies the belief that those hopes will be fulfilled. As you know, the purpose of the Grand Trunk Pacific Railway is to assist in opening up for cultivation and settlement the four North-west provinces of Canada—viz., Manitoba, Saskatchewan, Alberta, and British Columbia. As bearing on the prospects of these provinces, I call your attention to the following statistics: The population of Manitoba in 1901 was 255,000, to-day it is 454,000; the population of Saskatchewan in the same year was 91,000, to-day it is 453,000; the population of Alberta was 73,000, to-day it is 372,000; the population of British Columbia was 178,000, to-day it is 362,000. The population of the city of Vancouver has increased from 73,000 in 1901 to 100,000 to-day; Winnipeg, from 93,000 to 135,000. To come to the more recent, and, at present, smaller towns, Edmonton has increased in population in the same period from 2,000 to 25,000; Calgary to-day has 43,000 against 12,000 over five years ago; Regina, the capital of Saskatchewan, had in 1901 a population of 2,000, to-day it is 30,000. Saskatoon in 1901 was a village of 113 people, and to-day it has a population of 12,000, and there are many more growing towns showing the same proportion of growth. Turning to the older settled provinces in the East, where, doubtless, the reflection of Western prosperity has materially aided the progress of the cities of Ontario and Quebec, we find the population of Ottawa, the capital of the Dominion, has increased from 60,000 in 1901 to 86,000 to-day; Quebec, from 68,000 to 78,000; Toronto, from 168,000 to 376,000; Montreal, from 198,000 to 466,000, and the figures relating to many other cities in the East are equally encouraging. Immigrants arriving in Canada during the first five months of the current fiscal year numbered 212,800. Of these 141,000 landed at ocean ports, and 71,800 came from the United States, the total increase being 18 per cent. over the corresponding period of last year. The Bank Clearings for all Canada for 1909 amounted to £1,040,000,000, and in 1910, the last complete year, to £1,230,000,000, an increase in one year of nearly £200,000,000. The Customs receipts for the first six months of the current fiscal year were £8,600,000, as compared with £7,100,000 in the corresponding period of 1910, an increase in the six months of £1,500,000. The Financial Statement of the Dominion for the current fiscal year down to September 30th shows that during the six months the revenue amounted to more than \$64,000,000, an increase of nearly 8,000,000.

The Government estimate of the total grain crops in the North-west Provinces this year, as compared with the Government return of the actual results last year, is: Wheat, 180 million bushels, against 128 million bushels; oats, 204 million bushels, against 126 million bushels; barley, 30 million bushels, against 21 million bushels. The Government estimate of the three grain crops for the whole of the Dominion, as compared with the Government return of the actual result last year, is: Wheat, 200 million bushels, against 149 million bushels; oats, 308 million bushels, against 323 million bushels; barley, 51 million bushels, against 45 million bushels. There is one more comparison arising out of these figures to which I ask your attention. The Government, as I have said, estimate the crop of wheat for the whole of Canada for this year at 200 million bushels, and of this the North-west Provinces are estimated to contribute 180 million bushels. The crop of oats is estimated at 308 million bushels for the whole of Canada, of this the North-west Provinces are estimated to contribute 204 million bushels. The crop of barley is estimated at 51 million bushels for the whole of Canada, and of this the North-west Provinces are estimated to contribute 30 million bushels. Adding these figures together, the Government estimate of the total grain likely to be produced by the whole of Canada this year is 620 million bushels, of which the North-west Provinces are estimated to produce 414 million bushels, or, roughly, two-thirds of the total. You will realise from these figures what a tremendous factor in the wealth of Canada the produce of the North-west Provinces has become, and when you consider what a small proportion of the available fertile land in the North-west has been brought under the plough to produce the results I have brought before you, I think we are justified in feeling confidence in the success of our enterprise. Given the crops, its success must, however, depend also on the men in charge on the spot, and all I have seen this year confirms me in the opinion I have before had the pleasure of expressing in this room, of the present capacity and faithful devotion to your interests shown by Mr. Hays, Mr. Chamberlain, and their respective staffs. (Applause.) To meet the ever-increasing work, Mr. Hays has recently recommended to the Board some important changes in his staff, which the Board have approved, and we believe the organisation has been materially strengthened, and that Mr. Hays will feel some measure of relief in the discharge of his heavy responsibilities. Among the changes in the staff, I think I should mention the retirement of Mr. Loud, our freight traffic manager, who in July last completed fifty years of railway service, forty-two of which were passed faithfully and efficiently in your service.

Ladies and gentlemen, I thank you sincerely for the patience with which you have listened to me. I have gone rather fully into the latest available statistics showing the great prosperity of Canada, and the growth of the North-west Provinces, since we commenced the building, with your approval, of the Grand Trunk Pacific Railway. I ask you not merely to take my word and the statistics I have given, but I beg of you to read Lord Grey's eloquent speech at the dinner given in his honour on Tuesday last, in which he describes the growth and development of Canada during the seven years of his holding the office of Governor-General. (Applause.) In the face of this development of the North-west Provinces, what would have been said of us to-day had we not seized the opportunity to take action to enable us to participate in the prosperity of the North-west. To obtain that participation is a great and arduous undertaking, surrounded with many difficulties, and the greatest difficulty has been, and is at the present time, the immense rise in the cost of labour, brought about by the great prosperity of Canada during the last seven years, and it is that rise in the cost of labour that prevents us paying to the holders of our third preference stock a substantial, if, indeed, not the full, dividend on that stock. I ask, with all respect, and with all sympathy with the third preference shareholders, do they suppose for a moment it would not give the Board the greatest gratification to pay them their full dividend? The reason why a larger dividend is not paid arises from circumstances beyond the control of the Board, but we believe the growth of Canada will enable us to overcome these difficulties, and we believe nothing will enable us to attain success more surely than to keep the Grand Trunk physically in the best condition to meet the requirements of our customers, and to be ready to cope with the increased traffic which must come when we are physically connected with the Grand Trunk Pacific, and also, with regard

to finance, to keep the credit of the Company at the highest possible level. That is the policy of the Board, and I recommend it with all confidence to your acceptance. (Loud applause.) I now beg to move:—

"That the report of the Directors and the accounts for the half-year ended June 30, 1911, now presented, be and the same are hereby approved and adopted, and that the following dividends be paid—viz.: To the holders of the four per cent. guaranteed stock, of £2 per cent.; to the holders of the first preference stock, of £2 10s. per cent.; to the holders of the second preference stock, of £2 10s. per cent."

Sir HENRY MATHER JACKSON, Bart. (Vice-Chairman): I beg to second that motion.

Mr. LANDAU (was understood to say): Your last word, Sir, was that you had a great desire to uphold the credit of this Company. Well, there is one thing that I do give the Chairman and the Board credit for, and that is that they are undoubtedly doing their best; but I do not want the Board to regard any longer the ordinary shareholder as a mere paper-weight. I am afraid that our American, but intelligent, manager likes American railway methods rather more than we like them in England. Now, take the Chicago and Milwaukee stock. That was given to the contractor, and no money came into the coffers of the Company. Now, our stock—the Grand Trunk stock—was issued for cash, and the money went into the railway. Now, I consider that if you have an opportunity of giving the ordinary shareholders something—if not in the shape of a dividend, at any rate in the shape of a tempting offer of debenture stock—that would be some little solace to them for all the years they have waited. I am not going to try to pass a vote of censure upon the Board, but I want them to consider that the ordinary shareholders require a little consideration, and that there should be an issue of bearer certificates for the ordinary stock. I am afraid, however, from what the Chairman says, that this question of bearer certificates will remain a dead letter. He has told us that we should have to deposit this stock in London, and that it will take a month to communicate with Montreal, and then that we should have to pay a large stamp duty. Now, there is a large number of shareholders here, but I do not know how many are prepared to take up these bearer shares. It would, no doubt, be a great benefit to the Company, and particularly to the shareholders who are resident in Germany. I think you will realise that the largest shareholders in the Canadian Pacific Railway are now resident in Germany, but the Canadian Pacific Company gave far greater opportunities for people to acquire shares than is the case in this Company.

The CHAIRMAN: Mr. Landau, it might perhaps save time if I were to tell you that the arrangements to be made will be exactly the same as have been made with regard to the Canadian Pacific.

Mr. LANDAU: I thank you, Sir; and if you will be good enough to concede the other point, I shall be much more satisfied.

The CHAIRMAN: Well, ladies and gentlemen, I will try and reply as quickly as I can to my friend, Mr. Landau. With regard to the question of the ordinary stock, as to which he said the subscribers put their money in towards building the railway—well, it is rather an historical business, and I am not prepared to-day to say how much of the money went into the railway; but I can assure him that, if he will come to the office, Mr. Norman, the Secretary, will give him every information, and I think he will find—understand I do not say this to depreciate the ordinary stock—that his statement is not in accordance with the fact that anything like par value of the ordinary stock ever went into the line. (Hear, hear.) I only state that as a fact; and I think he will be rather astonished to find that it was a very small amount as compared with the par value of the stock. With regard to the question of Ordinary Stock Scrip certificates, I have already answered that point. It is our intention to do the same with regard to these scrip certificates as the Canadian Pacific do. We are in the middle of a very big undertaking, and have a very heavy burden to bear. I can assure you that there is a great deal more anxiety in this matter than there is fun; and we are trying to do our best to put this thing through, and I say unhesitatingly that if you cannot trust the Board to carry this undertaking through in the way of doing its finance in the best way they can, at the best possible time, and when they think right, the Board are not worthy of their position; and I do say that

if Mr. Landau's proposals were carried out they would cause a rise and fall in our stocks which would render the financing of our Company impossible, and destroy our credit. (Hear, hear.) I say that the true value of the ordinary stock to-day—and you must remember that you have all agreed to our carrying out this big undertaking—(hear, hear)—the value of this ordinary stock to-day is in the reversion of what this big undertaking is going to give you. I may be wrong. We may have bad crops, or we may have a setback year; we may have good crops; but I believe that the ordinary stock to-day is one of the most valuable reversions of any stock on the Stock Exchange list. But you have got to make that new undertaking, and to connect it up with the old line, and in order to do that you have to keep your credit in first-class order. When I am told that we ought not to spend this amount on locomotives and that amount on locomotives, or this amount on bridges or that amount on bridges, or some other amount on rolling stock in order to keep it up to date, then I say that we were a poor Company when we started this policy, and we are not a rich Company now, and, therefore, we have to cut our coat according to our cloth. If we have a good year, and can do something towards improving the line, it is to our interest to do it; and if we have a bad year, and yet have to do what is necessary in that year, it must be done in order to keep the line in proper order. The Board have always tried to do this—that is what the Board is for—and that is why we ask for your confidence, and it is because we have always relied upon your kindness and confidence and support that we hope and trust you will continue to support us in that policy. (Applause.) I will now put the resolution which I have read to the meeting. All those in favour of it signify the same. On the contrary. That is carried unanimously. Then there is just this formal point which I mentioned to you in my speech. I have to propose:—

“That the Directors are hereby authorised to exercise the powers conferred by the Grand Trunk Act, 1911, as amended by the Grand Trunk Amendment Act, 1911, and to guarantee the principal and interest of the first mortgage bonds of the Grand Trunk Western Railway Company referred to in the Grand Trunk Act, 1911, upon such terms and conditions as the directors may determine.”

Sir HENRY JACKSON, Bt.: I will second that resolution.

The resolution was agreed to unanimously.

Mr. LANDAU: To show that I am not in any way unfriendly, I have a great pleasure in proposing a vote of thanks to the Chairman and Directors.

Major FEARNSIDE SPEED: I beg to second that, and I say that it is the least thing we can do after the Board have devoted their time and energies to putting this Company into good order. (Applause.)

Mr. LANDAU: I will put that to the meeting. All those in favour of it signify the same. (Cheers.) That is carried by acclamation, Sir.

The CHAIRMAN: Well, ladies and gentlemen, we are much obliged to you. (Hear, hear.)

The proceedings then terminated.

CENTRAL ARGENTINE RAILWAY.

The ordinary general meeting of the proprietors was held on Tuesday, October 24, at River Plate House, Finsbury Circus, Mr. J. White Todd (chairman of the company) presiding.

The SECRETARY (Mr. F. Fighiera) read the notice convening the meeting and the auditors' certificate.

The CHAIRMAN, in moving the adoption of the report and accounts, said that those of the shareholders who were accustomed to attend the general meetings would no doubt miss, as the directors did, the genial presence of their former valued colleague and ex-chairman, Mr. Walter Morrison, who, through advancing years, and the desire of spending more time on his Yorkshire estate, had decided, greatly to their regret, to retire from the board. His association with the Central Argentine Railway established an almost unique record in that he hardly ever missed a board meeting, and certainly never failed to preside at the general meeting.

[A vote of thanks was here passed to Mr. Morrison for his past services.]

To fill the vacancy created by Mr. Morrison's retirement, they had been fortunate enough to induce Sir Archibald Williamson to accept a seat on the board. He regretted to have to apologise

for his absence that day, which was due to a sad family bereavement, and he was taking a short rest abroad under medical advice.

It was a source of satisfaction to the board to be able to place before the shareholders a report and statement of accounts, which he ventured to think every proprietor would consider eminently favourable. (Hear, hear.) The past year's business established a record for them. Not only did the gross receipts exceed any they had ever had in aggregate, but they headed the list of the broad gauge railways in gross revenue per mile of line, and the percentage of working expenses to gross receipts was lower than it had been for many years, notwithstanding the increase under various headings referred to by the general manager in his report. From the published figures it would be seen that their gross receipts amounted in round figures to over £5,400,000, whilst the working expenses were £3,000,000, and the resultant net profit £426,000 more than in the previous year. This had enabled them to set aside a sum of £112,000 for the credit of the renewals fund, over and above the provision made in the ordinary way through the working expenses, to meet payments of over £200,000 as extra interest and dividend on increased capital, to maintain their dividends of 6 per cent. on the ordinary and deferred stocks, and to carry forward £169,000 against £79,800 last year. (Hear, hear.) He might further mention that the general reserve fund stood at £646,000.

THE MAIZE CROP.

It seemed possible that paragraph 4 of the report might have caused some of them misgivings in that the decrease shown in gross receipts at the date of its issue had been accentuated by last week's traffic return, which brought the decrease up to £194,597 compared with the corresponding period of last year. He might say at once that, whilst the decrease was admittedly considerable, it was materially less than they had been figuring on. They were the cereal line par excellence of the country. In the first half of the last financial year they were carrying large volumes of maize. This year they suffered practically a total loss of the maize crop. Yet, in the 15 weeks covered by their last return they showed an average gross take per week of some £95,000. A large crop last year, none this year, and yet the railway was able to give them that average figure.

Argentina's growing prosperity, the stability of its Government and the general development of its trade, to which Dr. Frias called attention in his instructive report, gave rise, amongst others, to two important factors, which no existing railway company could afford to disregard. First, the necessity for extended means of communication and, what he might call, intercommunication; and, next, the inducement afforded for capital from fresh sources to be sunk in railway construction. Roads, such as we know them in Europe, were conspicuous by their absence in Argentina. The reason of this, to a great extent, was the total absence of stone in those vast cereal-producing plains. Distances are enormous and the railway there took the place of our roads. But there is another point of difference between Argentina and the older countries in Europe. Here the railways follow the towns: there the operation was reversed.

No inconsiderable part of their programme lay in the direction of creating lines of intercommunication, in shortening distances between the interior and the exporting centres and in filling in gaps which were a standing menace to the pick of their present sources of revenue, and in each instance they were going to foster the extension of the area of cultivation in districts the fertility and excellence of the soil of which they had practical knowledge. That their policy had been, and was, sound they had proved by the test of past experience.

EXTENSIONS.

During last year they brought into operation 313 miles of new lines belonging to their previous programme of development, and all he could tell them was that, in spite of competition, with a total loss of the maize crop and all that it meant to them in incidental traffic, with the modest return, comparatively speaking, which a new railway usually gave in its earliest days, they still retained their premier position amongst Argentine broad gauge railways, with an average gross take per mile for the year of no less a figure than £2,050, against £1,913 for the corresponding period of last year. (Cheers.)

Two of the new lines gave rise to a few words which might interest them. The rule was for the hardwood quebracho sleepers of the country to be used on all Argentine lines; in fact, it was compulsory. Hitherto, by far the greater number—he might almost say the totality—of such sleepers had been derived from the forests in the province of Santa Fé. It had been found

that this particular quebracho was wonderfully rich in tannin, hence, by degrees, quebracho from Santa Fé had been becoming less and less available for sleepers, for, naturally, the railway companies could not pay for sleepers a price based upon the value of the wood for extracting purposes. Momentarily he believed that the discovery of this valuable product in Santa Fé quebracho had caused supply somewhat to exceed demand, but that was an incidental and variable factor which they, as railway companies, were only indirectly interested in.

Their main trouble was that a vast area of quebracho land ceased to be reliable as a source of sleeper supply. The quebracho, which grew in the province of Santiago del Estero, and of which there were vast forests, was much poorer in tannin. There would, therefore, never be the same demand for that quebracho for purposes outside the requirements of sleepers and fencing posts as existed in the province of Santa Fé. To that province, consequently, they would have to look for supplying the Santa Fé deficiency, and as far as its quality was concerned, it serves their purpose quite as well.

As to new lines, they did not seek to increase mileage for the mere pleasure of doing so, nor had their scheme been evolved in one or two years. It had had long and deliberate study: it had been carefully investigated and reinvestigated, reported upon by different people, who had, whilst in their employ, had long experience of the country, was unanimously recommended by their local committee, general manager, and officers, and they had, therefore, satisfied themselves, as far as it was humanly possible for anyone reasonably to do so, that their new lines were going to prove instruments of defence and of progress and in no case create a permanent set-back in the company's prospects and future.

UNIFICATION OF CAPITAL.

It would be remembered that in July, 1910, the Bill they laid before Parliament, authorising the unification of the company's various classes of debenture stocks, received the Royal Assent. The 6 per cent. debentures were now represented by 4 per cent. debentures and of the original capital of £1,117,207 of 3½ per cent. debentures, the conversion of which was optional, there were only to-day £245,000 outstanding, which would sooner or later convert into 4 per cent. When this had taken place they would have as obligations, or loan capital, merely 4 per cent. debenture stock and the 4½ per cent. Western Annuity. Under the Central Argentine and Rosario Railway Act, 1902, the amount of debenture stock—including the Western Annuity—must not, without the sanction of a special resolution, exceed two-thirds of the nominal amount of the share capital at the time allotted. Their ambition was to restrict as far as unforeseen circumstances would allow of it, the issue of loan capital to one-half of the share capital allotted instead of to two-thirds. That, at any rate, was to be their aim. (Hear, hear.)

The reasons of their wanting to re-arrange their share capital were two-fold: one was, perhaps, a sentimental one, but none the less worthy of respect—the other one was essentially a practical one. In regard to the former of these considerations, the time had, in their opinion, come when there should be eliminated from the capital account of a concern of their standing those securities which claimed to yield a 7 per cent. dividend. This high rate took one back many years, to the days when it had to be offered as a bait to induce capitalists to invest in Argentina. To-day, of course, all that was permanently changed. That a 7 per cent. share or preference stock was a misnomer was proved by the fact that their money market assigned to these investments a quotation which much more closely indicated the enhanced credit of the country. Thus, if they worked out the return which this 7 per cent. on the nominal capital gave to the purchaser at present prices, they would find that it was somewhere between 4 per cent. and 4½ per cent. No practical purpose was therefore served by continuing in their capital account two items which were designated as 7 per cent., but which did not yield that return. They, therefore, came to the shareholders and unhesitatingly recommended the re-adjustment of their capital account so that it might become a real index of the credit to-day not only of their company, but of the country they were operating in. So much for the sentimental side of the question.

They might have suggested to the shareholders leaving those two items as they stood and creating a further preference stock, but they did not feel justified in submitting a scheme involving the creation of what must be a second preference stock, which was not required. This matter had had the closest consideration of the board, and as the result they had evolved a plan which, whilst in no way injuring the ordinary and deferred stockholders to-day, materially benefited their future prospects.

The Bill which would be submitted provided for three things: First, it authorised the redemption of the £332,090 of 7 per cent. preference shares, which were to disappear; secondly, it was to enact that the board be empowered to create and issue 4 per cent. debenture stock to such an amount as would produce to the holders of such shares the same revenue as they were to-day receiving. That meant that for every £10 share there would be allotted £17 10s. of 4 per cent. debenture stock, ranking *pari passu* with the existing 4 per cent. debenture stock. Thirdly and lastly, it contemplated the conversion of the existing consolidated 7 per cent. preference stock, amounting to £4,394,390 into a new 4½ per cent. preference stock. Every holder of £100 of consolidated 7 per cent. preference stock would receive £155 11s. 11d. of this new 4½ per cent. stock. This latter operation would have the effect of also ensuring to the consolidated 7 per cent. preference stockholder identically the same revenue as he was to-day receiving.

To summarise, therefore, their scheme was to restrict the issue of debenture stock, as far as circumstances would allow of it, to one-half of the allotted ordinary and deferred stocks; redeem the preference shares and issue to them 4 per cent. debenture stock; convert the consolidated 7 per cent. preference stock into a new 4½ per cent., its total issue to be limited by the Act to one-half of the allotted ordinary and deferred stocks and to forego the powers which they had of issuing 7 per cent. preference shares or stock, which powers represented to-day something over £3,800,000. They would thus have an ultimate capital account which would consist of 4 per cent. debentures and the 4½ per cent. Western Annuity, as obligations, and 4½ per cent. preference stock, ordinary and deferred stocks as share capital. There would be no underwriting and the number of their proprietors to-day was close on 20,000 as against 24,700 last year—that was, their number had increased by over 4,000. (Cheers.)

THE PASSENGER TRAFFIC.

There was one paragraph in the general manager's report which he felt he must say a word about, and that was the one dealing with passenger traffic. This revealed a wonderful ratio of development. There was no less an increase in the number of passengers than 14 per cent., and in receipts of 9 per cent. Suburban passenger traffic alone was responsible for an increase of nearly 2,000,000 in number. (Applause.)

On a previous occasion he informed them that they had engaged the eminent electric engineers, Messrs. Merz and McLellan, to proceed to the Argentine and to study for them the question of electrification of their Buenos Ayres suburban sections. This they did, and the figures which they were able to place before the board, as the result of their investigations, led them to adopt the policy which they were able to recommend. They were therefore to-day pushing on with the preliminary steps for the electrification of their suburban section, having already obtained from the Government their sanction to do this and their acceptance of the system which they were to adopt for the transmission of current. He thought he could with confidence say that, when this work was completed, they would see an even more imposing increase in suburban traffic than in the past, and this forecast was made not only by Messrs. Merz and McLellan, but by the general manager himself in his report. Their programme was divided under three heads. First, they would electrify between Buenos Ayres and Tigre by the old Central Argentine route. When this had been done they would definitely decide whether the second line to the Tigre should be taken in hand next or the section to Villa Ballester. With local traffic increasing as it was, if they had to face the continuance of steam-hauled trains, there would be nothing for it but to quadruple the lines of no inconsiderable part of their suburban section. What this would mean in capital expenditure he left the shareholders to imagine. The electrification, however, was going to put off that necessity for many years to come. When they were electrified they would be able to give a better and more rapid service, and they hoped thus powerfully to contribute towards the solving of the housing problem of Buenos Ayres, which was year by year becoming an increasingly acute one. Their general manager's policy of popularising their suburban residential districts would receive, he was confident, a great impetus from the change in system of traction. He would also like to mention that work was being vigorously proceeded with upon their new terminal station at Buenos Ayres, and orders were in hand in this country for such things as train-shed roof, etc. In regard to the new terminus at Cordoba, the plans of the lay-out of the station and yard had received Government approval, and the detailed plans of the building itself were awaiting sanction.

There only remained for him to say a few words in regard to prospects. The general manager, in his report, expressed distinctly encouraging opinions, but they were to-day nearly two months old. They had, as usual, requested their local committee to let them know by cable of anything which would be likely to prove of interest to the proprietors, and this was what they telegraphed under date of 21st inst. :—

"Prospects of abundant harvest continue undiminished; one million additional acres of land sown with wheat and linseed this year. Plants well advanced and heavy rains of past 48 hours warrant statement that outlook has never been more promising. Area of maize sown is larger than before. Sugar harvest has been successful. General optimism prevails."

The CHAIRMAN concluded by eulogising the staff abroad and at home for the loyal and efficient manner in which they had discharged their respective duties, and by formally moving the adoption of the report and accounts.

Mr. J. WILSON THEOBALD seconded the resolution, which, after a short discussion, was carried unanimously.

The dividends recommended in the report were approved, the appointment of Sir A. Williamson, M.P., as a director, was confirmed, and the retiring directors and auditors were re-elected.

An extraordinary general meeting was then held, when sanction was given to the introduction into Parliament of a Bill to empower the company to redeem its 7 per cent. preference shares and to convert its consolidated 7 per cent. preference stock, and for other purposes, as explained by the chairman in his opening speech.

A series of meetings of the holders of those stocks and the ordinary and deferred stocks was afterwards held, and approval of the scheme was unanimously given.

The proceedings then terminated.

CORDOBA AND ROSARIO RAILWAY.

The ordinary general meeting was held in Winchester House, Old Broad Street, E.C., on Tuesday, Mr. E. B. Merriman presiding.

The CHAIRMAN, in moving the adoption of the report and accounts, said that the second preference stockholders and the ordinary stockholders would no doubt be satisfied with the result of last year's working, as, with the exception of 2 per cent. paid upon the second preference stock in September, 1905, this was the first occasion upon which the line had been able to earn a dividend for either the second preference or the ordinary stockholders. This was encouraging, inasmuch as in the company's own district the cereal harvest was really a poor one, although, according to the statistics, there was a large increase in the tonnage from that source, namely, 77,601 tons. This increase was due to maize received from the Buenos Ayres Extension, which, as it was hauled only a few miles over this company's line for shipment at the port of Rosario, necessarily gave but small rate per ton. Given an average cereal harvest this season (the movement of which should commence during the month of December next), there was every prospect that they would experience another satisfactory year. In view of expansion of traffic, the board had deemed it prudent to take steps for the early provision of a further 200 wagons. The ratio of expenditure to gross receipts had decreased from 61.24 per cent. to 58.01 per cent. The board had transferred £5,000 from net revenue to the credit of the special renewals suspense account shown in the balance-sheet, thus reducing the same to £1,194, and, in addition to this £5,000, £3,200 was charged out during the year to working expenses. Owing to the much heavier locomotives now running over the main line, as compared with those originally in use, the increased capacity of the wagon stock, the faster time made by trains, particularly passenger trains, and the fact that the rails had already had a life of over 20 years, expenditure on the permanent way for some years to come would be considerably heavier than in the past, and this abnormal expenditure would be dealt with through the special renewals account. During the year, in addition to normal upkeep, there had been an extraordinary expenditure on permanent way of some £8,200. The Chairman proceeded to give comparative figures to show the growth of the undertaking. For the year ended June 30, 1903, the gross receipts amounted to £149,849, whereas those for the year ended June 30 last, amounted to £319,549, an increase of £169,700, or 113 per cent. The net receipts for the year 1903, namely, £53,595, compared with £134,165 for last year, an increase of £80,570, or 150 per cent. As regarded capital expenditure, the principal items were rolling stock and a new bridge over the River Carcarana. Only a portion of the cost of 150 new wagons had

been disbursed at the date of closing the accounts, and the balance would be charged out during the current year. The bridge over the River Carcarana was found to be too light for the heavy locomotives which now ran over it, and it was therefore necessary to construct an entirely new bridge. The other capital works represented expenditure to meet the increasing requirements of the traffic. For the same reason it had become necessary to increase materially the accommodation at Rosario station, and to provide new sidings, depôts, etc. The expenditure for these purposes, and for the provision of the additional rolling stock and several small stations at various points on the line where traffic was developing, would call for an expenditure of about £100,000, and some additional working capital would also be required. There was a balance of £302,289 second debenture stock at the disposal of the board. Mr. J. Henry Whittle, one of the original directors of the company, had found it necessary, owing to continued ill-health, to resign his seat on the board. With regard to the prospects of the coming cereal harvest, he read a cable just received from the general manager, which was as follows :—"Recent rains have minimised damage caused by frosts to young wheat and linseed, which are now in excellent condition. In districts where maize suffered from frosts land has been resown. Prospects for coming harvest and general traffic are exceptionally good, and outlook generally is very promising."

Mr. G. W. Houghton seconded the motion, and it was agreed to.

ENTRE RIOS RAILWAY.

The annual meeting was held on Wednesday, in River Plate House, London, E.C., Colonel Oldham presiding. The CHAIRMAN said that they were paying for the first time a dividend of 1½ per cent. on the ordinary stock. Negotiations had been in progress between the Argentine Government and the company with reference to the company taking over the construction of the Curuzu Cuatia line of railway. An *ad referendum* contract had been agreed by the Senate, which was now being discussed in the Chamber of Deputies. A provision had been introduced into the agreement by the Government to the effect that if the contract did not become law during the current year the entire proposal must be considered at an end. Whatever the decision of the Chamber of Deputies might be, it was satisfactory to know that in a letter addressed by the National Public Works Minister to the Governor of Entre Rios he deprecated the idea of the Argentine Government "waging a tariff war in unjustified competition with a private undertaking" or of "invading its theatre of action with lines and branches which would effectually interfere with those which the company were gradually extending." As to the future, during these five years there had been a large amount of capital expenditure which could not be remunerative at once, but always required time for development, and consequently they had had to meet year by year fast increasing fixed charges on an undeveloped capital expenditure. However, these charges had been met, and, nevertheless, the balance of their revenue had increased, and in several cases in spite of adverse circumstances. They must also remember that the crops of the years 1909 and 1910 were partial failures. Turning to the traffic receipts of the current year, they found that the increase in revenue had been well maintained during the first four months of the year, and with the news to hand that the crops never looked better they had every reason to be content with the present and full of hope for the future. He read a favourable cablegram just received from the general manager, the message stating that he expected a heavy increase in all traffics during this year. The report was agreed to.

Brazil Great Southern Railway Company.—This company makes intimation to holders of £100,000 of 6 per cent. mortgage debentures of the company, known as 1893 bonds, that the bonds mature on November 19, 1911. The company offer renewal for a period of seven years. In consideration of such renewal the company is prepared to pay to the holders of such bonds a premium of £2 70s. in cash on each £100 bond, and interest from November 20, 1911, will continue to be paid as heretofore at the rate of £6 per cent. per annum by half-yearly coupons. Bonds for renewal must be deposited at the company's office. The issue of £250,000 first mortgage debentures, which rank prior to the 1893 bonds, has by the action of the sinking fund been reduced to the sum of £98,700, and at the present rate of redemption the whole issue will be practically extinguished within seven years, when the 1893 6 per cent. bonds will automatically become a first charge upon the whole of the property of the company.

BUENOS AYRES AND PACIFIC RAILWAY.

The accounts of the Buenos Ayres and Pacific Railway, to June 30, 1911, were issued on Tuesday. They show that the total capital expenditure now amounts to £23,910,827, while the receipts have been £25,450,000, as follows: Ordinary stock, £7,000,000; ordinary shares (1911) £3,000,000; 5 per cent. first preference stock, £1,200,000; 5 per cent. non-cumulative second preference stock, £1,000,000; 4 per cent. first debenture stock, £2,025,000; 4½ per cent. second debenture stock, £2,075,000; 5 per cent. debenture stock, £1,250,000; 4½ per cent. consolidated debenture stock, £7,000,000. The capital expenditure during the year was £828,515.

The revenue accounts for the year ended June 30 show the receipts to have been as under:—

	1910-11.	1909-10.
Passengers.. ..	£1,074,038	£880,257
Parcels	148,554	125,488
Goods	3,357,990	3,004,803
Excess luggage, special trains, telegrams, warehousing, advertising, refreshment-rooms, etc.	85,833	71,551
Miscellaneous receipts	154,129	143,243

Total gross receipts .. £4,820,541 .. £4,294,432

The revenue expenditure during the same period was as follows:—

	1910-11.	1909-10.
Maintenance of way and works	£349,493	£300,855
Locomotive maintenance ..	291,491	217,861
Coaching stock do. ..	73,700	91,535
Goods and live stock wagons do.	139,618	117,519
Locomotive running expenses ..	1,028,178	890,793
Vehicle do. ..	37,549	35,185
Traffic expenses	549,588	514,919
General charges	240,960	220,804
Miscellaneous expenses	99,103	91,082

Total expenses .. £2,806,950 .. £2,495,253

The balance from the traffic account is £2,014,185, and to this is added balance from last account, £50,170; Caballito branch working, £1,495; balance of interest account, £79,011; and deducted interest on first debenture stock, £117,000; interest on second debenture stock, £93,375; interest on 5 per cent. debenture stock, £92,500; interest on 4½ per cent. consolidated debenture stock, £293,750; rents payable under agreements—Argentine Great Western Railway debenture stocks, £300,475; Bahia Blanca and North Western Railway stocks, £313,583; Villa Maria and Rufino Railway stocks £40,721; proportion of receipts payable to Argentine Transandine Company, £42,873; on account of sum payable on the preferred and ordinary stocks of the Argentine Great Western Railway in accordance with the working agreement, £106,250; income-tax, £4,163; and depreciation of steamers, £9,267; leaving a balance of £757,904. Out of this has been paid the dividend at 5 per cent. per annum on the first preference stock (£60,000); interim dividend of 2½ per cent. on second preference stock (£25,000); dividend at 5 per cent. per annum on ordinary (1911) shares (£150,000); interim dividend on ordinary stock (£105,000); balance of special expenditure on permanent way, etc., Argentine Great Western Railway (£9,449); leaving a balance of £408,456 available for distribution.

The board propose to transfer to reserve fund £60,000, and recommend a balance dividend of 2½ per cent. (making 5 per cent. in all) on the second preference stock, absorbing £25,000; a payment to the Argentine Great Western Railway of £106,250; a balance dividend of 2 per cent. on the ordinary stock, absorbing £140,000, and making 3½ per cent. for the year, free of income-tax, and carrying forward a balance of £77,206. The reserve fund, after the transfer of £60,000 mentioned above, will stand at £769,917.

The number of passengers carried in the year was 9,169,610 (against 8,145,743 in the previous year); the quantity of freight carried, 4,789,468 tonnes (against 4,141,359 tonnes); the number of animals carried, 2,218,517 (against 1,709,048); the train miles run, 8,974,711 (against 7,999,582); the receipts per train mile, 10s. 9d. (against 11s. 1¾d.); expenses per train mile, 6s. 3d. (against 6s. 4¾d.); receipts per passenger, 2s. 4d. (against 2s. 2¼d.); receipts per tonne of goods and live-stock, 14s. 0½d. (against 14s. 11d.); length of line worked, 3,114 (against 2,869) miles; ratio of working expenses to receipts, 58.22 per cent. (against 57.41 per cent.).

The report states:—"The damage by drought to all cereal

crops last season was fairly general, and the increase in wheat transported was principally due to an exceptional harvest in the district served by the Laboulaye to Villa Valeria and Mackenna to Sumpacho branches. In Mendoza the grape harvest realised expectations and wine traffic gave an excellent result. The latest cabled reports on the growing crops are satisfactory, and, up to the present, the weather conditions have been favourable to a good harvest. The general manager reports that there is a considerable increase in the area under cereals as compared with last year. The National Government sanctioned a law on October 6, 1909, for the issue of irrigation bonds, carrying interest at 5 per cent. per annum and 1 per cent. amortisation, for the purposes of providing funds for the construction of irrigation works in various parts of the Republic. In accordance with the law this company may be asked to undertake certain works for account of the Government, and to this end the memorandum of association needs alteration. Concessions have been granted to the company by Congress for a line of about 40 miles from Arribeños, a station on the Isabel branch, to connect with a line to be built from Alberdi to Sumpacho; also for a loop line of about 50 miles between Espejo and Palmira stations in the neighbourhood of the City of Mendoza. A resolution will be proposed authorising the directors to convert into ordinary stock 300,000 ordinary (1911) shares of £10 each.

TALTAL RAILWAY.

The capital expenditure on June 30, 1911, amounted to £1,361,912 of which £2,079 was expended during the twelve months ended on that date, while the receipts were £1,232,595—viz., ordinary shares (£5 each), £750,000; 4½ per cent. first charge debentures, £254,700; profit on surrender of deferred shares, etc., £182,595; and debenture redemption, £45,300, leaving a debit balance of £69,317.

The revenue account for the year ended June 30, 1911, shows the gross receipts to have been £248,003, a decrease of £22,806 compared with 1909-10. The working expenses were £131,484, a decrease of £15,432, while the net receipts amounted to £116,519, a decrease of £7,374. To the balance of £116,519 should be added: Registration fees, £66; interest and discount, £1,015; and the balance from 1910-11 of £16,987, making £134,587. From this must be deducted debenture interest, £12,002; debenture sinking fund, £11,998; transfer to reserve for renewals, casualties, etc., £5,000; transfer to general reserve, £20,000; and the interim dividend of 3s. per share to December 31, 1910, £22,500, leaving an available balance of £63,087. Out of this available balance the directors recommend a further dividend of 4s. per share, making 7 per cent. for the year, and a bonus of 2 per cent., carrying forward £18,087. The report states:—"The aggregate weight carried during the year has been 306,487 tons, and shows a decrease, as compared with last year, of 41,187 tons, equal to 9.41 per cent. The reduction is largely attributable to the smaller quantities of nitrate and coal carried, three oficinas having been closed during the year. For the same reason many of the less important items of traffic show a reduction, but, on the other hand, oil fuel and machinery have increased. The number of passengers has decreased from 85,073 to 76,817 during the year under review. The proportional rate of working expenses to gross receipts has been 53.02 per cent., as compared with 54.25 per cent. The nitrate industry has shown some improvement during the year. Two oficinas which had been closed have recently changed ownership, and are expected to commence the manufacture of nitrate during the coming year. The exchange adjustment account shows a debit of £417, which has been deducted from the balance from last year, leaving £3,808 to carry forward."

SAN PAULO (BRAZILIAN) RAILWAY.

The report for the half-year ended June 30, 1911, states that the receipts of the main line (Santos to Jundiahy) amounted to £666,013, being an increase, as compared with the corresponding period of 1910, of £99,873, or 16.26 per cent. The working expenses were £530,072, or 79.58 per cent. of the gross receipts, and the net revenue was £135,941, as against £119,461 in 1910. The average rate of exchange for the half-year was 16.052d., as against 15.864d. in the corresponding period of 1910. The expenditure in England and interest on stores reduce the net revenue to £122,857. The receipts for the half-year of the Bragantina Railway amounted to £13,442, being an increase as compared with the corresponding period of 1910 of £1,750, or 13.67 per cent. The working expenses were £11,630, or 86.52 per cent. of the gross receipts, and the net revenue

amounted to £1,812. Interest derived from the company's investments and general interest account amounted to £22,208. The balance of net revenue, after payment of the interest on the debenture stocks, and including £273,003 brought forward from the previous half-year, is £370,611. The directors propose a dividend on the ordinary stock of 5 per cent, being at the rate of 10 per cent. per annum, together with a bonus of 2 per cent. (both free of income tax), making 7 per cent. in all, and to carry forward £135,611. One per cent. of the above-mentioned bonus is provided for by the revenue of the Braganantina Railway, the interest on investments and on bank balances.

BAHIA BLANCA AND NORTH WESTERN RAILWAY.

The report states that the amounts payable to this company in respect of the year to June 30 last under the working agreement with the Buenos Ayres and Pacific Railway Company, have been duly received. The total gross receipts of the railway for the year are £520,823 (against £588,255). The receipts from passenger traffic were £70,782 (against £75,849). The drought which commenced in November last destroyed all prospects of good crops, and the failure of the harvest in the south of the province of Buenos Ayres for the second successive year entirely stopped, for the time being, the general expansion of business in the region served by this line. The general manager cables that prospects are especially good in the south of the province, but it is yet too early to say that the crops are safe. In April last the electric power station was put into service. Besides supplying power to this company's port and market, the power house provides current for the public and private lighting of the city of Bahia Blanca and power for the working of the electric tramway. The National Government sanctioned a law on October 6, 1910, for the issue of irrigation bonds, carrying interest at 5 per cent. per annum, and 1 per cent. amortization, for the purpose of providing funds for the construction of irrigation works in various parts of the Republic. In accordance with the law this company may be asked to undertake certain works for account of the Government, and to this end the Memorandum of Association needs alteration. A resolution will therefore be submitted at the forthcoming meeting, and, if approved, will be confirmed at an extraordinary general meeting to be held on Monday, November 20. The sum of £450,360 has been expended during the year on the construction of branch lines and on other capital works. This capital has been advanced by the Buenos Ayres and Pacific Railway Company in accordance with the working agreement between the two companies dated May 27, 1904, the amount due to that company as at June 30 last being £990,051.

VILLA MARIA AND RUFINO RAILWAY.

The annual report states that the capital account at June 30, 1910, showed an expenditure of £1,133,172 (of which £1,886 was expended during the year under review), while the receipts amounted to £1,067,250, viz.—4 per cent. first debenture stock, £673,500, and guaranteed stock £393,750, leaving a debit balance of £65,922. The total receipts were £43,399, viz.:—£40,721 guaranteed by the Buenos Ayres and Pacific Railway, and £2,678 received from the same company for management expenses in London and Buenos Ayres. This sum of £43,399 pays the guaranteed interest on the 4 per cent. debenture stock (£26,940), a dividend of 3½ per cent. on the guaranteed stock (£13,781), and the management expenses referred to above. The following are extracts from the general manager's report:—"The average length of line worked during the year under review was 141 miles, the same length as last year. Passenger traffic gave £19,827, as against £17,865 in the previous year, an increase of £1,962 (10.98 per cent). The total tonnage and freight on goods and live stock carried during the year, exclusive of company's capital and revenue material, amounted to 174,349 tons and £49,575, as against 149,840 tons and £43,013 last year, an increase of 24,509 tons and £6,562. The principal items are hay and wheat, which gave increases of £2,004 and £3,438 respectively. Wine showed a decrease of £3,327 and general goods an increase of £2,618."

BUENOS AYRES MIDLAND RAILWAY.

The report for the year ended June 30 states that the line from San Sebastian to Carhue (241 miles), although opened provisionally for traffic on January 1, was only definitely opened to public service on July 1 last. Previous to that date a certain amount of traffic was carried, resulting in a credit to capital account of £14,048. In consequence of the delay in the completion of the Carhue section, the only section of the line worked on revenue account during the year ended June 30,

1911, has been that from Puente Alsina to San Sebastian (79 miles). As this portion of the line does not reach the grain-growing districts, and as the expenses of administration preparatory to opening the whole line had to be incurred, it was only to be expected that the results of working for the period under review would show a loss, but under the terms of the working agreement with the Buenos Ayres Great Southern and Buenos Ayres Western Railways, by which these companies undertake that the working expenses of the Buenos Ayres Midland Railway shall not exceed a certain proportion of the receipts, the sums received from them, together with sundry net revenue credits, leave an available balance of £12,709. In April and May exceptional floods occurred in the valley of the Riachuelo, and so seriously damaged the first 10 kilometres of the line that for more than five weeks trains could not leave or enter Puente Alsina. The cost of repairing this damage amounted to £7,255, which, together with £338 income-tax charges, have to be deducted from the above-mentioned sum of £12,709, leaving a balance of £5,116 to carry forward. In order to obtain the sanction of Congress to the Bill for the line from Puente Alsina to the proposed terminus in the city of Buenos Ayres at Sola, extensive modifications were found to be necessary, which considerably increased the estimated cost, and it was therefore decided to withdraw the Bill from Congress for the present. In the meantime it has been arranged to construct a short branch from Puente Alsina to a point on the south side of the Riachuelo, opposite the Ingeniero Brian station of the Buenos Ayres Western Railway, where there will be a transshipping station with that company. This branch will be completed by the end of November, and by this means access will be obtained over the Western and Southern Railways systems to all the docks and markets in Buenos Ayres and La Plata. The board have appointed Mr. Basil Gwyn as general manager in place of Mr. Wilson Jacobs as from February 1.

Puget Sound, Chelon, and Spokane Railway.—A meeting of British shareholders in this company was held in Huddersfield last Saturday, Mr. C. H. Crowther presiding. An Advisory Committee which had been appointed to act in the interests of the British shareholders, reported that at least three-fourths of the cash capital of the company had been subscribed in this country. Some of the mining shares were of considerable value, assuming that transportation could be obtained. A scheme for this object was formulated, and ultimately developed into a project for a transcontinental railway, with a capital of 25,000,000 dollars. More than half of the cash capital subscribed had been expended in promoting the railway. A statement was made by Mr. William Ramsden (Messrs. Ramsden, Sykes, and Ramsden, solicitors, Huddersfield), who had recently been called in to advise the Committee. He said that the railway project was an utterly impracticable and wild cat scheme. If the reconstruction proposal did not go through, the shareholders would probably lose the whole of their money. By making a further payment of one dollar for every forty shares nominal amount in the old company, the shareholders would receive shares in the new company equivalent to the amount now to be paid by them, and the new shareholders would be entitled to all the profits which might be earned by the company. The proportion to be paid was only one in forty, or 2½ per cent., and he thought it worth while making this small payment on the chance of rescuing the assets from a receiver, and possibly enabling the company to make a success with its mining property. The meeting decided in favour of the reconstruction scheme providing for a new company, to be called the British Mining Company, with a share capital of 60,000 dollars. The company will be managed by eight directors, five being British and three American. Messrs. Arthur Sykes (Linthwaite) and C. H. Crowther and A. F. Hughes (Huddersfield) were appointed British directors with power to add two to their number.

Speed and Efficiency Tests.—It is stated that in the speed and efficiency tests on the Pennsylvania Railway a special train has covered 105 miles in 80 minutes. The train was drawn by a monster stoker-equipped engine, and consisted of ten coaches, each weighted down with 40,000 lb. of rails.

Swiss Railway Electrification Project.—The Commission appointed to consider the question of the form of electric traction to be adopted on the Swiss Federal Railways, has decided to recommend the adoption of single-phase current at 15,000 volts. Waterfalls are to be used for the generation of current. While admitting that the continuous current system entails less consumption of current, the report states that this advantage is offset by various inconveniences, and particularly by an increase in the first cost.

FIRST MEETING OF THE INDUSTRIAL COUNCIL.

The Industrial Council for the prevention and settlement of trade disputes recently appointed by the Government held its first meeting at the Board of Trade Offices, Whitehall, London, on Thursday. The meeting had among other results the effect of defining more clearly than before what the work of the Council is to be. The Council, it will be remembered, consists of leading representatives of employers' associations and of trade unions, and the chairman is Sir G. R. Askwith. Thursday's meeting was attended by Mr. S. Buxton, President of the Board of Trade, and he opened the proceedings by an address.

Mr. Buxton, in the course of his remarks, said that the more he had seen of trade disputes the more he was convinced, first, that the best and most satisfactory method of settling disputes was for the parties directly concerned to come to an agreement among themselves. Secondly, that when the parties were unable themselves to come to terms, assistance from outside was very often effective in preventing, shortening, or ending a dispute. Thirdly, that this method of action must be carried out at the right moment, in the right way, and by the right persons. Of late years the Board of Trade had been given considerable statutory powers of conciliation, and had been called upon to exercise these powers more and more. Their exercise of these powers had been attended with some considerable measure of success and of public confidence. Apart from the particular disputes about which so much was heard, there were scores of industrial disputes in which the assistance of the Board of Trade was sought, and which were settled in a quiet way without any public knowledge of the circumstances. For some time past the Board had been considering whether the time had not arrived to take a step forward in the direction which they had already been pursuing. One disadvantage of the existing system was that it brought into action and prominence the Parliamentary head of the Board of Trade, who was necessarily a politician, in disputes and conciliation which ought to be purely industrial. It had been his policy to efface as far as possible his personality as a political president. At the same time he realised that, if the action of the department in these matters could be still further removed from the sphere of politics or the suspicion of politics, it would give even greater confidence, and there would be greater willingness by the parties to a dispute to seek the assistance of the Board of Trade. In addition to the creation of the Industrial Council, he was creating a special department, under the direction of Sir G. Askwith, as Chief Industrial Commissioner, through which the existing Board of Trade powers of conciliation and arbitration would in future be exercised. The other reason for the creation of the Industrial Council was that the good offices of the Board of Trade could be advantageously strengthened in the direction of what might be called a National Industrial body of weight and of repute, consisting of representatives of the two great sides of the industry of the country; a body which would meet to discuss questions in which all were interested, a body that would bring to bear on these problems a great range of advice, great weight, and a greater likelihood, therefore, of useful and acceptable action, especially before rather than after stoppage of work.

Subsequently the Council, with Sir George Askwith in the chair, discussed methods of procedure. It was decided to hold periodic meetings in February, June, and November of each year, and to hold such other meetings as might be necessary. It was agreed that, excepting in very special cases, which would be considered on their merits in each instance, the meetings of the Council should be private and confidential; and that on the conclusion of the meetings only such official statements should be issued as might be authorised by the Council or by the Chairman, acting on their behalf.

The Chairman put before the Council the point that when questions were referred to the Council such matters should be treated by them as if they were acting in judicial capacity, and not as advocates, and after due consideration of the facts and evidence brought before them. A unanimous consent was accorded to this proposition.

The Chairman mentioned various classes of cases which might require to be dealt with, among which were the following:—

- (1) Cases which may be referred to the Council—as an impartial body—for their opinion, upon the facts only of the case, to be conveyed to the parties privately.
- (2) Cases which may be referred to the Council in order that the facts may be impartially ascertained and recommendations made to each side; the acceptance of such recommendations not to be obligatory nor made public.
- (3) Cases similar to the last mentioned, but both sides agree-

ing beforehand that the recommendations of the Council be made public.

(4) Cases which may be referred to the Council upon which a decision may be given, the parties agreeing to accept the decision as a final settlement.

(5) Cases which may be referred to the Council, under special circumstances, by the Board of Trade or the Government.

(6) Other matters, apart from particular disputes, which the Board of Trade or the Government may decide to refer to the Council, with a view to obtaining a considered and representative opinion upon specific points.

The meeting afterwards closed.

S.W.R. "ABOVE ALL OTHER RAILWAYS."

Speaking at the annual prize distribution in connection with the evening technical classes held at Eastleigh, under the auspices of the London and South Western Railway Institute and the Hants County Council, Colonel Williams, M.P., president of the Institute, and a director of the company, referred to the splendid loyalty of the South Western railwaymen during the strike. He did not know that any other director had had the privilege of speaking to a South Western audience since the strike. He was lucky, for he knew that the Chairman and every director felt what a lift in life it was to be supported by a body of men who knew how to keep their word, and were loyal to the trust in which they were engaged. That perhaps was a slight thing, but it had raised the South Western beyond all other railways, not merely because they kept their trains running, but what was much better—they kept their trust. So he wanted his first words to be of hearty thanks and hearty congratulations to those who had helped, as every servant of the company had helped, to bring about that result. When men all over the kingdom were proving that an Englishman's word was not as good as it used to be, when men had got hot-headed and allowed fancied or real grievances to stand in the light so that they could not see what was their first duty and first trust, the South Western men remained loyal, firm and true. (Applause.)

Mr. Surrey Warner, superintendent of the S.W.R. carriage works at Eastleigh, in proposing a vote of thanks to Col. Williams, mentioned that the directors had given £20 towards the prize fund.

BRAKES ON EITHER SIDE APPEAL.

In the Railway and Canal Commission Court, last week, Mr. Justice A. T. Lawrence, the Hon. A. E. Gathorne-Hardy, and Sir James Woodhouse resumed the hearing of the appeal of the Barry Railway Company, the Taff Vale Railway Company, the Rhymney Railway Company, the Incorporated South Wales and Monmouthshire Freighters' Association, against a Board of Trade order, under the Railway Employment (Prevention of Accidents) Act, 1909, with regard to the use of both side brakes. The applicants contended that the proposed rule was not necessary, and they asked that if the Court held it was necessary the time for it to come into operation should be uniform—that all companies should be allowed twenty years instead of some of them only ten.

Colonel Yorke, R.E., chief inspecting officer to the Board of Trade, stated that the gradients in South Wales were among the greatest in the country, and if a brake on either side were required it was in South Wales. The cost of affixing a second brake would be 25s., including material and labour. There were in the country 65 companies owning between 200 and under 3,000 wagons, and of these 22 companies had no objection to the order.

Mr. Justice Lawrence stated that it rested with the objectors to satisfy them that their objections were reasonable ones, and that they had not done. As they had failed in that the court could not override the Board of Trade. They wanted a brake that could be released from either side, and he hoped they would soon have such a one in working order. The objectors to the rule failed.

New Branch of the North British Railway.—Traffic has now begun on the new line constructed by the North British Railway Co. between Grangemouth and Camelon, for goods and minerals, at a cost of about £60,000. The branch was completed about three years ago, and covers a stretch of about three miles. It has hitherto been utilised as a bye for empty wagons.

PERSONAL.

Mr. G. Fryer, station superintendent at London Bridge (S.E. and C.R.), for reasons of health has been appointed station-master at Bexhill.

Mr. Partridge, who has been appointed station superintendent at Cannon Street (S.E. and C.R.), in the place of the late Mr. Baker, has previously been in charge at Herne Hill, Woolwich Arsenal, and New Brompton Stations.

Mr. J. M. Robertson, M.P. for the Tyneside Division of Northumberland, has been appointed Parliamentary Secretary to the Board of Trade, in succession to Mr. H. J. Tennant, M.P. for Berwickshire, who becomes Financial Secretary to the War Office.

Mr. R. E. Leonard has been appointed by the Canadian Government as chairman of the National Trans-Continental Railway Commission for the Construction of the Quebec-Monkton Railway, which is now three-fourths completed. Mr. Leonard is a graduate of the Royal Military College, Kingston, is a civil engineer, and has had much experience in railway work. He is wealthy, and it is understood that his motive in accepting the post was solely to render a public service.

Presentation to Mr. W. Thomson.—On the occasion of the quarterly meeting of the Railway Clearing House Superintendents' Conference, on Wednesday last, opportunity was taken to present Mr. W. Thomson, who recently retired from the service of the South Eastern and Chatham Company, with a testimonial consisting of a silver bowl suitably inscribed. Mr. Turnbull (London and North Western Company), Chairman of the Conference for the current year, in making the presentation, referred to the regret felt by all the members at Mr. Thomson's retirement from business life, and stated that during his long connection with the Conference he had made himself the friend of everybody, and that his assistance in the deliberations of the Conference had been much appreciated. Mr. Turnbull complimented Mr. Thomson on the distinction of M.V.O. which the King had conferred on him, and asked him to accept the testimonial as a token of the esteem in which he was held by his friends of the Conference, together with the hope that he would live a very happy retired life for many years. Mr. Cockburn (Glasgow and South Western Company) said that he had commenced his railway career as a boy under Mr. Thomson, and he wished to thank that gentleman for all that he had done for him. He endorsed Mr. Turnbull's remarks entirely. Mr. Thomson, in response, said he was much obliged for the very kind and eulogistic terms in which he had been spoken of, and he looked upon the fact that he had been asked to accept a testimonial with intense gratification as the crowning event of long years of business existence. He said that the bowl would be retained in his family as a heirloom and that he would always look upon it as distinct evidence of the good-will and kind regards of all the members of the Conference. He took the opportunity of thanking all those members with whom he had been in association for years for the consideration and courtesy which they had always shown to him.

THE LATE MR. J. CONACHER.

The funeral of Mr. J. Conacher, chairman of the Cambrian Railway Company, took place on Monday at Highgate. There was a memorial service at St. Columba (Church of Scotland), Chelsea, at which the Rev. Dr. A. E. Fleming officiated. Representatives of the Cambrian and Barry Railway Companies were present. Among those sending wreaths were the directors and staff of the Metropolitan Electric Supply Company, of which Mr. Conacher was formerly the head; the secretary and staff of the Cambrian Railway; members of the Cambrian Railways Board, the Mawdday Railway Board, and the Barry Railway Board; and the Mayor and Mayoress of Oswestry.

The *Manchester Daily Dispatch* considers that the most interesting incident in Mr. Conacher's career was when he and the late Sir John Maclure were summoned to the bar of the House of Commons and admonished by Speaker Peel on an allegation of penalising railway men who had given evidence before a Select Committee of the House.

RAILWAY NOTES.

The Osborne Litigation Ended.—In the Chancery Division on Monday, before Mr. Justice Warrington, Mr. Clauson, K.C., mentioned the case of Osborne against the Amalgamated Society of Railway Servants, which was an action for an injunction to restrain the society from expelling Mr. Osborne from membership. Counsel said he was instructed that arrangements had been made to put an end to the litigation, and, by consent, he asked for an order staying all proceedings. His Lordship made the order asked for.

Comfort for Enginemen.—Among the locomotives viewed by the members of the Railway Club during the visit to the L. and N.W.R. shed at Rugby was one of the non-superheated 4-6-2 tank engines provided with a metal plate in the cab covering the firebox. This is intended to keep things cooler for the driver and stoker, and it is stated to achieve that purpose.

Superannuation Funds and the Insurance Bill.—Mr. J. G. Butcher, M.P., is handing in amendments to the National Insurance Bill, the object of which is to enable the superannuation funds of railways to become approved societies and administer under the new legislation the benefits which they already confer upon their members. It is believed that the Chancellor of the Exchequer is friendly to the proposal.

Canadian Railways and Customs Tariffs.—During the reciprocity campaign in Canada hay dealers in the Dominion retained the hay, looking for a rise in price with its free entry into the United States, the argument being that four dollars a ton, less duty, would mean more profits for the growers. The railway companies sent out notices that on and after October 16 there would be an average increase of five dollars a car load in the rates for hay going into the New England States and New York. The reciprocity proposals having been defeated, the increased rate will not be imposed.

Paddington Station, London.

The British Standard Brake Block

NOW UNIVERSALLY ADOPTED BY THE LEADING RAILWAY COMPANIES.

WHY?

Because we cut down your present cost 40% to 60%.

THEREFORE

Shift the responsibility on to us.

Our Brake Shoes last $2\frac{1}{2}$ times the life of the ordinary cast iron Block, with equal braking effect, and slightly less wear on the wheel tyres.

By our new design and blending of metals the Shoe can be completely worn out without danger.

One Shoe only, interchangeable and reversible for all classes of Carriages, Wagons, Vans, etc.

Don't theorise: get the facts from the list of Railways we now supply.

Our Representatives, with suitable samples for trial, are at your command.

The National Rail & Tramway Appliances Co. Ltd.,

COMPANY NOTICE.

The Buenos Ayres Great Southern Railway Company, Limited.

ISSUE of 300,000 4% Extension Shares 1914, of £10 each. Notice is hereby given that a circular has this day been issued to registered holders of Ordinary Stock and 4 per Cent. Extension Shares, 1912, offering to them for subscription at par, upon the terms therein mentioned, shares of the above issue in proportion to their existing holdings so far as practicable. Holders of Warrants to Bearer for Ordinary Stock who desire to receive a similar offer must deposit their Warrants at the offices of the Company on or before the 10th November, 1911, when corresponding circulars will be delivered. The deposited Warrants will be returned by the Company on application on or after the 16th November, 1911, in exchange for the receipts issued therefor.

Dated 2nd November, 1911.

By order of the Board,

A. GIET,
Secretary.

Offices of the Company,
River Plate House,
Finsbury Circus,
London, E.C.

TENDERS INVITED.

Bombay, Baroda, and Central India Railway.

THE Directors are prepared to receive up to noon on Tuesday, 14th November, Tenders for the Supply of:—

1. Steel Boiler Tubes.
2. Steel Tyres for Carriages and Wagons.
3. Elliptical and Laminated Springs.

Tenders must be made on forms, copies of which, with specifications, can be obtained at these offices on payment of 21s. each (which will not be returned). The Directors do not bind themselves to accept the lowest or any Tender.

C. CROMMELIN,
Secretary.

Offices, Gloucester House,
110, Bishopsgate, London, E.C.
2nd November, 1911.

Great Western Railway Company.

THE Directors of this Company are prepared to receive Tenders for the Renewal of a portion of the Steel Superstructure of the Smithfield Goods Station.

Plans and specification may be seen, and forms of Tender and Bills of Quantities obtained, at the Office of the Engineer at this Station, between the hours of 10 a.m. and 4 p.m.

Tenders, addressed to the undersigned, and marked outside "Tender for Work at Smithfield," will be received on or before Tuesday, the 21st November next.

The Directors do not bind themselves to accept the lowest or any Tender.

A. E. BOLTER,
Secretary.

Paddington Station, London,
30th October, 1911.

Midland Great Western Railway of Ireland

THE Directors of the Midland Great Western Railway of Ireland Company are prepared to receive Tenders for the Supply of the Undermentioned Stores. The Contracts to commence from the 1st of January next and terminate on the 31st of December, 1912.

- | | |
|---|---|
| 1. Barrows and Trucks. | 18. Iron Staffordshire Bars, Plates, Wire, etc. |
| 2. Baskets. | 19. Do. Yorkshire do. |
| 3. Bolts, Nuts, Rivets, and Nail Fastenings. | 20. Ironmongery. |
| 4. Brass and Copper Tubes, Plates, Sheets, etc. | 21. Lamps and Fittings. |
| 5. Brass Cocks and Gas-fittings. | 22. Leather Goods. |
| 6. Bricks, Flags, Tiles, etc. | 23. Lime. |
| 7. Brushes. | 24. Oils and Tallow. |
| 8. Candles, Soap, &c. | 24a. Oil (Cresosote). |
| 9. Carriage Fittings. | 25. Ropes, Canvas, etc. |
| 10. Do. Trimmings. | 26. Springs, Steel, and Files. |
| 11. Cements. | 27. Steel Tyres, Axles, and Plates. |
| 12. Clothing. | 28. Timber, etc. |
| 13. Charcoal, Sheet Tin, Lead, Gunbarrel, etc. | 29. Tools. |
| 14. Fog Signals. | 30. Tool Handles. |
| 15. Glass. | 31. Varnish, Paints, Oil, etc. |
| 16. India Rubber Goods. | 32. Waste and Wicking. |
| 17. Iron Castings. | 33. Steel Castings. |

Forms of Tender can be obtained, on payment of 6d. each, from the Storekeeper, General Stores Department, Broadstone Station, Dublin.

Patterns and samples can be inspected at the same place on and after 1st proximo, between the hours of 10 a.m. and 4 p.m., except Saturdays.

Contractors cannot be allowed to Tender to supply Goods to their own patterns, nor can the Company's patterns be sent away for inspection.

The Directors will not consider any Tender unless furnished on the Company's forms; nor any Tender in which any alteration of the form has been made.

The Tenders to be sent in by post, sealed and endorsed on the envelope "Tender for Stores, Form No. —," and addressed to "The Chairman, Broadstone Station, Dublin," so as to reach him on or before 10 a.m. on the 14th November.

The Directors do not bind themselves to accept the lowest or any Tender.

By order,
PERCY A. HAY,
Secretary.

Broadstone Station, Dublin,
24th October, 1911.

The Great Indian Peninsula Railway Company.

THE Directors are prepared to receive Tenders for the supply of the following stores, namely:—

- Water Cranes, etc.
- Steel Work for Bridges.
- Cast Iron Sleepers.
- Tie Bars, Gibs and Cotters.
- Wicks, Lubricating Pads, etc.
- Mild Steel Plates, Section Bars, etc., for Miscellaneous purposes.
- Lamps and Lamp Fittings.
- Flatlayers' Tools.
- India Rubber Pads.
- Galvanised Corrugated Sheets, etc.
- Pig Iron.
- Galvanised Wrought Iron Water Tubes, etc.
- Wrought Iron (Grades B and C).
- Wrought Iron (Grade A).

Specifications and forms of Tender may be obtained

at this office on payment of the fee for the specification, which payment will not be returned.

Tenders must be delivered in sealed envelopes, addressed to the undersigned, marked "Tender for Water Cranes, etc.," or as the case may be, not later than 11 o'clock a.m. on Thursday, the 9th inst. The Directors do not bind themselves to accept the lowest or any Tender.

J. I. BERRY,
Secretary.

Company's Offices,
48, Copthall Avenue, E.C.,
London, 1st November, 1911.

POSITION VACANT.

Government of Southern Nigeria.

ASSISTANT SUPERINTENDENT OF RAILWAY TELEGRAPHS required for the Government of Southern Nigeria for one tour of twelve months' residential service, with possible extension. Age between 25 and 40, preferably unmarried. Strict medical examination and vaccination if necessary. Salary £300 a year. Free single quarters provided at established stations. Free second-class passage out and home again on satisfactory termination of engagement. Half salary on voyage out, full salary from date of arrival in the Colony.

Two months' leave on full pay after twelve months' tour, increased to four months if returning to the Colony, with full pay during voyage or voyages, and free passages.

Candidates must have had independent charge of telegraph construction parties, thorough knowledge of railway telegraphs, and be able to send and receive telegraph signals at a rate of not less than ten words a minute.

Application by letter (no special form required), stating age, whether married or single, giving full particulars of experience, accompanied by copies of testimonials (not originals), with names and addresses of referees of whom enquiries can be made as to capabilities and character, should be sent at once to the Crown Agents for the Colonies, Whitehall Gardens, London, S.W.

Quote M/4967 on left-hand top corner of application. This advertisement contains all the information available concerning the appointment.

PATENT.

FOR Sale, the English Patent No. 22846 (French Patent No. 295378) referring to Self-Acting Railway-Car Coupling. Also licences offered and other propositions invited for utilisation of invention. Offers to B. 558, c/o Haaseenstein and Vogler A.G., Vienna I.

THE RAILWAY SITUATION.

It was hardly to be supposed that the Report of the Royal Commission on the working of the Railway Conciliation and Arbitration Scheme of 1907 would be accepted by the professional agitator without some form of protest. His dissatisfaction has taken the form of renewed threats of strikes, which, however, after the experience of the last few months, are not to be taken at their face value. What impresses the thinking man in regard to the whole labour situation is the supreme contempt shown for the interests of non-unionist labour, which, after all, comprises about three-fourths of the railwaymen. The daily press, in their reports on railway labour matters, take great pains to record the happenings at sundry hole-and-corner meetings, where wild statements, and indeed mis-statements of fact, are indulged in, but no one seems to find it worth while to test the opinion of the bulk of the railwaymen who are outside the unions. Neither does it seem to be appreciated that from the very nature of the case the unions attract the most discontented, and also, to a large extent, the more incapable, section of the railway employees. If, after all, the extremists were to force a strike, they would simply, in our opinion, complete the victory of the companies, who so far have come out of this trouble better than even they could have hoped. We are glad to observe that various leading companies are following the course indicated in these columns last week, by voluntarily advancing wages in various directions, irrespective of arbitration awards. This policy will no doubt be adopted as generously and as completely as circumstances will allow. It is at this point that the Government can materially assist the cause of the railwaymen by carrying out their promises of assistance in the direction of authorising a slight increase in rates. There are various other matters also in which both the companies and the railwaymen have a right to expect the help of the Government and of the public. We refer more particularly to relief which might be given in the direction of the abolition of railway passenger duty, some reduction in the burden of rates and taxes which fall so heavily on the railways, and sympathetic action in regard to the policy of co-operation and amalgamation which has been pursued by most companies. To do them justice, we believe that the leaders of the railwaymen are far more businesslike and conciliatory in the council chamber than they are upon the platform, and the differences of opinion which have been disclosed at "Unity" House during the week seem to show that there are advocates of peace, even among the leaders of the trade unions concerned. There can be no question that a careful study of the recommendations of the Royal Commission reveal substantial concessions to the men, and also pave the way for investigating further demands. Any just claims that may be put forward will certainly receive more liberal consideration in this constitutional way than they will at the point of the strike bayonet. We are glad to note that the general public and the stock markets are taking a far less alarmist view of the outlook, thus showing a proper sense of proportion in regard to the whole situation. We must again draw attention to what we regard as a serious flaw

in the tactics adopted by the companies, in that they have taken no regular and complete method of informing public opinion through the daily press of the facts of their own case. It is only too obvious that most of the "copy" supplied to the newspapers has been inspired from the extreme labour standpoint, and the public are to this extent being misled. Notwithstanding this, there can be no question that in the event of any precipitate action on the part of the agitators the active sympathy of the public and the Government will be on the side of the railway companies. Any strike or dislocation of traffic must be regarded more than ever as a blow directed at public interests and not against the interests of the railways.

AMERICAN ELECTRIC RAILWAYS.

The astonishing development of electric railways in the United States is again brought home to people in this country who care to look into the proceedings of the recent annual convention of the American Electric Railway Association and its affiliated bodies. British railwaymen who have not in recent years visited America may be apt to overlook this development because of its origin and because of the want of precision in the terms usually employed. The first electric lines in the United States were town tramways converted from horse traction. Under American nomenclature these are called street railways. This has frequently been shortened to the simple term railways, and sometimes such lines are called electric railways, the word "street" being omitted. These lines were rapidly extended out into the country, and were frequently laid along the side of rural roads, giving them something practically as free from obstruction as a private right of way. High speeds then developed on these lines. The next step was the construction of what have been called interurban electric railways, or interurban railways, built on private land like a steam railway and rivalling the latter in the speed of the cars. Then there are elevated and underground electric railways in the cities, some of which lines have been converted from steam traction. Last, there are a few main lines of steam railway which have been electrified. All these classes are now indiscriminately called electric railways, and in the compilation of general statistics they are frequently lumped together. Though it is the fact that street railways still form a very large proportion of the total, the mileage of railways pure and simple worked by electricity is very rapidly increasing, and in many districts there is effective competition with the steam lines. It appears from the presidential address of Mr. Arthur Brady at the convention referred to that the length of electric railways of all classes in the United States now exceeds 41,000 miles, reckoned as single track, and more than 4,000 additional miles are under construction. The gross annual receipts exceed one hundred millions sterling, and the working expenses sixty millions. There are a quarter of a million of employees and ten thousand million passengers annually, carried in some 90,000 cars. What the proportions of these figures applicable to genuine railways on their own right of way are the records fail to tell, but undoubtedly they are considerable when one remembers the enormous traffic on the elevated electric railways in New York, Chicago, etc., and on the underground electric railways in New York. So far as interurban electric lines are concerned, the mileage doubtless bulks more largely than the traffic, but in the latter respect they are developing every day. Goods traffic, hitherto a minor feature on these lines, is being vigorously pushed, and efforts are being made to improve the safety of working. Some time ago accidents were frequent, and better signalling arrangements are being adopted. In this country railway companies have little reason to fear the growth of such competitors, as the conditions are so wholly different. Haphazard and makeshift electric railways—

as the American lines often are in their early stages—are not allowed. We have not the large territory to cover, and we have steam railways already in every district where there is a chance of making a profit—sometimes, alas, in districts where no profit can be got. Railway electric traction will not come about to any extent in England by the construction of new electric railways, but by the change from steam to electric traction on lines where the volume of traffic or other conditions make the change advisable.

Weekly Traffic Summary.

The traffic receipts for the week ended October 29, as officially published by the fifty-two principal railways of the United Kingdom, amounted to £2,238,845, which was earned on 21,521 miles, being at the rate of £104 os. 7d. per mile of line open. For the corresponding week of 1910 the receipts of the same lines amounted to £2,136,245 with 21,467 miles open, or £99 10s. 3d. per mile. There was thus an increase of £102,600 in the receipts, an increase of 54 in the mileage, and an increase of £4 10s. 4d. in the receipts per mile. Thirty-four of the returns distinguish between the receipts from passenger and goods traffic, and these show an increase of £16,380 (or 13s. 7d. per mile) in the passenger receipts, and an increase of £82,691 (or £3 15s. 11d. per mile) in the receipts from goods traffic. The aggregate increase of the thirty-four railways for seventeen weeks in the passenger receipts has been £105,296, while the aggregate increase in the goods traffic was £105,686. The aggregate receipts of the fifty-two railways for seventeen weeks (July 2 to October 29) amounted to £40,916,285, in comparison with £40,751,759 in the corresponding period of last year—an increase of £164,526.

Index Numbers of Railway Debentures.

Our Index Numbers for the prices of best debentures of English Railways, based on the average yield obtained from these stocks, are repeated below, and the table is brought up-to-date. The rate of interest is assumed to be 3½ per cent.

Year.	Index Price.	Month.	Index Price.
1871	79	End of February, 1911	90
1881	92½	March	89
1891	106	April	89
1896	128	May	89
1901	110	June	89
1906	97½	July	89
1908	95½	August	88½
1909	93	September	86½
1910	90	October	86

DIVIDEND ANNOUNCEMENTS.

PENNSYLVANIA RAILROAD.—A quarterly dividend at the rate of 75 cents per share, payable on November 29.

CARDIFF CHANNEL DRY DOCKS AND PONTOON COMPANY.—An interim dividend of 3 per cent., free of income-tax, on the ordinary shares.

NORTH WESTERN OF URUGUAY RAILWAY.—A dividend of 3 per cent. on the six per cent. first preference stock for the year ended June 30, 1911.

METROPOLITAN RAILWAY OF CONSTANTINOPLE, FROM GALATA TO PERA COMPANY.—A final distribution of assets equivalent to ½ per cent. (2s. per £20 share).

ARGENTINE NORTH EASTERN RAILWAY.—The directors announce a dividend at the full rate of 5 per cent. on the B debentures and debenture stock for the year ended June 30, 1911, payable, less income-tax, on November 24, after putting £10,000 to renewal fund and carrying forward £27,354. A year ago the distribution was at the same rate, £10,000 was reserved to renewal fund, and £4,289 carried forward.

3½ " " Mar. 19, 1908	3½	Jan. 19, 1910	3½	"	Feb. 15, 1911
3 " " May 28, 1908	3	Feb. 10, 1910	3	"	Mar. 9, 1911
2½ " " Jan. 14, 1909	2½	Mar. 17, 1910	2½	"	Sept. 20, 1911

The exigencies of the end of the month of October are very clearly reflected in the Bank return this week; more than half a million in coin was withdrawn—£573,000, as nearly as may be estimated—while £439,000 was exported to places abroad. The active note circulation at the same time expanded by £456,000, so that the Reserve is down £1,468,000. Fortunately, the Bank can well spare the money, thanks to precautions taken during the summer, and the prospect of passing the turn of the year without further increase of the official minimum rate of discount is quite good. Public Deposits show a small decrease of £65,000, while Other Deposits are down £1,646,000, these declines being accompanied by reduction of only £257,000 in the securities held by the Bank. As the result of all changes the ratio of Reserve to liabilities is 1½ lower at 51.60 per cent., which is, however, 2½ points above the level which obtained at the corresponding date of last year. The position is therefore satisfactorily strong, and though two months' paper commands somewhat higher rates than last week, the discount on bills of longer usance is rather less. The resources of the market as reflected in Other Securities is nearly four millions above the level of this time last year, so that money is relatively abundant.

On the Stock Exchange the revival which began so unmistakably last week made further progress, not, however, without the appearance of checks and hesitations. The causes on account of which it was so long held back are still too much in evidence to permit the operators in the market to ignore their existence. Events in China or Tripoli might easily take a turn at any

moment which would place another complexion on stock markets, as has so often happened before, and the rise of prices now in progress cannot be regarded with the same confidence in its stability that in former time was always inspired by upward movements when supported by expanding trade. The present rise was initiated by a feeling that the fears of the foreign complications that had oppressed the markets so long might be dismissed for the present; it was aided also by the belief that money may be expected to be fairly easy for the next few months. The demand for capital, however, is as keen as ever, and this must act as a check, the influence of which is sure to be felt before long. During the last three stagnant months a number of projects involving new capital issues have been held up, and we may again expect a plethora of these if conditions remain favourable, which will have the usual curbing influence on the quotations of existing stocks.

The events of the week in so far as Home rails are concerned have turned upon the way in which the railway workers' unions may be expected to act in face of the report of the Royal Commission. Last Saturday the rise in these stocks continued with unabated vigour, being assisted by the sanguine views prevailing in other departments of the Stock Exchange. In the American section a steadier tone was discernible. In the foreign section Chinese bonds advanced. Canadas were higher and South American railway shares in good demand. All these outlying factors were equally favourable on Monday, but in the meantime the eloquence of the labour leaders had flowed, with the result that Home rails relapsed sharply. The next day most departments of the market again experienced favourable conditions. Consols and other British Government stocks were quoted higher. United States Railways advanced strongly, and, apart from a few falls in South American stocks, there was little to complain of. Home rails, however, showed irregular movements. The publication of concessions in the matter of wages and conditions of service by the London and North-Western Railway was not received with unanimous approval. Many argued it should have been done long ago or not at all, and feared it would be regarded by the employees as a confession of weakness and by the public as an acknowledgment of error. The following day, being November 1st, was a holiday, but when the markets reopened on Thursday the doubters had evidently surmounted their fears, and many notable additions were made to the prices quoted in Home rails. Brighton A rose 1½, South-Eastern A 1½. The heavy stocks did not respond so readily, but London and North-Western was ½ higher. The plan for combining the Underground railways with the General Omnibus Company was much discussed, and favourably influenced the stocks concerned. The United of Havana and the Western of Havana line were also favourably affected by a scheme of amalgamation.

On Friday another check occurred. Home rails, which were steady enough at first, fell later in the day. The chief declines were those of the more speculative stocks, the heavies being less affected. London and North-Western, indeed, was ½ higher on the day. One cause of the set-back was impatience at the delay of the conference of the delegates of the four unions of employees to come to a decision. A profession of unanimity was all they had thought wise to publish up to the time of going to press. Other causes, however, were discernibly at work, and every department of the Stock Exchange experienced irregular movements, of which the general tenour was downwards. Consols fell in spite of rumours of a deputation of bankers, headed by Sir Inglis Palgrave, to the Chancellor of the Exchequer to advocate some policy of redemption. Mines, rubbers and oils were all off colour. United Havana, after rising to 87-88, closed at 86½, 87½. London General Omnibus stock was in request.

We are authoritatively informed that the statements as

to an arrangement having been reached between the Underground Railways Company and the London General Omnibus Company for a fusion of their interests is without foundation. Negotiations are proceeding, but any statements as to terms are more or less guesswork, and should be received with great caution. Should these negotiations lead to a successful result, the public will be informed without delay.

The movements of the week are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.

UNION EXECUTIVES AND THE ROYAL COMMISSION.

Last night, after a three-days' sitting of the executives of the railwaymen's unions at Unity House, Euston Road, to consider the report of the Royal Commission of Inquiry into the Conciliation Scheme of 1907, there was again an adjournment. The conference will be continued to-day. It is stated that the proceedings have been harmonious, and that a certain "decision" has been arrived at. No information was forthcoming as to the nature of the decision.

Many meetings were held at railway centres on Sunday evening, when resolutions were passed refusing to accept the report of the Royal Commission, and calling upon the Executive Committee to draw up a programme of hours and wages to be submitted to all the companies. Notable exceptions were recorded at meetings of the Associated Society of Locomotive Engineers and Firemen, whose resolution expressed regret that a fuller measure of recognition was not granted, but stating that, as their case had been exhaustively investigated by an impartial tribunal, whose recommendations embodied the main suggestions put forward by their Society, and as the 1907 scheme had been much simplified and improved, they accepted the report, and pledged themselves to give the proposed new machinery a fair and honest trial.

A list of nineteen demands by all grades, put forward on Wednesday by the Doncaster branch of the A.S.R.S., are alleged to have been approved at meetings of men belonging to the four unions which had been held at King's Cross, Peterborough, Colwick, Doncaster, Bradford, and other centres. An official of the A.S.R.S., interviewed on this point, said the programme would engage the consideration of the national executives in the present week.

HIGHER RAILWAY WAGES.

On October 28 the Great Western Railway Co. announced that, having for some time past had under consideration the rate of wages and other conditions affecting the various grades of men in their employ, the directors had decided to make concessions which will beneficially affect a very large proportion of the wages staff in the traffic and engineering department. The concessions were based on evidence offered by the men at the meetings of the Conciliation Boards prior to the strike, and they practically mean a yearly advance of 1s. a week over periods of from four to nine years.

The London and North Western Railway Co., on October 31, issued a document stating the directors had had under consideration a number of petitions from the staff for improved conditions of service, and, although the rates of wages and hours of labour were settled by the Award of Sir Edward Fry in 1909, for a term expiring on January 1, 1913, and cost the Company £70,000 a year, the directors had decided forthwith to grant certain increases in the rates of pay and reductions in the hours of labour, besides other concessions, to a large number of men, especially those in the lower grades. These concessions will amount to over £80,000 per annum.

On November 2, the London and North-Western Company announced an increase of wages for their Crewe workmen in nearly all departments, with an adjustment and advance in the rates of pay for piecework and overtime. The wages of labourers have been advanced to a minimum of 20s. a week.

The Caledonian directors, on October 31, announced that, following on the settlement signed on behalf of the Board of Trade, the railway companies and the trade unions of railway employees on August 19 last, applications were made to the Caledonian Railway Company by many of the employees for increased wages and improved conditions of service. The directors had decided to make certain concessions, particularly to the employees in some of the lower paid grades, which were estimated to involve an increased annual expenditure of about £10,000 per annum. A final decision with regard to the conditions of service of the locomotive employees had been deferred until after another meeting with their representatives on the sectional conciliation board.

The Latest P. and O. Liner.—An addition was recently made to the Peninsular and Oriental fleet, when Messrs. Caird and Co., of Greenock, launched the s.s. "Ballarat," which they have built for the company's one class service to Australia, *via* the Cape. The new liner is of 11,000 tons gross, and is finely equipped with passenger accommodation, while she is also provided with gear for the rapid loading and discharging of cargo. The vessel, which will offer many advantages not hitherto obtainable for so low a fare, will leave London on her maiden voyage on November 16, and her popularity should be assured.

THE "CORNWALL" OF 1847 RESUMES SERVICE.

A NORTH WESTERN INSPECTION CARRIAGE WITH LOCOMOTIVE.

On all railways a large amount of inspection of different parts of the lines has continually to be done, and many places being inconvenient of access by the ordinary trains, special carriages are usually set apart for the use of the various officers whose duties include such inspection. Our illustration shows the inspection carriage with locomotive attached as used by the chief mechanical engineer of the L. and N.W. Railway. The underframe of the carriage is 30ft. long, and constructed entirely of steel, the main members of the frame being 9in. by 4in. channel bars, the diagonal braces and ties being built up with plates and angle bars. To the underside of the frame is fixed a wrought iron tank carrying 660 gallons of water, from which the engine boiler is supplied. The tank is fitted with the apparatus for taking up water from troughs whilst travelling, an arrangement common to all L. and N.W. locomotives.

The body of the coach is 13ft. 6in. long by 7ft. 2in. wide, fitted with seats down each side, giving seating accommodation for 12 persons. One end of the coach is fitted with a lavatory, and at the other end, farthest from the engine, is a covered verandah 8ft. long, fitted with seats, the sides and end being

PADDINGTON STATION ENLARGEMENT.

Since the building at the terminus of the Great Western Railway was first put up by L. K. Brunel the structure has suffered no change, though the lines and platforms have been greatly altered. The two large spans, flanked on the east by a narrower space covered by a transverse ridge and furrow roof, have been familiar features for over 50 years. The covered part was used in the first instance as an engine and carriage shed, as well as for passenger trains, and all the lines were laid down for the broad or 7ft. 6½in. gauge. By shifting the engines and empties down the line, and, later, by the narrowing of the gauge, so much more passenger and parcels accommodation was obtained that no other alterations have been required until within the last few years. Preliminary work on the approaches to Paddington has been going on for many months past; as these neared completion the widening of the terminal station was started by the substitution of a third large arch span for the ridge and furrow roof on the east. The high level carriage road on the east will then be carried on arches, under which the station will be further widened. When the works are completed very extensive alterations will have been carried out at all stations and bridges up to and including Westbourne Park. The many crossings of the main lines by empty engines

North Western Inspection Carriage and the "Cornwall."

protected by glass screens, which can readily be turned up and fastened to the roof in fine weather, thus leaving the verandah entirely open. The interior of the carriage is upholstered in brown embossed leather, and is lighted up by electricity.

The engine attached to the carriage is the famous old locomotive "Cornwall," built at Crewe works in 1847 from the designs of Mr. Francis Trevithick, at that time the locomotive superintendent of the L. and N.W. Railway. The driving wheels of the engine are 8ft. 6in. diameter. The cylinders are 17½in. diameter by 24in. stroke, and the working steam pressure is 140lbs. per square inch. The engine weighs 24 tons 6 cwt., in working order, of which 12½ tons are carried by the driving wheels. In order to keep the centre of gravity of the engine as low as possible, the driving axle was originally put over the top of the boiler; but this was not a success, and the engine was rebuilt in 1858, the boiler being raised and placed above the axle in the usual way.

For 58 years the engine was engaged in working some of the fast main line express trains on the L. and N.W. Railway, and in August, 1905, it was withdrawn entirely from service. Up to that period the "Cornwall" had run 928,838 miles. After lying up for some time, it was decided to attach her to the inspection carriage for permanent service.

and carriages will be eliminated, as there will be six clear lines right up to and through the latter station. We shall shortly give further details of these works, the importance of which may be judged by the fact, as related by Mr. F. C. Warren, in the *Great Western Railway Magazine*, that the spans of the new bridges vary from 140ft. to a maximum, in the case of Westbourne Terrace Bridge, of 244ft., the girders in that case being the longest erected since the construction of the Royal Albert Bridge, Saltash.

Brighton Main Line and Electrification.—Mr. Philip Dawson, consulting electrical engineer to the L.B. and S.C. Railway Company, states that the completion of his report to the directors on the proposed electrification of the main line to Brighton will probably occupy another twelve months.

A Scotch Railway Closed.—The renewed efforts which have been made during the year to keep open the Invergarry and Fort Augustus Railway have not proved successful, and the line was closed on October 31. It was opened in July, 1903, the owning company having been formed in 1896 with a capital of £344,000. The growth of motor traffic is said to be one of the causes of the failure of the railway.

NEW SUBURBAN TRAINS OF THE GREAT NORTHERN RAILWAY.

The Great Northern Railway Company have just built two new trains for their London suburban service. As shown in the accompanying illustration, each train consists of four sets of twin carriages, on the same principle as the twin carriages already running on the Great Northern, each carriage being on three of the Great Northern Railway standard bogies, which have a wheel base of 8ft. With this system the coaches are articulated, and so prevent undue overhang or gaps between step boards and platforms on curves. It also enables the number of bogies to be reduced, and thus reduces the weight of the train.

The two outer sets are a third class brake at one end and a second class brake at the other; each of these vehicles has twelve compartments and guard's brake, and is 79ft. 9in. over buffers, the bogie centres being 30ft. 6½in. apart. The two

New Suburban Train on the Great Northern Railway.

inner sets are a third class carriage having sixteen compartments, and a composite carriage having three third class, eight first class, and three second class compartments. These vehicles are 89ft. 6½in. over buffers, the bogie centres being 35ft. 11¼in. apart.

The train is 338ft. long, and gives accommodation for 80 first class passengers, 180 second class passengers, and 372 third class passengers, or a total of 632. The weight of the train when empty is 147 tons, which gives an average weight per passenger of about 4½ cwt.

The non-storage system of steam heating apparatus is installed, each compartment being fitted with a "Westinghouse heater" and a regulator which can be operated by the passen-

All compartments are fitted with frames over each seat back, providing three spaces in each frame for advertisements or photographs. Wood's wire-woven seats are fitted throughout the train.

All doors are provided with wedge locks and safety catches, with inside handles.

The underframes and bogies are constructed of steel throughout, and to deaden the noise when running I.R. body cushions are placed between the underframe and the framing for the body floor, which is built with double floor boards, the 1 in. space between top and bottom boards being packed with hair felt.

DRAINING AND TURFING ON RAILWAYS.

The difference in the inception and carrying out of railway schemes in this country and on the North American continent has offered a constant subject for comparison from the very

first. Many of the features of the pioneer lines in America are also well known—the corduroy roads laid on the surface—the absence of high platforms, and, in many cases, of signals; these are gradually being changed for more modern methods. It is singular, however, that some of the practices that tell for good running and economical maintenance, which have obtained in the United Kingdom from the very beginning, have not been adopted more extensively in the States. The Americans are great travellers and keen observers, and yet it would appear that it is only of late that they have found out the advantage of dealing with rainfall in the British fashion. The thorough draining of the sub-grade—or formation, as we call it—both on embankments and in cuttings, is now being urged on every

Two Carriages on Three Bogies.

gers to "on," "off," and "medium." Incandescent gas lamps are provided for illuminating purposes. In the first class compartments lamps with two mantles are used. Ventilation is provided by two torpedo ventilators in the roof of each compartment and hinged fanlights over each of the four quarter lights. The carriages are made higher than the old suburban trains, having the high elliptical roofs, and the compartments are a little larger. The first class compartments are finished in teak framing and mouldings, with sycamore panels on quarters and above net rack, the fittings are in aluminium, and the upholstery is blue cloth, with crimson and blue silk lace. The ceiling and divisions above cant rail are lined with millboard and painted white, the three panels in ceiling being decorated in gold. The second class compartments are finished in mahogany framing and moulding, the fittings are in brass, and the upholstery is in brown and gold combination pile. The ceiling and divisions are lined with millboard painted white, the three panels in ceiling being decorated in blue. The third class compartments are finished in teak, the fittings are in brass, and the upholstery in crimson and black velvet pile. The ceiling and divisions are lined with millboard and painted white.

occasion, and the use of turf on all slopes is only just being realised. On British railways the top soil under embankments and over the sites of cuttings has always been preserved and laid by, to be spread afterwards on the slopes and to be sown with grass seeds. By this means, not only is the weathering and scouring of the surface avoided, but the eye is rested by the well-known beautiful green of the turf in these isles. At stations the laying aside of the original top soil gives an opportunity for the planning and cultivation of those gardens which are so common over here, but the beauty of which would seem to be appreciated for the first time on the other side.

German Electric Railways.—The first vote for the electrification of Berlin City and Circle Railway is to be included in the railway estimates for 1912. The experiment with the electric railway service on the line Dessau-Bitterfeld having proved satisfactory, the service is to be extended to Bitterfeld-Leipzig-Halle and Dessau-Magdeburg, each line being of a length of 150 kilometres. The Allgemeine Electricitäts Gesellschaft at Berlin is to carry out the work.

MEETINGS AND REPORTS.

FORTHCOMING MEETINGS.

- Nov. 7 (Tues.)—**North Western of Uruguay Railway** (Annual), River Plate House, E.C., at 2.30.

(Reports, Traffic Returns, Prospectuses, and all other items of financial intelligence should be sent as early as possible to the Editor of THE RAILWAY TIMES, 12, Norfolk Street, London, W.C. Telephone 2948 Gerrard. Telegraphic address, Altimetry, London).

BUENOS AYRES AND PACIFIC RAILWAY.

The ordinary general meeting of the proprietors was held on Thursday, November 2, at Winchester House, Old Broad Street, E.C., the Right Hon. Lord St. Davids (chairman of the company) presiding.

The SECRETARY (Mr. F. Sanders) having read the notice convening the meeting and the report of the auditors.

The CHAIRMAN, who was received with applause, said:—“I beg to move ‘That the report of the directors and the statement of accounts, now presented, be and they are hereby received and adopted.’ I am going to do what I have never done before, that is, read a speech to you, because, to tell the truth, I have been in bed for the last few days with influenza, and it was not very easy for me to come here to-day. Perhaps it will be well if I begin my remarks to-day by just touching upon matters contained in the notice given on the cover of the report as to the resolutions we propose to submit to you. The first resolution will be one for converting the 300,000 ordinary 1911 shares into £3,000,000 of ordinary stock, and as to that I think I need not make any explanation. After that we ask your authority for two new branches, one from Arribenos, running approximately 40 miles in a westerly direction; the second, a loop line of approximately 50 miles between Espejo and Palmira stations on the Argentine Great Western line. These are two small feeder lines which are necessary for the development of these districts, and both of them are expected to be remunerative as traffic producers. Then, in a somewhat long resolution we ask you to give us authority to construct irrigation works for the Government. More than one of the other leading Argentine railway companies have already taken this power from their shareholders. The position is, that the Government ask the companies to do these works for them—the companies taking payment in irrigation bonds. The terms are so arranged that if we do any of this work we gain nothing by it directly; on the other hand, it is extremely unlikely that we should lose anything by it; in other words, we do the work at cost. You may say then, how are we interested in doing it? We are interested and greatly interested, because we wish to get our districts developed, and there are many great tracts of land in the provinces which we serve which could only be developed by irrigation on a large scale, and this seems to be the best method of getting the work done. That, gentlemen, is why we make this proposal to you.

HISTORY OF THE HALF-YEAR.

Now, gentlemen, as to the history of the past year. Perhaps it may be better to go even further back and for us to regard the fact that for the last two years we have been bitterly disappointed as to our crops. Two years ago when I met you in this room all looked well with us, but our prospects were afterwards ruined by frost. Last year when we were in this room all was going well, but later there was a drought which destroyed the wheat on all the southern part of our system, and which ruined the whole of our maize crop. In point of fact, for several years past we have had very bad maize crops, but last year was the worst of all, in fact, we might say we have had no crop at all. Those, gentlemen, are the troubles to be faced by shareholders in railway companies that are still in the main dependent upon the crops of a particular year. We have had, however, a

general development to help us, and in spite of the badness of the crops, the result of the year's working is a net profit of £2,014,185, an increase over last year's figures of £165,000. We are, therefore, able to recommend to you a slightly increased dividend, and, in addition, set aside the sum of £10,000, which will provide for expenditure in the nature of special renewals, and we are also able to increase the amount carried forward to the present year's accounts by £21,000. A reference to the comparative statement of the working for the two years shows this result to have been obtained by an all-round improvement in all classes of traffic, for with the exception of wheat, due to an exceptional harvest in the district served by certain of the recently constructed branches, we have experienced a failure in what we had every reason to hope would be one of our principal sources of revenue. I should particularly like to draw your attention to the passenger traffic, where for the first time in the history of the company the gross receipts exceed one million pounds and now form over 28 per cent. of the gross earnings of the line—hear, hear—and this is not entirely due to short distance travelling, but to the increased passenger business that is steadily growing all over the system, and especially with Mendoza and Chili. From the experience gained in the first year of winter working in the Cordillera we have been able to provide defence works—that is, against snow and avalanches—where urgently required, and during the whole of the past winter there has only been one interruption and delay to passengers on the Argentine side. As regards the working expenses, you will have noticed that there is a considerable increase in running expenses, due to the coal bill. This is due to the extra train mileage run through the increased length of line worked, and the high ocean freights for coal that have been ruling for the greater part of the year. It will be of interest to you to know of the existence of an oil field at Comodoro Rivadavia—it is not on our system but further away. The Board have taken interest financially in one of the companies operating in that district, and have secured an option on favourable terms for all the oil it may require. At the present moment trials are being made on our Bahia Blanca line with oil which we have purchased from another source, and we expect, very shortly, to receive a report on the subject from our general manager.

THE DOUBLING OF THE LINE.

The doubling of the line out from Buenos Ayres to Chacabuco, a distance of 200 kilometres, has been under consideration for some years, but only expenditure has been incurred that was absolutely necessary, relief being provided by the construction of crossing sidings. Now the time has come when, owing to the traffic from the various branch lines being concentrated on to a single line, we find a considerable difficulty in maintaining a service during the busy season without serious delays. We are, therefore, proceeding with the work of doubling this section of line on which a large amount of preparatory work has been done, 76 kilometres of double track having been opened to service, and we hope a further 34 kilometres will be opened to service by December 31 next. I will now read you a cablegram received from the general manager, dated October 31:—“Prospects up to the present are excellent over whole Buenos Ayres and Pacific system. Rains during last three months have been more general and heavier than last year. Rains this month have been most beneficial, so outlook for crops is very bright, and we are so far free from any signs of locusts. Increase of 10 per cent. in cultivation Cuyo Division promises increased business there. Area under cultivation in Bahia Blanca and North Western section much larger than last year, and, if present prospects materialise, heavy increase of traffic on line and in Puerto Galvan may be looked for.” It was shown in the report that the traffic increase since July 1 last was £34,119, and since that date we have two weeks' additional traffic by cable which brings the published increase up to October 28th to £39,339. I think that this figure is gratifying, for as you know, this is the lean time of the year, and that during the same time last year our traffics were being helped by that which had been held back. The cable read to you just now is a satisfactory one, but in addition to that we had an estimate from the general manager a few weeks ago showing that there was a very much larger area under cultivation this year than last, and that being the case, it will be obvious to all of you that if we have anything in the nature of a favourable season, we ought to be receiving good traffics during the current year. At the moment all looks well, but for the last two years, as I have said before, we have had very bitter disappointments. I have put the situation before you as well as I am able to, and you can therefore sum up the position as well as I can, but I would remind you once again, that whatever people may tell you, in our part of the Argentine the crops are not safe, especially in the South, before the middle of December—wheat crops that is.

CROP PROSPECTS.

At the moment, however, prospects as to crops are as bright as they well could be. I think we ought to add a word as regards our relations with the Argentine Government. We must congratulate the Argentine upon the enlightened and patriotic policy pursued by the Executive power as regards their public works and railways. While achieving a full control over the railway working with a view to checking all possible abuses, the Government has conciliated the interests of the shareholders who have displayed so much confidence in the future of their country. They know as well as we do that without a due return upon capital and security for our money it is impossible to pursue our progressive course. (Hear, hear.) At the same time they keep us up to the mark, and, unless we are prepared to fill up our zone and keep well abreast of the times, we know that Argentine interests will not be allowed to suffer by our neglect. Upon these lines we are glad to say that our relations have been cordial, and we have received every reasonable assistance. Before sitting down, I think I may as well mention that there is a company in which we have a considerable interest, and which has, in fact, become a sort of subsidiary of our own—namely, the South American Light and Power Company—a company formed to acquire the concession granted by the municipality of the town of Bahia Blanca for the public and private lighting of the town, and to which we are in very close relation, and we own 75 per cent. of its share capital through the Bahia Blanca Railway. Since the working agreement was entered into in May, 1906, between the Light Company and the Bahia Blanca and North Western Railway Company, Limited, we have undertaken various extensions to ensure the proper development of the Light Company's business and have received the share capital in repayment. At June 30, however, the Light Company owed us for advances made during the year, and part of the proceeds of a debenture issue to be made shortly will go towards repaying us and providing for future working capital. When the time comes for the issue to be made I will see that a prospectus is sent to you in case any of you like to take an interest in the company. I beg to move the adoption of the report. (Applause.)

Mr. T. PENN GASKELL seconded the resolution.

In reply to questions by Messrs. Langford, Snow, Ogden, Sharp and Col. Porter,

The CHAIRMAN said the company had had labour troubles in South America, as in this country, but the board had made arrangements so as to live and let live. He thought there was no chance of making losses in connection with the proposed irrigation works, as the company would work as servants of the Government, and there was no reasonable risk in so doing. The bulk of the reserves was invested in the company's business, but they had a certain number of investments which were paying them well. As to new issues during the current year, he stated last year that he thought two millions would be required to last them up to the end of the current year. Probably two millions more would be required afterwards, but that would largely depend upon the crops. Mr. Langford had suggested that the dividend should be increased from $3\frac{1}{2}$ to $4\frac{1}{2}$ per cent., but by the articles it was not competent for a shareholder to propose a resolution which would result in a less sum being placed to the reserves than what was proposed by the directors. He felt sure the bulk of the shareholders would not wish, under any circumstances, to pay larger dividends than what the board considered prudent. (Hear, hear.)

The resolution was then put and carried unanimously.

On the motion of the CHAIRMAN, the board were authorised after the 2nd inst. to convert the 300,000 ordinary (1911) shares of £10, numbered 1 to 300,000 inclusive, into £3,000,000 ordinary stock, and to construct and work the lines to which reference had been made by the Chairman in his opening speech.

The retiring directors and auditors were re-elected, and the proceeding terminated with a vote of thanks to the Chairman and directors for their past services.

BUENOS AYRES MIDLAND RAILWAY.

The ordinary general meeting was held at River Plate House, E.C., on Monday last, Mr. Frank Henderson (chairman of the company) presiding.

The SECRETARY (Mr. C. H. Lambert) read the notice convening the meeting and auditors' report.

In moving the adoption of the report, the CHAIRMAN said that the report issued this year was a disappointing one. When he addressed the shareholders a year ago the directors had every reason to hope that the whole of their line would have been opened on January 1 this year, and that at their meeting that day they would have been able to consider the results of six

months' working on revenue account, but, unfortunately, their hopes had not been realised. The line itself was completed, but difficulties arose in connection with the building of their stations, and the completion of their terminal station at Puente Alsina was delayed, so that they were unable to obtain the Government's permission to open the line to public service, and could not, therefore, bring the whole of the line under the conditions of the working agreement with the Buenos Ayres Great Southern and Buenos Ayres Western Companies. Certain difficulties with regard to the stations had now been got over, and the stations were now well placed as traffic collecting centres, with ample room for intermediate stations when the development of the country required them. Although they were unable to open the line on January 1 they obtained permission from the Provincial Government to carry traffic on the section to Carhue by their construction trains, and full advantage was taken of this, with the result that capital account had received a credit of £14,948, being the amount of the gross receipts during that period. He was glad now to be in a position to report that they were able, on July 1 last, to open to public service a well-built and fully equipped line, ready to deal with any reasonable traffic demands which might be put upon it in the immediate future. He said advisedly the immediate future—for they hoped that once the facilities afforded by the Midland Railway were properly appreciated, the traffic development would be so rapid that additional rolling stock would be rendered necessary. He did not propose to go into the figures of the report, for, in his opinion, they conveyed practically no indication as to the future. They had, so far, been in a transition state—a line with no head and no tail, only touching the fringe of the traffic-producing districts, and working under conditions as difficult and as unsatisfactory as it was possible for them to be. He referred at length to these difficulties, and also to the importance of keeping friendly relations with both the National and Provincial Governments. It was not for them to take one side or the other in any constitutional differences which might arise between these Governments. It was their duty to them, as shareholders, and to the country in which they worked, to maintain the most friendly and harmonious relations with the authorities whether national, provincial or municipal, and, anxious though they were to obtain an entrance into Buenos Ayres, he thought they would agree with him to endeavour to do so in the case of the opposition of the authorities, under whose jurisdiction they would come, would have been a mistake in policy which they would have long regretted. There was another reason which had influenced the decision not to enter Buenos Ayres, and this was the great cost of the scheme. Although they were still of opinion that a terminus in the city of Buenos Ayres would mean to them a stronger position for developing a passenger and outward goods traffic, they felt that they could pay too high a price for such an object. Therefore, a middle course had been adopted, whereby a solution of the difficulty had been found which they believed would place them in a very satisfactory position at a cost considerably less than half that of the original project. With regard to the current year, from July 1, they entered upon what he considered as their first year's working as a complete railway system, and it was only this year that they could look for an indication of the results which the railway was capable of producing. Four months of the year had already gone by, and he regretted that traffic returns had not shown any marked advance, but he must remind them that they were suffering from the same thing which had affected all other railways in Argentina. At this time of the year the principal traffic of the railway was maize, but, as they would have seen from other companies' reports, the maize crop this year was almost totally lost through drought, and, whereas other older lines had developed many other sources of traffic which kept them going, even in bad maize years, they had not yet had an opportunity of doing this, and they felt the loss of the maize proportionately more than the other companies did. They were not discouraged, either. They had a well-built and well-equipped line; and they had it on the authority of many of those who were best able to judge that the districts through which they ran were second to none in the whole republic. In a country where cereals formed the bulk of the traffic disappointment often came when one was most confident and when prospects seemed brightest, and prophecy was dangerous, but at the moment there was no cloud on the horizon. The wheat crop was looking splendid, rains had just come when they were wanted, there were no locusts, and everyone in the country was full of optimism. If they got the good harvest they were hoping for and expecting, he felt confident that the Buenos Ayres Midland Railway would show, when it had had time to develop, that it would produce results in its own small way not inferior

to its older and more powerful neighbours. In conclusion he read the following cablegram which had just been received from their representatives:—"The line has been finished and accepted by the Government of the Province of Buenos Ayres; it is in excellent condition. Libertad workshops are almost completed. Transshipment station:—We expect that branch will be ready for opening to traffic next month, and anticipate this will considerably assist traffic generally. Area of land under cultivation largely increased; recent rains have been general all along the line and done much good. Coming harvest prospects are very encouraging and could hardly be better."

Mr. F. EUSTACE FAITHFUL seconded the motion, which was carried unanimously after a brief discussion.

The motions for re-election of the retiring director and auditors were duly carried, and with a vote of thanks to the chairman and directors, the proceedings terminated.

SAN PAULO (BRAZILIAN) RAILWAY.

The 104th ordinary general meeting was held on Wednesday last in Cannon Street Hotel, E.C., Lord Balfour of Burleigh, K.T. (Chairman of the company) presiding.

The SECRETARY (Mr. Wm. Hall Maxey) having read the notice convening the meeting and the auditors' report,

The CHAIRMAN said that he was sure all the shareholders would give Mr. Gordon a cordial welcome upon his return from Brazil. He had been absent from the last two half-yearly meetings. Although the directors missed him when he was away, his presence in Brazil from time to time was most useful to them, and greatly to the advantage of the company. Therefore he asked the shareholders to give him a hearty welcome on his return and presence at that meeting. (Applause.) The directors now presented the 104th half-yearly report of the company, and they believed that the shareholders would find it as satisfactory as any of those which had preceded it. It would be observed that the gross receipts for the half-year showed an increase of nearly £100,000, and the net revenue for the half-year amounted to £134,940. When the expenditure in England and the interest on stores were taken into account, the net revenue which remained was just about £123,000. He next dealt with the only adverse criticism which he thought could be made upon the report, and the only one to his knowledge which had been made. The working expenses were shown to be something like 79 per cent. of the gross receipts for the half-year. Without doubt, that seemed to be an unusually heavy proportion, but it arose from a combination of circumstances perfectly simple in themselves and perfectly easy to explain. It was fallacious under any circumstances, and especially fallacious in the circumstances in which they were placed, to base inferences upon the proportion of working expenses to gross receipts for one half-year by itself. They had on their railway what they always described as a lean and a prosperous half-year. It so happened that the extraordinary expenditure was heavier during the lean half-year than during the prosperous half-year. They had to prepare for the larger traffic which came upon them in the prosperous half-year, and much special work had thus to be done during the months when the receipts were less than in the other half-year when the traffic was relatively slack. They did all they could to put everything in order for the purpose of enabling them to cope with the greater traffic which came during the second six months. During that busy six months they avoided as far as possible executing work that would interfere with the progress of the traffic, and that had the effect of throwing on the gross receipts for the lean six months a much larger amount than was the case in the prosperous six months. That was not a mere matter of theory, and could be illustrated from facts which had already been communicated to the shareholders in the reports. In the year 1906 the working expenses for the whole year were about 49 per cent. of the gross receipts; in 1907, they were nearly 62 per cent.; in 1908, they were 60 per cent; in 1909, 54 per cent; and last year about 60 per cent. He had very little doubt that when the complete total for the present year was available, the shareholders would find that history would repeat itself, and what he had told them about the fallacy of taking a half-year's figure would be entirely borne out. The Bragantina Railway had had a prosperous half-year, but there also the extraordinary expenditure had been somewhat heavy, a fact which was accounted for by the desire of the board to put the line into first-class working order. Speaking generally, the balance of revenue of the whole system, including what was carried

forward after payment of interest on the debenture stocks in July and after making a small provision for depreciation in the value of securities, amounted to upwards of £370,000. Under all the circumstances in which they were placed, they proposed to pay the usual dividends and bonus, as to which he had no doubt they would obtain the consent of the shareholders. One per cent. of the bonus was provided out of the Bragantina revenue, and the interest on investments. It was perhaps worth noting that the number of passengers carried on the railway was greater than in the corresponding half-year of last year by 331,130. The gross tonnage of goods carried showed an increase of slightly over 114,000 tons. There was a decrease of 130 tons in the coffee carried, but general merchandise and coal and bricks showed an increase, and there was an increase of nearly 6,000 tons of sugar. As regards the main line, they had continued the special expenditure in the improvement of the ballasting of the line. In the item of wages and salaries, owing to the rise in the cost of living, there was a tendency to increase. There was no alteration during the half-year in the tariff of the carriage of coffee. In the month of March the directors asked the Federal Government to sanction a proposal for the reduction of 10 per cent. in the rates of coffee over the line, but it was only sanctioned a few days ago, and it only actually came into force on that day. The company's relations with both Governments and with the other railways had during the past half-year been harmonious. The extension of the Bragantina Branch to the confines of the State of Minas, which had been long projected was now well on the way to completion, and he hoped it would be open to traffic during the first half of the coming year. They were told that the technical conditions of the line were excellent, and they had every reason to believe that the traffic would be satisfactory because the railway would be the shortest between the south-eastern part of the State of Minas and the port of Santos, and when it was considered that the State of Minas itself was in extent larger than the republic of France, it would be seen that there might be great possibilities of development there. There was another point, and that was the Industrial Exhibition in the City of San Paulo, the buildings for which were now in course of construction. He need hardly explain to the shareholders that an exhibition of the nature projected was an excellent thing both for the inhabitants of the city and for the whole State of San Paulo. They were approached by the Executive with a request that they should give assistance, and in common with the other railways they were glad to respond to the request and gave a generous contribution towards the funds necessary for the foundation of that institution. They understood that it was to be a permanent undertaking, and all the shareholders would realise that as they carried on their business in the State of San Paulo and derived from the inhabitants of that State the income with which they paid dividends on the capital, they owed a duty at least to encourage all enterprises which it was thought might be of benefit to the unity and prosperity of the State itself, and its inhabitants, and he was sure that the shareholders would agree that he had done right in giving the company's assistance. (Hear, hear.) The coffee crop for the ensuing year was estimated to amount to something between 10 and 11 millions of bags, and the prospects of traffic in the half-year now current were excellent. Up to October 22—that was the first 17 weeks of the half-year—they had an increase of £17,500 over the gross income of the corresponding period of last year. They had carried 430,000 more bags of coffee than in the corresponding 17 weeks of 1910. The shareholders would see by the report that they had elected Mr. Chapple to a seat on the board. Mr. Chapple had been their solicitor for many years; was well acquainted with the company's affairs, and it was therefore thought that he would be a useful addition to the board. Consequently he resigned his position as solicitor and was elected a director. This would not increase the fees payable to the board, but the amount to be payable would be divided amongst six directors instead of five. The Chairman then moved: "That the report and statement of accounts now taken as read be received and adopted."

This was seconded by Sir EDWIN H. GALSWORTHY, J.P., D.L.

In answer to questions by shareholders the CHAIRMAN said that with reference to the reduction of rates he would remind them that there was a condition in the company's concession that they were not to earn more than a certain

percentage on their authorised capital: the authorised capital was larger than the capital actually issued; but what they had to take care of was that they were not found fault with by the Government or its agents for contravening the concession. They asked for permission to reduce their coffee freight in a special way which would give an advantage to the public and enable the company to show that they were not anxious to go beyond earning the full percentage; moreover, he thought it only fair in the prosperous condition in which they were that they should show that they were not usurious, and not desirous of pressing their advantage too far. He thought that if there was any real prospect of a hostile railway being made to Santos they would stand for the extremity of their just rights, but the board did not want to stand out for those rights and incur an undue amount of that hostility which seemed in theory to be given to the foreigner, but if, which had never happened, the Government did not duly uphold the company's rights, they would have to meet hostility by hostility.

The motion was carried unanimously, as also were the motions for payment of dividends and bonus, and election of auditors. Mr. F. N. Chapple was re-elected to the Board, and with a vote of thanks to the Chairman the proceedings terminated.

BAHIA BLANCA AND NORTH WESTERN RAILWAY.

The 22nd ordinary general meeting of the members was held yesterday at Winchester House, Old Broad Street, E.C., the Right Hon. Lord St. Davids (chairman of the company) presiding.

The SECRETARY (Mr. F. Sanders) having read the notice convening the meeting and the auditors' report,

The CHAIRMAN said: Gentlemen, I beg to move the adoption of the report and accounts, but before putting the resolution you may like to hear a few words on what has taken place in the district that your line serves in the Argentine. As you are aware, the earnings of the company only indirectly affect us, for we are a guaranteed line, and the guarantee is always duly paid by the Buenos Ayres and Pacific Railway Company. At this time last year when I was addressing you I said that the crops were looking well, but I pointed out that in the district our line serves there was danger until the middle of December. Well, gentlemen, unfortunately during those six weeks drought destroyed whatever prospects we had, and as far as the south of our district was concerned, we hardly had a crop at all. That is the reason of the diminution in the gross receipts, and the second year in succession that there has been a failure of the crops, so you can understand that business at Bahia Blanca is not so brisk as it otherwise might have been. Now, gentlemen, you will like to hear something about future prospects. Some of you were present yesterday at the Buenos Ayres and Pacific Railway Company's meeting and heard the cable read from our general manager. Referring to your property, the cable stated:—"Area under cultivation in Bahia Blanca and North Western Railway Company, Limited, section much larger than last year, and, if present prospects materialise, heavy increase of traffic on lines and in Puerto Galvan may be looked for." It is yet too early to rely on a wheat crop, and again I remind you of what has happened in the last two years, but at the moment it looks as if we, in common with other English railway companies operating in the Argentine, are going to have a good year. You will see from the notice of the meeting that we ask your authority to alter the memorandum of association so that we can undertake the construction of irrigation works for the Government.

PROPOSED IRRIGATION WORKS.

In certain districts through which the line runs there are large areas capable of irrigation—lands which at this moment give no traffic, but which should be a source of earning to us as soon as water is put on them. The position is that the Government may ask the company to construct such works, the company taking irrigation bonds in payment; we make nothing by it, and we are not likely to lose by it; in fact, we do the work at cost price. This, gentlemen, seems to be the best method of getting the work done, and is the reason we make this proposal to you. I think I may as well mention that there is a company in which the Buenos Ayres and Pacific Company and this company have a considerable interest, and which is, in fact, a sort of subsidiary company—namely, the South American Light and Power Company—a company formed to acquire the concession granted by the municipality of the town of Bahia Blanca for the public and private lighting of the town, and with which we are in very close relation; and we own 75 per cent. of its share capital. Since the working agreement

was entered into in May, 1906, between the Light Company and this company, we have undertaken various extensions to ensure the proper development of the Light Company's business, and have received share capital in repayment. At June 30, however, the Light Company owed for advances made during the year, and part of the proceeds of a debenture issue to be made shortly will go towards repayment and provide for future working capital. When the time comes for the issue to be made I will see that a prospectus is sent to you in case any of you would like to invest in the company. I beg to move: "That the report of the directors and the statement of accounts now presented be and they are hereby received and adopted." (Applause.)

Col. P. P. MOSLEY seconded the resolution, which was carried unanimously without discussion.

The CHAIRMAN further moved:—

"That the Memorandum of Association of the Company be altered in the manner following, that is to say:—

'By inserting after Clause (E) the following Clause—namely: (Ea) To acquire by purchase or otherwise, and to construct, maintain, work and use waterworks, reservoirs, tanks, canals, watercourses, pipes, and other works for the supply of water to any lands or buildings within the area from time to time served or capable of being served by any railway belonging to or worked by the company, and for the utilisation of any river or other water for such purposes; and to undertake and execute any contract for the construction, maintenance, or working of any such works as aforesaid with any government, municipal or other body, corporation, firm or person in consideration of the payment to the company of an agreed sum or of a sum representing the actual cost to the company of constructing or maintaining the same, or of a sum calculated according to an agreed schedule of prices, or of any payment in any one or more of such methods; and to accept payment of all or any part of any sum so due to the company in cash, shares, bonds or other obligations.'"

Mr. F. O. SMITHERS seconded the proposition, which was also agreed to *nem. con.*

On the motion of the CHAIRMAN, the retiring directors, Col. P. P. Mosley and Mr. E. Norman, were re-elected, and on the proposition of Mr. GASKELL, seconded by Mr. HAMILTON, the auditors, Messrs. Turquand, Youngs and Co., were also re-appointed.

A vote of thanks to the Chairman for presiding, proposed by Mr. NICHOLLS and seconded by Mr. COWAN, terminated the proceedings.

CUBAN CENTRAL RAILWAYS.

The twelfth ordinary general meeting was held in River Plate House, Finsbury Circus, London, on October 27, Sir W. Lawrence Young, Bart., presiding. The Chairman, in moving the adoption of the report, said that bearing in mind the partial failure of the sugar crop last season, they had reason to be satisfied with the results, which showed but a small diminution from those of the previous year, being £460,086, as against £465,310 in 1910. The working expenses were £281,288, as against £282,686, a decrease of £1,398, and the net balance was £178,798, as compared with £182,624. While last year they handled 18½ per cent. of the total output of the sugar crop of the island, this year they carried just over 20 per cent. These figures were very encouraging. The programme laid out for the betterment and renewal of the track had been duly carried out during the year. The number of sleepers put into the track was some 80,000. The capital expenditure amounted to £120,812, of which £59,497 had been spent on the Rancho Veloz Extension and £12,088 was in respect of the Cifuentes-Esperanza Extension. The extension to Rancho Veloz was opened for public service on June 29 last. The first instalment of the subvention, amounting to £7,400, was duly paid by the Cuban Government, and would be credited to capital. The cost of constructing the Rancho Veloz Extension would work out at about £5,500 per mile, and when the account was credited with the subvention money receivable the net cost would come out at about £3,600 per mile. The construction of the other extensions was being actively proceeded with, and it was hoped to have them completed in time to carry cane for the next season. In order to build these extensions the shareholders had authorised an increase of the capital of the company to £2,300,000, by the creation of 20,000 preference shares, and an increase in the borrowing powers. Under these powers the directors issued £550,000 of 5 per cent. debenture stock at par, out of which they had repaid the 6 per cent. debenture stock. With regard to the probable results of this year there seemed every chance that the sugar crop would be a good one, and, as the prices were high, every acre of cane would undoubtedly be cut, and he thought they might look forward to holding their

own, and a little more. The receipts up to date amounted to £90,639, as compared with £86,935, being an increase of £4,004. Their relations with the Government in Cuba had been most satisfactory and cordial. The motion was seconded by Mr. C. W. Parish, and unanimously adopted.

The accounts to June 30, 1911, show a total capital expenditure of £3,379,810, whilst the receipts were £3,480,882, viz., ordinary £10 shares, £1,000,000; 5½ per cent. preference £10 shares, £1,200,000; 4½ per cent. mortgage debentures, £803,200; 6 per cent. second debenture stock, £109,305; mortgage bonds of the old companies still outstanding, £130,936; 5 per cent. debenture stock, £282,581; 4½ per cent. debenture redemption account, £64,800.

The receipts on revenue account for the year ended June 30 were as follows:—

	1910-11.	1909-10.
Passenger traffic	499,219	493,877
Goods traffic	318,913	328,371
Luggage, parcels, animals, etc. ..	11,904	43,002
Total	490,086	495,310
In the same period the expenses were as shown hereunder:		
Permanent way and works	281,549	284,411
Locomotive power	79,805	75,142
Carriage and wagon repairs	28,750	30,849
Traffic expenses	47,544	46,955
Telegraph expenses	2,140	2,065
General charges, etc.	41,500	37,267
Total	281,288	282,680

The net receipts for the past year were thus £178,798, as against £182,624 for the previous year.

To the balance of £178,798 must be added various items amounting to £12,821, making £191,619. Rent-charges absorbed £9,927, interest and sinking fund on 4½ per cent. mortgage debentures, £45,955; interest on 6 per cent. debenture stock, £12,000; renewal and casualty fund, £9,000, interest on rolling stock bonds, £6,900; interim dividend on preference shares, £33,000; taxes, £5,208; income-tax, £930; interest and discount, £667; proportion written off premium on 7 per cent. debenture stock, £1,000; and general reserve, £5,000; leaving a surplus of £61,663.

Out of this surplus the directors recommend the payment of the following dividends:—Dividend for the half-year to June 30, 1911, on the 5½ per cent. cumulative preference shares, £33,000; dividend of 2 per cent. on the ordinary shares, £18,000; leaving £10,663 to be carried forward.

The number of passengers carried during the year was 851,902 (against 809,210); the average receipts per passenger 2s. 4d. (against 2s. 4d.); the quantity of freight carried 2,090,048 tons (against 2,350,340 tons); the number of cattle carried 11,250 (against 21,946); the number of train miles run 672,010 (against 660,269); the receipts per train mile 13s. 8½d. (against 14s. 1½d.); the expenses per train mile, 8s. 4½d. (against 8s. 6¾d.).

The report states:—"The working expenses, which include the cost of one new locomotive and a proportion of relaying the main line with 80-lb. rails, were £281,288 or 61.14 per cent. of the gross receipts. This amount does not include any charge for renewal fund as heretofore, a credit of £9,000 having been charged direct to the net revenue account. The total mileage of main line now open for traffic is 255, the increase of 14 miles being accounted for by the extension from Caguaguas to Rancho Veloz, which was opened for public service on June 20. Other extensions in course of construction are: Cifuentes to Esperanza, approximately 18 miles; San Juan de las Yeras to Cardoso, approximately 15 miles; Malezas to Cumanayagua, approximately 11 miles. The result of the year's working must be looked upon as satisfactory in view of the partial failure of the sugar crop in the island during the year.

Under the sanction given by the shareholders at the extraordinary general meeting held on May 23 last, the board have issued £550,000 five per cent. debenture stock. Notice was given on June 9 last to the holders of six per cent. second debenture stock that the stock would be paid off under the terms of the trust deed at 105 per cent., and £100,635 of the new stock was applied for in exchange. The balance of £99,365 has been duly paid off. Orders have been placed for seven standard-gauge locomotives and one narrow-gauge locomotive, as well as for 225 standard-gauge flat cars and 30 standard-gauge covered cars, added to which 25 standard-gauge flat cars, 10 narrow-gauge flat cars, and 10 narrow-gauge covered cars are being built in the company's shops. The whole of this rolling stock is expected to be ready for the service of the coming Zafra."

MIDLAND URUGUAY RAILWAY.

The report of the Midland Uruguay Railway for the year ended June 30, 1911, states that the gross receipts amounted to £100,102, an increase of £11,531. The working expenses for the same period were £75,706, an increase of £8,229, leaving a net profit of £24,486, as against £21,181. To this must be added balance from last year's account, £1,081; Government guarantee, £55,481, together, £81,148. After deducting debenture interest, £58,174; "A" sinking fund, £12,594; income tax, £397; betterments to line, etc., £3,416; and amount credited to capital account in respect of profit on working sections of extension opened for traffic, £2,812, a balance is left of £3,576, which it is proposed to carry forward to the next account. The result of the working has enabled the company to meet the full amount of £12,594 in respect of sinking fund for redemption of debenture stock. The extension of the company's line to Fray Bentos was completed and opened for traffic on July 18 last. The receipts for the period under review show a continued development of the traffic of the line. The number of passengers carried was 48,064, or an increase of 20.35 per cent., and the receipts from this source were greater by 15.42 per cent. A feature of the year's working is the increased receipts from the carriage of animals, due principally to the opening of the new extension. With a view to provide for the increased business which it is hoped will result from the opening of the whole extension to Fray Bentos, two locomotives, six passenger coaches and thirty-three wagons have been added to the rolling stock during the year, and orders have been placed for a further two locomotives and thirty-six bogie cattle wagons, which will be available for traffic during the coming season. The company's line and rolling stock have been fully maintained. During the year 24,409 hardwood sleepers were laid, against 22,554 in 1909-10.

NORTH WESTERN OF URUGUAY RAILWAY.

The accounts for the year ended June 30, 1911, show the following results:—Receipts, £70,488; expenses, £49,313, balance, £21,175. To this must be added: Balance from last account, £445; interest on 4 per cent. bonds, £10,724; and guarantee, £11,079; together £43,423. From this have to be deducted interest on first debenture stock, £24,000; interest on second debenture stock, £2,302; income tax, £483; depreciation of steam launch, £102; leaving a disposable balance of £16,536. The traffic receipts for the year under review have again exceeded those of the previous year by more than £5,000, thus showing the progressive nature of the company's traffic, and the net traffic result is £2,290 better than for 1909-10. The amount received for guarantee is less by £400 than in the previous year, owing to automatic returns to the Government of Uruguay, due to increased traffic receipts, as explained last year. The ratio of working expenses to receipts is a little less than last year, but as all the new rails are provided for and the heavy cost of sleeper renewals is coming to a close, that ratio may be expected to be considerably lessened in about two years' time. The directors recommend that out of the balance of net revenue a dividend at the rate of 3 per cent., less income tax, be paid on the 6 per cent. first preference stock, and that the balance be carried to next account. To meet the increasing traffic two new locomotives and twenty-four more large wagons have been shipped. Owing to some scarcity of labour the Brazil Great Southern Railway's extension has been somewhat delayed. The Quararim International Bridge Company was registered on May 25, 1911, and so soon as the Brazilian Government has accorded its assent to the bridge plans, immediate steps will be taken to raise the capital required, and to proceed with the building of the bridge.

Mold and Denbigh Railway.—At an ordinary meeting held on October 26, Mr. F. P. Robjant, who presided, said that although there had been a decrease of £84 in the net receipts, there had been a considerable increase in minerals and merchandise. The rent-charges and interest due on debenture stock "A" had been paid, and the directors proposed to make a payment at the rate of £2 10s. per cent. per annum on account of interest due on debenture stock "B."

Villa Maria and Rufino Railway.—The 23rd ordinary meeting was held on Thursday in Dashwood House, New Broad Street, E.C. Mr. Edward Norman, who presided and moved the adoption of the report, remarked that there was little to say on it as they were in the position of having the interest and dividends guaranteed by the Buenos Ayres and Pacific Railway Company, and the guarantee had been duly received in accordance with the agreement between the two companies. As they

would see from the report, there was an increase over last year's gross receipts. The knowledge that the company was progressing was satisfactory to all of them.—The motion was adopted.

Cathcart District Railway.—The half-yearly meeting was held on Tuesday in Glasgow, Sir Charles Bine Renshaw presiding. The Chairman, in moving the adoption of the report, said that their revenue had increased under every head except minerals—the decrease of £150 in which was probably due to the depression in the building trade—and showed a total increase of £474, and there was an actual decrease in expenditure of £38, due to the fact that law expenses in the corresponding half-year were unusually high, and there was therefore a total increase of £512. Turning to the net revenue account the balance brought in from the previous half-year was less by £241 than in the corresponding half-year, and if this amount was deducted from the £512 it left £271 more available for interest and dividend account. After satisfying the interest charges a balance for ordinary dividend of £4,274 remained, as against £3,983 twelve months ago.* It was proposed to pay a dividend at the rate of 2½ per cent. and to carry forward £369, as compared with £78 a year ago. Mr. H. E. Gordon seconded, and the report was adopted.

Western of Havana Railway.—At the annual meeting in London on October 20th, Mr. J. White Todd, who presided, said that the results shown were satisfactory in the face of the exceptional climatic conditions. The tobacco planters had especially suffered in consequence of the cyclone, and it had become necessary to replant their crops. Cyclones in Cuba very rarely occurred later than the end of October, and there was, therefore, every reason to anticipate that they would not be afflicted in the same way this year. In the agricultural districts there were indications of increased prosperity. The net result of the past year had been that their gross receipts had shown an increase of no less than £10,887, and the directors were, therefore, in the position of proposing the payment of a balance dividend of 8s. per share, making 7 per cent. for the twelve months. With regard to the outlook of the current year, they anticipated good returns. A large amount of traffic had already come forward in respect to the tobacco crop. As to the question of any extension of the railway by an electrical branch, the position was not such as to justify their undertaking such a scheme unless they were assured of a satisfactory subsidy from the Government. The report was adopted.

Royal Mail Steam Packet.—The directors, in their report for the half-year ended June 30 last, state that since the issue of the annual report in May last preliminary arrangements have been made for acquiring an interest in the business of the Lamport and Holt Line, which the Court believe will be the means of strengthening the position of the company in the trade with South America, both from Europe and the United States. The company having recently purchased the interests of Messrs. T. and J. Brocklebank in the Shire Line of Steamers, Limited, arrangements are being made for the closer working of this branch of the company's service with the steamers of the old-established Glen Line, and in this way economies will be effected and a more regular service will be provided for shippers to and from the Far East. All the cruises which had been arranged for the Coronation Naval Review, although the vessels were fully booked, were cancelled on account of the strikes and labour troubles. The large new triple-screw steamer "Arlanza" (14,800 tons), now being constructed by Messrs. Harland and Wolff for the company's South American mail service, will be launched in November. The Court have resolved that the usual interim dividend at the rate of 5 per cent. per annum be paid on the preference stock for the half-year ended June 30 last.

Uruguay Northern Railway.—The receipts for the year ended June 30, exclusive of the guarantee, amounted to £26,357, against £23,435 for the previous twelve months, showing an increase of £2,922. The expenditure was £19,682, as against £17,448 in 1909-10. For the year under review the net earnings show a profit of £6,675, compared with £5,987 last year. Two-thirds of the net profits, amounting to £4,450 become payable to the debenture stockholders, under the arrangement of April 12, 1892, in addition to interest at 3½ per cent. per annum, making the total distribution on the debenture stock for the year to June 30, 1911, say, £4 9s. 9d. per cent. The gross total receipts, including the guarantee, were £44,826, leaving, after deducting the expenditure, as above, a balance of £25,144. After payment of the interest on the prior lien and debenture stocks (£21,152) and reserving £258 for income-tax, there is a surplus on the year's working of £3,734. Adding the amount carried forward from last year (£2,530) there is an available balance of £6,264, out of which the directors recom-

mend a distribution of 1½ per cent. as dividend on the preferred stock. This will absorb £3,750, leaving the sum of £2,514 to be carried forward. The capital expenditure for the year amounts to £3,831, and includes the cost of a second ropeway cable and siding for the transportation of freight in connection with the new Saladero on the Brazilian frontier, opposite the company's terminus at San Eugenio. To provide for the expenditure on these works, and for twenty additional wagons which have been shipped since the close of the financial year, and other requirements of the company, a further £10,000 prior lien debenture stock has been issued during the year.

Taltal Railway.—At the 30th annual general meeting on Wednesday at River Plate House, London, Mr. C. W. Parish, who presided, said that the board were gratified at being able to lay before the shareholders another satisfactory record of the year's working. The gross receipts amounted to £248,000 as compared with £270,800 in the previous year; the working expenses were £131,484 as compared with £146,917, and the net receipts were £116,519 as against £123,892. After providing £24,000 for debenture service, placing £20,000 to the general reserve, and £5,000 to the reserve for renewals and casualties, they were able to recommend a final dividend of 4 per cent., making, with the interim dividend paid last April, 7 per cent., and a bonus of 2 per cent., making 9 per cent. in all for the year. They also carried forward £18,000 as compared with £17,000 last year. Only eleven of the 16 oficinas on the line were actually working during the year. Of nitrate, 270,253 tons were carried as against 299,069 tons in the previous year. There was a distinct increase in the world's consumption of this fertiliser, nearly one-fifth of the total production being now used in the United States of America. There was a falling off in the carriage of coal, but this was partly due to the oficinas using more oil fuel than formerly. The working expenses were 53.02 per cent. as against 54.25 per cent., and the property had been kept in a high state of efficiency. The capital expenditure during the year had been only £2,078. The general reserve account now amounted to £100,000, and the reserve for renewals, etc., to £54,551, representing over 20 per cent. of the capital. The use of oil fuel had made considerable progress during the year, and further developments in this respect would take place as soon as a reliable supply of suitable oil at a suitable price could be secured. The report was adopted.

GRAND TRUNK RAILWAY COMPANY OF CANADA.

The Grand Trunk Railway Company of Canada has issued the following statement for the month of September:—

Grand Trunk Railway Company of Canada.

	Month of September.	Inc.	July 1 to Sept. 30.	Inc.
	1911.	1910.	1911.	1910.
Gross receipts.....	£710,650	£661,200 +	£2,125,400	£1,813,200 +
Working expenses	508,800	469,300 +	1,561,000	1,296,600 +
Net earnings...	£201,850	£194,900 +	£564,400	£516,600 +

Canada Atlantic Railway Company.

	Month of September.	Inc.	July 1 to Sept. 30.	Inc.
	1911.	1910.	1911.	1910.
Gross receipts.....	£37,900	£36,100 +	£113,250	£95,500 +
Working expenses	32,200	32,600 -	100,550	93,100 +
Net earnings...	£5,700	£3,500 +	£12,700	£2,400 +

Grand Trunk Western Railway Company.

	Month of September.	Inc.	July 1 to Sept. 30.	Inc.
	1911.	1910.	1911.	1910.
Gross receipts.....	£115,100	£103,800 +	£346,050	£292,200 +

Gross receipts.....	£906,050	£844,100 +	£2,701,900	£2,296,000 +
Working expenses	660,400	611,900 +	2,027,500	1,708,300 +
Net earnings...	£245,650	£232,200 +	£674,400	£587,700 +

G.N.R. Lectures.—The following series of lectures, each illustrated by about 100 views, have been prepared by the Great Northern Company:—Lincoln and Lincolnshire, Lynn, Sandringham, the Norfolk Broads and Coast Resorts, Cathedrals and Abbeys on the East Coast Route, Castles and Mansions on the East Coast Route, the Yorkshire Coast and Spas, the Highlands and Islands of Scotland.

GENERAL NEWS.

THE PROPOSED REPEAL OF THE TRADES DISPUTES ACT.

In the House of Commons on Wednesday, Sir F. Banbury (City of London—U.) presented a Bill to repeal the Trades Disputes Act, 1906, and it was read a first time. It has no chance of going any further during the present session.

CONTRACTS FOR WAGONS AND WORKS.

Birmingham Railway Carriage and Wagon Co., Metropolitan Amalgamated Railway Carriage and Wagon Co., and Gloucester Railway Carriage and Wagon Co. have received between them an order for three thousand wagons with underframes of iron for the Great Western Railway Co.

THE RAILWAY ACCOUNTS BILL.

The Railway Companies (Accounts and Returns) Bill was read a third time without discussion in the House of Commons on Tuesday night. It now only requires to pass through the House of Lords, and there is little doubt that this will be accomplished before the end of the session. This, it will be remembered, is the Bill which failed to get through last year, and which provides for the new form of accounts and of certain returns being published by railway companies.

PROPOSED TUBE RAILWAY AT MANCHESTER.

It is proposed to promote a Bill next session to secure powers to construct an underground electric railway at Manchester, and to connect the eight stations by means of escalators with the above-ground railways. The system will be four and a third miles long, and the capital required is estimated at £1,000,000, four-fifths of which have been subscribed. There are to be two separate parallel tubes, and the trains will make the circuit of the city in about twenty minutes. It is stated that there are many complaints as to the inability of the tramway service to deal with short distance traffic within the city, and that the railway will also tap other traffic not dealt with by the tramways. The local engineer is Mr. J. W. Welch, 27, Victoria Buildings.

RAILWAY CONTRACTS.

The Department of Railways at Ottawa has awarded the contract for the construction of the Sunny Brae to Guysborough branch of the Inter-Colonial Railway to the Nova Scotia Construction Company of Sydney, Cape Breton, which sent in the lowest tender out of some 40 applications, several being from English firms.

R. McAlpine and Sons, of Glasgow and London, have secured the contract from the Great Central Railway Co. for the removal of Darnell Tunnel and constructing four lines of railway in place of the two existing lines. The amount of material to be removed is estimated at 300,000 cubic yards, and the work will extend over 18 months. The tunnel is the chief cause of the obstruction on the east side of Sheffield to traffic from London. The traffic to the west has been greatly expedited by the removal of the old Bridgehouses tunnel, and the removal of Darnell tunnel, which is 3,007 yards long, will greatly facilitate the through traffic, and, it is said, will have the effect of shortening the journey between Sheffield and London by ten minutes, thus enabling the Great Central Company and the Great Northern—which runs over the Great Central line from Retford to Sheffield—to run the fastest trains between the Metropolis and Sheffield. North of the tunnel to Sheffield the track has already double sets of metals. With the making of the cutting the track southwards will be widened for 2½ miles.

BOARD OF TRADE INQUIRY.

On Wednesday the Board of Trade held an inquiry at Stafford into the accident at Colwich Station on Saturday, when the boat express, drawn by two engines, from Euston to Liverpool ran into a local train. The drivers of the two engines on the fast train applied the brakes, and thus reduced the speed, but the rear coaches of the other train were telescoped, and three of the occupants were injured. The express kept the rails, and no one on board was hurt. Later it was able to continue the journey to Liverpool. At the inquiry, Jakeman, driver of the local train, said both the distant and

home signals were at danger, but when he sighted the down fast signal it was off, and he thought the signalman had erred. Witness whistled for the home slow signal and applied his brake, but misjudged the distance and speed, and came to a stand where the fast and slow lines met. He reversed and tried to set back his engine, but it would not move. He then sent it forward, and had proceeded a short distance when the collision occurred.

The fireman of the local train stated that when they over-shot the home signal the train stopped foul of the main line. Signalman Compton said that seeing the local train had passed the signal he placed the home fast signal against the express, and tried to call the local train forward, but a porter on the station, waving his arms, negatived this. When he accepted the express he thought the local train had stopped, and mistook the smoke from a goods train as coming from the local train.

The porter said he waved his arms to stop the express.

A report will be issued in due course.

PROPOSED HAVANA AMALGAMATION.

The secretary of the United Railways of the Havana and Regla Warehouses, Ltd., has issued a circular to the shareholders which says:—The Havana Central Railroad Company, in which this company has a very large interest, has since its formation contemplated an extension of its line into territory served by the line of the Western Railway of Havana. As this projected line, when built, might result in serious and wasteful competition with the Western Railway, your directors have considered it advisable, with a view of avoiding this competition and still further consolidating the position of this company, to acquire the property of the Western Railway Company by an exchange of shares of this company for the shares of the Western Railway. With this end in view negotiations have been in progress between your board and the board of the Western Railway Company for some considerable time, with the result that your board has made the following proposal to the board of the Western Company, subject to your confirmation—viz., That for each £10 ordinary share of the Western Railway of Havana there be given in exchange £4 15s. of 5 per cent. cumulative preference shares and £10 of ordinary shares of the United Railways of the Havana. These shares will be converted into stock. The dividend paid upon the ordinary shares of the Western Railway of Havana during the past few years has been 7 per cent., and should the present proposal be carried through, the combined dividend upon the preference stock and ordinary stock of this company to be given in exchange would, on the basis of the last dividend paid upon the latter—viz., 4 per cent.—be equivalent to a dividend of approximately 6½ per cent., per annum, to the Western shareholders, whilst a dividend of 4½ per cent. on this company's ordinary stock would give the Western shareholders approximately 7 per cent., and if 5 per cent. were paid they would receive approximately 7½ per cent.

GRAND TRUNK PACIFIC RAILWAY.

IMPORTANT DECISIONS.

The Judicial Committee of the Privy Council on Thursday gave judgment in two appeals from the Supreme Court of Canada, in which the Grand Trunk Pacific Railway Company was a party.

Lord Robson, in giving judgment in the case of the railway company v. the King, said that the appeal raised a series of questions touching the meaning and effect of a provision contained in a supplementary agreement between the Government and the Grand Trunk Pacific Railway which modified the original contract between the company and the Government. The original contract, dated July 29, 1903, provided for the construction of a line of railway between Monckton, New Brunswick, and the navigable waters of the Pacific Ocean. The proposed railway was to consist of two divisions, the eastern, extending from Monckton to Winnipeg, and the western from Winnipeg to Prince Rupert. The first was to be constructed by the Government and to be Government property. The western division was to be constructed by the company and to be their property. Both divisions were to be equipped, maintained and operated by the company. The western division was to be sub-divided into the Prairie section and the Mountain section. At the time of the contract of 1903 the 3 per cent. stock of the Dominion of Canada was about par. Soon afterwards the price of the stock began to fall, and consequently the fund intended to be provided under guarantee of Government for the construc-

tion of the western division became inadequate. A supplemental contract was made between the Government and the company. It removed the limitation of \$30,000 per mile, fixed by the contract of 1903 in respect of the Mountain section, but retained the limitation fixed in respect of the Prairie section. Differences had arisen as to the interpretation of this agreement. The Supreme Court of Canada was of opinion that the liability on the part of the Government was a secondary liability only as guarantors, that the primary liability must fall upon the company, and that it rested with the company to issue additional bonds which Government was to guarantee. Their lordships of the Judicial Committee were unable to accept the interpretation placed on the agreement by the Supreme Court. There was nothing importing that any further liability was to be imposed on the company in respect of the first mortgage bonds, and that it fell upon the Government to implement their guarantee so as to make the proceeds of those bonds issued and to be issued equal to their par or nominal value. It would be a breach of faith with the Grand Trunk to let in any further charge in priority to their security, and, as it appeared to their lordships, the company had no power to issue bonds other than those authorised by the original contract. Their lordships would, therefore, humbly advise that this appeal should be allowed.

In the other case, that of the Grand Trunk Pacific Railway Company *v.* the landowners fronting on Empire Avenue, Fort William, and others,

Lord Shaw gave the judgment of the Judicial Committee. He said that this was an appeal from a decision of the Supreme

THE "WEBB" ORPHANAGE, CREWE.

The Webb Orphanage is designed to accommodate 40 orphans, 20 of each sex, provision being made for extension if required. The site contains an area of about $4\frac{1}{2}$ acres, and the main block is set back to a depth of about 100 yards from the entrance in Victoria Avenue, which leaves ample playgrounds in full sunlight for the use of the residents under the direct supervision of the matron. This playground covers two acres in extent, which will permit of all the usual outdoor games. The building consists of a main block, having a frontage of about 200 feet and a central depth of about 180 feet. In addition to this main block provision is made for an isolation block in case of any epidemic outbreak. There are also covered play sheds for both boys and girls, and two lodges, one for gardener and nurse's residence and the other next to Victoria Avenue so as to control the entrance. Stretching along the site next the railway is a kitchen garden about one acre in extent with a south slope. There is also a suitable laundry and other necessary outhouses, and a large covered yard, which may be used as an exercise yard in bad weather, and which will protect the servants in the course of their duties.

The general accommodation of the main block includes a large common dining hall in touch with the kitchen, which hall can also be used on occasions for entertainments and lectures, sitting and day rooms, detached workrooms, dormitories divided to suit the various ages, the whole of which will be under the direct superintendence of special attendants. The matron's rooms

The "Webb" Orphanage at Crewe.

Court of Canada dismissing an appeal from an order of the Board of Railway Commissioners for Canada. The railway company had constructed a branch line to Fort William, Ontario, and in order to establish and maintain its terminals and other works in connection therewith it entered into an agreement with the Corporation of that town on March 29, 1905. By that agreement the Corporation granted the company free of cost and all liability the right to built on the level and operate in perpetuity a double track line of railway on certain streets of the municipal Corporation, including Empire Avenue and McKellar or Hardisty Street. The company then applied for approval of the location of its line of railway under section 159 of the Railway Act, 1906, and the Board of Railway Commissioners ordered that, subject to the agreement and that the applicant company should do as little damage as possible and make compensation for such damage as might be sustained by the location of the line along any street in Fort William, the location should be approved. The question was whether it was within the powers of the Board to impose the condition that the company should make full compensation for all damage sustained by reason of the location of the railway. The respondents were frontagers, and they and the municipality itself were seriously affected by the location of the railway. In the opinion of the Committee the administrative action taken was beyond the powers of the Board of Railway Commissioners for Canada under the law as it then stood, and the parties would be left to come to a fresh arrangement. They directed that the order of the Board should be rescinded and that the judgment appealed from should be reversed.

are placed in the centre, and will command views of the approaches and playgrounds and give facilities for easy superintendence. There is also a trustees' room, with waiting-room attached. The style of the building is of the period of Chelsea Hospital, the building being faced with red brick and stone sills and other dressings, and the roofs covered with grey Westmorland slates. A conspicuous clock and bell tower is placed in the centre over the entrance. The building is fire-proof throughout and heated with hot water in addition to open fireplaces. The contractors for the building are Messrs. C. H. Normanton and Son, Ltd., of Manchester, and Mr. J. R. Goulden, of Crewe, has acted as clerk of the works. The whole of the work has been carried out in accordance with the designs of Mr. John Brooke, F.R.I.B.A., architect, Manchester.

Orders for Moving Stairways.—The London Electric Railway Co. has ordered seven additional moving stairway installations in consequence of the success of the system at Earl's Court Station. These will be at the Elephant and Castle, connecting the Baker Street and Waterloo and City and South London; Baker Street, from the Baker Street and Waterloo to Metropolitan Railway; Piccadilly Circus, between Baker Street and Waterloo and G.N., Piccadilly and Brompton; Leicester Square, connecting G.N. and Piccadilly and Hampstead; Oxford Circus, connecting Baker Street and Waterloo and Central London lines. The extension at Charing Cross, which will bring the District Railway, the Hampstead and the Baker Street and Waterloo into touch, will include a moving stairway, and the Bakerloo extension comprises a similar convenience.

PERSONAL.

Mr. Herbert Allen has been appointed receiver of the Bibi-Eybat Petroleum Company, Limited.

Mr. David Davies, M.P., has been elected chairman of the Cambrian Railways, in succession to the late Mr. J. Conacher.

Mr. C. H. Pearson, general manager of the Central Argentine Railway, is leaving Argentina for a business and holiday trip to England.

The Hon. Reginald Walsh has been appointed assistant manager of the West End branch of the Royal Exchange Assurance.

Mr. J. R. Woodall, of Whittington, has accepted an appointment under the Argentine Railway Company to supervise the construction of their bridges, etc.

Sir Walter R. Lawrence, Bart., G.C.I.E., has been appointed a director of the Assam-Bengal Railway Company, Limited, in the place of Mr. Robert Hart, resigned.

Mr. T. Skinner, a director of the Canadian Pacific Railway and Hudson's Bay Co., has returned from a tour in Western Canada. He is much impressed with the extraordinary development of Victoria and the Western Provinces.

Mr. A. Stevenson, for many years in charge of the rates section of the chief goods manager's office of the North-Eastern Railway at York, has been appointed depôt agent at Ripon. He has been presented with a mahogany bureau by the staff.

Mr. A. H. A. Knox Little, late general manager of the Leopoldina Railway and the Great Western of Brazil Railway, has been appointed as European manager of the Brazil Railway Co., in which capacity he will annually go to Brazil on a visit of inspection.

Mr. Sam Williamson, who has been secretary of the Cambrian Railway Company since 1906, has been appointed to the combined position of secretary and general manager. Mr. Williamson has been in the service of the Cambrian Company over thirty years.

Mr. C. A. Bathurst Bignold has resigned the appointment of general manager and secretary of Norwich Union Fire Insurance Society, Limited, owing to ill-health. The directors have accepted the resignation with regret, and have elected Mr. Bignold to be a director on the head office board.

Mr. Cecil Partridge has been appointed manager of the Central London Railway Co., after eight years' work as traffic superintendent and one year as traffic manager. He is popular with the staff, and was instrumental in raising a substantial sum to start the employees' sick and benevolent fund. Mr. Partridge is the co-inventor of the Bowden and Partridge fog signal economiser, an appliance which is in universal use.

Grand Trunk Railway Appointments.—Mr. C. A. Hayes, who is at present general freight agent of the Grand Trunk Railway system, has been appointed freight traffic manager, with office at Montreal. Mr. Robert L. Burnap, at present assistant general freight agent, Chicago, is appointed assistant freight traffic manager at Chicago. Mr. Henry C. Martin, now second assistant general freight agent, Chicago, goes to Montreal as general freight agent. Mr. A. F. Read has been promoted to the position of general foreign freight agent, with office in Montreal. Mr. S. L. Strauss, now chief clerk of the tariff department at Chicago, is promoted to the position of chief of tariff bureau.

OBITUARY.

The death has occurred, at the age of 79, of Mr. E. Trangmar, for many years the storekeeper of the London, Brighton and South Coast Railway Company. He was always to the fore in any project which had for its object the betterment of his fellows. The funeral took place on October 26, at Bandon Hill, near Croydon, when the company was represented by Mr. J. J. Brewer, secretary; Mr. W. H. Fox, storekeeper; Mr. J. J. Richardson, outdoor locomotive superintendent; and Mr. W. H. Barnlen, late assistant manager. A good number of retired Brighton railway officials also attended, having made great efforts to be present at the funeral of their chief whom they had learned to esteem.

Lancashire Wagon Company, Ltd. The accounts for the half-year show a profit of £3,140, making, with the balance of £4,387 on account at March 31, a total disposable balance of £7,527. The directors recommend a dividend at the rate of 5 per cent. per annum on the preference shares, £1,612 being placed to reserve fund and £1,613 carried forward. A year ago the dividend was at the same rate, and £3,822 was carried forward.

RAILWAY NOTES.

Railway Benevolent Institution. The King has doubled his annual subscription of £50 to the Railway Benevolent Institution.

Irish Railway Clearing House.—At a meeting of the Irish Railway Clearing House on Saturday last, Mr. J. Cowie, manager, Midland Railway (Northern Counties Committee) was unanimously elected chairman of the Conference for the year 1912.

Scotch Porters' Bravery Rewarded. John Blaikie, a porter at Polmont Station, and Wm. Thomson, porter at Inverkeithing, have been handed rewards for gallant conduct by the Earl of Dalkeith, chairman of the North British Railway Co. Blaikie rushed forward and got hold of a barrow the front wheels of which had swung round and got over the platform edge, but had not strength to prevent it falling over. Knowing that the 1 p.m. express from Glasgow was signalled, he jumped on to the line, followed by other two porters, to try to get the barrow clear of the up main. The latter two when they saw the express approaching got on to the platform, but Blaikie pluckily managed to pull the barrow into the six-foot way nearly clear of the up main. The barrow was destroyed, a piece of wood from it striking Blaikie on the foot. Thomson, in the face of an approaching express, jumped on to the rails and lifted an intoxicated man bodily on to the platform. The awards consisted of a cheque for ten guineas and letter of commendation from the company, and a silver watch from the Carnegie Hero Fund for Blaikie; and a cheque for two guineas and letter of commendation from the company and a cheque for £5 for Thomson.

The Permanent Way Institution.—Part II. of the Journal for the current year contains an account of the meetings of the council and of the sections in London and elsewhere, also of the summer convention at Southampton in July last. It is interesting to note that the members were shown over the *Olympic* on that occasion, and that in the description of the vessel given in the Journal the following occurs: "The captain can, by simply moving an electric switch, instantly close the watertight doors throughout, practically making the vessel unsinkable." That was shown shortly afterwards. A photograph gives an excellent idea of a device for unloading single 45ft. rails while the train is moving slowly, as described by Mr. C. W. Hunter to the Lancaster section. Mr. C. H. Roberts gives a clear description of the various appliances inspected on the Metropolitan Railway in May, and Mr. S. E. Packham does the same with regard to the timber and cresoting works of Messrs. Burt, Boulton and Haywood, which were visited in June. Mr. J. F. Clarke's excellent account of the Southampton Dock, read at the convention, is reproduced; also papers by Mr. J. W. Melville on "Permanent Way Details," with the discussion thereon; "Electricity as an adjunct to Mechanical Signalling," by Mr. H. E. Morgan (illustrated); "Renewal of Viaducts," by Mr. W. Thomson (illustrated and discussed); "Junctions for High Speeds," by Mr. Comyn Macgregor, with diagrams; and some useful notes. Sir Bradford Leslie has joined the institution; on the other hand, the hon. editor, Mr. H. E. Roberts, has resigned owing to press of other work; he will be a very great loss both to the Journal and to the members generally.

Workmanship and Materials of the Highest Quality.

A Convincing Reason

why the typewriter purchaser should select the

"REMINGTON"

has always been furnished by the unique Remington strength and reliability.

Eighteen additional reasons are furnished by the eighteen original improvements found in the latest Remington Models (Nos. 10 and 11.)

Let us send you descriptive booklet.

REMINGTON TYPEWRITER COMPANY,

100, Gracechurch Street, LONDON, E.C.

Telephone No. Avenue 5555 (4 lines).

The British Standard Brake Block

NOW UNIVERSALLY ADOPTED BY THE LEADING RAILWAY COMPANIES.

WHY?

Because we cut down your present cost 40% to 60%.

THEREFORE

Shift the responsibility on to us.

Our Brake Shoes last $2\frac{1}{2}$ times the life of the ordinary cast iron Block, with equal braking effect, and slightly less wear on the wheel tyres.

By our new design and blending of metals the Shoe can be completely worn out without danger.

One Shoe only, interchangeable and reversible for all classes of Carriages, Wagons, Vans, etc.

Don't theorise: get the facts from the list of Railways we now supply.

Our Representatives, with suitable samples for trial, are at your command.

PROSPECTUS.

THE GRAND TRUNK RAILWAY
COMPANY OF CANADA.

Issue of £1,250,000 Four per Cent. Guaranteed Stock under the powers of the Grand Trunk Railway Act, 1909, sanctioned by the Proprietors at the General Meeting on the 21st April, 1909.

ISSUE PRICE £92 PER £100 STOCK.

payable as follows:—

£10	per £100 Stock on Application.
£20	do. on Allotment.
£30	do. 1st January, 1912.
£32	do. 1st February, 1912.
£92	

Or the whole may be paid up in full on Allotment, or on the date for the payment of any instalment, under discount at the rate of 4 per cent. per annum.

The Stock will be entitled to the full dividend of £2 for the half-year ending 31st December, 1911, and after payment of the final instalment on the 1st February, 1912, the present issue will rank *pari passu* with the existing Four per Cent. Guaranteed Stock.

The Directors of the Grand Trunk Railway Company of Canada invite applications for £1,250,000 Four per Cent. Guaranteed Stock, the proceeds of which will be applied to the general purposes of the Company.

The Four per Cent. Guaranteed Stock ranks for dividend out of the profits of each year in priority to all the Preference Stocks of the Company, and the net earnings of the Company for the year 1910, after providing for the fixed interest charges and the dividend on the existing Four per Cent. Guaranteed Stock, showed a surplus of £333,000, which amount will be exceeded during the current year.

On the 1st January, 1912, Midland Five per Cent. First Mortgage Bonds, amounting to £856,800 (the balance of an original issue of £1,571,600), will mature and be paid off, thereby reducing the preference charges of the Company by £42,840 per annum.

After payment of the instalment due on allotment, Interim Scrip Certificates to bearer will be issued in exchange for the Allotment Letter, for which Registered Stock Certificates will be issued after the date for the payment of the final instalment.

The Stock will be registered free of expense.

Application will be made in due course for a settlement and quotation of the Interim Scrip Certificates, and afterwards for the Stock to be added to the Four per Cent. Guaranteed Stock already quoted in the official list of the London Stock Exchange.

Applications must be made to the Company's Bankers, Messrs. Glyn, Mills, Currie and Company, 67, Lombard Street, E.C., with a deposit of £10 for each £100 of Stock applied for.

Should it not be possible to make an allotment in full in respect of the amounts applied for, any excess in the amount deposited on application will be applied towards the payment on allotment.

The subscription list will be closed on or before Saturday, the 11th inst.

Prospectuses and Forms of Application may be obtained at the Offices of the Company, of Messrs. Glyn, Mills, Currie, and Company, 67, Lombard Street, London, E.C., and of Messrs. Coates, Son and Co., 99, Gresham Street, London, E.C.

On behalf of the Board.

ALFRED W. SMITHERS, Chairman.
Dashwood House,
9, New Broad Street, London, E.C.,
7th November, 1911.

COMPANY NOTICES.

North Eastern Railway.

NOTICE is hereby given that the Books for the Registration of Transfers of the Company's Debenture Stock will be closed from the 5th to the 30th December next, inclusive, preparatory to the payment of the Half-Yearly Interest.

R. F. DUNNELL,

Secretary.

York, 8th November, 1911.

Great Eastern Railway Company.

NOTICE is hereby given that the Transfer Books of the Metropolitan, Debenture, and Rent Charge Stocks of the Company will be closed on the evening of Thursday, the 30th day of November instant, and all parties registered at the time of such closing of the Transfer Books will be entitled to the dividend payable on the 1st January next. The Transfer Books of the above Stocks will re-open on Saturday, the 2nd day of December next.

By order,

P. LOMAS,

Secretary.

Liverpool Street Terminus,
London, 10th November, 1911.

TENDERS INVITED.

East Indian Railway.

THE East Indian Railway Company is prepared to receive Tenders for the Supply and Delivery of:—

1. Steel Rails and Fishplates,
2. Cast Iron Plates and Jaws for Denham-Olpherts Sleepers.

as per specifications to be seen at the Company's offices.

Tenders are to be sent to the undersigned, marked "Tender for Rails, etc.," or as the case may be, not later than twelve o'clock noon on Wednesday, the 22nd day of November instant.

The Company reserves to itself the right to divide the order, also to decline any tender without assigning a reason, and does not bind itself to accept the lowest or any tender.

For each specification a fee of £1 1s. is charged, which cannot under any circumstances be returned.

By order,

C. W. YOUNG,

Secretary.

Nicholas Lane, London, E.C.,
9th November, 1911.

Royal Siamese State Railways.

SOUTHERN LINE.

II. R.H. the Minister of Public Works for Siam is prepared to receive Tenders for the Supply of Low-Sided Goods or Ballast Wagons and Spare Parts.

Plans, specifications, and forms of Tender can be obtained on application to the Siamese Legation, 23, Ashburn Place, London, S.W., on payment of £1, which sum will not be returned.

The Tenders must reach Bangkok not later than the 30th January, 1912.

Burma Railways Company, Limited.

THE Board of Directors of the Burma Railways Company, Limited, are prepared to receive Tenders for the Supply of 1,000 Rolled Tyres for Carriages and Wagons.

For each copy of the specification a fee of 20s. will be charged, which will not be returned.

Tenders, enclosed in sealed envelopes and endorsed "Tender for Tyres," must be delivered at the Company's office not later than noon on Friday, the 17th November, 1911.

The Directors do not bind themselves to accept any or the lowest tender.

By order of the Board.

W. HOME,

Managing Director.

199, Gresham House,
Old Broad Street, London, E.C.,
10th November, 1911.

The South Indian Railway Company.

THE South Indian Railway Company, Limited, are prepared to receive Tenders for the Supply of:—

1. Rolling Stock: Comprising Steel Covered Goods and High-sided Bogie Wagons and Underframes for Goods Brake Vans, and Combined Brake Vans and Horse Boxes with Brake Gear (Metre Gauge).
2. Locomotive Boilers (Broad Gauge).

Specifications and forms of Tenders may be obtained at the Company's offices.

Tenders, addressed to the Chairman and Directors of the South Indian Railway Company, Limited, marked "Tender for Rolling Stock," or as the case may be, must be left with the undersigned not later than One o'clock p.m. on Wednesday, the 22nd November, 1911.

The Company is not bound to accept the lowest or any Tender.

A charge, which will not be returned, will be made of 40s. for each copy of specification No. 1, and 20s. for each copy of No. 2.

Copies of the drawings may be obtained on payment at the office of Robert White, Esq., M.I.C.E., Consulting Engineer to the Company, 3, Victoria-street, Westminster, S.W.

By order,

V. E. DE BROE, M.I.C.E.,

for Managing Director.

Company's Offices,
91, York Street, Westminster, S.W.,
10th November, 1911.

Great Western Railway.

THE Directors of this Company are prepared to receive Tenders for the Supply of about 270 Tons of Steel Bridge Girders and other Iron and Steel Work of British manufacture—to be let in Two Contracts.

Plans and Specification may be seen and Forms of Tender and Bills of Quantities obtained at the office of the Engineer at this Station, between the hours of 10 a.m. and 4 p.m.

Tenders, addressed to the undersigned, and marked outside "Tender for Girderwork," will be received not later than 10 a.m. on Tuesday, the 21st instant.

The Directors do not bind themselves to accept the lowest or any Tender.

A. E. BOLTER,

Secretary.

Paddington Station, London,
7th November, 1911.

THE RAILWAY MEN AND THE GOVERNMENT.

After a somewhat heated discussion, lasting over four days, the joint executives of the four railwaymen's unions decided, on Saturday last, to refer the question of the acceptance of the Railway Commission report to their members. They propose also to ask them whether they are prepared "to withdraw their labour" in favour of recognition of the unions. The date of the ballot has been so placed that it would be possible, should the ballot result in favour of a strike, for the leaders to carry out their amiable plan of attempting to dislocate railway services at Christmas. As Lord Claud Hamilton had remarked, it may be hoped that the public will note exactly what it is that these leaders of the men have in mind. It is a policy which, unfortunately, accords with their course of procedure for months past. They disregard equally the real interests of their own members, the convenience of the public and their own pledges. In the midst of the general labour unrest in August those leaders initiated a strike without asking for authority to do so from their members. The ostensible reason put forward was the alleged failure of the Conciliation scheme of 1907; but the real object of the leaders, as was said in these columns at the time, was to secure recognition of the unions. This was their object in 1907, and they have ever since kept it steadily in view. As soon as the Conciliation scheme was put in operation they began to turn the minds of the men against it. Their weekly organ was used to encourage discontent with its results, and at meetings of the men throughout the country the leaders fulminated against the arrangement which they themselves had agreed should be binding until 1913. The natural result of this campaign was the creation of a spirit of discontent and disloyalty to the companies, which enabled the leaders to take the extreme step of asking the men to tear up the agreement. They promised them that they would not suffer if they struck, and they succeeded in securing the re-instatement of all disloyal men after the strike, and obtained the appointment of a Royal Commission to consider their grievances. They obtained also an agreement from the representatives of the railway companies that they would accept the findings of that Commission, and they allowed it to be supposed by the Board of Trade that they also gave a similar undertaking to abide by the result of the inquiry. It was only on this stipulation that the railway companies could have consented to the arrangement. They understood that the Commission's recommendations were to be final, and that strife in the railway world was to cease when those recommendations had been put in force. It is true they may not have given due weight to the fact that they were dealing with the same influences which led to the refusal of the men to carry out the scheme of 1907; but they relied on the Board of Trade to see that this new agreement was adhered to in an honourable manner. It cannot be said that the representatives of the company were careless in the matter. The Board of Trade issued the statement on August 19 that both sides had agreed to accept the findings of the Commission. That statement was published in newspapers all over the country,

including the official organ of the Amalgamated Society of Railway Servants. Not only was no denial given, but during the hearing before the Commission statements were made which substantiated the understanding with the Board of Trade. There is not the least doubt that had the Commission recommended recognition the men's leaders would have accepted the report with alacrity. This is perfectly clear because, although the report confers great advantages on the men, their leaders are eager to prevent its acceptance. The former say that their hands are being forced by the men and that they have, therefore, been compelled to submit the question of a strike to the workers; but the fact is that no sooner was the report of the Commission issued than the leaders themselves began to urge the men to repudiate it and to deny that they had ever agreed to be bound by the finding of the Commission.

Various efforts have been made to obtain from the Government a clear statement on this matter, but official reticence has been carried to such an extent that no information has been elicited. On Tuesday the President of the Board of Trade was questioned in the House of Commons, but he entirely failed to appreciate the responsibility which in the present situation rests upon the Government. It is impossible to exaggerate the probable effects, both on the public and the railway employees, if a strike is brought about. Such a strike would entail consequences very different from those that followed the strike in August. The next strike will not be compromised, and thousands of men will necessarily be deprived of employment as a consequence of their own actions. It is, therefore, imperative that the railway employees should understand clearly the position in which they will stand if they follow the wishes of their leaders. Under the circumstances it is the plain duty of the Government to give them such help as they can in the ballot on the question submitted by their leaders. Many thousands of the employees are honourable men, who would disdain to break their word as pledged by their leaders. What they should be told is whether their word was pledged as the Board of Trade stated it was. The Government, we maintain, are morally bound to give the men assurance on this point. They are equally bound to give the public the same information, so that they may know whether the companies are taking up a right attitude in refusing further to meet the men's representatives. The Cabinet may think it good tactics to avoid any appearance of taking sides; but the position is too serious for those entrusted with their responsibilities to act as though tactics were the main consideration. It is clear that the country may be faced with a crisis of no small danger, and the only matter the Government have a right to consider is the public welfare—not merely the supposed welfare of the men or the Government's own advantage. The Board of Trade know the facts. Either there was sufficient justification for their statement that both sides had bound themselves or there was not. If there was not, then the Board were most singularly mistaken, the railway companies were misled by the Board's error, and the men's leaders cynically completed that operation by carefully refraining from any denial until they ascertained that recognition was not to be granted. Such trifling with public interests as was shown by the President of the Board of Trade on Tuesday, when he fenced with his questioners with the evident intention of concealing the facts, is unworthy of statesmen entrusted with the welfare of the country.

American Accident Statistics.—The Inter-State Commerce Commission issued statistics on November 7 showing that during the year ended 30 June, 10,996 persons were killed and 150,155 injured on the American railways. In 1900 the figures were 6,930 killed, and in 1909 they rose to 8,722. In 1909 the number of the injured had risen to 95,626. American newspapers demand stricter precautionary measures.

GRAND TRUNK OUTLOOK.

The issue during the current week of the prospectus offering $1\frac{1}{4}$ millions 4 per cent. Guaranteed Stock of the Grand Trunk Railway was made a pretext for depreciating the prices of the junior securities, but on second thoughts a strong recovering tendency has been shown. The issue is being made at 92 per cent., and has been well underwritten, and we have no doubt will prove attractive to the public. It will be noted from the prospectus that the major part of the issue is required to pay off the outstanding balance of about £856,800 of the old Midland of Canada 5 per cent. First Mortgage Bonds, which mature on January 1 next. The present issue will not only provide the whole of that sum, but will leave a considerable margin in hand, with an addition only of about £7,000 per annum to the net capital charges of the undertaking, after allowing for the saving of interest by repayment of the bonds referred to. The conservative policy of the Grand Trunk Board has from time to time enabled it to raise funds for the Grand Trunk Pacific Railway, and for its own purposes on remarkably low terms, and the latest issue is an example of the benefits of maintaining its credit at the highest possible level. At the recent meeting Mr. A. W. Smithers, the Chairman of the Company, emphasised the importance of high credit to the Company, and no doubt he had the present issue in mind. The manner in which the profits available for distribution have been freely utilised for improvements to the property has no doubt been somewhat trying to certain holders of the Third Preference Stock, who are desirous of receiving their full dividend. The ultimate prospects of this security, however, and to an even greater extent those of the Ordinary Stock, are greatly improved by the remarkably low rates at which all necessary capital has been raised. Mr. Smithers, as his speech to the shareholders on the 26th ult. indicated, is a great believer in the prospects of the Grand Trunk Pacific, and within a year or eighteen months it is hoped that the system as a whole will realise the advantages of the Pacific Extension. As the holders of the entire Common Stock of the Grand Trunk Pacific, amounting to \$25,000,000, the Grand Trunk Ordinary shareholders practically hold the reversion to the whole of the net profits of that great extension, after it has met its fixed charges. Bearing in mind what the Canadian Pacific and the Canadian Northern have already done, there can be no question about the possibilities of that holding. Indeed, it is probable that Mr. Smithers had this in mind when he referred at the recent meeting to the Ordinary stock as offering the most valuable reversions of any stock on the Stock Exchange List. It may be pointed out that Grand Trunk Ordinary Stock will probably be worth almost its present price as representing the reversion to the profits of the old Grand Trunk system, without reference to the capabilities of the Pacific Extension, which are still greater. It is true that at present the full dividend has not been earned upon the Third Preference, but there is no accumulation of arrears, and for the current year it may be hoped that a substantial dividend will be paid on the junior Preference. In appraising the value of the Grand Trunk Pacific Common Stock, it must be kept in mind that the capital is very small, having regard to the large mileage of the system. If it were to be valued at par—that is to say, five millions sterling—it would represent more than £20 per £100 of the Grand Trunk Ordinary Stock. There is one other important matter which in the meantime has been rather overlooked. We refer to the arrangements made by the Company for the issue as from January 1 next of bearer securities representing holdings of Grand Trunk Ordinary Stock. The arrangements made will be exactly the same as those which apply to the Canadian Pacific, and there can be no question that interest in Grand Trunk Ordinary Stock will greatly broaden and become co-extensive with that of Canadian Pacifics, which are as well known and

popular in the United States, Canada, and on the Continent as they are here. At the present moment London alone can boast a market in Grand Trunk securities, but with the objectionable registration method removed, the market for the ordinary stocks will certainly become an international one.

THE EDUCATION AND TRAINING OF RAILWAY MEN.

In noticing the Conference on the Education and Training of Engineers, held at the Institution of Civil Engineers last July, we pointed out that the discussions were practically valueless to parents. In no single instance was any decision arrived at, nor, except from Mr. Yarrow, were any suggestions made as to further investigations into the subject. The conclusions arrived at by Sir William White's committee some years ago on the curriculum to be followed by candidates for admission to the Institution of Civil Engineers were practically ignored by the great majority of the speakers, whereas, as was suggested by one of them, it would have formed a useful basis for arguments both in its favour or against it, in the light of the experience gained since its adoption. In his address, on Tuesday last, the new president, Professor Unwin, took the same view, but it cannot be said that his remarks were very helpful on the subject of education except as recording the personal opinions of one of the most successful teachers of the time, whose numberless pupils helped to fill the lecture theatre to overflowing, and who, by their rapturous applause, gave audible proofs of the President's popularity and of the esteem in which he is held by those whose advancement in their profession was due in a great measure to the thorough grounding they received under him. Former generations of engineers were represented by the many greybeards at the council table and in the auditory, among whom the venerable figure of Lord Brassey was perhaps the most distinguished—all these most practical men, who had been responsible for capital works over the whole world for years past, must have taken some comfort from many of the learned Professor's conclusions. While recognising the value of *data* regarding breaking strength, yield-point and elastic limit as a guide to the engineers, Mr. Unwin considered that they did not furnish any purely rational rule for the designers in fixing the working stress, and that experience in similar cases should always be the ultimate appeal. It is just this experience allied to mature judgment which enabled eminent engineers in the past to erect works that have shown no signs of weakness, and that are likely to stand the test of time as well, if not better, than many structures designed and executed by younger and less experienced men, who have relied too much on factors which, as he said, could only be fixed empirically—*i.e.*, by judgment informed by experience. That tests must be continued to be made, while specifications should not disregard questions of cost and the convenience of manufacture, was insisted on by the President—but these same tests are evidently not considered as in any way taking the place of the qualities on which we have insisted.

The C.L.R. Extension to Liverpool Street.—The extension of the Central London Railway from the Bank to Broad Street and Liverpool Street is expected to be ready for traffic in June next. Five hundred trains a day will use the new station, which will be provided with an escalator platform for the speedy transport of passengers between the two stations. Twenty-six minutes will be allowed for the full journey between Wood Lane and the new eastern terminus. The half-mile of double tunnelling will cost £282,000, this sum also including the purchase of certain property which will enable a widening of the street to be effected by the civic authorities. As 180,000 persons leave Liverpool Street Station in a day, and 70,000 depart from Broad Street, a very large addition is expected to the number of passengers on the Central London line, which already exchanges 25,000 passengers a day. At the western end the terminus is to be extended to Ealing, an open country route, which is becoming a suburb.

Besides £350,000 withdrawn from the Bank last week for export to Egypt, £100,000 was sent into the provinces, the whole of which is fully accounted for by the requirements of term time in Scotland, though the exigencies of the National Penny Bank may have contributed. The active note circulation declined by £159,000, thus making a reduction in the Reserve of £881,000. There are increases in Government Securities and Other Securities amounting to £242,000 and £824,000 respectively, thus balancing the drain upon the market's resources involved by these withdrawals of gold. Other Deposits are, nevertheless, £2,166,000 lower owing to payments for the issue of Treasury Bills, which is again reflected in an addition of £2,342,000 to Public Deposits. The addition is necessarily transient owing to the scale on which disbursements of the Government are going on. Hence there has been no advance in rates for money on account of the decline in Other Deposits. The inclination of the money market has been, if anything, towards greater ease, and discounts have not appreciably altered except for bills maturing in the new year, which rule a shade lower. The ratio of Reserve to the liabilities of the Bank is nearly two points lower, at the still very respectable figure of 49½ per cent.

The account just ended on the Stock Exchange has been one which on the whole has been distinctly favourable to holders, though its record in this respect was marred by a sharp decline in Home rails that rendered memorable the early days of the present week. The improvement has been characterised by a general rise in

foreign Government stocks, comprising, with few exceptions, the whole list of these investments. Evidence of a widespread sense of enhanced confidence, such as this affords, furnishes a very useful—and, indeed, nowadays, a very necessary—support to a stable advance in domestic securities, and these have not been wanting. Colonial Government stocks have advanced with them. Home rails, indeed, are higher than they began in almost every case. Indian railways tended upwards. Among Colonial railways, Trunks made an exception, being all down a point or more owing to the new issue. United States railway bonds rose on an average nearly 1 per cent., the shares on common stock being in almost every case over a point up. Some striking rises occurred in foreign rails. Entre Rios ordinary rose from 61 to 68. Leopoldina from 63½ to 67; but Argentine lines were not all favoured, and the largest declines occurred among the stocks of the longest established railways. In the general advance even some of the neglected brewery list were included, and the commercial and industrial section showed many more rises than falls. All this affords evidence of elasticity and strength, or, at least, belief in the strength of the investing public, and if its buying power is not again smothered in a flood of new issues of capital, higher prices are likely to rule all round when the new year begins. The capacity of foreign complications and domestic labour troubles to interfere must not, however, be forgotten. We had a striking example of what could be done by the mere threat of the latter last Monday.

On Saturday the protracted delay of the conferring railwaymen's leaders to arrive at a decision upon the policy to be pursued had already begun to work upon the nerves of operators on the Stock Exchange, and although the other markets were fairly bright for a Saturday morning, the movements in Home rails were against the holders. On Monday, when the decision to take a ballot had been reached and made public, such a decline occurred as requires a long memory to parallel. Great Northern Deferred fell 2½, London, Chatham and Dover 4½ per cent. Preference also Great Central 1894 Preference fell, each of them 2. Altogether out of the active list, which comprises some forty and odd stocks, twenty, or nearly half, fell one point or over, and few, if any, escaped a fractional set-back. The decline continued the following day, when Great Central 1894 Preference fell another 2½ points, but the other falls were not so heavy as the day before, and towards the afternoon some excellent figures showing the expansion of our foreign trade during October were a reminder that the country is still doing an increasing business, thereby giving a check to the fall in prices. On Wednesday this view was fortified by the traffic returns of the railways, which in almost every case recorded a larger increase than for last year. Recovery then set in, which made further progress the following day, but came to an end before the afternoon, quotations ending rather below the opening prices. Consols were lower on account of the £5,000,000 issue for Southern Nigeria. The question created by the low price of this stock has been the subject of much discussion during the week, and is likely to cause an organised protest against the diversion of sinking funds. On Friday a further fall took place in Consols, for which certain passages in the German Chancellor's speech were made responsible, but as long as British Government stocks are so invariably chosen by executors for realisations to meet the increased death duties it is needless to look further for a cause of declining quotations in these stocks. Home rails weakened. South Eastern Deferred, also Great Northern Deferred, fell ½. Declines in smaller fractions garnished the whole active list. Great Central stocks were among those that suffered. The 1889 Preference Stock of that line may now be purchased at about 82, and at that price yields nearly five per cent. when the accrued dividend is allowed for. Considering the margin of profits available,

this is a good yield, and the stock affords as good an opportunity for investment as any in the whole list of Home rails. United States railways were strong, but Canadians and Mexicans weak. United of Havana rose 1 to 87.

The movements of the week are set forth in the following table:—

Weekly Traffic Summary.

The traffic receipts for the week ended November 5, as officially published by the fifty-two principal railways of the United Kingdom, amounted to £2,234,523, which was earned on 21,521 miles, being at the rate of £103 16s. 7d. per mile of line open. For the corresponding week of 1910 the receipts of the same lines amounted to £2,122,816 with 21,467 miles open, or £98 17s. 9d. per mile. There was thus an increase of £111,707 in the receipts, an increase of 54 in the mileage, and an increase of £4 18s. 10d. in the receipts per mile. Thirty-four of the returns distinguish between the receipts from passenger and goods traffic, and these show an increase of £28,602 (or £1 5s. 4d. per mile) in the passenger receipts, and an increase of £81,538 (or £3 14s. 9d. per mile) in the receipts from goods traffic. The aggregate increase of the thirty-four railways for eighteen weeks in the passenger receipts has been £133,898, while the aggregate increase in the goods traffic was £187,224. The aggregate receipts of the fifty-two railways for eighteen weeks (July 2 to November 5) amounted to £43,150,808, in comparison with £42,874,575 in the corresponding period of last year—an increase of £276,233.

DISCIPLINE AND SENIORITY IN RAILWAY SERVICE.

BY R. WEATHERBURN.

One admirable feature peculiar to well-managed lines, and alike applicable to salaried officers and the running staff, is the pedigree book, which records the date of entry into the company's service, promotions, rewards, fines, suspensions, admonishments and cautions, with the nature of the offence or act fully stated during the individual's career. This indispensable book, although helping materially to a better knowledge of the men, and invaluable as a reference when investigating or making rewards, is not to be considered as infallible or used in an arbitrary sense. The first duty of any official, particularly when responsibly placed, is to enforce a strict observance of the rules and regulations. These rules are the outcome of years of experience, solicitude, and care, and are framed in the joint interests of the public and company. Their observance tends to the moral and physical benefit of the men. Their enforcement, however, should be qualified by a regard for the circumstances and the man. Drafted from every phase of life, some men are readily amenable, others, if not ignorant of their meaning, fail to see the need or justice of what appear unnecessary or irritating restrictions, and when the opportunity occurs do not hesitate in their infraction. Then there are those who in personal habit and performance of duty are careless and negligent, and, unless checked, soon demoralise the younger hands. The only successful treatment for these failings is the inculcation of new habits by exacting the observance of the smallest trifles without irritation.

THE TEST FOR CLEANERS AND FIREMEN.

It may seem personal and superfluous to speak of official duties and their performances. I have found that the true estimate of such is not alone in carrying out the daily round in strict accordance with the rules and regulations, but at the same time trying in every way to elevate the tone and character of the work, thus arousing a personal interest and pride in doing it. All recruits are more or less desirous of becoming drivers, and the test of suitability is a lengthy one, and involves a trying period of probation—viz., cleaning. The youth must be encouraged and taught that it is needful for the work to be thoroughly done. The task in bad seasons is almost incessantly recurring, for the engine, turned out clean and sprightly, a credit to himself and the company, and a pride to the driver, is returned to the cleaner bespattered with dirt, grease and weather-beaten day after day, week after week, with a cruel and trying monotony that either makes or mars the man. No mere sense of duty is enough to keep him up to the daily average required—the incentive is to be found only in the personal pride and interest, strengthened by the feeling that the engine in smartness and appearance represents his particular contribution. When this feeling, judiciously stimulated, has taken root, the man's feet are securely placed on the next rung of the ladder, and the company has a creditable unit for further training. From the commencement of my official career I had strenuously enforced these unwritten rules, which for a time produced opposition and unpopularity in some, yet eventually brought about satisfactory results. The effect on the development of character of strict inculcation by example of order and cleanliness as a system is of the highest and most vital importance. Everything necessary to high efficiency is associated with cleanliness. The necessity of keeping the machinery under a man's charge as a cleaner satisfactory carries with it the qualification for advancement, and not less as fireman is it incumbent to do the same, as the engine armature requires an occasional rub here and there, as well as cleaning out of smoke-box, ash-pan and grate-bars. This unnecessary cleanliness, as some would term it, often reveals defects, flaws or incipient fractures. The moral effect is still greater, for the individual feels himself under inspection, and begins to realise that he must be circumspect in small things as well as great; henceforward he is on the way to become a servicable and economical factor.

A PRACTICAL ILLUSTRATION.

Some may think that this discipline may be carried too far; others that the results are not in proportion to the expenditure. To those I would observe that the effect follows the man through his whole career and is constant. Cleanliness and order once obtained are easily maintained. There is another side to be considered—namely, the official one, with its obligation to the men, which is equally important in order to consolidate and bind together and prove how needful one is to the other. A case in point may not be amiss to show some of the results. The men working many ordinary and special trains at the end of their journey are required to lodge out. If

lodged on premises provided by the company the sum of 1s. 6d. was allowed per night, if at private lodgings 2s. 6d. Men from the provinces—Leeds, Manchester, Nottingham, or other large towns working into London were naturally open to the hundred and one attractions of the great Metropolis, and made the most of their opportunities when there, the result, in too many instances being loss of rest, or late to trains or even worse. I may here remark that the company insist on eight hours' rest. In order to ensure this object and keep the men under proper supervision, it was at last decided to build a special lodging-house, or barracks controlled by a steward, in telephone touch with the depôt. The barracks were fitted up with separate cubicles, beds, reading and dining-rooms, bath-rooms, soap, towels, hot and cold water. In every respect the conveniences and management were equal to those in second-class hotels. To many of the men from the colliery and other country districts the change was almost palatial when contrasted with the want of conveniences they left at home. For a short time after the opening the baths were but sparingly used, but the sight of the smart rooms and clean beds forced the suggestion that a bath was necessary before using. The result was that the beds after several days' use would bear comparison for cleanliness with the linen of the best hotel for the same time. But further good resulted, for many of the men who built houses for themselves, or through the medium of building societies, insisted on bath-rooms as a needful adjunct, while those who had slatternly wives forced the pace in the way of imitating the cleanliness and order that they had been accustomed to at the barracks.

PROMOTION TO THE POSITION OF DRIVER.

Having dealt with those influences which trim and shape the rough material into satisfactory and self-respecting and respected men, there remains the question of preparation and selection for the duties required of engine-men. It will be understood that my references are more particularly to that class. Promotion by seniority is the rule up to a certain extent, and its general application if practicable would simplify and lighten official responsibilities greatly. All men, however, are not equally capable; hence the close supervision and discrimination required in order to safeguard the public and the company's interests, which are identical. The stages of promotion are as follow:—(1) From cleaner to passed cleaner—i.e., eligible for fireman's duty when required; (2) from passed cleaner to fireman; (3) from fireman to passed fireman—i.e., eligible for ordinary driver's work when required; (4) from passed fireman to driver. The two last are qualified by actual test and inspection. So far, promotion by seniority is carried out, but although passed and certified as qualified for ordinary driving, many lack the qualities necessary to first-class driving. Some never realise the responsible nature of their duties, and go wrong. Others fail by over-estimating them, many are physically unable to bear the nervous strain entailed by speed and concentrated effort. Again, others in every other way competent have not the moral rectitude, or, in other words, cannot be depended on to keep straight. Any further attempt to carry out promotion by seniority than that shown would be followed by most unfortunate results. The selection of the fittest therefore suggests itself as a natural solution, and success follows in proportion to the care and judgment exercised. The qualifications necessary for such judgment and selection on the part of officials are a thorough acquaintance with the actual duties required, and of the capabilities and character of the candidate, supplemented by the silent but eloquent testimony of the pedigree book. Further strengthened by encouraging a constant, healthy competition and friendly rivalry, these qualifications are, in the end, sure to promote all-round excellence. Yet some maintain with bitterness that the principles of seniority should be carried to the fullest extent, even to the education of the incompetent. I can only aver that a railway worked on such-like socialistic principles, even after the most Procrustean manner, would be followed by disaster.

THE PERSONAL FACTOR—PILOT ENGINE TROUBLE.

With a railway like the Midland, whose training and discipline leave little or nothing to be desired, it is an impossibility even with the most assiduous application, to mould and develop a status, that shall be alike satisfactory, and the same can be justly applied to all other companies or corporations. Let it be understood that with the restrictions of gauge, height of tunnels, width of platforms, etc., the English engineer has his work cut out to meet the maximum demands made upon him by competition, and the further demand for increased economy. So that bad weather, or any other unexpected thing, acting as an adverse factor, will often make the conditions of power on the one hand and resistance on the other so nearly

equal that little margin appears left. The competent driver with the right grit will then rise equal to the occasion, and rejoice and take pride in having by dint, and addition of the human factor, come successfully through. A man with less grit and fewer expedients fails, and excuses himself on the ground of bad weather, heavy trains, etc. The conditions being equal, with some men an engine will be a great success, with others as great a failure. Some men, by sheer skill and energy, will get one-half more work out of an engine than another, and with less punishment to machinery. Such men, although admired and secretly envied, are frequently unpopular with their fellows, as what they accomplish with ease and pride of place, with a man less endowed becomes a stress and worry. The personal factor is by no means a negligible quantity on a railway, and should be fostered and encouraged, in order to obtain satisfactory results. At one time there was a secret understanding amongst a great many drivers of passenger trains that should a train consist of more than a certain number of vehicles, a pilot engine should be requisitioned. In many instances such trains did not average more than two hundred tons. Now this involved nearly double the cost of haulage, and opened the door to many risks and misunderstandings as to responsibility of signals and application of brakes. From the date of my appointment it became an anxiety and personal study to break through this understanding, and in order to pave the way I determined to have the locomotives in such an efficient condition that no man could complain without cause of the machinery placed at his disposal. At the same time I deemed it necessary to appeal to the innate pride of place and duty which every good man esteems. The difficulties were greater than I imagined, as diverse opinions existed as to what were considered reasonable loads at the booked speed, and departmental opposition was added to that of the men. Nevertheless, a careful selection of promising junior men, whom I knew to possess the qualities needed, introduced into the hitherto exclusive rings of duties, proved soundness of judgment in this respect. Still, years of opposition had to be encountered, not only as formerly stated by the men, but also officially. Happily the time came when the exigencies of the service forced the official recognition and the carrying out the scheme more extensively, but it would never have been a success had not selection of the fittest been the policy eventually pursued.

The reader must not suppose that double-headed trains were abolished entirely, but at least sixty-five per cent. were. There will always be assistant engines needed at special times.

DRIVERS WITH TWO PERSONALITIES—THE DRINK EVIL.

However far-reaching and close applying the rules and discipline of a company may be, there are agencies constantly at work tending to neutralise, drink being the principal one. It is a deplorable fact that some men have two distinct personalities. Outside the company's gate, free from restraint, he takes his glass in moderation, or to the contrary, once inside the company's domains he knows he is under observation. Beer or any other intoxicant is forbidden on the premises. He must be in a sober condition when signing on duty, and in order to prevent any infraction, a clerk or some responsible individual witnesses such signatures, and is compelled to report to his superior officer anything of an irregular or suspicious character. Further, the foreman on duty is expected to see each man personally before taking to his engine. Even when away from his depôt he is liable to be reported by any officer of other departments should he fail in his duty. Despite these precautions, men do run the gauntlet, and are only discovered by blundering, or incapacity. Unfortunately, capable men in every other respect sometimes come to grief, for the means and ways of obtaining drink are numerous and secret. One such out of a number. Some thirty odd miles out a train slowed down, and came to a stop for want of steam. The driver was found incapable through drink. It was afterwards ascertained that on his way to the sheds he had called in for a glass and met some old friends who had persuaded him to drink a glass with each, somewhat hurriedly, the effect of which was not in the least apparent when signing on, but which when running at high speed took effect. Others secrete drink upon their persons. One of the most painful cases I had to deal with was that of an express driver who had been fined and reduced to shunting work for getting drunk when on duty. He felt his reduced condition keenly, and at the expiration of nearly a year, asked that his case might be reconsidered with a view to his reinstatement to passenger train duty. He was refused. His "society" then made application on his behalf, and, moved by the number and character of these intercessions, he was fully reinstated as express driver. Nearly two years had elapsed since he had been on the main line, and as several

signal alterations had been made, it was considered advisable that he should go as third man on the foot plate for a couple or three days, so as to thoroughly revive his knowledge of the road.

On the third day I had a telegram instructing me to suspend him at once. My consternation was immense when I heard that he had taken a bottle of drink with him, and insisted on the driver and fireman drinking to his success, and still worse, the train in question being a heavy one, had an assisting engine at the front, and in order to still further show his good fellowship, he had clambered over the tender of the leading engine when at full speed to give the men on the engine behind a share of the liquor. How he had obtained the drink was never known, but the feat of climbing over from one engine to the other with a bottle in one hand can only be partially understood by anyone trying it with both hands.

THE UNEXPECTED IN THE HUMAN FACTOR.

Guarded and protected as far as human judgment can forefend, the unexpected in the human factor may occur, which for the moment upsets the wisest calculation. The question often obtrudes itself whether the many automatic safeguards provided are the unquestionable advantage claimed? The men have become so accustomed to depend on their accuracy and reliability, that their own otherwise quick intelligence has become impaired by disuse, so that when called upon unexpectedly they are found wanting. Certain it is that although accidents are fewer, those that do occur are of a much more severe character, and in many cases traceable to want of judgment at critical moments, which goes to prove that after all the human factor is everything. Some years ago a case occurred on the Tottenham and Hampstead branch, worked jointly by the Great Eastern and Midland Railways, which one would hardly consider possible. A Great Eastern driver had occasion in the early morning to run a light engine from Junction Road to Highgate Road, in order to cross over to the down line. After his arrival at the latter station, and in full belief that he had done so, he reversed his engine, and started his return journey on the same (up) road. The first intimation of his mistake was coming into violent collision with a Midland Railway workmen's train near Harringay; the result would have been disastrous had not the driver of the workmen's train seen the light engine careering on the wrong road.

Of course, the investigations into this case had but one foregone conclusion. Yet there are cases so intricate, where the evidence for and against is so balanced as to make decision a question of difficulty. The Scotch express, under admirable conditions for the effective application of the brakes, ran into the stop blocks at St. Pancras one Sunday morning. Several carriages were telescoped, and the buffer stops smashed. On my arrival I mounted the engine for the purpose of testing the brake. The driver, who was standing by, remarked "The brakes are all right, Sir. There is no fault to find with the brakes." This I verified by raising the proper amount of vacuum. The driver and fireman both solemnly averred that the train was run in at the usual speed. This was confirmed by the two guards and platform inspector, the latter a man of long experience. The pointsman in the box at the time and other witnesses bore similar testimony.

On the other hand, the once massive buffer stops smashed to splinters, carriages telescoped, engine partly mounted on platform, all bore striking testimony to a speed far in excess of seven to eight miles per hour. Fortunately, in one sense, the onus and responsibility of a decision as to cause and blame is removed from the company's officials to the official appointed by the Board of Trade to investigate and report on accidents. In this instance it was the late Major Marindin, the "Bayard" of Government Inspectors, whose name and reputation through a long and arduous career was honoured by all who had the privilege of knowing him. His decision was that the speed of the entry was in excess of that stipulated. The punishment was almost nominal—namely, transferred from main line work for a period. I may here remark that in view of the difficulty of estimating low speeds that the rule is to approach the terminal stations and others classed as such at no greater speed than that controllable by hand brakes. The chief study underlying every phase of duty should be the accomplishment of the greatest mileage with the least loss of life or injury; this can only be obtained by exacting from those responsible the most careful examination of such parts of machinery as are likely to suffer or depreciate, either by prolonged use or sudden strain.

BENGAL DOOARS RAILWAY.—An interim dividend on the ordinary stock of 2 per cent. for the half-year ended June 30, 1911. A year ago the dividend was at the same percentage.

REPUDIATION OF PLEDGES BY THE AMALGAMATED SOCIETY OF RAILWAY SERVANTS.

NEW EFFORTS TO FOMENT A STRIKE TO SECURE RECOGNITION. FIRM ATTITUDE OF RAILWAY MANAGERS.

The sitting of the joint executive of the railwaymen's four unions, which was in progress when the RAILWAY TIMES went to press on Friday of last week, developed into nearly a fourth day's full deliberation before a decision was announced. It was late on Saturday afternoon when the following resolution was issued to the press:

That this Joint Executive Committee, having considered the reply of the Prime Minister to the resolution of this Committee wherein we asked that the railway companies should meet the signatories to the recent settlement, with a view of endeavouring to arrive at a basis of settlement on the Railway Commissioners' findings, we deeply regret His Majesty's Government have failed to bring about such a meeting, which, in our opinion, might have resulted in a settlement satisfactory to both parties.

The Executive Committee has, therefore, decided to ascertain the wishes of their members in a manner in accordance with the following resolution:—

That this Joint Executive Committee, whilst not agreeing with the findings of the Royal Commission, were prepared to meet the railway companies to consider what amendments would be acceptable to the proposed scheme. This suggestion being refused by the railway companies, this Joint Executive Committee decided to take a ballot of all members as to whether they are prepared to accept the findings of the Royal Commission as set out in the proposed scheme. If not, are they prepared to withdraw their labour in favour of recognition of the trade unions, and of a programme for all railwaymen to be agreed upon by the members of this Committee?

Five delegates are stated to have opposed the resolution, and to have expressed themselves in favour of an immediate threat to strike. After the proposition had been adopted, it was approved of by Mr. W. Hudson, the representative of the North Eastern railwaymen, who, for a reason well known, were not represented at the meetings.

A statement made in daily newspapers on Saturday that the employees were represented at a meeting between the Prime Minister and representatives of the railway companies at Downing Street is incorrect. Only representatives of the companies met the Government. The joint executives had passed a resolution asking the good offices of the Board of Trade in bringing about another conference with the companies in order to discuss the details of the Commission's findings, with a view to seeing how far it was possible to introduce such amendments as were calculated to make the draft conciliation scheme more acceptable to the men and to their leaders. The Board of Trade placed the matter before the Prime Minister, and the result was forwarded to the executives on Friday evening after the conference had concluded for the day.

THE GOVERNMENT AND THE COMPANIES.

On this occasion the Government quite properly recognised that it would be improper to urge the companies to attempt any further compromise with the men. In August last the companies, having been challenged, were prepared to fight out the issue, but adopted the conciliatory attitude of agreeing to accept the Royal Commission and to abide by its findings, though there was a strong opinion against the wisdom of such a course. It is stated that in assenting to the appointment of the Commission the representatives of the companies were largely influenced by a statement alleged to have been made by a Cabinet Minister that a railway strike in this country at that time would quite possibly tend to encourage hostilities between two Continental countries whose relations were then strained, and to one of whom Great Britain had treaty obligations. It was, in fact, known that most important events might then take place at any moment, and in the public interest it was necessary to avoid any interference with transport in this country.

MEN'S BROKEN AGREEMENT.

The men's denial of the Board of Trade's statement that both parties agreed to abide by the report of the Commission will, no doubt, be dealt with by the Government in the discussion which is to take place later in the House of Commons. In the meantime, we have the definite statement of Lord Claud

Hamilton, chairman of the Great Eastern Railway Company, in regard to the matter. On Monday he informed a Parliamentary lobby representative that there could be no question whatever as to the employees' delegates having pledged themselves to accept the findings of the Commission, and that the repudiation was only made on the very day when the report was published. If they had not agreed to accept the report the men's representatives would have repudiated the suggestion on the very first occasion possible. It may be added that not only was no disclaimer published at the time of the appointment of the Commission, but that the statement binding the men to accept its report was actually published without question of any kind in their own organ, the *Railway Review*. Lord Claud Hamilton's statement is the more important because now that a ballot has been ordered, it is necessary that those who have to vote should learn the truth with regard to the assurances given by their representatives. In the official statement made on the night of August 16, it was stated by Sir H. Llewellyn Smith, in the presence of Sir George Askwith and other representatives of the Board of Trade, that

assurances have been given by both sides that they will accept the findings of the Commission.

This statement the Board of Trade have neither withdrawn nor modified.

Mr. G. J. Wardle, the Labour M.P. for Stockport and editor of the *Railway Review*, in a speech at New Cross on Sunday, said that so far as he knew no authority was given for the Board of Trade statement that both sides had agreed to be bound by the findings of the Royal Commission; still, that statement was not challenged at the time, and that fact was an element in the situation and could not be ignored. The position of the men had been greatly improved by the scheme in the report, and he foresaw that the limited recognition in it would be expanded. In his closing sentence Mr. Wardle said: "I do ask you to weigh carefully your decision. My own candid opinion is that the fight is largely won. Do not strike for the sake of striking. Rather make sure of the fruits of the victory you have already won."

PREPARATIONS IN VIEW OF A STRIKE.

Lord Claud Hamilton stated early in the week that a meeting of railway managers would be held in the course of a few days, when the situation in the light of recent developments would be discussed, and the managers would be as firm as a rock. Amongst the suggestions that are understood to be under consideration by the companies in the event of a strike being declared are the following:—

Prompt application to the Government for troops to assist in the preservation of law and order.

Strike time tables, on the basis, as far as possible, of inter-railway services, thus securing, for example, a frequent service of long-distance trains spread over several systems.

Suspension of cheap bookings.

Extension of the experiment which was tried in August, of enlisting voluntary workers, such as clerks, to take the place of porters and others on strike.

At Bradford, the Midland Railway authorities are making provision for the boarding and lodging of loyal workmen and also for their protection. A large number of beds have been sent to a convenient point to be prepared at short notice.

CONCESSIONS BY THE COMPANIES.

CONSIDERATION GIVEN TO THE INCREASED COST OF LIVING.

The directors of the Midland Railway Company announced that for some time they have had under review the question of the wages of the adult employees in the lower-paid grades of the service. There are many factors peculiar to railway employment which have to be taken account of in considering the matter of wages. For instance, many men, principally in the working departments, remain in the lower grades for a comparatively short time only, during which they qualify and are afterwards promoted to the higher positions in the service. Again, the great majority of the labourers employed in the company's workshops and the staff engaged at the goods stations in the large towns work under a premium, or bonus,

system, by which their nominal weekly rates of pay are substantially augmented, in many instances by as much as 20 or 25 per cent. It has, however, been urged, and it is now generally admitted, that the cost of living has been increased, and, influenced mainly by this consideration, the directors have decided, as a principle, that so long as these conditions continue, no adult member of the staff in any branch of the service shall be paid a less rate of wage than 22s. a week if employed in London, 20s. a week if employed at certain large towns, or 19s. a week if employed at other places. These new conditions came into force on November 4. In coming to this decision the directors have voluntarily set aside the award of Earl Cromer, which fixed the rates of wages of the majority of the men now benefiting until December 31, 1913. The adoption of these minimum rates will necessitate some adjustment in the scale of pay for certain higher grades in the service, of course to the advantage of the men in those grades. Further, the whole of the men engaged on the permanent way will receive advancement in wages. The details are being worked out, and each individual member of the staff affected will shortly be advised of any change in his wages. During the last few weeks the officers of the company have held a series of informal conferences with the men's side of several of the Sectional Conciliation Boards, and a further meeting with another board has yet to be arranged. At these meetings a number of applications have been made for certain improvements in the conditions of the grades represented. These appeals are now being considered.

THE GREAT CENTRAL.

The Great Central Railway Company have issued the following statement:—

"The Great Central Company's Conciliation Board on November 3 completed the revision of wages of the men in the various departments of the railway, which was commenced by the settlement a fortnight since with the engine drivers and firemen, continued last week with the goods workers, plate-layers, etc., and have now included the passenger train staff, signalmen and all those coming within the Conciliation Board's arrangements. The increase of pay given affects mainly the lower grades and involve in the aggregate a very considerable sum of money per annum."

THE GREAT NORTHERN ALL-GRADES REQUEST.

Mr. W. E. Crawford, of Doncaster, chairman of the men's side of the Great Northern Conciliation Board, presided over a meeting of all grades of railwaymen at Bradford, and submitted a long list of proposals to the company for improved conditions and wages. One novel proposal, as coming from the men, ran as follows:—"Where it can be shown that the cost of living at country stations is 5s. a week less than the standard rates of pay shown in the sections concerned, it shall be competent for the company and the men's representatives to tabulate such stations, and, if mutually agreed, the standardised rates of pay may be reduced by not more than 5s. per week." A resolution was passed endorsing the proposals, and deciding to send them to the general executive for consideration as the basis for a national programme.

LANCASHIRE AND YORKSHIRE RAILWAY.

The directors have decided to grant an immediate advance to workers in the lowest grades in the traffic department, including the passenger and goods porters, and, as it can be arranged, to some other grades. The directors have also decided to advance the salaries of a large number of the station clerical staff at an early date. At the commencement of the present year the company advanced the salaries paid to clerks in the lower positions at goods and passenger stations.

ATTITUDE TOWARDS CONCESSIONS

Mr. W. E. Crawford, of Doncaster, chairman of the men's side of the Great Northern Conciliation Board, has stated that he does not believe the concessions which are being granted by the companies will have any effect whatsoever on the ballot, "because the question we are voting on is 'Will you strike for unqualified recognition and a national all grades programme?' On these issues we are unanimous. A few years ago the companies used to try to buy the higher-grade men out of an agitation for better conditions by a promise of more wages. Now they are trying to do the same thing with the men of lower grades but it is not likely to succeed. The chief difficulty I am faced with just now is to explain, in reply to repeated demands for an immediate general strike, why such a move is inexpedient at the present moment. I have no doubt whatever that at the proper time the men will respond to what is really the call of the Joint Executives for 'a lead' from the men. After the result of the ballot is known the men intend to allow no more protracted conferences."

Mr. J. R. Bell, Organising Secretary for the Glasgow district A.S.R.S., referring to the decision of the Caledonian Company to improve wages and conditions of service at a cost of £10,000 per annum, states that if this was to apply to 5,000 men, it would be something like 8d. or 9d. a week, and the company thought it would be a permanent settlement of the difficulty, but the railwaymen were not going to accept any such settlement. The chairman in Glasgow the other day hoped the men would accept the settlement, and that they and the company would work amicably together. During the arbitration proceedings a concession was granted to locomotive men, drivers and firemen, in the busy shunting yards. The arbitrator clearly stated that these men were to have an eight hours' day. The men believed the arbitrator meant what he said, but it was referred back to him on the ground that the company had violated the award, and when he gave his final decision he made the extraordinary statement that while this was in the award, the award must be read as if the words were not in it at all. He (Mr. Bell) would go so far as to say that it would be well worth while to go through the Courts and have the legality of the decision given on that occasion tested.

Mr. Drummond, of the Associated Society of Locomotive Men and Firemen, states it seems to him that this £10,000 would not compensate locomotive men for what was taken away from them in 1883. In that year the mineral men lost a ten hours' day. The locomotive men at that period were more highly paid, and worked shorter hours than to-day. It was an acknowledged fact that the Caledonian was the only line in Great Britain to-day where locomotive men were working twelve hours a day.

EXECUTIVES' LETTER TO THE PRIME MINISTER.

In the resolutions passed during the deliberation of the unions reference was made to some communications with the Prime Minister which had taken place during the discussions. These letters were published for the first time by the *Railway Review* on Friday, and are as follow:—

A.S.R.S., Unity House, London, N.W.

November 2, 1911.

Report of the Royal Commission on the Working of the Railway Conciliation and Arbitration Scheme of 1907.

The Right Hon. H. H. Asquith, P.C., M.P., Prime Minister.

SIR,—We, the undersigned, are instructed to forward to his Majesty's Government, through you, the enclosed resolution, which was passed at a joint meeting of the Executive Committees of the Amalgamated Society of Railway Servants, the Associated Society of Locomotive Engineers and Firemen, the General Railway Workers' Union, and the United Pointsmen and Signalmen's Society assembled in conference to-day.

In doing so, we desire to point out that the situation is a most critical one, large numbers of the railway employees demanding to cease work. This we are anxious to avoid.

Whilst the proposals of the Royal Commission are disappointing to the men, we nevertheless feel that the scheme suggested does provide for a basis of agreement between the railway companies and their employees.

In fact, we venture to suggest that, with modifications which could be recommended for acceptance to our members, there is a possibility of the scheme being adopted.

We, therefore, urge you to take such immediate steps as his Majesty's Government consider necessary to give effect to the terms of the resolution, either through the Board of Trade or any other authority, and so enable us on behalf of the men to arrive at a basis of settlement which will remove the present unrest, and, we hope, bring peace to this important industry.

We may add that this decision has not been communicated to the Press, inasmuch as we are anxious to prevent any misunderstanding which might perhaps prejudice the efforts we are making for peace.

We are, sir, yours faithfully,

J. E. WILLIAMS, T. LOWTH,
A. FOX, S. CHORLTON.

Accompanying the letter was a resolution passed by the Executive Committee of the four unions, expressing regret that they could not accept the Royal Commission report. The resolution proceeded:—

"We therefore resolve to inform his Majesty's Government, the medium of the appointment of the Commission, that, unless the scheme can be amended so as to become acceptable to the men we represent, we shall have no alternative but to reject it in its entirety, and report to our men accordingly; and in our opinion an immediate meeting between the companies' representatives and the signatories to the recent settlement should be the medium of negotiation."

THE PREMIER'S REPLY.

10, Downing Street, Whitehall, S.W.

November 3, 1911.

GENTLEMEN, With further reference to your letter of yesterday and enclosure, I am directed by the Prime Minister to inform you that he has lost no time in communicating with some of the principal railway companies, including all those signatory to the agreements of 1907 and 1911.

As a result he has to-day, together with the Chancellor of the Exchequer and the President of the Board of Trade, had a private conference with the representatives of these companies.

He finds that the companies cannot share the view expressed in the last part of the resolution of your conference—viz., that there should be an immediate meeting for the discussion of points arising on the report of the Royal Commission between the companies' representatives and the signatories of the recent settlement. The companies consider that it was an integral part of the agreement of August last, which led to the appointment of the Royal Commission, that both they and the representatives of the railway employees bound themselves to accept and act upon its findings. In their opinion any points arising under Sections 1 to 8 of the scheme appended to the report of the Royal Commission, and other matters as they rise, are susceptible of adjustment between the various companies and the representatives of their employees as soon as the scheme as a whole has been put into operation.

He desires me to add that the Board of Trade are prepared to take steps towards bringing into operation the amended scheme on hearing from the various interests concerned.—Yours faithfully,

(Signed) VAUGHAN NASH.

The General Secretaries, Amalgamated Society of Railway Servants.

EVIDENCE OF MEN'S AGREEMENT TO ACCEPT REPORT.

Mr. A. Bellamy, chairman of the A.S.R.S., and the Joint Executive, has contradicted the statement that in his evidence before the Commission he replied in the affirmative to the question of Mr. Henderson, "Is it part of the settlement that both sides accept the decision of the Commission?" And also the question, "Has this been made public?" In the circumstances it may be useful to give the text of the questions and answers.

Mr. A. Bellamy: Do you think that it might be necessary to call in the assistance of the legislature to assist you (in the matter of alleged evasions by the companies)? You know there is such a thing as the Trade Boards Acts, do you not?—Yes, I do, but we were given the assurance by the railway companies at the date of the settlement that they would accept the findings of the Commission. We are told that it will not need an Act of Parliament to put it into operation, but that they are quite willing to put it into operation themselves.

Is that part of the settlement agreement?—It is.
Has that been issued to the public?—It has.

Then it is perfectly clear that whatever decision this Commission reaches the companies are prepared to accept? Does that go to the extent of recognition?—It does.

We have indicated a reply by Mr. Bellamy, which seems to show that he was fully aware of the publication by the Board of Trade of the statement that both parties would accept the findings of the Commission.

The replies to similar questions by Mr. Edward Charles, who is a member of the Executive Committee of the A.S.R.S., and was president of the society in 1910, show, however, very clearly that it was understood from the statements made by the representatives who were themselves concerned in the negotiations, that an agreement to accept the findings of the Commission had been given both by the representatives of the companies and of the men.

In the course of his evidence before the Railway Commissioners, he gave the following replies:—

What course could the Commission take to require the railway companies to receive the union officials?—By taking away the right from them to refuse to meet them if the men desire.

Do you think that should be done by legislation?—Well, I do not know. As I understand the settlement of the strike, it was that whatever recommendations you make would be accepted loyally by the men and by the companies. You do not want legislation. You simply make a recommendation and that is the end of it.

Is that the fact that whatever recommendation this Com-

mission may make is to be accepted by both the companies and the men? You cannot answer for the companies, but you can answer for the men? That is what our representatives told us was the understanding under which they signed the agreement. If that was not the understanding that strike would not have finished when it did.

LABOUR MEMBERS TO RAISE A DEBATE.

Mr. Ramsay MacDonald and Mr. Bruce gave joint notice in the House of Commons on Thursday night of the following resolution, which they propose to move on behalf of the Labour Party.

"That this House regrets that the directors of railway companies have refused to meet the representatives of the men, in order to discuss the report of the Royal Commission appointed to inquire into the Railway Conciliation Agreement of 1907, declares such refusal to be contrary to the public interest and to have no justification, and asks the Government to bring both sides into conference without delay."

It is stated that the motion will come up for debate week after next, probably on Wednesday. It is understood that the Government are willing to give a day for the purpose, and it is not secured it will be due to the failure of the Labour members to press for it.

THE RAILWAY COMMISSIONS FINDINGS AND THE UNIONS.

On Wednesday, Mr. Harold Smith (Warrington—U.) asked the President of the Board of Trade whether on August 21 last an official statement was issued to the press, on behalf of the Board, announcing that assurances had been given by the representatives of the railway companies and those of the trade unions that they would accept the findings of the Railway Commission; whether such announcement was correct; and whether representatives of various unions had repudiated the accuracy of the announcement so far as the unions were concerned.

Mr. Buxton: An official statement was issued to the press on August 10 at the conclusion of the negotiations, and I have nothing to add to it. I have received no communication from any of the parties concerned with regard to the accuracy of the official statement.

Mr. J. H. Thomas (Derby Lab.): Is the right hon. gentleman aware that no signatory of the settlement on the men's side was ever asked any such question, and therefore could not answer? Further, is he aware that every member who signed that agreement has since repudiated the suggestion that he entered into any such arrangement?

Mr. Buxton: I do not think that I can add anything to the answer I have given.

Mr. Lawson (Mile End—U.): Is it the case that the right hon. gentleman gave an assurance to the railway managers that the men had agreed to abide by the findings of the Commission?

Mr. Buxton: As the discussion was obviously of a confidential nature, it is impossible for me to make any statement with regard to that. I have given an answer which covers the notice given to the press, and I do not think that I can be usefully asked to answer any further question.

Lord Claud Hamilton (Kensington, South—U.): Is the right hon. gentleman aware that the official organ of the Amalgamated Society of Railway Servants, the *Railway Review*, on August 25, after giving an account of the appointment of the Railway Commission and its members, stated that assurances had been given by both parties that they would accept the findings of the Commission? (Opposition cheers.)

Mr. Buxton: I have nothing to do with that publication. I have given the answer from the point of view of the Board of Trade and the official position that we have taken up, and that we were bound to take up, with regard to this matter.

Lord Claud Hamilton: That is the union statement.

Mr. Buxton: I have nothing to add to what I have said.

AGREEMENTS AND AMALGAMATIONS.

In the House of Commons on Monday, Mr. Peto (Devizes—U.) asked the Prime Minister whether, in any legislation arising out of the report of the Departmental Committee on Railway Agreements and Amalgamations appointed June 17, 1909, or required to give effect to the promise of the Government made on the appointment of the Railway Inquiry Commission in August last, in regard to the grant of higher wages to their employees as reasonable ground for the railway companies to raise their rates for goods traffic within the legal

maxima, notwithstanding the provisions of the Railway and Canal Traffic Act, 1894, he would recognise the fact that there were three parties concerned, the public, including all traders, the employees, and the shareholders, and that no lasting and peaceful settlement could be arrived at without fixing a datum level and apportioning any increased profits that might result from economies effected by amalgamations and agreements entered into by the railway companies equitably between the three parties on the co-partnership principle; and whether, for this purpose, he would appoint a small commission and give legislative sanction to their findings.

Mr. Buxton, President of the Board of Trade, who replied said: In any legislation proposed by the Government on this question the interests of all parties concerned will be fully borne in mind. There does not appear to be any ground for appointing a further Commission on this subject, but any representations made to the Board of Trade by the hon. member will have careful consideration.

Mr. Martin (St. Pancras, E.—L.) asked the Prime Minister if he was aware that an amalgamation of the London General Omnibus Company, the Metropolitan District Railway Company, and the Underground Electric Railways Company was being arranged; and whether he would introduce legislation similar to the Sherman Anti-Trust Law of the United States of America to protect the public against combinations intended to prevent competition in railway rates.

Mr. Buxton, who answered, said: I have seen it stated in the press that some such arrangement is under consideration. The recent Departmental Committee on Railway Amalgamations recommend *inter alia*, that the Railway and Canal Traffic Act of 1894 with regard to increase of railway rates should be extended to cover passenger fares, and the Government hope to introduce a Bill next session to deal with the matters covered by the recommendations of the Committee.

DIVIDEND ANNOUNCEMENTS.

NORFOLK AND WESTERN RAILWAY.—A quarterly dividend of 1 per cent. on the adjustment preferred stock.

CANADIAN CAR AND FOUNDRY COMPANY.—At 4 per cent. on the common stock for the year ended September 30.

LEIBERG-CZERNOWITZ-JASSY RAILWAY.—An interim dividend of 8s. 3d. per share, less income-tax, for the past half-year.

ALGERIAS (GIBRALTAR) RAILWAY.—The directors propose to pay 3 per cent. interest on the six per cent. debentures and carry forward £1,107.

CHICAGO, ROCK ISLAND AND PACIFIC RAILWAY.—At 5½ per cent. on the capital stock, carrying forward \$1,511,765, against \$1,004,600 a year ago.

HURST, NELSON AND COMPANY, LTD.—The profits for the past year amounted to £13,715, of which £11,708 has been placed to the depreciation fund. The preference share dividend to May 15 has been paid by drawing on the special reserve.

INTER-OCEANIC RAILWAY OF MEXICO.—At £2 10s. per cent. on the first preference stock, making £5 per cent. for the year ended June 30, and £4 per cent. on the second preference stock, both dividends less tax. A year ago £4 per cent. was paid on the second preference stock.

CORDOBA CENTRAL RAILWAY.—The board have decided, after placing the sum of £10,458 to reserve, to recommend payment of the following dividends, less income-tax at 1s. 2d., for the year ended June 30, 1911: £2 10s. per cent. on the first preference stock, making, with the interim dividend paid on June 15 last, £5 per cent. for the year; £2 10s. per cent. on the second preference stock, making, with the interim dividend paid on June 15 last, £5 per cent. for the year; £5 per cent. on the ordinary stock, and £2 per cent. on the income debenture stock (Central Northern section).

ARGENTINE GREAT WESTERN RAILWAY.—At 2½ per cent. on the preferred and 2½ per cent. on the ordinary stocks, less income-tax, for the year ended June 30. The following is a list of the dividends for the past eleven years:—

	1911	1910	1909	1908	1907	1906	1905	1904	1903	1902	1901
1st Half	5	5	5	5	5	5	5	5	5	5	5
2nd Half	5	5	5	7	7	7	7	7	7	7	7
Annual Rate	5	5	5	6	6	6	6	6	6	6	6

RAILWAY AND STEAMBOAT PASSENGERS.

A case of some interest to railway and steamboat companies and to passengers has been decided in Glasgow Sheriff Court by Sheriff Thomson. The action was brought by Mr. Robert Wylie and his wife and two children against the Glasgow and South Western Railway Company, claiming £50 as loss and damage in consequence of defender's alleged breach of contract and misrepresentation in failing to run a train from Prince's Pier Station, Greenock, to Kilmacolm immediately after the arrival of and in connection with the turbine steamer "Queen Alexandra" on Saturday evening, May 13, notwithstanding advertisements and time-tables intimating that such a train would be run. Pursuers stated that they spent the afternoon at Skelmorlie, and joined the steamer at Wemyss Bay, intending to leave by the special train leaving Prince's Pier at 8.50 p.m. They purchased tickets for Kilmacolm, but on making inquiry at the station they were informed that there was no train to Kilmacolm until the ordinary train at 10.5 p.m. In consequence pursuers, who had been drenched with rain, were compelled to wait in the station, and, they averred, suffered great inconvenience and discomfort. In effect the defence was that it had not been arranged that the 8.50 p.m. special train should stop at Kilmacolm. In any case, pursuers were not cruise passengers and held no through tickets or contract bringing them within the provision of the advertisements. The Sheriff said he thought if pursuers had taken tickets for the cruise by the steamer they would have had a good ground of action against the defenders. But, as a matter of fact, their contract with defenders was constituted in the ordinary way by the purchase of tickets at Prince's Pier for conveyance to Kilmacolm, which, he thought, involved no more than conveyance by the first regular train from Prince's Pier stopping in ordinary course at Kilmacolm. Pursuers only joined the steamer at Wemyss Bay and did not make a cruise, and his lordship found the representations made by the company were made as an inducement and could be founded upon only by such as actually purchased tickets for the cruise. If pursuers' contention was right they were entitled to the special train even if all who had taken the cruise had gone on to Gourock and none had embarked at Prince's Pier, or, indeed, even if the cruise had not taken place at all. He could not accept that view. His lordship found pursuers liable in expenses.

THE RAILWAY TRADES UNIONS.

The following statistics showing the membership of the Railway Trades Unions were given by Mr. W. F. Marwood, in connection with his evidence before the Railway Commission, and they should receive careful attention, as showing how small a proportion of railway men are represented by the unions. It was because of this circumstance, and of the general undesirability of weakening in any way the discipline which must necessarily be maintained on our railways, that we said in our issue of August 19 that no Royal Commission would ever compel the companies to recognise the leaders of the railway unions. We added that a Royal Commission, which at that time had just been refused by the men's leaders, might remove causes of complaint against the scheme of 1907; but that "such a result would be of no use to executives of the unions struggling for admission to the board-rooms of the railway companies." The way in which the fair and judicial report of the Royal Commission has been received by the men's leaders during the past week should make it perfectly clear to all impartial observers that recognition is, as we said, the only thing for which those leaders really care. Improvements in the conditions of the men, which will undoubtedly result from the arrangements proposed by the Commission, are considerations with which the leaders have comparatively little concern. It is desirable that the public should note this fact; for the railway men generally are loyal, and will be disposed, if not misled, to carry out their duty to the public and to accept the recommendations of the Commission. The only danger is that the extremists who fill the offices of the railway unions may by their influence lead the men to take a wrong view of the matter.

TABLE SHOWING THE MEMBERSHIP OF THE UNDER-MENTIONED TRADE UNIONS AT THE END OF EACH OF THE YEARS 1900-1910.

Trade Union.	1900.	1901.	1902.	1903.	1904.	1905.	1906.	1907.	1908.	1909.	1910.

MEETINGS AND REPORTS.

FORTHCOMING MEETINGS.

- Nov. 13 (Mon.). **Argentine Great Western Railway** (Annual), Winchester House, E.C., at 12.30.
- Nov. 14 (Tues.). **Bolivar Railway** (Annual), 1, Broad Street Place, E.C., at 2.30.
- Nov. 14 (Tues.). **Rohilkund and Kumaon Railway** (Half yearly), 237, Gresham House, E.C., at 12.
- Nov. 15 (Wed.). **Salvador Railway** (Annual), Winchester House, E.C. at 12.
- Nov. 17 (Fri.). **Paraguay Central Railway** (Annual), Salisbury House, London Wall, E.C., at 2.
- Nov. 20 (Mon.). **Bahia Blanca and North Western Railway** (Extraordinary), Winchester House, E.C. at 12.30.
- Nov. 20 (Mon.). **Buenos Ayres and Pacific Railway** (Extraordinary), Winchester House, E.C., at 12.
- Nov. 20 (Mon.). **Interoceanic Railway of Mexico** (Annual), Winchester House, E.C. at 12.
- Nov. 20 (Mon.). **Rio Claro Sao Paulo Railway** (Adjoined General), Cannon Street Hotel, E.C., at 12.
- Nov. 27 (Mon.). **South Yorkshire Junction Railway** (Half-yearly), 50, Moorgate Street, E.C., at 12.30.
- Nov. 28 (Tues.). **Argentine Great Western Railway** (Extraordinary), Dashwood House, New Broad Street, E.C., at 2.45.
- Nov. 29 (Wed.). **Bolivar Railway** (Extraordinary), 1, Broad Street Place, E.C., at 2.30.

(Reports, Traffic Returns, Prospectuses, and all other items of financial intelligence should be sent as early as possible to the Editor of THE RAILWAY TIMES, 12, Norfolk Street, London, W.C. Telephone 2948 Gerrard. Telegraphic address, Altimetry, London.)

PEKIN SYNDICATE.

The ordinary general meeting was held in Cannon Street Hotel, London, on Tuesday last, Sir R. D. Awdry, K.C.B., in the chair.

The SECRETARY (Mr. Thomas Gilbert) having read the notice convening the meeting and the report by the auditors,

The CHAIRMAN said that it had been found convenient for a second time to bring out the accounts for a period of eighteen months, and they were made up to June 30 last, the latest date at which full information was available from China. The accounts showed liquid assets of about £1,000,000, and a profit account of over £400,000—a very satisfactory result. It was proposed in the future that the financial year should conclude regularly on June 30, and that the accounts be presented annually in the autumn. With regard to the balance sheet, the item, "sundry creditors," £10,000 was made up of royalties on output of coal for six months ended June 30, 1911, suspense account for income tax, law charges, and various other small sums. The royalty was not payable until the end of the year. The liability on capital—£10,625—represented the syndicate's liability of 10s. per share on their holding of 21,250 ordinary shares in the Chinese Central Railways. On the other side of the balance sheet was the item "investments," £182,091; these had all, with the exception of the investment in Consols, £35,000, appreciated since they were bought. Whilst they have written down the Consols they had left the other investments at cost price. They had £35,000 in Consols, £5,000 in Japanese Government five per cent. loan, 1907, £50,000 Japanese Government four-and-a-half per cent. loan second series, £5,000 Tientsin-Pukow Railway five per cent. loan (first issue), £20,000 second issue and £40,000 supplementary, £15,000 Chilean Government five per cent. loan, 1909, £100,000 National Railways of Mexico two years four-and-a-half per cent. secured gold notes, and £20 Cheng Tai Railway five per cent. loan. The item £20,643 15s., "shares in other companies at cost," represented 21,250 ordinary and 225 deferred shares of £1 each in the Chinese Central Railway. This item also included a holding of 1,300 shares of 50 taels each, fully paid, in the Tientsin Wharf and Godown Company, Ltd., and they had also a small interest in the North China Printing and Publishing Company. The next item, "debtor balances," £35,147, was in respect of disbursements made in London, on account of the Tao-Ching Railway, for which the Imperial Chinese Government was responsible, an amount in suspense to meet extraordinary payments which had since been repaid to the company, and a few other small amounts. With regard to the stocks taken at cost item, £53,793, this represented 174,196 tons of coal stored at depôts, various agencies, and marts. The output and sales figures were:—Output—At December 31, 1909, 244,379 tons, and at June 30, 1911, 582,790

tons, making altogether 827,169 tons. They sold in December 31, 1909, 66,294 tons, and at June 30, 1911, 552,972 tons, making 619,266 tons, which left a balance of 175,893 tons. To this had to be added their stock at Shanghai, 81,835 tons, making, together, 257,728 tons. They had to deduct colliery consumption, 81,505 tons, and wastage from the commencement of output to June 30, 1911, 1,067 tons; total, 83,552 tons—the balance being 174,196 tons. The item mining stores, £29,809, represented cost price, including freight and charges to the mines. The item brickworks, £103,158, represented the cost of bricks on hand. With regard to the item £105,033, "further expenditure from January 1, 1910, to June 30, 1911, less sundry credits," this was the balance of the amount expended at the collieries for development, machinery, electrical hauling plant, boilers, pumping engines, boring, etc., less receipts in respect of coal sales. The directors were convinced it would not be in the interests of the business to set out at the present time the results of the mining operations in the profit and loss account.

With regard to the profit and loss account, on the debtor side, item £25,288 for London expenditure was somewhat larger than that for the previous eighteen months. This increased item included law costs and expenses in connection with the reconciliation of the share rights—expenses in regard to the splitting of the ordinary shares, fees to three additional directors, salaries of the two managing directors, and an amount of nearly £1,500 in respect of depreciation of the investment of £35,000 in Consols. The China expenditure item, £10,781, was less than the expenditure for the previous eighteen months. This was accounted for mainly by differences in exchange and final payment in respect of expenses in North Shansi. He also wished to draw attention to the payment to Messrs. Pearson of £40,000 and the costs of the arbitration award. The disagreement with Messrs. Pearson dated from some years past. Their claim was finally submitted to arbitration, and the board had no option but to pay the award. The directors hoped to have been able to report having obtained a reduction in the freight on coal on the Chinese railways; but, although their claim had been admitted in principle, the actual scale of reduction had not yet been agreed to. While on this subject he would like to correct a statement that he made last year. He then mentioned what he believed to be a general reduction of the railway rates, relying upon information that had been just received by telegraph. On further information it was subsequently learned that the reduction applied only to a special consignment of coal to Tientsin, and was not applicable to rates of freight generally.

The directors regretted that they were unable to recommend the distribution of a dividend. They felt that it would be impolitic to do so until the business of the Pekin Syndicate was still more firmly established upon a solid basis and regular and continuing dividends could be foreseen. They had yet to husband their resources until they could ascertain the amount of capital requisite to complete the equipment of the company and bring it to a dividend-paying stage. He was, however, justified in adding that, so far as it was humanly possible to look forward, there was every reason to hope and believe that the dividend-paying stage was now within view. Moreover, notwithstanding delays and stumbling blocks, it was satisfactory to feel that the Pekin Syndicate stood to-day in a stronger position than ever before in its history, and must eventually be the great success anticipated for it. With the certainty of a huge output of coal—indeed, the whole property was a gigantic coalfield—with the certainty of a sale proportionate to the output, with the knowledge that the Honan coal was considered equal in quality to the finest Welsh coal, one need not have any fear for the final success of the company's operations. In addition to the many outlets for the sale of the coal, trials of it were taking place in war vessels, and they might surely hope that these trials would be successful, in view of the fact that their coal had the one great advantage of being practically smokeless.

As to the existing state of politics in the Far East, the board considered that the present political upset in China should give no cause for any lasting anxiety on the part of shareholders. Whatever might be the outcome of the struggle, whatever might be the new régime under which in the future they might have to work, the board believed that China would strictly adhere to, and carry out, all existing contracts made by its Government with the foreigner. The board had implicit confidence that they would find their contract with the Chinese Government faithfully and honourably carried out, both in the spirit and in the letter, whatever might be the form of Government within that Empire. It was true that temporarily the existing trouble interfered with their coal sales, inasmuch as the goods traffic was suspended on the railways; but the Pekin

Syndicate's property had not been molested, and the rising was in no sense aimed against foreigners. At the close of last year two of the directors, with powers of managing directors, paid a prolonged visit to China, and to these gentlemen for their unremitting labours and for their efforts to place everything on a business footing, the thanks of the shareholders were very justly due. He moved:—"That the directors' report, dated October 24, 1911, and accounts made up to June 30, 1911, be, and the same are hereby, approved and adopted."

Mr. LIBERT OURY seconded the motion, and it was carried unanimously.

On the motion of Mr. H. T. ANSTRUTHER, seconded by COMTE DE LEGUIER, the Chairman and M. René de Cérenville were re-elected directors.

The SECRETARY, on the request of the Chairman, read the following telegram just received as to the Syndicate's output of coal:—"Total output for the month of October, 35,000 tons; sales, 41,000 tons. Situation unchanged."

This closed the proceedings.

ROHILKUND AND KUMAON RAILWAY.

The accounts for the half-year ended June 30, 1911, showed that the total capital outlay on the whole system amounted to Rs.324,57,408, inclusive of stores. The net earnings of the whole system for the half-year amount to Rs.10,60,945, against Rs.10,33,246 for the corresponding half of 1910. The company's share is Rs.4,44,467, brought home at the rate of 1s. 4d., against Rs.4,14,001 at the same rate in 1910. After bringing forward the balance from last half-year, £8,405, providing for interest on debenture and preference stocks, contribution to provident fund, and making other adjustments, including £2,000 set aside on account of the Secretary of State's share of surplus profits, the amount available for dividend is £25,495. The board recommends a dividend of £3 per cent. together with a bonus of 10s. per cent. on the ordinary capital of £400,000 for the half-year, free of Indian, but subject to English, income tax, leaving £12,311 to be carried forward.

The percentage of working expenses to gross earnings during the half-year has been 43.66 per cent., as compared with 39.13 per cent. in the first half of 1910.

The capital account of the original line shows an expenditure of £240,281, the outlay of the half-year having been £437 incurred on new rolling stock. On the company's extensions the capital expenditure has been £830,857, of which £32,792 has been spent during the half-year on the Pilibhit-Shahjahanpur branch. The total capital expenditure on the company's lines has thus been £1,071,138 to June 30, 1911. On the Lucknow-Bareilly State Railway the expenditure during the half-year, exclusive of suspense account, was Rs.8,70,215, and was incurred chiefly on new extensions, conversion of Dudwa branch, the Sardah bridge and rolling stock. Rs.305 were credited to State funds, and Rs.8,70,011 were provided from funds raised by the company under the agreement for that purpose. The total capital expenditure on the Lucknow-Bareilly State Railway, exclusive of suspense, has been Rs.161,01,393 or at 15Rs. per £, £1,073,426. The net earnings of the Powayan steam tramway for the half-year were Rs.20,947 against Rs.20,578 during the first half of 1910. Debentures for £115,000, forming part of the £147,000 issued by the company at 3½ per cent. for use on the State line and guaranteed by the Secretary of State, matured on July 1 last, £75,000 have been renewed for four years at 3½ per cent. from that date, and £40,000 have been paid off out of funds provided by the Secretary of State for India and standing to his credit in the general balance sheet on June 30.

ARGENTINE GREAT WESTERN RAILWAY.

The capital account shows an expenditure in the Argentine Republic during the year ended June 30, 1911, of £481,036, of which £167,219 was on permanent way, rolling stock, locomotives, etc., £3,250 on Rivadavia loop line, £3,793 on Lujan loop line, £4,402 on the Caucete branch, £123,683 on the San Rafael to Buena Esperanza branch, £68,214 on the Lujan to San Carlos branch, £52,116 on the Guadales to Victoria and Toay branch, £19,366 on the San Juan loop line, £9,432 on the Caucete to Albardon branch, £51,064 on the San Juan to Marquesado branch, and £7,251 additional cost of Andine Railway; less credits of £656 Monte Coman to San Rafael branch, and £28,098 special studies—together £28,754. The total expenditure to June 30, 1911, amounted to £11,650,659, whilst the receipts were £11,250,000—viz., first debenture stock, £1,700,000; second debenture stock, £1,700,000 5 per cent. debenture stock, £3,600,000; 5 per cent. preferred stock, £2,125,000; ordinary stock, £2,125,000.

Under the working agreement this company has received from the Buenos Ayres and Pacific Railway Company and has duly distributed a sum of £415,725, as follows:—Interest on first debenture stock, £68,000; interest on second debenture stock, £68,000; interest on 5 per cent. debenture stock, £173,475; and interim dividend on preferred and ordinary stocks, £106,250. The Buenos Ayres and Pacific Railway Company, having paid 5 per cent. for the year ended June 30 last on its first and second preference stocks has, in accordance with the working agreement, paid to this company the sum of £106,250, with which amount the directors propose to pay a balance dividend of 2½ per cent. on the preferred and ordinary stocks making, with the above-mentioned interim dividend, 5 per cent. for the year on both stocks. The gross receipts for the year have amounted to £1,074,092, as compared with £1,003,079 in the preceding year, showing an increase of £71,013, which is equivalent to 7.08 per cent.

The number of passengers carried during the year was 2,938,759 (against 2,552,447); the total goods and live stock carried (exclusive of company's capital and revenue material) 1,201,856 tons (against 1,006,437), the train mileage, 2,149,721 (against 1,723,302); the receipts per train mile, 10s. (against 11s. 7½d.); the length of the line worked, 814, as against 666.

The report states:—"In December last, 128 miles of the Guadales to Buena Esperanza branch were opened to service. A line to the new cargo station at Mendoza and some small adjustments account for 5 miles, making a total of 867 miles open at June 30, 1911. A concession has been granted by the Argentine Congress for a loop line from Espejo to Palmira of about 50 miles. The National Government sanctioned a law on October 6, 1909, for the issue of irrigation bonds, carrying interest at 5 per cent. per annum and 1 per cent. amortization, for the purpose of providing funds for the construction of irrigation works in various parts of the Republic. In accordance with the law this company may be asked to undertake certain works for account of the Government, and to this end the Memorandum of Association needs alteration. A resolution will, therefore, be submitted at the forthcoming meeting, and, if approved, will be submitted for confirmation at an extraordinary general meeting to be held on Tuesday, November 28, 1911."

SALVADOR RAILWAY.

The report for the year ended June 30th, 1911, states that the gross receipts, including the subsidy paid by the Government of Salvador and the receipts of the steamship service, amount to £135,876, against £120,780 in the preceding year. The total expenses were £57,430, against £51,081, the proportion to receipts working out at 50.49 per cent., against 51.81 during the corresponding period. The number of passengers carried was 21,300 more than in 1909-10, the receipts showing an increase of £4,496, or 2½d. per head on the total number of passengers carried. Although there was a decrease of 2,910 tons in the volume of goods transported over the system, mainly attributable to a shortage of the sugar and coffee crops, the receipts show an increase of 4s. 7d. per ton. The political condition of the country has been a normal one, and exchange during the year under review has been favourable, the accounts now presented being taken at a premium of 143 per cent. as compared with 170 per cent. last year. The company's steamship service operating on the Pacific Coast between Salina Cruz, the port terminal of the Tehuantepec National Railway and Corinto in Nicaragua, and serving the Republics of Salvador, Mexico, Guatemala, Honduras and Nicaragua, has been successfully maintained, realising a profit of £6,056. The net receipts during the year, after providing interest and amortisation on both classes of debentures, and interest on the terminable notes, show a surplus of £23,464 (including £1,065 brought in from the last accounts), against £8,565 last year. After writing off £6,058, being two years' proportion of the cost of issuing the terminable notes, a sum of £1,000 has been placed to general reserve, £1,500 to renewals of plant reserve, and a further sum of £2,000 has been carried to exchange reserve account. Out of the remaining amount of £12,906 the directors recommend the payment of a dividend of 4 per cent.—namely, 8s. per share upon the preference shares, which will absorb £10,000, leaving a balance of £2,906 to be carried forward to the credit of net revenue account. Prior lien debentures amounting to £3,900 and mortgage debentures to £11,000 were redeemed during the year, making the total amortisation £77,100 to date of the accounts. The payment by the Government of Salvador of the railway and steamship subsidies have been punctually made. Two vacancies were created on the board since the last report, the first by the much regretted death of Mr. Walter Murray Guthrie and the second by the resig-

of Mr. Charles Tallent Spencer, who has accepted the post of general manager of the company's property in Salvador. These vacancies have been filled by the election of Mr. George Todd Symons and Mr. Robert Henry McCarthy. The expansion of the company's business and the development of the steamship service have largely increased the call on the time and personal attention of the directors. It is therefore proposed to give effect to the suggestion made by the shareholders as long ago as 1907, and to increase the fixed remuneration of the board by £650 per annum, and a resolution for this purpose will be submitted to the meeting.

PARAGUAY CENTRAL RAILWAY.

The accounts for the year ended June 30, 1911, show the receipts to have been as follows:—

	1910-11.	1909-10.
Passengers	£44,777	£34,139
Parcels	1,048	4,189
Goods	62,082	51,839
Miscellaneous	7,015	9,904
Total receipts	£120,022	£97,125
Working expenses	98,001	48,789
Net receipts	£51,421	£48,330

The percentage of working expenses was 57.16 compared with 50.23 in the previous year. To the above sum of £51,421 there have to be added transfer fees and general interest amounting to £1,991, making a total of £53,412. From this there have to be deducted interest on prior lien debenture stock, income tax and loss on exchange, amounting together to £32,758, leaving a balance of £20,354, which it is proposed to place to renewal account.

The report states:—"In view of the need of placing the line in a position to take full advantage of the international traffic, which will develop on the completion of the through route by the train ferry between Posadas and Encarnacion, the board is satisfied that it is in the general interest of the company and in the particular interest of the 5 per cent. debenture stock holders to allocate the £20,354 to renewal account in order to strengthen the financial position of the company by retaining in the undertaking all available funds. The disposal of the old rolling stock, although a highly satisfactory transaction for the company, has made it necessary in this year's accounts to charge the accumulated depreciation thereon to renewal account, with the result that the renewal account appears in the balance sheet as a debit of £31,880. The extension to Encarnacion was opened for public traffic on July 1—sections of it having been opened at different dates during the year. The whole of the new locomotives, wagons and coaches of standard gauge had already been received and re-erected in the workshops of the company in Paraguay. The change of gauge was effected in sections, and the new equipment brought into operation as each section was completed. The whole transformation—change of track from broad to standard gauge and replacement of the old by the new locomotives and rolling stock—was made with but slight dislocation of traffic. The company thus starts from July 1, 1911, with a standard gauge line and new equipment. The Argentine North Eastern Railway Company had, previous to July 1, laid their rails through to Posadas, and from that date through bookings were made from Buenos Aires to Asuncion. The train ferry—establishing physical connection between the two termini—will not, however, be in operation till 1912—early in the year it is hoped. Meantime passengers and goods are transferred by a steamer across the river from Posadas to Encarnacion. At meetings of the shareholders and five per cent. debenture stock holders held in July of the present year a new capital issue was authorised for the construction of two extensions as feeder lines, respectively east and west of the main line, and also to meet any balance due on change of gauge and through route account. The new issue is in six per cent. notes to an amount not exceeding £500,000, payable on August 1, 1914, constituting both as to capital and interest a charge in priority to the charge created by the five per cent. debenture stock trust deed. The interest payable on the notes issued for the purpose of defraying the cost of constructing and equipping the new branches will be charged to capital account. But on any part of the proceeds of the notes spent in completion of the change of gauge and other works on the main line necessitated for the efficiency of the through route to Buenos Aires, interest will in each year be deducted from the net earnings of the company of that year. By the time the notes fall due the new branches should be bringing in remunerative traffic, and the directors are advised that in all

probability they will be able to place a permanent debenture stock in three years' time on better terms than they could now, hence their reason for proposing to raise the money for a short period. The eastward extension will leave the main line south of Villa Rica, and will run through heavily-timbered country, which it is believed will give the company remunerative traffic, as soon as the first section is completed. The survey of this is approaching completion, on which construction will at once be commenced. This line will be extended in the same direction, as traffic warrants, with a view of eventually connecting with the Brazilian railways. The board record with great regret the death of Mr. William Lauber, who, since the early days of the company, had been its secretary, and since 1908 a director of the company. Mr. Julian Lauber, who had previously been assistant-secretary, has been appointed secretary. Mr. S. F. Mondl has been elected to the board in place of the late Mr. William Lauber."

THE INTEROCEANIC RAILWAY OF MEXICO.

The capital account to June 30, 1911, shows an expenditure of £7,072,828, whilst the receipts have been £7,015,375—viz., ordinary shares, £1,700,000; 5 per cent. first preference stock, £1,400,000; 4 per cent. second preference stock, £1,000,000; 7 per cent. B debenture stock, £400,450; 4½ per cent. second debenture stock, £1,150,000; 4 per cent. debenture stock, £1,150,000; amount received on account of subventions, £40,023; and from sale of properties and business at Vera Cruz, £99,203.

The accounts now submitted include the results of the operation of the Mexican Southern and Mexican Eastern Railways for the 12 months ended June 30, 1911, but the comparative figure given for the twelve months ended June 30, 1910, include those of the Southern for six months only, that line not having been taken over on lease by this company until January 1, 1910. The working results compare as follows:—

	1910-11.	1909-10.
Gross receipts	\$8,804,282	\$7,087,208
Working expenses	5,079,351	5,043,184
Net profit	\$3,187,931	\$2,044,114
Net profit in sterling	£326,821	£300,012

To this sum of £326,821 must be added balance from last year, £7,600; transfer fees, £201; interest received, £3,023; and amount transferred from special reserve fund, £5,540; making the total net revenue £343,254. From this is deducted rent of Mexican Eastern Railway, £20,000; rent of Mexican Southern Railway, £72,022; interest on 4 per cent. debenture stock, £46,000; interest on 4½ per cent. second debenture stock, £52,312; interim payment of 3½ per cent. on 7 per cent. B debenture stock, £16,431; interim dividend of 2½ per cent. on the first preference stock, £35,000; one-half of balance of consideration paid for granting the Mexican Southern lease, and of expenses in connection therewith, £9,458; total, £251,823; leaving a balance of £91,431, which will enable the payment of £3 10s. per cent., less income tax, on the 7 per cent. B debenture stock, making, with the interim payment made on May 30 last, £7 per cent. for the year, £2 10s. per cent. less income tax on the first preference stock, making, with the interim payment made on May 30 last, £5 per cent. for the year; and the payment of a dividend of £4 per cent. less income tax, on the second preference stock.

The number of passengers carried during the year was 2,385,203 (against 1,055,880); the quantity of goods carried, 974,166 tons (against 943,791 tons); the train mileage, 2,496,766 (against 2,257,355); the receipts per train mile, \$3.55 (against \$3.54); the expenses per train mile, \$2.27 (against \$2.23); the profit per train mile, \$1.28 (against \$1.31); the ratio of working expenses to receipts, 64.04 per cent. (against 63.14 per cent.); the length of the line worked, 1,033 miles, as compared with 878.

The report states:—"The business of the company suffered through the political disturbances in Mexico which commenced towards the end of the year 1910: certain sections of the line had to be closed for some time, and there was a considerable falling off in the volume of traffic through the Port of Vera Cruz. During the disturbances some damage was caused to the company's property, to repair which an expenditure of \$101,015 has been incurred. Of that amount \$42,200 is included in the expenses of the year under review, and the balance—viz., \$58,755—was charged out during the months July to September of the current year. Claims have been made upon the Government for reimbursement of this amount, and for loss occasioned by reason of the suspension of traffic. The management expect that these claims will shortly be recognised by the Government. Prospects for the current year are

reported to be favourable, the coming crops throughout the territory served by the railway being in excellent condition. In January last arrangements were entered into for the supply of oil fuel for locomotives, and already about one-half of the total number of locomotives have been converted from coal burning to oil burning. The remainder are being converted as quickly as possible, and considerable economy in locomotive expenses will result when the conversion has been completed. The net receipts of the Mexican Southern Railway for the twelve months amounted to £47,918, the rental payable for the period being £72,621, a difference of £24,703. The political disturbances already referred to adversely affected earnings and caused an increase in expenditure.

With regard to this difference, the directors would again remind the proprietors that a loss on the working of the Mexican Southern Railway during the early years of the lease was not only anticipated when the line was taken over, but a special reserve fund was set aside to meet it. Towards this difference a sum of £5,539 has been transferred from the fund. The Interceanic system, however, benefited to a considerable extent by the traffic received from the Mexican Southern Railway, which would have been lost had the line been under other control. The use of oil fuel has necessitated the provision of a number of oil storage tanks and pumping plants at various points along the line. The amount so far spent in this connection—viz., £13,750—is included in the item of "capital expenditure in suspense" appearing in the balance-sheet, and the balance will have to be provided during the current year.

After debiting the expenditure incurred during the year, the capital account was at June 30 last overdrawn to the extent of £57,452. To make good this deficiency and provide for further expenditure the directors have, since the date of the closing of the accounts, disposed of the balance—viz., £150,000—of $\frac{1}{2}$ per cent. second debenture stock. The directors record with much regret the death of their colleague the Hon. Chandos S. Stanhope, which occurred on March 9 last: Mr. Stanhope had occupied a seat on the board for nearly fifteen years, during which time he rendered the company many valuable services. It is not proposed to fill the vacancy."

Lancashire Wagon Company.—The half-yearly meeting was held at Bury on Monday, when a dividend at the rate of 5 per cent. per annum on the preference shares was sanctioned, £3,225 added to the reserve fund, and £3,225 carried forward.

Mexican Eastern Railway.—The annual report states that as the company's railway is worked and managed by the Inter-oceanic Railway of Mexico (Acapulco to Vera Cruz), Ltd., under a lease dated December 7, 1903, separate accounts of its operation are not issued. The results of working for the twelve months ended June 30, 1911, are reported by the Inter-oceanic Railway to be as under:—Gross receipts, \$856,398; working expenses, \$553,443; net receipts, \$302,955, or in sterling, £31,010. Ratio of expenditure, 64.62 per cent.

Algeciras (Gibraltar) Railway.—The report for the year ended June 30th, 1911, shows a net profit on working of £21,118, to which has to be added the balance brought forward, £1,227, and difference in exchange and interest, £1,486, making a total of £23,831. After deducting interest on prior lien bonds, £7,500; reserve for the Spanish Government taxes, including stamp tax, £2,100; provision for rolling stock and ferry boat on order, £5,500, and income-tax, £124, the dispersable balance is £8,607. Out of this sum the directors propose to pay 3 per cent. on the £250,000 six per cent. mortgage debentures. This will absorb £7,500, leaving £1,107 to be carried forward.

Rio Claro Sao Paulo Railway.—A report has been issued by the shareholders' committee appointed to consider a scheme submitted by the directors of the company for extending the powers of the company, rearranging, increasing and converting the capital. The committee concur in the following recommendations by the directors—namely, the conversion of each existing £10 ordinary share into 27 preferred shares of £1 each, bearing 5 per cent. cumulative interest and preferential as to capital; the creation and issue of 125,000 deferred shares of £1 each; the expansion of the company's powers of investment and the change of the company's name; but they recommend that the Paulista bonds shall not be realised without being first offered to the shareholders. They do not recommend any further alterations. The directors on their part state that they are prepared to meet the views of the committee as regards any proposal for rearrangement of the conditions of the existing debenture stock, and they propose to embody in the Bill a provision that the Paulista bonds shall not be realised without the sanction of the company in general meeting, and also for the provision, subject to the sanction of the company in general meeting, of a special remuneration for the board in substitution

of all claims to participate in the balance of the £25,000 earmarked in 1892 as compensation to the staff and directors. A meeting of the company will be held on November 20 for the purpose of sanctioning the promotion of a Bill in Parliament.

Midland Uruguay Railway.—Sir W. Lawrence Young, presiding at the ordinary general meeting at 71, Finsbury Pavement, London, on Wednesday, said that for the first time in the history of the railway the gross receipts had amounted to six figures, having reached £100,192, against £88,661 in the previous year. They were able to complete the second section of the extension to Fray Bentos in February, and in doing so secured the carriage of animals for the operations of Messrs. Liebeg's factory at that place. As to the prospects for the current year the reports were favourable, and in spite of the severe drought experienced last season, they might, having regard to their increased mileage, reasonably look for an advance on the figures of last year. The country generally was in a very prosperous condition, the value of lands continued to advance, with the result that a greater stimulus was given to agriculture and the improvement of animals, which should tend to benefit the railway. They were making every effort to develop the port of Fray Bentos, and had already arranged for two steamers from this country to take cargo to that port direct. In the neighbouring State of Rio Grande do Sul there were also signs of development. There was the probability that a bridge would be constructed to connect the North-Western of Uruguay and the Brazil Great Southern systems, which should assist in dealing with the increasing traffic from the latter line. At the last meeting he mentioned the company had obtained a guaranteed concession for a further extension of its line from the station of Tres-Arboles to Piedra Sola. That line had now been definitely surveyed, and the plans approved by the Government. The report was adopted.

North Western of Uruguay Railway.—The thirtieth ordinary general meeting was held on Tuesday, at River Plate House, Finsbury Circus, London. Mr. Arthur Holland, who presided, said that the traffic receipts showed a net increase over the previous year of £5,164. The receipts for 1910 were the greatest since the railway was started, and now they had more than £5,000 above that record. The actual traffic receipts by themselves showed an increase of £6,200. He had no doubt that the traffic would be maintained, because in the year under review there had been much drought, which had produced great mortality among cattle. The passengers had increased in number by 7 per cent., and the goods in weight by 10 per cent. The expenses had increased by £2,873, and the ratio of expenses to receipts was less than 70 per cent., which was the lowest that the company had ever had. In a little more than two years they hoped to have finished the relaying of the line with new hardwood sleepers, and after that there ought to be a saving of about £4,000 a year in maintenance. The renewals of rails was now complete, and the permanent way was in a condition much superior to what it had ever been before. There was a total available balance of £43,422, and after paying debenture interest, etc., a sum of £16,555 was left, out of which it was recommended that a dividend at the rate of 3 per cent., less income tax, be paid. That was the highest dividend this company had ever paid, except in 1890, when $3\frac{1}{2}$ per cent. was paid, but in those days they had the full Government guarantee of 7 per cent., which came down in 1892 to $3\frac{1}{2}$ per cent. The prospects of the company were to be considered on the up grade. He moved the adoption of the report, and this was seconded by Sir R. Edgcumbe, and carried unanimously.

Equipment of the Grand Trunk Pacific.—The Grand Trunk Pacific are in receipt of a letter from a prominent traveller in Eastern Canada, who has just returned from a trip to the West, which included a journey on the Grand Trunk Pacific from Winnipeg to Wainwright and return. He states: "I must say it was one of the most pleasant experiences in a long life of travel. Having seen the road in the making, and being aware of the high standard set up, I was prepared for a good roadbed, and was not disappointed, for we rode as smoothly as between Montreal and Toronto. The sleeping cars are models of comfort, and the service on them, as well as the dining cars, couldn't be better. The Grand Trunk are setting the pace for general excellence in Western Canada." Before leaving Canada, Mr. Hamar Greenwood, M.P., wrote to the Grand Trunk Railway System, in connection with his trip over their lines in Canada: "We especially enjoyed the journey from Edmonton to Winnipeg, which we made on your system in the best equipped train I ever saw in my life. You have fixed a very high standard, if this train is the standard up to which you are working."

LONDON ELECTRIC RAILWAY EQUIPMENT ARBITRATION.

The Court of Appeal, composed of Lords Justice Vaughan Williams, Buckley, and Kennedy, on Tuesday began the hearing of the Appeal by the British Westinghouse Electric and Manufacturing Company, Limited, from the refusal of the Divisional Court (Mr. Justice Pickford and Mr. Justice Lush) to set aside an award of an arbitrator, whereby plaintiffs' claim for about £80,000 in respect of the balance of the price of certain machinery was dismissed, and the defendants' counter-claim for damages for alleged breach of contract was allowed to the extent of about £20,000.

In the arbitration proceedings the Westinghouse Company claimed the balance of the purchase price, and the railway company counterclaimed for damages for breach of contract. In the course of the hearing the arbitrator stated a special case, which came before a Divisional Court presided over by the Lord Chief Justice. That court ruled that as the substitution of the Parsons' machines went in mitigation of the damages consequent upon breach of contract, the railway company were entitled to recover from the Westinghouse Company the price paid for the Parsons' machines, and none the less so because the Parsons' machines were so superior to those of the Westinghouse Company that it would have been to the pecuniary advantage of the railway company to have effected the substitution at their own cost.

The arbitrator subsequently made his award, under which the railway company succeeded to the amount of between £100,000 and £120,000. The Westinghouse Company applied to the Divisional Court, composed of Mr. Justice Pickford and Mr. Justice Lush, to have the award set aside on the ground that the damages were assessed on a wrong basis in law, but the application was dismissed. They now appealed to this court.

On Wednesday, Mr. Fitzgerald, K.C., for the railway company, took the preliminary objection that the arbitrator, having acted or purported to act in accordance with the advice given by the Divisional Court, presided over by the Lord Chief Justice, his award was not open to review.

Sir A. Cripps contended that if it was made clear to the court that the arbitrator had gone wrong in law—and that he had done so appeared on the face of the award itself—the court could interfere. Counsel also relied on the fact that the special case and the answers of the first Divisional Court were incorporated in the final award.

Lord Justice Vaughan Williams said that there was so much to be said on both sides on the preliminary point that the court thought it advisable to consider the law relating to it before giving their decision.

Mr. Fitzgerald addressed the court on the merits of the case, contending that the advice given to the arbitrator by the first Divisional Court rightly indicated the true measure of damages, and that the arbitrator, when giving his final award, had acted in accordance with the advice so given.

On Thursday the arguments were concluded, and the Court reserved judgment.

BANK RETURN.

The return of the Bank of England for the week ended Wednesday, November 8, compared with that for the previous week, shows the following changes:—

PERSONAL.

Mr. Oliver Bury, general manager of the Great Northern Railway, was on Tuesday elected chairman of the general managers conference of the Railway Clearing House.

Mr. Joseph Tatlow, Midland Great Western Railway, has been elected a director of the Dublin and Kingstown Railway, to fill the vacancy caused by the death of the late Mr. T. P. Hogg.

Mr. George Arnold, London District Superintendent of the Midland Railway, has been presented by his colleagues and members of his staff with a canteen of silver and tea and coffee service on his retirement after forty-six years' service.

Mr. T. Tod, son of Mr. J. Tod, the principal of Cardiff Engineering Academy, left England for Buenos Ayres on November 9 to take up an appointment as superintendent engineer under the London-Tilbury Dredging Co. at Port Argentine.

Mr. O. Hawkins, sectional traffic inspector on the Buenos Ayres Great Southern Railway, has been fatally shot by an employee whom he had occasion to admonish. Mr. Hawkins had been twenty years with the company, and was highly respected.

Mr. A. W. U. Pope, general manager of the Shanghai-Nanking Railway, has been appointed honorary adviser to the Chinese Board of Communications in the matter of the railways. This Board is the Ministry of Railways, at the head of which is Sheng Hsuan-huai, who has provoked animosity by his policy of absorbing the provincial lines with a view to a grand main-line scheme.

BOOK NOTICE.

THE NATIONALISATION OF RAILWAYS.* Mr. Edwin A. Pratt is an adept at seizing the psychological moment. In August, 1907, after the settlement, as it was hoped, of the railway unrest for a term of years, he issued what has been recognised as a text-book on the subject of the Nationalisation of the railways in the United Kingdom. Mr. Pratt has re-issued the work at a time when the dislocation of traffic under present conditions has turned the attention of all sorts and conditions of men to the burning question now under discussion both in Parliament and in the press. That the strikes and the taking over of all railways by the State are intimately connected is evidenced in many ways, and especially by the programme of the Independent Labour Party as announced by the chairman. The author has added a prefatory note to the present edition, in which he points out that in the light of the recent attempt to bring about a general railway strike, the matters dealt with in the chapters on "State Railways and Labour" should be of special interest at the present moment, and that the facts given in reference to "A Wages Strike in Hungary," "A 'sympathy' Strike in Holland," and "Labour v. Government in Victoria," might be commended to the attention of the British public in general and to that of railway nationalisation advocates in particular, especially if studied in conjunction with the Board of Trade Reports on "Continental Railway Investigations." The result of the strikes in Holland has been that last month in the report of a special commission appointed by the Dutch Government is recorded a resolution that State management is undesirable, that management by a single company is preferable. Mr. Pratt also corrects a general assumption that our Act of 1844 on the purchase of railways applies to any railways except those constructed under Acts passed in that year or subsequent thereto and not to those already existing amounting to 2,320½ miles of main line. The author is sanguine that the Government undertaking to bring forward legislation next year authorising a general increase of charges by the railway companies will offer a practical means of meeting certain difficulties and that the conclusions of the Departmental Commission on Railway Agreements and Amalgamations will have a similar tendency. In an appendix the author gives some striking passages on "Government Purchase of Railways" from the report of the Royal Commission of 1865. Mr. Pratt gives his readers "the fullest opportunity of considering the whole subject in the light, not simply of theory or assumption but of actual conditions at home, and of accomplished facts abroad."

*RAILWAYS AND NATIONALISATION, by Edwin A. Pratt. 455. xviii. pp. 7½ in. by 5 in. Price, 2s. 6d. net, cloth. (THE RAILWAY GAZETTE, London.)

Ottoman Railway from Smyrna to Aidin.—The section of the Egerdir Extension, twenty-two miles in length, was opened on November 1. The first section of the above, twenty miles in length, was opened on October 11, 1910.

RAILWAY NOTES.

To Remedy Congestion in Sydney.—Among the proposals by the New South Wales Government for the relief of the congestion at Circular Quay, Sydney, is a subway under the harbour to take railway traffic.

Light Railway Contract. Mr. James Dickson, St. Albans, was on Tuesday awarded a contract by the London County Council for the construction of a light railway connecting various parts of the Council's estate at Horton, Epsom, with the London and South Western Railway at Ewell. There were no fewer than 30 tenders, ranging in amount from £14,207 to £24,824. Mr. Dickson's price is £15,844.

Canadian Railways and Hotels.—Mr. C. M. Hays, President of the Grand Trunk Pacific Railway, states that the rails will be laid to the Rocky Mountains by the end of this year. A chain of first-class modern hotels will be established, including a large structure in Winnipeg, which will cost over \$1,000,000. The Canadian Pacific is building a palatial hotel at Calgary, similar to the Royal Alexandra at Winnipeg, and three others are nearing completion.

Employees' Records.—Mr. C. Evans, on taking up the duties of the post of Commissioner for Railways in Queensland, has destroyed all the history records of every employee, and issued new books, which are to be kept in the custody of the men. In a general order, the Commissioner draws attention to the space available for promotions and to the small portion of the page allotted for disbursements, fines, etc., and states that he will have great pleasure in making entries on the top portion, and will assist the staff all he possibly can to keep the lower portion of the page spotless. He is confident that the heads of branches will be equally in earnest in this direction.

Ludgate Hill Station.—The City of London Corporation has agreed to allow the London, Chatham and Dover Railway Company to erect shops at the ground level, with three floors above, on a portion of the forecourt of Ludgate Hill Station, in New Bridge Street, at present enclosed by railings. An area of about 296 yards will be thrown into the public way. The Corporation stipulated that the company should make adequate provision for vehicles entering or leaving the station, and that no claims be made in respect of the proposed building in the event of the Corporation requiring to widen the public way.

Steam Heating on the Great Eastern Railway.—The Great Eastern Railway Company have adopted steam heating for their main line rolling stock. Several trains have already been fitted with the necessary apparatus for this purpose, embracing those in the London, Doncaster, and York services; the down evening and up morning expresses between London and Cromer, Yarmouth, Lowestoft, and Clacton; several of the trains to and from Southend, including the 5.3 p.m. tea car and 12.0 night supper car trains, and the boat expresses between London and Harwich, and Harwich and York. Further trains will be equipped as rapidly as possible.

The L. and Y. Railway Company Gain an Appeal.—In the King's Bench Division on October 27 the case of Statham v. the Lancashire and Yorkshire Railway Company came before Justices Bankes and Lush on appeal by the company from a decision of Judge Greenhow, sitting at Wakefield, who gave judgment for the plaintiff, a miner, for £55 damages and costs, for injuries sustained by falling over luggage on the platform and striking his eye against the footboard of a carriage at Kirkgate Station. In support of the appeal, Mr. T. P. Perks contended that the leaving of a box on the platform in the ordinary course of business was not negligence. The appeal was allowed, but plaintiff was granted leave to appeal.

Liability for Loss of Goods at Sea.—The Great Central Railway Company were sued on November 2nd, before Mr. Justice Coleridge, without a jury, for £172 damages for the loss of linen goods sent by W. J. Jenkins and Co. to Switzerland on the company's steamer *Blackburn*, which was sunk in collision on December 7. In the Admiralty Court both ships were held to be in fault. The defendants, in consequence, admitted negligence, but said they were protected from liability by the bill of lading, which exempted them from liability for the negligence of the master or pilot. Plaintiffs replied that the terms of the bill of lading were unjust and unreasonable, that such terms were not signed by them, and that the Railway Act of 1854 was not complied with. Mr. Sankey, K.C., for the defendants, contended that the consignment note was signed by plaintiffs' agents at Grimsby, who were also defendants' agents there. Judgment was reserved.

Opening Up the Canadian Rocky Mountains.—The new territory in the Canadian Rocky Mountains that is being opened up by the Grand Trunk Pacific Railway has already become the resort of a number of Alpine climbers and those who love to explore mountain fastnesses that are practically unknown. Some of the travellers who have gone into this Yellow Head Pass territory are now returning, and one gentleman writes to the Grand Trunk Pacific headquarters as follows:—"Lake Maligne is a beautiful lake between sixteen and eighteen miles long. I have visited all along the other transcontinental lines both in Canada and the United States, and there is no lake or district along any of these lines that can compare with the Lake Maligne country. Some of the mountains around the lake are in the neighbourhood of 12,000 feet, and covered with ice fields, which make them very beautiful." Lake Maligne is reached from Henry House, a few miles west of Fitzhugh, the second divisional point, about 225 miles west of Edmonton. By next year the line will reach this territory.

The British Thomson-Houston Company, Ltd., have removed their Leeds office from Greek Street Chambers to Standard Buildings, City Square. The telephone number will be the same as hitherto—viz., 3244 Central.

The British Standard Brake Block

NOW UNIVERSALLY ADOPTED BY THE LEADING
RAILWAY COMPANIES.

WHY?

Because we cut down your present cost 40% to 60%.

THEREFORE

Shift the responsibility on to us.

Our Brake Shoes last $2\frac{1}{2}$ times the life of the ordinary
cast iron Block, with equal braking effect, and
slightly less wear on the wheel tyres.

By our new design and blending of metals the Shoe
can be completely worn out without danger.

One Shoe only, interchangeable and reversible for all
classes of Carriages, Wagons, Vans, etc.

Don't theorise: get the facts from the list of Railways
we now supply.

Our Representatives, with suitable samples for trial, are
at your command.

The Subscription List will close on or before Monday,
20th November, 1911.

UNITED STATES OF BRAZIL.

OFFER OF

**£2,000,000 SOROCABANA
RAILWAY COMPANY 4½ PER
CENT. FIRST DEBENTURES,**

Forming part of a total authorised issue of £4,000,000,

AT 86½ PER CENT.

Trustee for the Debenture-holders:
London County and Westminster Bank, Limited.

The Debentures will mature 1st October, 1961, and will be repayable by means of a Cumulative Sinking Fund, beginning in 1916, sufficient to redeem the Debentures at or before maturity. The Sinking Fund will be applied annually to the purchase of Debentures at or below par and accrued interest, or to drawing Debentures at par. The entire issue, or any part thereof, will also be redeemable at par on any interest date before maturity on three months' notice by the Company.

The Debentures will be issued to Bearer in denominations of £20, £100 and £200, with the privilege, at the holder's option, of registration as to principal at the Company's Office in London. Principal will be payable at the London County and Westminster Bank, Limited, London, and interest at the Bank of Scotland, London; principal and interest will also be payable in Amsterdam in Guilders at the fixed rate of exchange of F 12.06 to the £, and in Switzerland in Francs at the fixed rate of exchange of fs. 25.16 to the £.

Coupons will be payable 1st April and 1st October. Particulars of the security for the Debentures, and of the position and prospects of the Company, will be found in a letter, dated 15th November, 1911, from Mr. A. H. A. Knox-Little, the Chairman of the European Committee, printed in full in the full prospectus, extracts from which are given below.

Messrs. Speyer Brothers

offer the above Debentures for sale at the price of
86½ per cent., payable as follows:—

10	per cent.	on Application.
15	"	" Allotment.
30	"	" 11th December, 1911.
31½	"	" 9th January, 1912.
86½	per cent.	

Payment in full may be made under discount at the rate of 3 per cent. per annum on allotment, or on 11th December, 1911.

On payment of the instalment due on allotment, the allotment letters will be exchangeable for Speyer Brothers' Scrip Certificates to Bearer, carrying a coupon for £1 2s. 10d. per £100, payable 1st April, 1912, representing interest to that date on the amounts of the instalments. The Scrip Certificates, when fully paid, will be exchangeable, in due course, for definitive Debentures, carrying interest from 1st April, 1912.

The Debentures will also be offered in Amsterdam by Messrs. Teixeira de Mattos Brothers, and in Switzerland by the Swiss Bankverein and the Schweizerische Kreditanstalt.

(Extracts from letter from Mr. A. H. A. Knox-Little, the Chairman of the European Committee of the Sorocabana Railway Company, dated 15th November, 1911.)

The Share Capital of the Sorocabana Railway Company consists of 20,000 6 per Cent. Preferred Shares of \$100 each (25 per cent. paid) and 80,000 Ordinary Shares of \$100 each (fully paid), all of which, with the exception of 640 Ordinary Shares, are held by the Brazil Railway Company.

The total authorised Debenture Capital of the Company will, when arrangements referred to below have been carried out, consist of £4,000,000 4½ per Cent. First Debentures, of which it is not intended at present to issue more than £3,017,500, including £2,000,000 to be offered in your prospectus. The remaining £982,500 can only be issued for improvements, betterments, or additions on existing lines or for further assets.

The Debentures are to be secured under a Trust Deed in favour of the London County and Westminster Bank, Limited, as Trustee for the Debenture-holders, upon *inter alia*:—

(a) The lease from the State of San Paulo of the Sorocabana Railway and the full benefit thereof so far as relates to lines now constructed.

(b) All the interest of the Company in all lines of railway, not included in the preceding clause, which may hereafter be acquired by the Company, whether wholly or partly with the Debentures or their proceeds.

(c) The full benefit of the contract of lease from

the Company to the Brazil Railway Company, so far as it relates to the property referred to in Clauses (a) and (b) above, and to any payments which the Brazil Railway Company may thereby be bound to make for making good any deficiency in the service of the Debentures.

(d) 20,087 fully paid Shares of 200\$000 (two hundred milreis) each in the Paulista Railway Company, 5,335 (out of a total of 6,000) fully paid 6 per Cent. Preferred Shares of \$500 each, and, as and when available, 4,711 (out of a total of 14,000) fully paid Ordinary Shares of \$500 each of the Compagnie du Port de Rio de Janeiro, 6,106 (out of a total of 58,655) Preference Shares of \$500 each, and 1,345 (out of a total of 22,000) Dividend Shares, and 115 (out of a total of 1,345) Jouissance Shares of the Cie Auxiliaire des Chemins de fer au Brésil, 14,000 (out of a total of 50,000) fully paid Ordinary Shares of the Cie des Chemins de fer Sud-ouest Brésiliens, and 1,250 (out of a total of 2,500) fully paid Shares of 200\$000 (two hundred milreis) each of the San Paulo Hotels Company, and also all other shares, bonds, and securities hereafter acquired by the Company, whether wholly or partly with the Debentures or their proceeds.

The Sorocabana Railway forms part of the system controlled and operated by the Brazil Railway Company. The Sorocabana Railway consists of 813 miles in operation and 265 miles of lines under construction and to be constructed.

The Railway belongs to and is held under a lease from the State of San Paulo, for 60 years, expiring 1st July, 1967, subject to the annual payment as rent to the State of (a) a sum equal to the amount now required for the service of the debt, amounting to £3,800,000, of the State of San Paulo, having a first mortgage on the greater part of the Railway; (b) interest at 6 per cent. per annum on the capital expended by the State on extensions and improvements, and (c) 25 per cent. of the net revenue remaining after deducting the above amounts and crediting certain sums to the Company, including 6 per cent. on its capital expenditure recognised by the State.

The Government has the right to rescind the lease after 1st July, 1937, on payment by way of indemnity of an amount in the Public Funds of the State sufficient to produce a revenue equal to the average net revenue of the Company derived from the Railway during the five most profitable years of the preceding seven years of working. On rescinding the lease the Government assumes the responsibility of paying for the then acknowledged capital of the lessee.

Since 1st January, 1909, the Railway has been operated by the Brazil Railway Company by virtue of a lease from the Sorocabana Railway Company, under the terms of which the Brazil Railway Company takes the whole earnings of the line and undertakes to pay (*inter alia*) all sums payable by the Sorocabana Railway Company under the lease from the State and also the sum necessary, after taking into account the income of the Sorocabana Railway Company derived from sources other than the lease, to pay the principal, interest and sinking fund payments of all Debentures issued by the Sorocabana Railway Company with the consent of the Brazil Railway Company. Such consent has been given to the present authorised issue. The Brazil Railway Company also undertakes to pay an amount sufficient to enable the Sorocabana Railway Company to pay the full dividend of 6 per cent. per annum on its Preferred Shares as well as a dividend on its Ordinary Shares on a rising scale with a minimum of 3 per cent. per annum.

For the first nine months of this year the gross and net earnings of the Sorocabana Railway show an increase over the same period of last year of £41,790 and £39,786 respectively. I estimate the net earnings for the whole year at ... £540,000

On this basis the amount payable as rent to the State of San Paulo will be ... 340,000

Leaving a balance of ... £200,000

Add one year's interest and dividends on investments less administration expenses ... *45,000

Estimated total income available for the service of the 4½ per Cent. First Debentures ... £245,000

The annual charge for interest on the £3,017,500 4½ per Cent. First Debentures is under ... 136,000

Leaving a surplus of over ... £109,000

*This does not include any revenue from the assets to be acquired with more than half the proceeds of the Debentures to be issued under your prospectus.

The surplus revenue of the Brazil Railway Company after payment of all expenses and Bond and other interest charges was:—

In 1909	...	£95,000
In 1910	...	£257,000

Prospectuses containing a map of the system and forms of application can be obtained from Messrs. Speyer Brothers, 7, Lothbury, London, E.C., from the Bank of Scotland, 30, Bishopsgate, E.C., the Company's Bankers, or from Messrs. Kiteat and Aitken, 9, Bishopsgate, E.C., the Company's Brokers.

A draft, subject to revision, of the Trust Deed to secure the Debentures and copies of the two leases above referred to can be seen during the usual business hours, while the list is open, at the

office of Messrs. Bircham and Co., 50, Old Broad Street, E.C., or at that of Messrs. Surtees, Philipotts and Co., 6, St. Helen's Place, E.C.

Application may be made on the form printed below and forwarded with the necessary remittance to Messrs. Speyer Brothers.

Non-payment of any instalment at the due date will render the allotment liable to cancellation and the amount previously paid to forfeiture.

7, Lothbury, London, E.C.
16th November, 1911.

FOREIGN RAILWAY ACTIVITY.

The feature of the revival in the Stock markets during the past few weeks has been the activity and strength of many leading foreign railway securities. Whilst British railway stocks have been the sport of labour influences, and lack a sustained investment demand, capital has been flowing freely into good Anglo-Foreign railway stocks. The unrest at home and the shock to the credit of the companies administered by the strike of August has left a lasting effect upon the Home Railway market, and many investors have been induced thereby to divert their patronage to the foreign railway market. Argentine rails have naturally been conspicuous in this connection, because of the high yields which they afford and the regularity with which their dividends are maintained. Companies like the Buenos Ayres Western, Buenos Ayres Great Southern and Central Argentine have not varied their rates for many years past, the only change of any consequence having been the advance in the Buenos Ayres Western distribution for the last year to $7\frac{1}{2}$ per cent. by way of compensating for deduction of tax, previous dividends having been paid at the rate of 7 per cent. *free* of tax. The new issue of extension capital by the Buenos Ayres Great Southern has been a conspicuous feature, and the new shares which were allotted to the shareholders at par are already quoted at thirteen shillings premium per £10 share. A very striking feature in the Argentine section has been a rise in the Entre Rios Railway ordinary stock to 74, as compared with the lowest price this year of that security of 44. Of course, this company paid a maiden dividend of $1\frac{1}{2}$ per cent. for the year 1910 quite recently, and the traffics of the system are making steady progress, the gross increase since July 1 having reached £32,000. We have previously pointed out in these columns the excellent prospects of this Company and the manner in which its development was being facilitated by the provision of the train ferry in connection with Buenos Ayres. After making full allowance for the progress of the company, however, we think the rise in the price referred to fully discounts the probabilities. Another of the minor Argentine railways which has come more to the front lately is the Argentine North Eastern, and in this case the recovery in the company's position was reflected in the dividend recently announced, whilst the traffic receipts since July 1 show an improvement of about £20,000. The Cuban Railway group has been particularly interesting. A few weeks ago we pointed out the excellent prospects of the United of Havana, and since that reference appeared there has been a rise of about ten points in the price of the stock, allowing for the dividend of £4 recently deducted from the price. The prospects of this company are excellent, and from next month onwards very large increases in traffic are likely to be realised, whilst there is a fair chance of the dividend for 1911-12 being raised to about 6 per cent., which will justify at least par for the stock. This company now occupies an impregnable position in the Island of Cuba, and has lately strengthened its position by taking steps to acquire the Western of Havana on terms which are favourable to the shareholders of the latter. The price of Western of Havana Ordinary shares

has risen to £13 for the £10 share, but considering the terms of purchase a considerably higher price will probably be ultimately realised. The stocks of the old Mexican Railway have lately shown a reactionary tendency, but a striking development among other Mexican Railway securities has been the sharp advance in the price of National Railway of Mexico Second Preference shares to 36½. This Security is now largely dealt in on the Continent, and the demand is said to come largely from that quarter, accompanied by rumours that the Mexican Government, which already controls this railway through ownership of shares, intends to acquire it outright.

ADVANTAGES OF PUBLICITY.

The directors and managers of railway companies in this country are fully alive to the benefits to be obtained from publicity in some directions. Not so many years ago they practically ignored many methods for bringing the advantages of their systems before the public. That has been largely overcome, because in addition to the familiar canvassing for goods traffic extensive advertising for the purpose of attracting passengers is now quite common. Formerly this was for the most part confined to the advertising of cheap excursions, but now we have regular services advertised and the natural attractions of places served displayed pictorially. Along with this are the companies' guide-books, excellent compilations well written and well illustrated. Perhaps little more can be done in this direction. But there is another branch of publicity into which British railways have never entered except in an occasional and sporadic way and one which in America seems to be productive of very good results. Those responsible for the direction of the railways in this country have too long clung to the old idea of secrecy, so far as the general public are concerned, in regard to many matters of organisation, management, engineering administration, and so forth, about which there is no need for secrecy at all. This policy is no doubt founded on the attitude natural in the old days when a railway company was looked upon more or less as a private concern, whose administrative and business affairs were regarded as sacrosanct. Moreover it was believed that if the public knew too much, the knowledge might be used against the companies. Of course there is an abundant class of information which it is not wise to disseminate broadcast, but there remain great bodies of facts connected with the working of railways which in these days when the undertakings are regarded as public institutions might profitably be imparted to the general press. No better example probably can be found of what we have in mind than the public information department of the Pennsylvania Railroad Company. This great company, by means of a fully organised information bureau, sends out to newspapers and all interested in railways a continual stream of facts relative to policy, management, rolling stock, running of trains, engineering matters, and so on. The information is clearly and concisely written by people not only of railway knowledge, but of considerable literary ability, and properly enough it is evolved in such a way as to show the excellence of the railroad and all its works. Though a great deal of it is manifestly of minor interest to people outside of the United States, it is plain that to Americans and especially to those who live within the territory served by the Pennsylvania Railroad, the intelligence thus conveyed is of much moment. Here we have a great corporate body telling the public openly what it is doing in improving the services, teaching its men, improving the rolling stock, trying new types of engines, testing materials and stores, and scores of different things the knowledge of which by the public not only does the company no harm, but does it a great deal of good. In regard to the matter of testing (both mechanical and chemical),

we quote as an example the following from a recent type-written sheet of "information for the press."—"Scientific management to Nth power is practised by the Pennsylvania Railroad in the purchase of supplies, and by supplies is meant everything from a rubber band to steam locomotives." In such ways not only is public interest aroused, but people respond to the tacit call to take a pride in their great railway institutions and to sympathise with them when they are attacked. Our British railway companies have done for years all the things of which the American companies naively boast—all, that is, which are appropriate to the different conditions in this country—and they are quite as efficient, painstaking, and energetic in their whole working arrangements. But they take little trouble to impress such facts on the British public. They take too much for granted and do not realise sufficiently that to produce any strong general impression it is necessary to be continually hammering away, to be enunciating the facts again and again, and to be rubbing them in. It is an axiom in the world of manufacturing that if you have a good article saleable to the public at large, continuous and extensive advertising always pays. Our railway companies have an admirable article—how admirable only those in the inside fully know—and it is certain that great benefits, direct and indirect, and some of them not immediate will result from the carrying out consistently and unweariedly of such a policy as we have indicated.

NORTH LONDON RAILWAY ELECTRIFICATION.

As will be seen from the particulars in another column, the North London Railway Company has decided upon electrification of its system. The step is an important one and emphasises the progress which electric traction is making in the Metropolis. Ever since the fortunes of this railway were so severely attacked by the competition of tubes, trams and motor 'buses, the step of electrifying the line has been urged upon the directors. Until about ten years ago the company paid regular dividends of 7½ per cent., and was able to make ample provision for reserves besides, whilst its ordinary stock was quoted at well over 200 per cent. The dividend, thanks to the competition referred to, fell to only 3½ per cent. for the year 1908. Since then, under the working agreement with the North Western Company, remarkable economies have been effected and last year the distribution on the Ordinary stock was restored to 5 per cent. The difficulties in the way of introducing electric traction at an earlier stage were serious. First of all, it must be kept in view that the North London, as distinct from many other local lines in the Metropolitan area, deals with a very large goods traffic, and no change could possibly be made which would do away with the revenue derived from this source. Another important feature of the system is that, although it only represents about twelve miles of lines, it has running powers over many times that mileage of other companies' lines, and the through traffic created in that way could not be sacrificed to any system of electric traction. The North Western itself has of course embarked upon electrification of its new suburban line between Euston and Watford. Financial difficulties which the North London might have encountered in raising funds to carry out the electrification have been removed by the arrangement contemplated under which the North Western will finance these works. As the owner of about one-third of the capital of the North London, the North Western Company is of course by far the largest shareholder, and will stand to reap the greatest benefit from the change. The loss of revenue which the North London Company has had to withstand owing to the competition already referred to amounts to over £100,000 per annum, and of course the undertaking, under normal conditions, might have been expected to share in the growth of London traffic as well, so that the real loss

in receipts is probably considerably larger. There is no doubt that the introduction of electric traction will enable the Company to regain a large proportion of this loss of revenue, and, that being so, the financial results should be ample justification for making the change.

Cash has come in again from the provinces, and £474,000 is shown by the Bank return to have been received from this source, while £180,000 was imported from abroad; at the same time, a contraction of £520,000 occurred in the note circulation. Thus the Reserve gained £1,174,000, making it more than a million sterling above the level which obtained at the corresponding date of last year. The Government account has been swelled by the borrowing of £1,000,000 on Ways and Means. Who supplied the funds is not known. Government Securities are only £100,000 up, and the addition of £309,000 to Other Securities is more than accounted for by an increase of £440,000 in Other Deposits. In effect, the whole influx of cash and bullion has been absorbed in Public Deposits. As the result of all changes, the ratio of Reserve to the liabilities of the Bank has improved three-quarters of a point to 50½ per cent. Money is plentiful, and a good demand for bills, of which there has been but a moderate supply, has caused a decline in the open market rate of discount, amounting to ½ for bills maturing early and ¼ for those of longer usance. So far as can be discerned on 'Change, there are no apprehensions of anything but plain sailing ahead for some time. On the Stock Exchange prices have improved in several

departments, and present quotations seem likely to be maintained, if not advanced further, during the concluding weeks of the year, unless the markets receive some unexpected jolt from abroad. The rise has been founded almost entirely on the indications perceived of growing quiescence among our workmen at home, and the advances that have occurred have more than obliterated the very sharp falls that were recorded the week before. These rapid changes, however, convey their own meaning, and indicate that movements in prices are brought about by the operations of persons dealing with borrowed money. The permanent investor is not so easily affected, particularly by causes originating in the attitude of employees. The threat of a strike seldom disposes the investor for income to sell, even though his next dividend may be endangered; it rather causes him to adhere to his holding with greater obstinacy as a sort of demonstration in firmness. On the other hand, he is not often moved to buy because the threat of a strike is withdrawn, so that speculators for the rise would be courting disappointment if they relied on that alone to stimulate purchases for investment. Fortunately, trade continues good and the receipts from traffic continue to advance. The North Eastern is now the only important railway which has failed to recoup the losses caused by the August outbreak—a sad commentary on the one line that has embraced the principle of "recognition."

Last Saturday moderate rises took place in Consols, Home rails and Argentine rails, thus continuing the reaction we noted in our last issue. On Monday the decision of the men at Crewe to vote against a strike caused a rise in Home rails only comparable to the fall that occurred the Monday before, when the decision of the leaders to take a ballot had been made known. The active list offered no less than five advances of two points or more on the day; London and North Western rose 2½, Brighton A 2½, Great Western 2, Lancashire and Yorkshire also 2, Furness 2. Altogether, there were fifteen advances of one point and over in the active list. The public were not given much chance, as the opening prices were nearly as good as the closing prices; however, the latter were not in all cases the best. The next day some further declines ensued during the morning, but rumours of a happy ending to the miners' conference at Westminster brought about a change of tone in the afternoon, and the markets closed higher than they began in almost every case. The following day the general tone came under the influence of information and notices touching the issue of new stocks. Besides those already published; Chili was understood to be ready with large demands, and numerous private undertakings are known to be feeling their way. Government stocks were affected by the competition of Southern Nigerian scrip, which served to withdraw some support from the market. Home rails opened firm, but developed an irregular tone later. North London rose 5 points on the news that electrification had been decided upon. Americans, after some early weakness, advanced during the afternoon. The second preferred stock of the National Railway of Mexico was much favoured, but Mexican Railway stocks declined. United of Havana lost ½. Antofagasta Deferred rose 2½.

Friday was a day of quiet markets and contracted business, mostly done at lower prices. Gilt-edged stocks were dull again on the prospect of new issues. In Home rails the changes were nearly all against their holders. North London lost most of the previous day's gain owing to profit-taking. United States railways somewhat improved the advance of the day before. A comparatively large business was done in Canadas, which opened above parity and remained firm throughout the day. Trunks responded to good traffics with a small improvement in price. A great deal of interest has centred in the North Western of Uruguay stocks owing to a rumoured design of the Brazil Railway to purchase for control. Among

foreign bonds, Chinese were naturally lower, and it is a testimony to the strength of the interests supporting these issues that prices have not already declined a great deal more.

The movements of the week are set forth in the following table:—

Railway Employment (Prevention of Accidents) Act, 1900.—The Board of Trade have made a rule dealing with the subject of brake levers on both sides of railway wagons, being the first of the matters specified in the Schedule to the Act.

Weekly Traffic Summary.

The traffic receipts for the week ended November 12, as officially published by the fifty-two principal railways of the United Kingdom, amounted to £2,180,771, which was earned on 21,521 miles, being at the rate of £101 6s. 7d. per mile of line open. For the corresponding week of 1910 the receipts of the same lines amounted to £2,088,725 with 21,467 miles open, or £97 5s. 11d. per mile. There was thus an increase of £92,046 in the receipts, an increase of 54 in the mileage, and an increase of £4 0s. 8d. in the receipts per mile. Thirty-four of the returns distinguish between the receipts from passenger and goods traffic, and these show an increase of £22,553 (or 19s. 7d. per mile) in the passenger receipts and an increase of £63,419 (or £2 17s. 6d. per mile) in the receipts from goods traffic. The aggregate increase of the thirty-four railways for nineteen weeks in the passenger receipts has been £156,451, while the aggregate increase in the goods traffic was £250,643. The aggregate receipts of the fifty-two railways for nineteen weeks (July 2 to November 12) amounted to £45,331,579, in comparison with £44,963,300 in the corresponding period of last year—an increase of £368,279.

DIVIDEND ANNOUNCEMENTS.

SOUTH YORKSHIRE JUNCTION RAILWAY.—After paying the 3½ per cent. per annum guaranteed dividend for the half-year ended June 30, there is a surplus of £11,979, an additional dividend at the rate of ½ per cent. per annum is proposed, carrying forward £1,454.

PENINSULAR AND ORIENTAL STEAM NAVIGATION.—The directors, after providing for the usual dividend at the rate of 5 per cent. per annum on the preferred stock, recommend a dividend on the deferred stock of 6½ per cent. for the six months, and a bonus of 3 per cent., making, with the interim dividend of 3½ per cent., paid in May, a distribution on the deferred stock of 13 per cent. for the year, or a total distribution of 9 per cent. on the paid-up capital. A year ago all dividends were at the same rates.

CANADIAN PACIFIC RAILWAY.—The directors have declared a dividend of 2½ per cent. on the common stock for the quarter ended September 30, being at the rate of 7 per cent. per annum from revenue, and 3 per cent. per annum from interest on the proceeds of land sales. A year ago the dividend was 2 per cent. on the common stock, being at the rate of 7 per cent. per annum from revenue, and 1 per cent. per annum from interest on the proceeds of land sales.

METROPOLITAN AMALGAMATED RAILWAY CARRIAGE AND WAGON COMPANY.—At the meeting held on November 16 the following dividends were declared for the half-year ended September 30 last:—On the ordinary shares, at the rate of 7½ per cent. per annum, free of income-tax; on the A preference shares, at the rate of 5 per cent. per annum, less income-tax; and on the B preference shares, at the rate of 6 per cent. per annum, less income-tax. A year ago all dividends were at the same rates.

PARLIAMENTARY.

Railway Companies (Accounts and Returns) Bill.

This Bill was read a third time in the House of Lords on Wednesday. As it has already passed through the House of Commons, it only awaits the Royal assent to become law.

Invergarry and Fort Augustus Railway.

On Wednesday, Mr. J. M. Robertson, Parliamentary Secretary to the Board of Trade, replying to Sir John Dewar (Inverness—L.), said he was aware that the Invergarry and Fort Augustus Railway was closed last month after long negotiations between the parties concerned, in which the Board of Trade assisted so far as they were able. He feared the Board had for the moment exhausted their good offices in the matter, and could not usefully intervene further.

Sir J. Dewar asked whether legislation could be introduced to meet a case of this kind.

Mr. J. M. Robertson: I think it extremely unlikely.

MEETINGS AND REPORTS.

FORTHCOMING MEETINGS.

- Nov. 20 (Mon.).—Bahia Blanca and North Western Railway (Extraordinary), Winchester House, E.C., at 12.30.
- Nov. 20 (Mon.).—Buenos Ayres and Pacific Railway (Extraordinary), Winchester House, E.C., at 12.
- Nov. 20 (Mon.).—Interoceanic Railway of Mexico (Annual), Winchester House, E.C., at 12.
- Nov. 20 (Mon.).—Mexican Eastern Railway (Annual), Dashwood House, New Broad Street, E.C., at 11.30.
- Nov. 20 (Mon.).—Rio Claro Sao Paulo Railway (Adjourned General), Cannon Street Hotel, E.C., at 12.
- Nov. 21 (Tues.).—Bengal and North Western Railway (Half-yearly), 237, Gresham House, Old Broad Street, E.C., at 12.
- Nov. 21 (Tues.).—Nizam's Guaranteed State Railways (Half-yearly), Winchester House, E.C., at 12.
- Nov. 22 (Wed.).—Cordoba Central Railway (Annual), Winchester House, E.C., at 12.
- Nov. 22 (Wed.).—Delhi, Umballa, Kalka Railway (Annual), 237, Gresham House, Old Broad Street, E.C., at 12.
- Nov. 22 (Wed.).—Madras and Southern Mahratta Railway (Half-yearly), 91, York Street, Westminster, S.W., at 12.
- Nov. 22 (Wed.).—Western Railway of Havana (Extraordinary), River Plate House, Finsbury Circus, E.C., at 2.
- Nov. 22 (Wed.).—United Railways of the Havana and Regla Warehouses (Extraordinary), Winchester House, E.C., at 11.30.
- Nov. 27 (Mon.).—South Yorkshire Junction Railway (Half-yearly), 50, Moorgate Street, E.C., at 12.30.
- Nov. 28 (Tues.).—Argentine Great Western Railway (Extraordinary), Dashwood House, New Broad Street, E.C., at 2.45.
- Nov. 29 (Wed.).—Bolívar Railway (Extraordinary), 1, Broad Street Place, E.C., at 2.30.
- Dec. 11 (Mon.).—Great Indian Peninsula Railway (Half-yearly), Salisbury House, London Wall, E.C., at 12.30.

(Reports, Traffic Returns, Prospectuses, and all other items of financial intelligence should be sent as early as possible to the Editor of THE RAILWAY TIMES, 12, Norfolk Street, London, W.C. Telephone 2948 Gerrard. Telegraphic address, Altimetry, London.)

ROHILKUND AND KUMAON RAILWAY CO., LTD.

The 36th half-yearly ordinary general meeting of the proprietors was held on Tuesday, November 14, at the offices, 237, Gresham House, Old Broad Street, E.C., Col. T. Gracey C.S.I., R.E. (Chairman of the Company), presiding.

The SECRETARY (Mr. J. Lightfoot) having read the notice convening the meeting and the report of the auditors to the shareholders,

The CHAIRMAN said: Gentlemen, Before beginning the business of the meeting, I must refer to the great loss the company have sustained in the lamented death of Mr. Rawlins, who has been the legal adviser of the company since its inception. In him the company have lost a sound lawyer and the directors a personal friend. You will, I presume, take the report as read. The gross earnings of the whole undertaking are the largest on record, but unfortunately the working expenses are also the highest. The excess in the latter is, I hope, due to temporary causes, which will not recur to the same extent—the heavy flood damages of the rains of 1910 have had to be made good, there was initial outlay to be written off owing to the conversion of the Dudwa branch from a temporary to a permanent line, there was special expenditure in rail renewals, and then certain outlay on maintenance which had been erroneously charged to capital had to be written back to revenue. Altogether the charges for the maintenance of the way and works were considerably more than Rs.1,50,000 in excess of the normal. Again, in the locomotive and carriage and wagon departments there was abnormal outlay in repairs to stock which had been damaged in accidents, or which had been worn out.

The passenger traffic shows steady expansion in the lowest class of about 200,000 annually, but the numbers of those travelling in the second and intermediate classes are almost stationary, whilst those in the first-class are decreasing. It is becoming increasingly evident that the running of separate accommodation for first, second and intermediate class passengers is not appreciated by the public, and that one of these

classes will have to be abolished. The expenses, compared with the earnings, are very great, as is evident from the fact that for each 14 seats that have to be hauled in the first-class, on the average only one is occupied. It is necessary to charge the very low fare of one-sixth of a penny per mile in the lowest class to attract the poorer natives, who are, of course, very numerous, and then even those natives who are fairly well off prefer to travel in this class rather than pay for the superior accommodation in the upper classes. Judging by what is learned by watching the numbers of passengers travelling in each class (and it is believed that this is the only method of arriving at the truth) what is wanted in India is that passengers should be carried with reasonable comfort at the lowest fares possible consistent with a moderate return on the outlay. If this is done it is almost useless to provide at high fares accommodation superior to that which the bulk of the passengers are accustomed to.

The traffic in general merchandise shows but little improvement in the last three years, and has been disappointing, mainly through the Bareilly-Soron extension having carried less sugar and salt than was expected. The sugar crops have not been very good for some time, and the increase in the consumption of salt has not responded to the reduction in duties, which were very large.

Up to the present the prospects of the current half-year are that gross earnings of about the same amount as in the corresponding period of 1910 will be obtained, so that it is probable that your usual dividend and bonus will be available when we next meet.

Good progress has been made with the new extensions, and it is probable that those from Pilibhit to Shahjahanpur and Barmdeo will be opened for traffic early next year, and that from Dudwa to Garwarighat later in the season.

With the approval of the board, the managing director and I propose to proceed to India in December next, where our presence is required to discuss some matters still pending with Government. We shall, of course, take the opportunity of inspecting your line, and more especially the new branches which have been lately added to the undertaking. I will now move:—

"That the report of the directors, with audited statement of accounts to June 30 last, presented to this meeting be, and the same are hereby received, approved and adopted."

Mr. LEONARD L. COHEN: I beg to second that resolution.

The CHAIRMAN: Would any gentleman like to make any remarks?

Mr. G. L. EDWARDS: There was one point I noticed in the report, and it was emphasised by what you have said, and that is, the excessive expenditure in the half-year. Then I notice that there is a very large carry forward. It has been gradually increasing in the last three years, from £3,000 to £12,000 I think, and it seems to me that at the present time you are carrying forward sufficient to pay 3 per cent. on the ordinary stock for the next half-year.

The CHAIRMAN: I don't know whether you raise any objection?

Mr. EDWARDS: I do not raise any objection, but it is in the report of the directors.

The CHAIRMAN: But the directors are pleased to see the increase in the carry forward, which got lamentably low a few years ago, when it had got down to £2,000 or £3,000, and we thought it would be necessary to reduce the dividend. When we see a sufficient carry forward, we think our dividends are safe for the next half-year, and I think you would rather like steady dividends than those which went down one half-year and increased the next half. I think that has been the desire of the shareholders during our existence, but if the shareholders wish the other way we can do it, although it would be strongly against our wish. When we see our way to pay higher dividends we will do it, but I think 7 per cent. is a very good dividend.

SURGEON-MAJOR CARTER: I think most of the shareholders will agree with you that in having a considerable carry forward there is safety. Regarding your remarks as to the passenger traffic, I noticed the matter in the accounts. It does seem rather curious to me that there should not be more travelling by the first or second class, and it occurs to me that you would be doing right in doing away with the first class. I don't know what is your own idea, but it seems to me that it is unsatisfactory to have so many classes, and I cannot understand why more people do not travel first class. The tendency on the English railways is to reduce the number of classes, but on the Rohilkund line you have four against our three.

The CHAIRMAN: I purposely did not commit myself to any opinion as to what classes should be abolished, because I thought it would be a good thing to investigate when we go out there before making up our minds in any way as to what

shall do. Perhaps it would be better to make a compromise, and work up to some final determination.

The resolution was then put and carried unanimously.

The CHAIRMAN: I further move:—

"That the sanction of the company be, and the same is hereby given to the declaration and payment of the dividend and bonus for the half year on the ordinary stock recommended by the board—viz., a dividend of £5 per cent., and in addition thereto a bonus of 10s. per cent., both free of Indian, but subject to English income-tax."

Col. Sir WILLIAM BISSETT, K.C.I.E., R.E.: I have pleasure in seconding that.

The resolution was put and agreed to *nem. con.*

The CHAIRMAN: Perhaps some gentleman will propose a vote of thanks to the staff in India?

SURGEON-MAJOR CARTER: I shall be very pleased to do so. I think it has been my pleasant duty to do this before, and I am sure all the gentlemen present will agree with me that the half-year's working has resulted satisfactorily, and that our thanks are due to our chairman, the directors and the staff, both in India and at home. I, from considerable residence in India myself, know what the difficulties are in the country. Those who have not been there cannot well judge. I am sure all present will join with me in our approval of the work done by the staff. (Hear, hear.)

Mr. EDWARDS: I shall have much pleasure in seconding the resolution.

The resolution was put and carried unanimously.

The CHAIRMAN: Gentlemen,—We are very much obliged to you for the vote of thanks you have passed, and we shall have much pleasure in communicating it to the staff in India, who will be very glad to know that they have your sympathy.

The proceedings then terminated.

SALVADOR RAILWAY.

The ordinary general meeting of the proprietors was held on Wednesday, November 15, at Winchester House, Old Broad Street, E.C.4; Mr. Mark J. Kelly (chairman and managing director of the company) presiding.

The SECRETARY (Mr. F. C. Tillbrook) having read the notice convening the meeting and the auditors' report,

The CHAIRMAN said:—

Gentlemen,—I venture to assume that we may take as read the report and accounts, which have been in your hands some days. I also venture to hope that you have found them satisfactory, because although they show a somewhat smaller tonnage carried, there was compensation in the favouring rates of the exchange, together with increased receipts from your steamship service, and it is reflected in the larger amount appearing on the right side in the accounts. As you will have observed, the decrease is represented principally by 1,304 tons of coffee, about 2,000 tons of sugar and sugar cane, and several hundred tons of maize, etc., all products of the soil, and subject to unavoidable fluctuations in amount. The decreases in coffee and sugar were peculiarly disappointing, because the season had appeared to be propitious, and as the price of these staples was very favourable in the consuming markets, the decreased amount available for export must have been a severe disappointment to the producers. They were compensated, however, by the better prices obtained abroad, while so far as we are concerned it is the fact that, notwithstanding these decreases, the gross receipts from your railway were the best so far attained, just falling short of a million silver dollars. This circumstance indicates that your property is each year becoming more of a general and less of a purely coffee line, although much coffee has really been planted in the past few years, and it is well to grasp the full significance of the fact. We are each year less dependent upon coffee carriage than was the case in the past, because our transportation is broadening out in a satisfactory manner.

INCREASED PASSENGER TRAFFIC.

The passenger traffic, too, during the year under review shows an increase of over 21,000 passengers, which registers the beginning of an upward tendency on this head, as you will remember that there was a falling off when, in the early autumn of 1909, we put up the fares, which arrested for a time the passenger movement. We have now arrived at a stage when we are considering the probable effect of the issue of return tickets at reduced rates, as a means of further encouraging this movement, which policy is advocated by our local advisers. In the way of encouragement of goods traffic, which appears to be justified by the gradual centralisation of business in the capital of the Republic, we have taken up with Mr. Charles T. Spencer, who now fills the post of general manager in Salvador, the provision of storage at our San Salvador station, to meet a pressing need of the merchants, and also as a means of tapping a new source of revenue for the company. You know already

that he is an able civil engineer, and as he had been on more than one occasion in Salvador, once as a member of our board, he was familiar from the start with the local conditions of your business. His predecessor, Mr. Charles Stuart, resigned the post of general manager in his third year of office, in consequence of bad health. Mr. Spencer took over last July, and we hope to see his efforts satisfactorily reflected in next year's accounts. Returning to the subject of last year's traffics, I may point out that the better prices obtained abroad for coffee, sugar, etc., were reflected in the accounts before you by an increase of imported merchandise and materials amounting to over 1,500 tons, while, as you will also see, the receipts from passengers were better by nearly £4,500, which certainly indicates progress in our development.

THE STEAMSHIP BUSINESS.

The steamship business has brought in upwards of £6,000, against £2,335 10s. 8d. appearing in last year's accounts, which, however, represented only seven months of working, but included a coffee season. Of this branch of our business I shall have more to say presently. In the general result we are in a much more satisfactory position than last year, when after providing for interest and redemption on the two classes of debentures, and interest on the Terminable Notes, payment of trustees, and other charges to revenue, the available balance in hand was £8,565 13s. 9d. against an available balance this year, after making similar provisions, of £23,464 13s. This result has enabled the board to make certain necessary provisions, such as £6,057 15s. 8d., being two-thirds of cost of the issue of the Terminable Notes about two years and a half ago, and a desirable appropriation of £4,500 to reserves, which your directors have seized the first opportunity to strengthen as much as the circumstances will allow. After making these provisions, we recommend you to pay a 4 per cent. dividend to the preference shareholders (against 3 per cent. paid last year), and to carry forward £2,606 17s. 4d. (against £1,065 13s. 9d. last year), which will improve the position of the company, and we hope you will adopt our recommendation.

The company's steamship business has developed so satisfactorily that the board decided to increase its tonnage by building two more vessels. We are convinced that the success so far obtained has been due essentially to the fact that we have provided vessels of exactly the right type for the trade to be served. The management of this part of your business has been confided, subject to your board, to very capable hands, and I may add that every officer of your ships has been most carefully selected, so that we will have about as fine a set of young Britishers in the service as can be got together, and I believe we can depend upon their doing excellent work for us. We have established a special agency at Salina Cruz, the Pacific terminal of the Tehuantepec Railway, in the charge of a thoroughly competent and active man, for the purpose not only of being in constant touch with our shipping customers, but also of watching closely over the efficiency of the vessels in every department, so that a high standard may be constantly maintained.

OIL FUEL.

Mention has been made on several occasions from this chair as to our adoption of oil fuel as a substitute for wood on the railway, and of expensive coal on the steamship service. It has not been possible to make great progress in this direction on the lines we had in view, inasmuch as they involved considerable expenditure for the erection of storage tanks at Acapulco, with secondary tanks at several of our stations, and therefore great prudence had to be exercised. The obstacles found involved us in their turn in many and somewhat costly experiments, since Acapulco is an open roadstead, and a floating pipe-line from ship to shore—never a simple matter—had to be carefully considered. The principal obstacle lay in the distance of anchorage for large tank ships, and the consequent greater risk of a breakdown in the transference of oil from these vessels by a floating pipe-line to the shore. Experiments in this direction, under the best technical advice procurable in London, left so much to be desired that we had perforce to go very slowly—a policy which I notice is being observed by some of the South American railways, placed similarly to ourselves by reason of there being no oil produced on the spot. One of these lines actually commenced to use oil fuel several years ago, and had borne the heavy initial expense of providing storage tanks; but it has gone very slowly in extending the use of oil to all its engines, and only now, after widening its experiments considerably, declares itself ready to convert more engines to oil fuel "as soon as there is a certainty of securing a reliable supply of suitable oil at a suitable price." As a matter of fact, there is almost a glut of oil at this moment on the Pacific coast,

which, incidentally, should enable us to secure for your railway and steamers both the reliable supply and the suitable price, and I believe, even apart from this circumstance, that I am almost in a position to-day to foreshadow that we may be able very shortly, and without any considerable capital outlay, to arrive at the provision of both the railway and the steamers with the desired fuel. This is as much as I am prepared to say to-day on the subject. Before leaving this part of my subject it will interest you to hear a cablegram which we have received from the general manager in reply to our request for his impressions concerning the new year from July 1 ultimo. He says: "Prospects generally are very encouraging; crop is very good and at high prices, consequently trade is active. Everything points to an increase of traffic; the traffic receipts last year in local currency beat our record, but they have been exceeded this year up to the present, whilst in addition to this the exchange is greatly improving."

THE DIRECTORS' FEES.

It will be within the recollection of shareholders who were on our register in 1907 that at the general meeting of that year a resolution was proposed and seconded by influential shareholders present, aiming at an increase of the sum allocated as remuneration of the board from £14,000 to £22,250 per annum. This proposal, I am happy to recall, received the willing support of the shareholders, but it was found that effect could not be given on that occasion to your kindly appreciation of the work of the directors, as the company's articles required that notice should have been given before the general meeting. The same gentlemen who on that occasion took up the matter at the meeting have approached me again on the subject, and having regard to the fact that the company is in a stronger position to-day, and that during the four intervening less satisfactory years we have refrained from allowing this subject to be brought up again, the board is of the opinion that it might be usefully proceeded with now, subject to confirmation by an extraordinary general meeting as required by the articles. The present remuneration of the board is extremely small, and has not been altered since the company came into existence, while the work falling upon the directors, particularly in the last three or four years, has been very greatly augmented, and now embraces an entirely new branch of business. The directors on their side, as you will see by the notice, have decided of their own accord to double the qualification in shares established by the articles.

THE POLITICAL SITUATION.

Before concluding these remarks I shall be acting only with consistency when, as at our previous annual meetings, I touch upon the political as well as the general situation in Salvador. Well, it will be gratifying to you to hear that the new Government, which came into office last March, has now settled down into its stride, and promises to give a very good account of itself. The new president, Dr. Manuel Enrique Araujo, has displayed the greatest activity in dealing with matters of domestic finance, having evidently the firm purpose of making receipts and expenditure balance without appealing to the disreputable old expedient of borrowing from Peter to pay Paul. This policy has demanded great courage, but President Araujo has already shown himself a man of strong will. The remittances for account of the national loan which I was instrumental in negotiating in London for the Government in 1908 continue to be sent forward with a punctuality which reflects the president's appreciation of the credit extended by the London Stock Exchange to the bonds of his country. These securities will no doubt be quoted in due season at a much higher price, but it must be remembered that Salvador is a new as well as an infrequent borrower in foreign markets. The remittances for account of the subsidy to your company are also received with punctuality each month, as well as the monthly proportion of the subsidy of £1,200 per annum which has been granted to our steamship service. The future, I have little doubt, holds the real first place in those regions for the United States, and we may live to see most of the large public undertakings created and operated by English and other European capital garnered in one after another by our cousins across the water, whose "manifest destiny" appears to be to dominate in America. With the completion of the Panama Canal, and all that that may in itself involve in the way of commercial supremacy for its owners, with the probable pushing ahead more vigorously than heretofore of the construction of the Pan-American railway, which the late Mr. Blaine, with the statesman's far-seeing mind, clearly realised would tighten the grip of his country upon all the rest of the Latin-American continent; with a probable early flooding of all of those countries with chains of banks directly or indirectly subservient to the aims of Washington; the tentacles of the octopus must

become powered and back, and the near future may witness a complete transformation of the economic conditions in every one of the Spanish American Republics, to the manifest detriment of European capital and displacement of European trade competition, supported, as the *Times* correspondent intimates, by astute if unusual diplomatic methods; but in any case the writing on the wall appears to be plain enough for even those who run to read.

The CHAIRMAN concluded by formally moving the adoption of the report and accounts and the declaration of a dividend at the rate of 4 per cent. on the preference shares.

Mr. E. Livyack seconded the resolution, which, after a short discussion, was carried unanimously.

On the motion of the CHAIRMAN, seconded by Mr. M. Urcog, the election by the board of Mr. G. T. Symons and Mr. R. H. McCarthy, C.M.G., as directors was unanimously confirmed; and on the proposition of Mr. Urcog, seconded by Mr. C. Boquer, the retiring directors, Messrs. M. J. Kelly and E. Lambek, were reappointed.

A resolution to increase the qualification holding and the fees of the directors was defeated, on a show of hands, and no poll was demanded, although the directors, it was stated, had sufficient proxies to swamp the opposition.

On the motion of Mr. F. S. Hawkes, the retiring auditors were re-elected, and the proceedings terminated with a hearty vote of thanks and confidence to the chairman and directors for their past services.

ARGENTINE GREAT WESTERN RAILWAY.

The ordinary general meeting of the shareholders was held on Monday last, at Winchester House, 50, Old Broad Street, E.C., the Rt. Hon. Lord St. Davids (the chairman of the company) presiding.

The SECRETARY (Mr. J. T. Dillon) having read the notice convening the meeting and the report of the auditors,

The CHAIRMAN said: I beg to move—"That the directors' report and audited statement of accounts for the fiscal year ended 30th June, 1911, be received and adopted, and that a balance dividend of two and a half per cent. be and the same is hereby declared on the preferred and ordinary stocks of the company for the year ended 30th June, 1911." We have received the amounts due to us under the working agreement from the Buenos Ayres and Pacific Railway, and are accordingly paying 5 per cent. for the year on the preferred and ordinary stocks of this company. The gross receipts have increased from £1,003,079 to £1,174,092, an increase of £171,013, or 7.08 per cent. As in the preceding year, much of the through traffic is diverted from a portion of our system to a line built by the Buenos Ayres and Pacific Railway, but under the working agreement this does not in any way affect the amount payable to us by that company. During the past year the actual weight of goods traffic carried by us has increased from 1,006,437 tons to 1,201,856 tons, an increase of 195,419 tons or 19.41 per cent. You will be interested to hear that this percentage of increase is higher than that shown by the other Argentine broad gauge railways, and confirms the reports we have received of the advance in prosperity of Mendoza and the other districts served by our railway. As you know, much of the prosperity of the Cuyo Provinces is due to irrigation, and you will see that we are about to ask you to authorise an alteration in the memorandum of association enabling the company to undertake the construction of irrigation works for account of the Government. In certain districts served by this line there are large areas of land capable of irrigation lands which at present give little or no traffic, but which should be a source of earning to us when supplied with water. The position is that the Government may ask this company to construct such work, the company taking Irrigation Bonds in payment. We make nothing by the operation, and we are not likely to lose by it; in fact we do the work at cost price. We have obtained a concession for a line from Espejo (a little north of Mendoza) to Palmira, forming a loop of about 50 miles in length. This line passes through some good land likely to give us traffic, and will form part of the network of lines which we have built in the neighbourhood of Mendoza. In the San Juan district, where the rate of progress has been slow for many years, there are now more signs of rapid advancement, and this will be helped by several lines which we are building, running from that city. We have received the following cablegram from the general manager: "Prospects at moment for Argentine Great Western Railway are excellent. Area under cultivation estimated to be 10 per cent. over last year. Snowfall in Cordillera during winter has been sufficient to ensure a plentiful supply of water for irrigation. Opening of industrial branches in San Juan

and Monte Coman to Colonia Alvear Line will bring increased traffic." The only other matter of interest that I have to mention to you is that Mr. Arthur Stanley, who is one of our directors, is at the present moment in Argentina and will be visiting the property of this company. I now beg to move the adoption of the report, and if any gentleman has any questions to ask or remarks to make we shall be very pleased to hear them.

The Hon. Charles N. LAWRENCE seconded the resolution, which, in the absence of questions or remarks from shareholders, was at once put and carried unanimously.

The CHAIRMAN next moved the re-election of the Hon. Charles N. Lawrence as a director of the company.

Mr. C. M. ROSE seconded the proposition, and it was agreed to.

On the motion of Mr. ROSE, seconded by the Hon. C. N. LAWRENCE, the Rt. Hon. Lord St. Davids was re-elected to the board.

Mr. PEARSE proposed the re-appointment of Messrs. Deloitte, Plender, Griffiths and Co., as auditors, which was seconded by Mr. T. E. NALTY and carried *nem. con.*

The CHAIRMAN then moved the following resolution:—

"That the Memorandum of Association of the Company be altered in manner following, that is to say:—

"By inserting after Clause (n) the following Clause, namely:—

(o) "To acquire by purchase or otherwise, and to construct, maintain, work and use waterworks, reservoirs, tanks, canals, watercourses, pipes and other works for the supply of water to any lands or buildings within the area from time to time served or capable of being served by any railway belonging to or worked by the Company, and for the utilisation of any river or other water for such purposes; and to undertake and execute any contract for the construction, maintenance or working of any such works as aforesaid with any Government, municipal or other body, corporation, firm or person in consideration of the payment to the Company of an agreed sum or of a sum representing the actual cost to the Company of constructing or maintaining the same, or of a sum calculated according to an agreed schedule of prices, or of any payment in one or more of such methods; and to accept payment of all or any part of any sum so due to the Company in cash, shares, bonds, or other obligations."

The Hon. C. N. LAWRENCE seconded the resolution, which was carried unanimously.

Mr. W. H. SKEEL proposed a vote of thanks to the Chairman and his co-directors, particularly to Mr. Stanley for going out to the Argentine. He thought the shareholders were very glad that the directors went out from time to time, as the master's eye was always very good. (Hear, hear.)

Mr. H. Percy NORRIS seconded the vote, which was unanimously accorded, and the proceedings terminated.

THE PARAGUAY CENTRAL RAILWAY COMPANY.

The twenty-third ordinary general meeting was held yesterday at Salisbury House, London, E.C., Mr. Victor N. Branford (vice-chairman of the company) presiding.

The SECRETARY (Mr. J. Lauber) read the notice convening the meeting and the auditor's certificate.

The CHAIRMAN then said that before moving their adoption, he would make a few remarks on the salient features of the year's work and on the present position and prospects of the company.

The past year would be memorable in the annals of the company on account of the completion of the line to Encarnacion and by the change of gauge. Sections of the extension were opened for traffic in the course of the year, but it was not until July 1 that the whole line was thrown open, and even now they had connection with the Argentine North Eastern across the river at Posadas only by means of a passenger steamer, the train ferry not being completed, thus no benefit accrued in this year's accounts from the through route. The total traffic receipts for the past year at £120,022, marked also a period in the progress of the company, for it was the first occasion on which they had exceeded £100,000. The growth was all the more noteworthy by reason of its coincidence with the change of gauge—for, thanks to the energy and efficiency of the staff, that difficult operation was performed with but slight dislocation of traffic. The proportionate increase in traffic receipts over 1909-10 was 23 per cent. The working expenses for the past year amounted to £68,600—an increase of £19,800 over last year. For the previous year the ratio of working expenses was—owing to special circumstances—exceptionally low, and if they omitted that from the comparison, they found the ratio of working expenses for the past year—viz., 57.16 per cent., was, with the above exception, actually lower than any former year. The net receipts on working amounted to £51,420, an increase of £3,084, or 6.4 per cent. on the previous year. After allowing for prior lien interest and sundry other charges, they had a balance of net revenue amounting to £20,354, which it was proposed should be placed to renewal account. In recommending that allocation, the board was not unmindful of the position of the 5 per cent. debenture holders, and of the patience they

had displayed. On the contrary, the board was alive to the need of doing everything possible within the limits of sound policy towards meeting and regularising interest payments on the 5 per cent. debenture stock, but they were bound to look ahead beyond the immediate necessities or conveniences of the moment. The through route, which had been so long the company's ambition, was on the point of being realised. The extension to Encarnacion was finished and opened for traffic. But the international traffic, in the proper sense, without break of bulk, would only commence with the establishment of the train ferry across the Alto Parana, connecting the line at Encarnacion with the Argentine North Eastern at Posadas. That, he hoped would be in operation early in the New Year. Happening to be in Glasgow in October, he had the satisfaction of seeing one of the two train ferry boats being built to the order of the Argentine North Eastern Railway just before it left the yard of Messrs. Inglis on the Clyde to start on its long voyage out. It would not, however, be put into use immediately on its arrival, because the makers of the machinery for transferring the trains from the rail head to the ferry boat and *vice versa* had not been able to promise delivery just as rapidly as was hoped; thus it would not be till some time early in 1912 that they would have the advantage of the through route traffic, without break of bulk. Now that advantage would carry with it a great, a manifold responsibility. It would saddle the company with the responsibility of handling passenger and goods traffic in which the time, comfort and convenience of travellers and merchants had to be considered and provided for on a scale appreciably beyond that of a local railway in a remote and solitary country, as the company had hitherto been, and it would saddle them with the responsibility of handling the rolling stock of other companies than their own. And all these responsibilities were not mitigated by the fact that the through route was no monopoly, but in competition with an old-established river service between Asuncion and Buenos Aires. To meet these new prospective responsibilities they had of course laid their plans, which it was hoped would be adequate, but just what requirements might prove necessary in the way of renewals, better upkeep and general improvements in the service they could not in the nature of things estimate with precision. Under these circumstances they felt that all the proprietors of the railway would sympathise with the board in its desire to fortify the position of the company in every needful and justifiable way, and such were the general grounds on which they recommended the allocation of the £20,000 of net revenue to renewal. At the same time they desired to affirm their adhesion to a policy of liberally recognising the claims of the 5 per cent. debenture holders. The shareholders would observe in the general balance-sheet an item of £31,880, being a debit balance against renewal account. The change of gauge obliged them either to re-equip the line with new rolling stock, or to re-adjust the old broad gauge locomotives, carriages and wagons to the standard gauge; their arrangements with the Argentine Government fortunately enabled them to adopt the former alternative, the purchase of the old rolling stock by the Argentine Government being part of the bargain. This sale, though a highly satisfactory transaction for the company, had made it necessary to enter in this year's accounts a realised depreciation—viz., the difference between the amount at which the old rolling stock stood in the books, and the amount estimated to result to the company as the sale price of this rolling stock in the rather complicated bargain made with the Argentine Government. Just how to deal with this realised depreciation engaged the very serious attention of the board, but the charge was strictly and properly against renewal; and only by defective accounting could the appearance of that charge be evaded. It would therefore have been actuarially unsound to have dealt with the matter otherwise than as had been done. Of the two lateral extensions authorised as feeders of the main line east and west, the first was of primary importance, because as soon as it tapped the great unexploited forest area of Central Paraguay they were assured of a remunerative traffic, and as that grew and occasion offered, they proposed to extend farther eastwards so as to ultimately link up with the Brazilian railways now being pushed out towards the Paraguay frontier. The survey of the extension was not yet quite completed, but it had proceeded so far as to assure them of comparatively easy and cheap construction through an exceptionally rich and fertile country. While the past year had been so productive of favourable changes, they had one lamentable personal loss to deplore. Their late esteemed secretary and colleague was no longer with them. Mr. Lauber had been connected with the company almost from its beginning, and had given to it well nigh half a lifetime of devoted service. His heart was with the company, and its affairs were his deepest concern. He rejoiced to reflect what satisfaction its recent progress imparted to the last few

years of his life. He died in harness, for he was at his accustomed place in the office till within a few weeks of his death. It is some compensation for his loss that his successor in the secretaryship was Mr. Julian Lauber, who had been trained in the company's office under his father, and of late had acted as assistant-secretary.

He then moved "that the directors' report and accounts for the year ending June 30, 1911, now presented be received and adopted," which was seconded by Mr. CHARLES MENDEL, and carried unanimously.

The re-election of Mr. S. F. Mendl as a director and Messrs. Deloitte, Plender, Griffiths and Co. as auditors of the company being duly carried, a vote of thanks to the staff in Paraguay and London was also carried, which brought the proceedings to a close.

BENGAL AND NORTH WESTERN RAILWAY.

CAPITAL.

The expenditure on capital account to June 30, 1911, amounted to £6,250,387, and the receipts to £6,521,268, of which £3,000,000 was from the issue of ordinary shares, £1,500,000 from the issue of $\frac{3}{4}$ per cent. preference stock, £1,500,000 from the issue of 4 per cent. second preference stock, £400,000 from the issue of 3 per cent. debenture stock, and £121,268 from premiums (less discount).

The capital expenditure on the main lines during the half-year amounted to £90,572, incurred mainly on the large bridges and new extensions now under construction, and also on new rolling stock put on the line, and on adding to and improving stations and buildings. The total outlay now stands at £4,554,934. The expenditure on the Ganges Gogra Doab lines on the Benares Allahabad extension, including the Allahabad bridge, and on the bridge over the Gogra at Manjhi Ghat amounted to £52,149 for the half-year, bringing up the total expenditure to £1,834,742. The amount expended on the Tirhut State Railway, from funds supplied by Government, was Rs.2,77,396 on the open line, principally on land, bridgework, stations and buildings, ballast, permanent way, and rolling stock, and Rs.3,93,955 on the new extensions. The total expenditure upon the Tirhut line now amounts to Rs.6,06,77,993 on the open line, and Rs.1,44,10,427 on the extensions, making a grand total of Rs.7,50,88,420.

REVENUE.

The net earnings of the joint undertaking for the half-year amount to Rs.64,41,232, against Rs.60,94,666 for the corresponding half of 1910. The company's share is Rs.33,92,291, brought home at the rate of 1s. 4d., against Rs.30,93,396 at the same rate in 1910. After bringing forward the balance from last half-year of £24,462, providing for interest on debenture and preference stocks, transferring £30,000 to reserve, and making other adjustments, the balance to be dealt with is £157,134. The directors recommend that a dividend be declared of $\frac{3}{4}$ per cent., free of Indian, but subject to English income-tax, absorbing £98,875; carrying forward a balance of £58,259. The figures given are net after deducting income-tax.

TRAFFIC.

The length of line in operation was as follows: Owned 1,176 miles; worked for the State, 776 miles. Number of passengers carried, 11,533,959 (against 10,838,959); tons of freight carried 1,451,439 (against 1,397,429); of which 283,495 (against 268,668) tons was construction and revenue materials. Proportion of working charges to gross receipts 37.07 per cent. (against 36.71 per cent.)

The report states:—"There has been little variation in the 1st, 2nd, and intermediate class traffics, though the 1st and 2nd are smaller than they were in the corresponding period of 1910. In the 3rd class there is, however, again a satisfactory increase of 688,845 in the number of passengers, and Rs.2,54,049 in earnings. The increase nearly all occurred in local traffic, and was general on all sections of the company's system. The passengers interchanged with the East Indian Railway during the half-year, via Monghyr, Mokameh, and Digba Ghat Junctions, amounted to 530,226 as compared with 552,535 in the 1st half-year of 1910; and with the Eastern Bengal State Railway, via Katihar Junction, to 501,383 as compared with 470,438 for the same period. The goods earnings as a whole increased by Rs.3,07,763 over those of the first half of 1910. The increase on the company's own lines amounted to Rs.3,43,596, whilst there was a decrease of Rs.35,833 in the Tirhut lines. The crops generally were good. There were increases in coal, grain and pulses, wheat, rice, sugar and salt, but decreases under linseed, rape, and other seeds, cotton manufactured and tobacco. The seeds and tobacco crops were average ones, though they were not quite so good as those of 1910. There are large increases under main-

tenance way and works, and carriage and wagon expenses. Regarding the former, heavy expense has had to be incurred in repairing the serious damage caused by the floods of 1910. As to the latter large renewals were necessitated to damaged stock, and the ordinary repairs and renewals were heavy. In the locomotive department increased expense was incurred in repairs to engines, but this was more than counterbalanced by the decreased price of coal. In the traffic department the increase is due to the opening of the Burhwal-Sitapur extension, increased cost of handling goods, of lighting, of printing, and payments to other lines.

In special and miscellaneous expenditure the increase has occurred in payment of compensation for goods lost and damaged and rent of joint stations. Notwithstanding these additional expenses the increase in the traffic dealt with has enabled the percentage of working charges to gross earnings to be maintained at the low figure above mentioned."

H.H. THE NIZAM'S GUARANTEED STATE RAILWAYS.

The half-yearly report states that the expenditure on capital account on the broad gauge system during the first half of 1911 was £20,175, and the total capital expenditure carried to final heads of account on June 30 amounted to £3,518,444. The working of the broad gauge system between Wadi and Bezwa during the half-year is as follows:—Mean mileage worked, 354; gross earnings, Rs.32,23,301; working expenses, Rs.17,88,760; net earnings, Rs.14,34,541; percentage of working expenses on gross earnings, 55.49; sterling rate of exchange at which net earnings were accounted for, 10d.; net earnings in sterling, £95,798. These figures show an increase in the gross earnings of Rs.2,19,208, and a decrease in net earnings of Rs.1,60,489. The receipts from coaching traffic increased Rs.3,281, and from goods traffic, Rs.2,29,040. The net earnings, after deducting £4,890 payable to the Government of India on account of the Bezwa Extension, amount to £90,900. The sum required to meet the charges in respect of the debentures, together with 5 per cent. per annum on the capital stock amounts to £90,000, leaving £900, divisible between the Government of H.H. the Nizam and the company. The board have carried forward the company's moiety of surplus earnings. The expenditure on capital account of the Hyderabad-Godavery Valley line during the first half of 1911 was £19,309, and the total capital expenditure carried to final heads of account on June 30 amounted to £1,827,918. The working of the metre gauge system during the half-year is as follows: Mean mileage worked, 391; gross earnings, Rs.19,75,580; working expenses, Rs.9,81,932; net earnings, Rs.9,93,648; percentage of working expenses on gross earnings, 49.70; sterling rate of exchange at which net earnings were accounted for, 10 1/2d.; net earnings in sterling, £66,373. These figures show that the gross earnings decreased Rs.2,71,571, and the net earnings Rs.3,54,856; also that coaching traffic decreased Rs.30,240 and goods traffic Rs.2,48,683. The net earnings for the half-year amount to £66,372. The sum required to meet the charges on the $\frac{3}{4}$ per cent. debentures for the same period is £42,595, leaving as surplus earnings £23,807, for adjustment between the Government and the company at the close of this year. The board recommend the payment of a dividend on the stock for the half-year to June 30 at the rate of 5 per cent. per annum, less income tax. The board much regret that Mr. H. Rendel, who has been secretary of the company since 1900, died on July 28 last. The vacancy has been filled by the appointment of Mr. M. T. Walker, who has been the company's accountant for many years. The board also announce with great regret the retirement of their colleague, the Right Honourable Sir A. R. Scoble, K.C.S.I., K.C., whose ripe experience and knowledge of the affairs of the company they will greatly miss. Sir A. R. Scoble was one of the first directors of the company and retired in October, 1886, on appointment as a member of the Council of the Governor General of India. On his return from India in 1898 he rejoined the board, and occupied the chair of the company for some years. The vacancy thus created has been filled by the appointment of Mr. W. A. Bankier, a director of the National Bank of India, a gentleman of wide Indian commercial and financial experience.

MADRAS AND SOUTHERN MAHRATTA RAILWAY.

The report for the half-year ended June 30, 1911, states that the funds required for capital expenditure since January 1, 1908, were advanced by Government, and, under the contract, all such advances are treated as additional capital contributed by the Secretary of State. The amount so provided to December 31, 1910, was Rs.1,47,28,479, equivalent (at 1s. 4d. per rupee) to £9,81,800, and during the half-year under review was Rs.45,67,100, equivalent (at 1s. 4d. per rupee) to £3,04,474.

Including £15,000 advanced by the Secretary of State for the discharge of debentures in October, 1909, the capital account at June 30, 1911, as between the Secretary of State and the company may be stated:—Secretary of State's capital, £11,250,000; company's capital, £5,000,000; advances by Government for capital expenditure, £1,301,373; total, £17,551,373. The gross earnings for the half-year amounted to Rs.1,71,94,082, an increase of Rs.39,833, equal to nearly 0.23 per cent. over the figures for the corresponding half of 1910. The main features of the result of the comparison are a decrease of Rs.1,67,427 in the earnings of the broad gauge lines, and an increase of Rs.2,07,266 in the earnings of the metre gauge lines. The decrease under broad gauge was made up of Rs.19,815 under coaching traffic, Rs.1,08,365 under goods traffic, and Rs.39,247 under miscellaneous. The increase under metre gauge is the net result of advances of Rs.2,81,394 under goods traffic, and of Rs.27,902 under miscellaneous, and a falling off of Rs.1,02,030 under coaching traffic. The working expenses of the entire system for the half-year amounted to Rs.1,04,24,237, or 53.24 per cent. of the gross earnings, as compared with Rs.1,05,71,027, or 53.52 per cent., for the corresponding half-year. Thus with an increase in the mean mileage worked and maintained of 6.79 miles, and a decrease in the gross earnings of Rs.1,72,252, the working expenses have decreased by Rs.1,46,790, or 1.39 per cent. The main factors contributing to this result are reduced charges for carriage of coal and stores for the railway; less expenditure on coal, due to a lighter train mileage and more favourable rates; reduced charges in connection with the interchange of stock with other railways, the result of revised rates introduced from January 1, 1911; and smaller compensation payments, which were somewhat exceptional in the first half of 1910. These savings have been absorbed to a considerable extent by increased expenditure on renewals of girders, and on repairs and renewals of rolling stock. The company's share of the divisible surplus for the half-year is Rs.21,33,030, which, after deducting the guaranteed interest of Rs.13,12,500, leaves a balance of Rs.8,20,530. This sum is carried forward, and may be reduced if the company's share of the divisible surplus for the second half of the year falls below the guaranteed interest on the company's share capital—namely, Rs.13,12,500. Under clauses 19 and 20 of the contract of June 26, 1908, between the Secretary of State in Council of India and the company, the company are entitled to receive one-twentieth of the surplus of the net earnings of the Mysore State lines over the interest payable on capital expenditure on the said railways incurred after December 31, 1907. The divisible surplus for the half-year under review was Rs.6,79,747, of which the company's share (Rs.33,987) has been remitted at 1s. 4 d. 16d. per rupee, realising £2,275. The directors recommend a payment from the stockholders' revenue account of 5s. per cent. for the half-year, making, with the guaranteed payment of £1 15s. per cent. to be received from Government on January 1 next, a dividend of £2 per cent., subject to English income-tax.

CORDOBA CENTRAL RAILWAY.

CAPITAL.

The capital account to June 30, 1911, shows an expenditure of £8,054,245, and receipts amounting to £9,024,820—viz., debenture stock (Original line) 5 per cent., £400,000; ditto (Central Northern section) 4 per cent., £2,900,000; ditto (Central Northern section) 5 per cent., £600,000; ditto (original line) 5 per cent., £738,212; income debenture stock (Central Northern section), £3,150,000; first preference stock, 5 per cent. cumulative, £720,000; second preference stock, 5 per cent. non-cumulative, £120,000; ordinary stock, £320,000; premiums, £11,671; amount transferred from reserve account Central Northern section, being sum realised by the sale of £76,400 rescission bonds, £64,946.

REVENUE.

The accounts of the original line for the year ended June 30, 1911, show a gross revenue on the original line of \$3,332,970 (against \$3,118,483), an expenditure of \$1,882,624 (against \$1,843,397), and a profit of \$1,450,346 (=£126,617), to which must be added transfer fees £44, making the total net revenue £126,661. From this must be deducted interest on the 5 per cent. debenture stock, £20,000; interest on the 5 per cent. second debenture stock, £18,844; expenses in connection with the issue of 5 per cent. second debenture stock, £2,705; balance of interest account, £1,654; amount now transferred to reserve, £10,458, leaving a balance available for dividend, to be disposed of as hereafter recommended, of £73,000. One-tenth part of the above balance—namely, £7,300, has to be credited to the revenue account of the Central Northern section. After making this transfer and providing for the interim dividends at the rate

of 2½ per cent. paid on the first and second preference stocks there remains a balance of £44,700, to which must be added £34,500 brought forward from 1910, making the total available balance £79,200. Out of this amount the directors recommend the payment of the following dividends, less income-tax:—£2 10s. per cent. on the first preference stock, making, with the interim dividend paid in June last, £5 per cent. for the year; £2 10s. per cent. on the second preference stock, making, with the interim dividend paid in June last, £5 per cent. for the year; and £5 per cent. on the ordinary stock. The above distributions will absorb £37,000, and leave £42,200 to be carried forward.

CENTRAL NORTHERN SECTION.

On the Central Northern section the gross receipts were \$8,092,975 (against \$7,081,707), the expenses \$5,867,838 (against \$5,349,481), and the net profits \$2,225,137 (=£194,258). To this there has to be added:—Amount brought forward from previous year to credit of income debenture stockholders, £2,397; interest from investments of the reserve fund, etc., £10,888; and transfer fees, £227; making a total net revenue of £207,770, which, with the percentage of original line profits, £7,300, makes a total of £215,070. Deducting interest on 4 per cent. consolidated debenture stock (Central Northern section), £116,000; and interest on 5 per cent. second debenture stock (Central Northern section), £30,000; there remains a balance of £69,070, out of which the directors propose to pay a dividend of £2 per cent. less income-tax, on the income debenture stock, which will absorb £63,000, and leave a balance of £6,070 to be carried forward to the credit of the income debenture stockholders.

TRAFFIC.

The number of passengers carried on the original line and Central Northern section for the 12 months ended June 30, 1911, compared with the corresponding period ended June 30, 1910, was 1,547,574 (against 1,327,147); the quantity of goods carried, 2,034,611 tons (against 1,775,912 tons); the number of train miles run, 2,416,583 (against 2,263,388); the length of line worked 805 (against 784); the ratio of expenses to receipts, 67.83 (against 70.52 per cent.).

The report states: "Considerable benefit may be expected to accrue when the new works and improvements which are being carried out are completed and all the rolling stock ordered last year is taken into service, but the further development of traffic in sight, consequent upon the expected early opening of the Buenos Ayres extension to through passenger traffic and the agricultural development in the company's zone, renders the provision of further rolling stock imperative. The balance required to complete these works, to provide for the new rolling stock already referred to, and for general purposes, is estimated at £200,000 for account of the original line and £350,000 for account of the central northern section. To provide the necessary funds further capital will have to be raised during the current financial year, and a separate meeting of the income debenture stockholders has been convened for the purpose of obtaining powers to issue the balance—viz., £600,000, of second debenture stock (central northern section) as and when required. The succession of high tides, accompanied by heavy rains and floods, experienced in July and August last, have retarded the completion of the works of entrance into the city of Buenos Ayres, but the manager expects to be able to inaugurate through passenger traffic early in December next. Goods traffic is being dealt with at the station in the Buenos Ayres docks. The manager reports with regard to the current year that there are prospects of a good cereal harvest in the company's district, and that the sugar crop promises to produce a record tonnage; a further increase in through traffic may be expected when the Buenos Ayres extension is fully open to service. During the past financial year the board had the advantage of a visit from Mr. Duncan M. Munro, who, for 22 years, has acted as general manager of the company's railway. Feeling a desire, after his long service, to take up some less arduous position, Mr. Munro requested the board to relieve him of his duties, which the directors, in March last, consented to do upon the understanding that Mr. Munro's resignation should not take effect until the appointment of a new manager had been made, and that thereafter Mr. Munro should act as chairman of the local board and representative of the company in the Argentine. The board have now appointed Mr. Robert H. F. Stuart, M.Inst.C.E., as general manager, and feel assured that the experience gained by him in important railway positions in the Argentine Republic will prove of great value to the company's interests. The directors desire to place on record their appreciation of the many valuable services rendered by Mr. Munro during the time he has acted as general manager, and of his devotion to

the interests of the company generally. The directors have to announce, with much regret, that their former chairman, Mr. E. L. Weigall, and Mr. Jacques van Raalte have, for personal reasons, resigned their seats on the board. The Right Hon. Lord Farrer and Mr. Pellett Holt, M.Inst.C.E., have been appointed directors, and Lord Farrer has been elected chairman."

CANADIAN NORTHERN RAILWAY.

The results of the Canadian Northern Railway Company's operations for the fiscal year ended June 30, 1911, compared with the previous year, show a notable expansion of business. We append a summary of the accounts compared with those of the previous year—

GROSS EARNINGS.			
	1910-11.		1909-10.
Passengers	\$2,899,077	..	\$2,415,449
Freight	11,951,994	..	10,192,511
Mails	88,008	..	77,599
Express	298,445	..	145,994
Miscellaneous	1,182,588	..	1,091,008
Total receipts	\$16,390,712	..	\$13,833,562
WORKING EXPENSES.			
	1910-11.		1909-10.
Maintenance of way and structures	\$2,302,004	..	\$2,447,581
Maintenance of equipment	2,210,842	..	1,849,113
Traffic expenses	263,543	..	153,512
Transportation expenses	5,879,357	..	4,879,153
General expenses	648,619	..	508,003
Total expenditure	\$11,379,315	..	\$9,488,672
Net earnings	\$4,999,347	..	\$4,344,890

From this balance of \$4,999,347 must be deducted fixed charges \$3,982,651, leaving a surplus of \$1,016,696, from which must be deducted interest at 5 per cent. per annum paid on income charge convertible debenture stock outstanding \$312,872, leaving a net surplus for the year of \$694,824.

The income account shows that a balance of \$4,950,860 was brought forward from the previous year, bringing up the total sum available to \$21,311,572. The balance of this account, after paying working expenses, taxes on line and lands, interest on various bonds, and rental of leased lines, was \$5,575,695.

The report states that "During the year over 400 miles of newly constructed tracks were added to the system, the average mileage operated being 3,383 miles. The directors are again gratified to report a substantial increase both in the total amount of grain hauled and in the proportion of the total grain crop carried by the railway. In the northern districts, where the railway has immense territories tributary to it, more equable climatic conditions prevailed, during the growing season of 1910, resulting in a uniform ripening of the crop and consequent increased yield. Confidence in the continuance of these conditions has resulted in a substantial increase in the areas put under cultivation, emphasis of this being found in the last estimate of the total grain crop for the growing year 1911, which shows that the Province of Saskatchewan will produce about 60 per cent. of the entire crop of the Province of Manitoba, Saskatchewan and Alberta. The demand for increased facilities in every department of the railway continues, and to meet the requirements of a rapidly growing traffic and to generally improve the efficiency of your property large expenditures were incurred during the year. These expenditures represent the enlargement of shops at many of the divisional points, the purchase of additional machinery, the building of water stations and new and additional passing tracks, the re-laying of many miles of road with heavier rails, the ballasting of tracks, and the extension of the telegraphic system. A further issue of 5 per cent. income charge convertible debenture stock was made during the year. The total amount issued and now outstanding is \$15,000,000.00; and as the surplus net earnings of the company permitted the payment of the interest there was paid out \$312,872 for interest upon the amount of principal outstanding from time to time during the fiscal year. The year just closed is particularly important in the history of the company because of the final step towards the accomplishment of the directors' determination to secure for it the status of a transcontinental system. In May last the Dominion Government of Canada entered into an agreement with the Canadian Northern Ontario Railway Company to facilitate the construction and guarantee the financing of a line from Montreal to Port Arthur to connect there with the present eastern terminus of the Canadian Northern Railway. This arrangement, together with the similar contract entered into last year with the Provincial Government of British Columbia (reference to which was made in the annual report last year), for the construction of a line from the western boundary of the Province of Alberta to the Pacific Coast, assures

the railway the completion of the long projected for the extension of a coast-to-coast service. The construction of these lines is being vigorously pushed forward."

BRAZIL RAILWAY.

The report of the directors for the year 1910 states that considerable progress has been made with the programme outlined in the last annual report to connect and combine under one system the railways serving the southern part of the State of São Paulo and the States of Paraná, Santa Catharina, and Rio Grande do Sul, from the Atlantic to their western borders. When the extensions under construction and to be constructed have been completed, the system will extend from São Paulo to the frontiers of Uruguay and Paraguay, and by its own lines and connections will open up the State of Mato Grosso to the Bolivian border. At the present time the length of lines controlled and operated by the Brazil Railway Company is 4,919 miles. The company also has a substantial interest in other railway companies, which have 1,604 miles of lines in operation. The net results for the past year of the operation of the Sorocabana Railway by the Brazil Railway Company were sufficient to provide for the payment of the fixed charges of the Sorocabana Railway Company and to leave a surplus. The Brazil Railway Company has contracted with the São Paulo-Rio Grande Railway Company to build the lines comprised in its concession. During 1910 construction was contracted on the last section of the main line which runs from Itararé to the River Uruguay. Construction is now proceeding on the São Francisco line, which will extend westerly from that point on the Atlantic to the River Paraná, on the Paraguayan border. The first section of this line, sixty miles in length, was put into operation in June, 1910. The earnings from the two sections of the São Paulo-Rio Grande system already in operation practically cover operating expenses. The Paraná Railway is in complete operation, and the working results are highly satisfactory. The Brazil Railway Company, through its shareholding and that of its subsidiary companies, has secured a controlling interest in the share capital of the Compagnie Auxiliare de Chemins de Fer au Brésil, whose system comprises practically all the railways in the State of Rio Grande do Sul, and has made a contract whereby it assumes the operation of such system as from January 1, 1911, until the expiration in 1938 of the concession held by the Compagnie Auxiliare. The Brazil Railway Company owns nearly 50 per cent. of the ordinary share capital of the Madeira-Mamoré Railway Company. During 1910 two sections, of a total length of ninety-four miles, were opened temporarily for traffic, and, the results obtained, particularly during 1911, are very encouraging. The greater part of the lands over which the Brazil Railway Company has rights in the States of Paraná and Santa Catharina are covered with forests of pine and other timber. The company organised the Southern Brazil Lumber Company, the whole of whose shares it owns. The accounts as at December 31 last show that, after payment of all fixed charges and expenses, the net revenue for the year amounted to \$1,251,616.64. To the above amount must be added the balance of revenue carried forward from the previous year, amounting to \$378,060.47, making a total of \$1,629,677.11. From this must be deducted the sum of \$416,101.69, in respect of the dividend at the rate of 6 per cent. declared and paid on the preferred shares for the past year. The directors have appropriated \$200,000 to reserve account, as a provision towards the amortisation of preliminary and special financial expenses, leaving a balance of \$1,013,575.72 on the revenue account to be carried forward.

QUEENSLAND RAILWAYS.

The annual report of the Queensland Commissioner for Railways gives the mileage open on June 30, 1911, as 3,868 miles, an increase of 207 miles. There are 358 miles of line, of the 3ft. 6in. gauge, belonging to local companies practically under the control of the department. There are new lines under construction with a mileage of 1,616 miles when completed; this includes the North Coast railway, which, when finished, will link up Cairns, the capital of tropical Queensland, with Adelaide, in the south of Australia. The gross earnings of the Queensland railways for the year amounted to £2,730,430; working expenses were £1,563,110, producing a net revenue of £1,167,311; the gross earnings were £302,000 above the figures for the previous year. The percentage of working expenses to revenue was 57.25. The train mileage was 6,367,270; the revenue per train mile was 5s. 10d., and the expenditure 3s. 4d. The sum of £25,808,841 has been expended upon the Queensland lines to date; the average cost per mile

was £6,696. The net revenue paid £4 10s. 2d. per cent. on the capital invested, the highest return ever made in the history of the railways.

RETIREMENT OF MR. C. A. ROWLANDSON.

Mr. C. A. Rowlandson, M.Inst.C.E., retires on December 31 next, under the age limit, from the position of engineer-in-chief of the Great Central Railway, a post which he has held for the last fifteen years. Mr. Rowlandson is the eldest son of the late Rev. John Rowlandson, Vicar of Kirby Moorside, Yorkshire, and was educated at Tonbridge School, afterwards serving as articled pupil with Messrs. Humphreys and Tennant, of London. After five years' service in carrying out engineering work for the Indian Government, Mr. Rowlandson, on his return, was appointed engineer of large ironstone mines in Yorkshire, and in 1882 he became resident engineer for the firm of Sir Douglas and Francis Fox, on the construction of the Scarborough and Whitby Railway, involving the building of an important viaduct over the Esk. Mr. Rowlandson was connected with the construction and equipment of the Mersey Railway, and was appointed resident engineer when the line opened. During his tenure of this office he carried out for Messrs. Fox

Mr. C. A. Rowlandson.

the construction of the low-level station under the Central Station, Liverpool. He also acted as resident engineer for Thomas Parker and Company, Wolverhampton, the electrical contractors for the Liverpool Overhead Railway during its construction and working until the company took over the electrical equipment. Subsequently, Mr. Rowlandson was resident engineer for Messrs. Sir Douglas and Francis Fox for the construction of the London end and terminus at Marylebone of the Great Central Railway Company's extension to London. In 1896 Mr. Rowlandson was appointed engineer-in-chief of the Great Central Railway. During his tenure of that position many important works have been carried out under his supervision and control, among others the new railway from Neasden to Northolt, the new railway (joint with the Great Western Railway) between Princes Risborough and Ashenden Junction, extensive widenings at Manchester and Sheffield, the new avoiding railway at Doncaster, new railways in South Yorkshire, and the equipment of Immingham Dock, etc. Mr. Rowlandson was elected a Member of the Institution of Civil Engineers in 1888, is a past President of the Manchester Association of Students, and a Major in the Engineer and Railway Volunteer Staff Corps. It may be added that Mr. Rowlandson's services have been retained by the company as consulting engineer.

Uruguay Northern Railway.—At the annual meeting held at 71, Finsbury Pavement, London, on November 10, Mr. E. A. Underdown, the chairman, said that the receipts for the year (£26,357) were the largest earned by the company in any year. Their expenses were £19,682, or over £2,000 more than last year, while the directors had been able to declare a dividend of 1½ per cent. on the preferred stock. On the whole, he considered the results very favourable.

IMPORTANT JUDGMENT AGAINST THE G.C.R.

Mr. Justice Coleridge, in the King's Bench Division, has given judgment in the action by W. J. Jenkins and Co., linen merchants, of Belfast, against the Great Central Railway Company, to recover damages for a consignment of linen handkerchiefs sent from Belfast to Grimsby, and lost when the defendants' steamship, *Blackburn*, collided with another vessel. Defendants pleaded that they were exempted from liability by the terms of the bills of lading, and also by the railway statutes. His Lordship remarked that the first point was whether Section 7 of the Railway and Canal Traffic Act of 1854 applied to the case. That section provided that carrying companies should be liable for damage done to goods they had undertaken to deliver, but defendants said that it only applied to goods carried by land and canal. The Railway Clauses Act of 1863, which applied to steam vessels, incorporated the section from the Railway and Canal Act. By a private Act in 1864 the defendant company, who were then the Manchester, Sheffield, and Lincolnshire Railway Company, by Section 2 incorporated Part 4 of the Railway Clauses Act of 1863 with their private Act. If the matter rested there no dispute would arise as to whether Section 7 of the Railway and Canal Act of 1854 was applicable to steam vessels, for by Section 31 of the Act of 1863 these provisions were extended to carriage by steam vessels. In 1864, however, there was an Act which had clauses which were not applicable generally, but only to such companies as chose to incorporate them. Then came the Regulation of Railways Act of 1868, which also incorporated the provision with regard to liability from the Railway and Canal Traffic Act, and in 1888 there was an Act which repealed these provisions.

Was the effect of that course of legislation, proceeded his Lordship, to drive out of the private Act of the defendants the incorporated clause from the Railway Clauses Act of 1863? He had had no authority for the proposition that where a clause from a public Act had been incorporated with a private Act, that part of the private Act was repealed by the subsequent repeal of the public Act. A local Act might incorporate into its clauses provisions of a former Act, though that Act had been repealed, and the repeal of the statute did not repeal the portions incorporated, nor, in general, was a local Act of Parliament, in the absence of any indication of intention on the part of the Legislature, repealed or superseded by a general Act subsequently passed. The words in question could only be said to be impliedly repealed because similar words in the Act of 1868 had been repealed, and therefore there was no indication of intention on the part of the Legislature to repeal Section 31 of the Act of 1863. He could find no authority for the doctrine of merger or absorption, and under such circumstances he thought the legal effect was to leave the defendant company bound by their private Act, which incorporated in it the words of the Act of 1863, so far as they applied to this case. It had been argued that this section only applied to where the whole of the carriage was by sea, but he held that Section 7 of the Act of 1854 applied to the circumstances of the present case. It was not seriously contended that the limitations put in the bills of lading were reasonable. It followed from these facts that the plaintiffs were entitled to the amount they claimed—viz., £167 os. 4d., with costs. A stay of execution was granted.

UNDERGROUND ELECTRIC RAILWAYS OF LONDON.

The Underground Electric Railways Company of London, Ltd., have issued the following comparative statement of receipts and expenses of the Associated Companies for October:—

<i>Metropolitan District Railway.</i>					
	Month of October, 1911.	1910.	Inc.	July 1 to Oct. 31, 1911.	Inc. 1910.
Gross receipts.....	£61,953	£52,290	+ £2,673	£231,651	£223,132 + £8,519
Working expenses.....	28,664	28,439	+ 225	114,107	112,752 + 1,355
Net receipts	£33,289	£30,841	+ £2,448	£117,544	£110,380 + £7,164
<i>London Electric Railway.</i>					
	Month of October, 1911.	1910.	Inc.	July 1 to Oct. 31, 1911.	Inc. 1910.
Gross receipts.....	£65,470	£61,549	+ £3,921	£232,846	£226,177 + £6,669
Working expenses	32,715	31,039	+ 1,576	127,268	122,673 + 4,695
Net receipts	£32,755	£30,510	+ £2,245	£105,578	£103,504 + £2,074
<i>London United Tramways.</i>					
	Month of October, 1911.	1910.	Inc. or Dec.	July 1 to Oct. 31, 1911.	Inc. or Dec. 1910.
Gross receipts	£26,252	£28,149	- £1,897	£126,832	£122,680 + £4,152
Working expenses.....	18,271	20,600	- 2,329	73,997	81,639 - 7,642
Net receipts	£7,981	£7,549	+ £432	£52,835	£41,041 + £11,794

LONDON SUBURBAN ELECTRIC RAILWAYS.

NEW SCHEME BY THE L. AND N.W. RAILWAY.

Hitherto the London and North Western Railway Company have not been active competitors for London suburban traffic, and have not even taken any special steps to encourage its development on their lines. Their reasons have been that the demands made on the available facilities at Euston Station by long-distance traffic are so great that there has appeared to be little opportunity of accommodating there any considerable degree of suburban traffic as well, while the experience of other companies has been that suburban traffic, once definitely encouraged, has a tendency to assume unwieldy proportions in the case of even the most commodious of terminal stations. But the great expansion of the London suburbs in all directions of late years has made it necessary that the London and North Western should make further provisions for those who, without any special inducement so to do, have already settled in such numbers in neighbourhoods served by this system, and the com-

the four lines continuing those of the London and North Western Railway from Watford to Broad Street will be electrified.

At Watford the new lines will also serve High Street Station, while the Croxley Green Branch will be worked electrically. Between London and Watford several new intermediate stations will be opened. From Chalk Farm into Euston Station the traffic will be worked on the present lines, and Euston will be altered on the level, the construction of a tube station 60 feet below the surface, with lifts, etc., being thus avoided.

Of still greater interest is the fact that from Queen's Park Station a new tub. railway, to be constructed by the London Electric Railway Company, will form an extension from the Baker Street and Waterloo line, and, also, a connecting link between the whole system of tube railways in London, and the trunk lines of the London and North Western Railway Company.

A special type of carriage, which can be used equally well on both systems, will be provided, and residents of Watford and district will be enabled to travel through to Paddington, Mary-

pany have decided to carry out one of the most comprehensive schemes yet projected for dealing with the suburban traffic problem.

As first drawn up in 1907, the scheme proposed the widening of the London and North Western main line between Watford and Kilburn, and the construction, from the latter point, of a tube railway, which would dip down to a low level station underneath Euston itself, a loop being provided there in order that a continuous series of trains could be maintained. In view, however, of the fact that nine-tenths of the suburban passengers on the London and North Western want to go to other destinations than Euston Station itself, the original idea has been temporarily abandoned in favour of a much more comprehensive proposal, including, among other details, the electrification of the North London Railway, which already forms so important a means of access into the heart of the City.

In the first place, provision is being made for a complete system of electric railways by the London and North Western and North London routes from Watford, via Chalk Farm, to Broad Street Station. Between Watford and Chalk Farm two extra lines are being laid to accommodate the electric trains, so as to free the existing four main lines for the ordinary fast and express traffic; and on the North London Railway, two of

lebone, Baker Street, Oxford Circus, Piccadilly, Charing Cross, Waterloo, and other stations on the Baker Street and Waterloo line without change of carriage, while it will be possible to make connections at various points with all the other tube railways, serving every part of London.

It will be seen that, under these arrangements, three streams of traffic from Watford are provided for in place of the one originally contemplated, viz., to Broad Street, to Euston, and to the West End. Even if the company should decide to run only a 15-minute service from Watford to each of the three destinations in question, this would mean that a train would leave Watford every five minutes, and the service of trains could, if necessary, be increased to one every 2½ minutes.

Other important features of the scheme include the electrification of the lines from Earl's Court and Kew Bridge to Willesden, and also of the Hampstead Junction line from Willesden to Camden Town, thus affording, in conjunction with the electrification of the North London line already referred to, complete electrical services from Broad Street to various western and northern suburbs, including, in addition to places already mentioned, Richmond, Acton, Brondesbury, Hampstead, etc. Broad Street should thus become the centre of a vast passenger traffic, and this will be still more the case when the

extension there of the Central London Railway has been completed.

The new arrangements here detailed should allow of a still better distribution of London workers than exists to-day, with all the advantages of frequent trains and quick travel. They may further help to check the overcrowding that characterises certain of the more densely populated of the London suburban districts by opening up various other desirable residential suburbs in localities where an abundance of accommodation is still to be found.

Although this advent of the London and North Western into the competition for London suburban traffic may be somewhat belated, it is characterised by various features of exceptional interest, including (1) the resort to so widespread a scheme of electrification, showing that the trunk railway companies are disposed more and more to fight with its own weapon the active competition in various districts of the electric tramway; (2) the establishment of through connection and through train services between trunk lines and tubes; and (3) the distribution of suburban traffic under such conditions that the London and North Western, while taking measures to secure a much larger share therein, will avoid the enormous expenditure on additional terminal accommodation to which some of the other companies, swamped at their termini by the great proportions to which that traffic has grown, have been put in the past.

LORD C. HAMILTON AND THE TRADES DISPUTES ACT.

Lord Claud Hamilton, M.P., chairman of the Great Eastern Railway Company, writes: "Until the Trades Disputes Act is amended, employers' federations can do little to avert the distress to their workmen, the general public, and themselves, now caused at the will of agitators. Never have there been such manifest signs that every section of the community (excepting those who thrive by encouragement of strikes) would welcome revision of that law, which, in effect, grants a licence to terrorism, violence, and outrage. At present, however, there would appear to be no concerted movement to focus the exasperation which is undoubtedly felt by the civilised community against this national scandal, or to convince Parliament that a mistaken effort of legislation which threatens the safety of life, liberty and property must be amended. With these objects, therefore, an association called the Trades Disputes Act Reform League has been formed, of which I have accepted the presidency. Lord Joicey and Lord Monkswell have agreed to become vice-presidents; Mr. Charles Charlton is chairman, and Mr. Ernest Platt deputy-chairman. May I appeal for the hospitality of your columns to ask for support from all peaceful and law-abiding citizens who desire, before it is too late, that a charter of immunity from actions in courts of the land to which all other law-breakers are subject should be repealed? I do not propose to recapitulate at length the many instances that give warning of this national danger. Incendiarism and pillage in South Wales, mob law and civil strife in many large cities, the stoppage of traffic and threatened starvation in London and elsewhere, terrorism to which those willing to work were generally subjected, and strike leaders' 'permits' that gave facilities necessary for the Royal mails to pass along the streets of London, are fresh in the minds of all. The object of the Association is to carry on a continuous educational campaign with regard to the calamity which threatens the future of the social and industrial life of these islands. It is evident the combined forces of trade unions are being concentrated to bring about a national strike which, serious enough in itself, would pale in comparison with the state of anarchy that would inevitably follow such an event under the existing law. Feeling assured this movement will commend itself to law-abiding citizens of all shades of political opinion, I appeal to those willing to give financial or actual support to the work to communicate with Mr. Charles Charlton, chairman of the League, at 4, Eastcheap, E.C., or with Mr. Ernest Platt, deputy-chairman, 63, Princes Gate, W."

Railway Conciliation Boards.—A return was issued this week by the Board of Trade of the employees elected on the seven sectional conciliation boards of the Lancashire and Yorkshire Railway Co. The nominations of the eighteen representatives of all the wages grades employed by the North-Eastern Railway for the Conciliation Conference, have been received by the joint secretaries, Mr. P. Burt, representing the company, and Mr. Walter Hudson, M.P., of the A.S.R.S., and were issued from the headquarters of the company at York on Tuesday. The term of office of the existing representatives terminates on December 22, and an election of men's representatives for the ensuing three years thus becomes necessary. Voting papers will be issued on November 24.

GENERAL NEWS.

UNREST AMONG RAILWAY EMPLOYEES.

NO SUPPORT FROM MINERS FOR A CHRISTMAS STRIKE.

The suggestion of some of the union railwaymen of a Christmas strike in company with the miners has proved abortive as far as the colliers are concerned, for the conference held this week in London between the mine-owners and men's representatives upon the question of a minimum wage resulted in the miners deferring their threatened general withdrawal from work. The miners' strike is postponed, at any rate, until January or February, and there is good ground for hope that it will not take place at all. In most quarters the opinion is held that the threatened railway strike will also be averted. The generous concessions made by the railway companies are convincing the men of their employers' willingness to act in a spirit of fairness, and it is not likely that the men will be so foolish as to take up the struggle again for the mere object of securing the "recognition" which their leaders desire. In the meantime, the companies are not idle, and all desirable preparations are being made to cope with any disorderly proceedings.

The London and North Western, the Great Eastern, the London and South Western, the London, Brighton and South Coast, and the Central London are among the railway companies which have accepted an offer by the Volunteer Police Force to take part in the protection of their servants and property in the event of a strike. The force was inaugurated a few weeks ago at a mass meeting held at the Crystal Palace. A hopeful sign this week is that the trade union railwaymen at Crewe, said to number three thousand, and representing the four unions and all grades, have resolved to accept the report of the Commission and to give the suggested scheme contained therein a trial. They ask the Government, however, to arrange at once a round table conference of the Royal Commissioners, the Board of Trade, railway companies and railway trade unions "to discuss the recommendations and suggested schemes as outlined in the report," and to decide upon the definitions and interpretations of the whole, so that the scheme should not be prejudiced by various renderings, and that co-ordination may be secured in its application on all railways in the British Isles.

As a counter stroke, no doubt, to the reports of the preparations which the railway companies are making in view of the threatened general strike of union men, the joint executive committees of the Amalgamated Society of Railway Servants, the Associated Society of Locomotive Engineers and Firemen, the General Railway Workers' Union, and the United Pointsmen and Signalmen's Society have decided to consider the question of a fusion of forces of a permanent character. A sub-committee has been appointed to draw up a scheme to be submitted to a full meeting of the joint body to be convened as early as possible.

The union railwaymen's ballot papers are to be returned by December 5, and the result is expected to be announced on December 11 or 12.

PARLIAMENT AND THE RAILWAY QUESTION.

NEXT WEEK'S DEBATE.

The Labour Party's motion on the railway question will be proposed in the House of Commons on Wednesday next by Mr. Ramsay Macdonald, and seconded by Mr. Brace. It is in the following terms:—

"That this House regrets that the directors of the railway companies have refused to meet the representatives of the men in order to discuss the report of the Royal Commission appointed to inquire into the Railway Conciliation Agreement of 1907, declares such refusal to be contrary to the public interest and to have no justification, and asks the Government to bring both sides into conference without delay."

It is expected that Mr. Buxton will take part in the debate, and possibly Mr. Lloyd George.

Three amendments have been tabled:—

Mr. MacCallum Scott desires the Government "to offer its friendly services to both sides to bring about a conference without delay, and, in the event of the companies refusing to meet the representatives of the unions, to submit to this House a scheme for the nationalisation of the railways."

Mr. Martin, M.P., will move that the Government be asked to introduce a Bill providing for the Government ownership of all railways, with a proviso for a minimum wage for all railway employees, and dealing with the conditions of labour on railways, with a view to finally redressing the grievances which gave rise to the strike in August.

Mr. Kellaway, M.P., will move that the recommendations of the Railway Commission form a very inadequate and temporary remedy, and that the Government should take the necessary steps for nationalisation.

THE GOVERNMENT AND THE IRISH RAILWAY STRIKE.

In the House of Lords on Thursday the Earl of Mayo called attention to the recent railway strike in Ireland, and moved—

"That the Chief Secretary to the Lord Lieutenant of Ireland should have been at his post during the continuance of the strike, when life and property were in danger and when the trade of the country was paralysed." The strike, Lord Mayo said, was really a criminal conspiracy, because its object was not to obtain better terms for the strikers, but to prevent the railway companies from fulfilling their legal obligations. It was accompanied by violence and attempted violence, and yet the Government did nothing. The Lord Lieutenant was away. The Chief Secretary was out of Ireland throughout the conflict, though it lasted nineteen days. He was, in fact, the chief striker. Protection from the violence of the strikers was asked for by the Great Southern and Western Company, which was chiefly concerned, but the response was totally inadequate until the military were called in. The chief originator of the strike was a man named Larkin, who edited a paper called the *Irish Worker*, in which appeared an article representing that a man who deserted from the ranks of labour in time of industrial war forfeited his life. The Government had totally ignored the paper and its language.

The Earl of Desart said that the bulk of the railwaymen had no quarrel with the companies, and had they been assured of protection only a small number of them would have gone on strike.

Viscount Morley (Lord President of the Council) said he thought the House would be of opinion that Lord Mayo did not use the language of good taste when he attacked Mr. Birrell for not attending to his duties, although drawing a large salary. Mr. Birrell was at the end of a telegraph wire the whole time. He knew everything that was done, and was as much responsible for it as if he had been in Ireland. There was no incident in Ireland which was not common to all the strikes which had been going on in this country, and the complaints against the supineness and want of energy of the Irish Government were similar to those which had been heard in this country. Exception had been taken to the expression "keeping the ring," but surely it was the accepted attitude that whilst it was the duty of the Government in industrial strife to see that law and order were preserved—(ironical Opposition cheers)—they should not go beyond the recognised sphere of government. With regard to the odious and detestable extracts read by Lord Mayo, the Law Officers advised that there should not be a prosecution in connection with those newspaper articles. The language of the motion which Lord Mayo proposed was extravagant. Life and property were not in danger during the strike any more than was usual in industrial warfare, and probably a great deal less, and, as a matter of fact, there was not, as a result of the strike, any injury to property, not a life lost, or even a head broken. (Hear, hear.)

The Marquess of Lansdowne (Leader of the Opposition) did

not think the explanation was satisfactory. The situation was one which demanded that the Chief Secretary should be at his post. The strike paralysed business in many parts of Ireland. What was the duty of the Government? Mr. Asquith at the Mansion House the other evening, speaking of industrial warfare, said: "The Executive Government must maintain order, prevent and punish violence, and secure, so far as it can, the community at large against the stoppage of supplies and the suspension of services indispensable necessary for the maintenance of its every-day social life." These, he added, "are duties which no civilised Government, however tangled may be the circumstances of the hour, can afford to ignore or to leave unperformed." The views thus expressed by Mr. Asquith were absolutely sound, and the present attitude of trade unions doubled the obligation which lay on the Government to carry out the policy laid down by him. But what did the Dublin Executive do in the crisis of the railway strike? The Chief Secretary's absence gave a great shock to public confidence, and an equal shock was given by the attempt to employ Larkin as an intermediary between the companies and the men.

Viscount Morley: I understand that the statement about Larkin, unintentionally, of course, is perfectly untrue.

The Earl of Mayo said that Lord Morley's denial compelled him to read a letter which he had received from Mr. Frank Martin, a great timber merchant, whose business had been affected by the strike. It was in these terms: "I beg to say that from the beginning of the timber strike, about August 22, Lord Aberdeen suggested very strongly that I should meet Larkin, a suggestion which I strongly resented." (Hear, hear.)

Viscount Morley: Neither the Chief Secretary nor the Under Secretary know anything about such a communication.

After further discussion the motion was withdrawn.

EXTENDED USE OF OIL FUEL IN AMERICAN ENGINES.

Although, owing to the high price of liquid oil, there are now only about six oil-propelled engines on the Great Eastern Railway, where, under the *regime* of Mr. Holden, the locomotive department carried out extended and satisfactory tests the use of petroleum for locomotives is extending in America. Early this year the Mexican Railway Company converted practically all its engines into those of the oil-burning type, and it is expected that use of oil fuel will make considerable progress in that Republic. Another railway company working in Chili is also taking up the matter. The Tatal Railway Company, which, although it uses Australian coal, which is cheaper than the European coal largely used in South and Central America, has, after extensive trials, adopted the type of engine best suited for oil fuel consumption. The company is now prepared to convert all its engines to the oil-consuming class directly an adequate supply of oil is assured. During the year ended June 30, considerable progress had been made, as out of a total engine mileage of 406,652, no less than 70,040, or 17.22 per cent., were with oil, as compared with only 6.87 per cent. in the preceding twelve months. The economy in working with oil by the company is apparently not expected to be so great as in the case of the Mexican Railway Company, but substantial benefits are expected to accrue. A few days

ago it was announced that the first shipment of crude oil had arrived at Bahia-Blanca from Trinidad, it being understood that the B. A. Pacific Railway Company intended using oil fuel on the Bahia-Blanca North-Eastern section line. A report recently published by the United States Geological Survey, dealing with the subject of the use of oil fuel on American railways, shows that 21,075 miles of railways in that country were traversed by engines burning oil. The total consumption for this purpose during the year 1910 amounted to 24,526,883 barrels, while the aggregate mileage travelled by oil-burning engines amounted to 88,318,497 miles.

THE LATEST OIL-FUEL LOCOMOTIVE.

A modification of the Mallet design is the feature of the latest oil-fuel engine produced by the Baldwin Locomotive Works for the Southern Pacific Railway. The two tanks are semi-cylindrical in shape, and are placed end to end. They have respective capacities for 3,200 gallons of oil and 10,000 gallons of water. The tender frame is composed of 12-in. channels, weighing 40 lb. per foot, and strongly braced transversely, while the end buffers are of cast steel. To operate it the oil tank is partly filled with crude oil, and is simply placed higher than the piece to be heated. If a short, quick heat is required, a few fire-bricks are usually placed around and over the part as a preliminary. There are nearly 1,000 locomotives of the oil-burning type on the Southern Pacific system, and as a rule the oil is carried in tanks built to fit the coal space in the tender. Additional flat tanks, when required, are placed over the coal space or back of it. Gravity supply is depended upon through flexible pipes to the locomotive. The burner used is of the flat jet type, consisting of a flat casting, divided longitudinally by a partition over which the oil flows as it is admitted to the upper cavity. The lower cavity receives the steam for the jet which strikes the oil flowing over the partition, spraying it into the furnace. The aim is completely to atomise the oil near the burner tip in order that it may be immediately vaporised. With the steam jet the oil is sprayed and broken up so as to allow the air, admitted through proper dampers, to mix and the oil to be consumed without damage to the sheets. Tests by Professor Grey, formerly of the University of California, show that temperatures ranging from 2,500 to 2,750 degrees F. are obtained, the latter being the highest observed.

PERSONAL.

Mr. W. Bunch has been presented with a traveller's filter and a vacuum flask on leaving the engineer's department of the North Eastern Railway to take an appointment as bridge inspector on the Federated Malay States Railway.

Mr. C. A. Rowlandson will retire from the position of engineer-in-chief for the Great Central Railway Co. at the end of the year, and will be succeeded by Mr. J. B. Ball on January 1 next.

Mr. E. A. Field, who has been associated with the Canadian Northern Railway Land Department for the past ten years, has been appointed to represent that department in this country. His address is at the head offices of the C.N.R. (Davidson and McRae, general agents), Bond Court, Walbrook, London, E.C.

Mr. H. A. Reed, has been appointed chief engineer of the Manchester Ship Canal Company as from the first of January next, in succession to the late Mr. H. Congreve. Mr. Reed was one of the contractors' engineers engaged on the construction of the canal, and subsequently he had charge of several other important works. He was the contractors' chief engineer on the harbour and dockyard extension at Gibraltar for the Admiralty, a work which took 10 years to construct.

RAILWAY NOTES.

Diploma for a Canadian Exhibit.—The Canadian Northern Railway have been awarded a diploma for their pavilion, which attracted so much attention at the Coronation Exhibition, Shepherd's Bush, London.

An Electric Railway for Constantinople.—Lenz and Co., Ltd., of Berlin, are to construct an electric railway from the centre of the city to the Black Sea, a distance of 32 kilometres, for the Turkish Minister for Public Works, at a cost of £4,000,000.

Canadian Railway Construction.—Two-thirds of the contract work on the National Transcontinental Railway is now completed. Out of 1,845 miles all told, rails were laid on 1,245

miles at the beginning of October. The present indications are that the line will be completed by the end of 1913. Grading on the second section of the Grand Trunk Pacific Railway, between Copper River and a point near Hazelton, will be completed before the end of December, according to Mr. Angus Stewart, a well-known railway contractor.

Permanent Way Institution.—At the council meeting on Saturday the choice of Barrow-in-Furness for the summer meeting of the members was approved. Mr. David L. Rutherford, chief engineer of the Furness Railway, was nominated as president for the coming year. The resignations of the hon. treasurer, Mr. Packham, on his doctor's advice, and of the hon. editor, Mr. Roberts, owing to press of his ordinary work, were recorded with great regret, as expressed in resolutions to that effect, and steps were taken to fill the vacancies when they would occur.

Lighting Instruction Car.—That the Pennsylvania Railroad believes education and efficiency go hand in hand is indicated by the announcement that a train lighting instruction car has just been added to the company's extensive educational facilities for employees. This will be sent to the different points along the lines where electrical forces are maintained, and by means of lectures and demonstrations the men will be given uniform instruction. The apparatus installed in the new car consists of a 32-cell storage battery, a turbo-generator, a variable speed motor with necessary controlling apparatus for driving the axle devices, and a number of axle generators with their regulating equipments. One end of the car has been partitioned off and equipped as an office and sleeping quarters for the instructor. With the instruction car in operation it is intended that all employees whose duties include car lighting shall be taught to care for and operate the various equipments, with the two-fold object of educating those interested and securing uniformity in their work.

Delhi Umballa Kalka Railway.—The report for the year ended June 30 last, states that the earnings of the main line, less Indian income-tax, were during the half-year to December, 1910, £44,516, and for the half-year to June last £45,043, a total of £89,559. An interim dividend for the half-year ended December 31, 1910, of £3½ per cent. was declared on the ordinary stock. After bringing forward the balance from last year of £15,062, providing for interest on debenture and preference stocks, Indian income-tax, transfer of £15,000 to reserve, interest on capital advances, etc., the balance to be dealt with is £51,840. The directors now recommend that a final dividend of £3½ per cent., also a bonus of £1 per cent., be paid on the ordinary stock, making £8 per cent. for the year ended June 30, 1911; and that the balance of £15,840 be carried forward. The steady increases in gross earnings are very satisfactory, both as regards coaching and goods traffic. The net earnings are, under the company's contract, 52 per cent. of the gross earnings. The Kailthal extension was opened for traffic in December, 1910. No definite sanction has yet been received for the construction of the Paniput Jhind extension.

The West Country Riviera

For Autumn Holidays.

Sidmouth, from Peak Hill.

For a delightful holiday at this time of the year the West Country Riviera, extending from the border of Dorset along South-East Devon to Exmouth, is unrivalled. The lovely "garden coast," with the picturesque red cliffs, is extremely beautiful just now when autumn tints impart the wonderful colour schemes which make its scenery famous. Here and there mid hill and dale are ideal sheltered retreats, the better known being Lyme Regis, Seaton and Sidmouth, the latter, according to Ruskin, "being unequalled for transporting landscape and coast scenery." Budleigh Salterton is noted as possessing what is said to be the finest seaside golf course on the South Coast.

Illustrated Guides to these and other holiday resorts in Devon, Cornwall and the Sunny South, together with all information as to Cheap Tickets, Trains, etc., free, upon application to Mr. HENRY HOLMES, Supt. of the line, Waterloo Station, S.E.

(CHARLES J. OWENS, General Manager.

CORRIDOR RESTAURANT-CAR TRAINS
in principal services from London (Waterloo).

IN PARLIAMENT—SESSION 1912.

Great Eastern Railway.

(Widenings and Deviations of Railways and Other Works in Counties of Norfolk, Suffolk, Essex, and Cambridge; River Walls, Pier Widening and Extension of Breakwater at Lowestoft; Reconstruction of Bridge over Regent's Canal in County of London; Tolls, Rates, etc.; Dredging Powers; Reclamation of Lands at Lowestoft; Powers in Connection with River Waveney and Lake Lothing; Compulsory Purchase of Lands and Easements in Counties of London, Middlesex, Essex, Suffolk (Eastern and Western Divisions), Norfolk and Cambridge; Exemption from Section 32 of Lands Clauses Consolidation Act, 1845; Breaking and Stopping up and Repair of Roads, Footpaths, etc.; Extension of Time for Completion of Works Authorised by Great Eastern Railway (General Powers) Act, 1897, the Great Eastern Railway (General Powers) Act, 1898, and the Great Eastern Railway (General Powers) Act, 1900; Alteration or increase of Tolls Rates or Dues at Pier, Fish Market and Harbour at Lowestoft; Compulsory Purchase of Lands by Great Northern and Great Eastern Joint Committee in County of Cambridge; Powers to Company, Great Northern Railway Company, Midland Railway Company, and Joint Committees of any such Companies in Reference to Retention, Sale and Disposal of Superfluous Lands; Agreements with Middlesex County Council as to Bridge Widening at Enfield; Powers to Company as to Sale of Lands at Norwich; Electrification of East London Railway and Powers to Company, London, Brighton, and South Coast Railway Company, Metropolitan Railway Company, Metropolitan District Railway Company, South Eastern Railway Company and London, Chatham, and Dover Railway Company and Joint Committee of such Railway in Connection with the Electrification; Further Capital Powers to Company and Contribution of Funds and Guarantee of Capital by such Companies; Powers to Metropolitan District and London Electric Railway Companies in Reference to Supply of Electricity for such Working; Warrants and Certificates to Bearers for Stock or Debenture Stock; Provisions in regard to Voting Powers of Company's Stockholders, Savings Bank Accounts, and the Appointment of Directors and Auditors; Application of Funds; Further Money Powers to Company; Repeal and Amendment of Acts, etc.).

NOTICE IS HEREBY GIVEN that application is intended to be made to Parliament in the ensuing Session by or on behalf of the Great Eastern Railway Company (in this Notice called "the Company") for leave to bring in a Bill for the following purposes or some of them (that is to say):—

1. To authorise the Company to make and maintain with all necessary and convenient bridges, arches, piers, abutments, walls, piles, embankments, stations, junctions, rails, sidings, buildings, approaches, roads, quays, wharves, groynes, breakwaters, wharf wall retaining works, booms, caissons, coffer dams, feeders, pontoons, landing places, warehouses, mooring buoys, stages, cranes, lifts, machinery, water pipes, pumps and other works and conveniences the following works or some of them or some part or parts thereof (that is to say):—

(a) The following widenings and improvements in the county of Norfolk of the Company's Norwich to Cromer line of railway (that is to say):—

A widening and improvement (No. 1), commencing in the parish and urban district of North Walsham at a point on the said railway half a chain or thereabouts north of the bridge carrying such railway over the Aylsham road, and terminating in the parish of Thorpe Market, in the rural district of Erpingham, at a point on such railway 10 chains or thereabouts south of the centre of the Gunton Station buildings.

The said widening and improvement (No. 1) will be made or pass from, in, through or into the following parishes or some of them (that is to say):—The said parish of North Walsham, the parish of Antingham, in the said rural district of Erpingham, and the said parish of Thorpe Market.

A widening and improvement (No. 2), commencing in the said parish of Thorpe Market at a point on the said railway one chain or thereabouts north of the centre of Gunton Station buildings, and terminating in the parish of Northrepps, in the said rural district of Erpingham, at a point on the said railway at or near the junction thereof with the Company's Sheringham loop line.

The said widening and improvement (No. 2) will be made or pass from, in, through or into the following parishes or some of them (that is to say):—The said parish of Thorpe Market, the parish of Southrepps, in the said rural district of Erpingham, and the said parish of Northrepps.

(b) A widening and improvement (No. 3) in the county of Essex of the Company's Clacton branch railway, commencing in the parish of Thorpe-le-Soken, in the rural district of Tendring, at a point on the said railway 3½ chains or thereabouts east of the centre of Thorpe-le-Soken Station buildings, and terminating in the parish of Great Clacton, in the urban district of Clacton at a point on the said railway 4 chains or thereabouts north of the northern end of the centre platform of Clacton Station.

The said widening and improvement (No. 3) will be made or pass from, in, through or into the following parishes or some of them (that is to say):—The said parish of Thorpe-le-Soken, the parish of Little Clacton, in the said rural district of Tendring, and the said parish of Great Clacton.

(c) The following widenings and improvements in the county of Suffolk (Eastern Division) of the Company's Felixstowe branch railway (that is to say):—

A widening and improvement (No. 4), wholly in the parish and county borough of Ipswich, commencing at a point on the said railway 7½ chains or thereabouts east of the junction of the said branch railway with the Company's main line, and terminating at a point on the said branch railway half a chain or thereabouts north of the centre of the bridge carrying Derby road over the said branch railway.

A widening and improvement (No. 5) commencing in the said parish and county borough of Ipswich at a point on the said branch railway 64 chains or thereabouts south of the centre of Derby road Station buildings, and terminating in the parish of Naeton, in the rural district of Woolbridge, at a point on the said branch railway 2½ chains or thereabouts north-west of the centre of Orwell Station buildings.

The said widening and improvement (No. 5) will be made or pass from, in, through or into the following parishes or some of them (that is to say):—The said parish of Ipswich, the parish of Aldeburgh Priory, in the said rural district of Woolbridge, and the said parish of Naeton.

A widening and improvement (No. 6), commencing in the said parish of Naeton at a point on the said branch railway 3 chains or thereabouts south-east of the centre of Orwell Station buildings, and terminating in the parish of Trimley St. Mary, in the said rural district of Woolbridge, at a point on the said branch railway 7½ chains or thereabouts north-west of the centre of Trimley Station buildings.

The said widening and improvement (No. 6) will be made or pass from, in, through or into the following parishes or some of them (that is to say):—The said parish of Naeton, the parishes of Lexington, Stratton Hall, and Trimley St. Martin, in the said rural district of Woolbridge, and the said parish of Trimley St. Mary.

A widening and improvement (No. 7), commencing in the said parish of Trimley St. Mary at a point on the said branch railway 7½ chains or thereabouts south-east of the centre of Trimley Station buildings, and terminating in the parish of Walton, in the urban district of Felixstowe and Walton at a point on the said branch railway one chain or thereabouts west of the bridge carrying Garrison Lane over such railway.

(d) A widening and improvement (No. 8) of the Company's Ely and Newmarket branch railway, commencing in the parish of Ely St. Mary, in the county of Cambridge, at a point on the said branch railway immediately opposite the signal box at Dock Junction, and terminating in the parish of Soham, in the rural district of Newmarket, in the county of Cambridge, at a point on such branch railway one chain or thereabouts measured in a northerly direction along such branch railway from Barroway siding signal-box.

The said widening and improvement (No. 8) will be made or pass from, in, through, or into the following parishes or some of them (that is to say):—The said parish of Ely St. Mary, the parish of Ely Trinity, in the said urban district of Ely, and the said parish of Soham.

(e) A widening and improvement (No. 9) in the county of Cambridge of the Company's Cambridge main line, commencing in the parish of Whittlesford, in the rural district of Linton, at a point on such railway 10½ chains south of the centre of the bridge carrying such railway over the River Cam, and terminating in the parish of Sawston, in the said rural district of Linton, at a point on such railway ½ chain or thereabouts south of the Sawston Siding signal-box.

(f) The following deviations and improvements of the Company's Beccles to Yarmouth line and works in connection therewith (that is to say):—

(1) A deviation and improvement (No. 1) commencing in the parish and borough of Beccles, in the county of Suffolk (Eastern Division), at a point on such railway 20 chains or thereabouts south of the centre of the swing bridge carrying the said railway over the River Waveney, in the said parish of Beccles, and terminating in the parish of Aldeby in the rural district of Loddon and Claverigg, in the county of Norfolk, at a point on the said railway 18 chains or thereabouts north of the centre of the said swing bridge, together with a swing bridge for carrying the said railway where so deviated over the River Waveney.

(2) A deviation and improvement (No. 2) commencing in the parish of Haddiscoe, in the said rural district of Loddon and Claverigg, in the county of Norfolk, at a point on such railway 7 chains or thereabouts south of the centre of the bridge carrying such railway over the River Waveney, near St. Olaves Station, and terminating in the parish of Herringfleet, in the rural district of Mutford and Lothingham, in the county of Suffolk (Eastern Division) at a point on such railway 10 chains or thereabouts north of the centre of such bridge, together with a swing bridge for carrying the said railway where so deviated over the River Waveney,

and in connection with such deviations and improve-

ments the Bill will or may authorise the taking down and abandonment, by the Company of the existing swing bridges, and confer on the Company all necessary powers for working the new swing bridges.

(g) The reconstruction, widening, and lengthening in the said parish and county borough of Ipswich of the existing bridge carrying the Company's Colchester main line over Auncaster-road, viz., a widening on the north side of the railway for a width of 10 feet and on the south side for a width of 18 feet, and a lengthening of the bridge on the east side for a length of 14 feet and on the west side for a length of 10 feet and in connection with such reconstruction widening and lengthening a widening of Auncaster-road underneath the reconstructed bridge.

(h) A river wall or embankment (No. 1), in the parish and borough of Lowestoft, in the county of Suffolk (Eastern Division), upon the bed and shore of Lake Lothing, on the north side thereof, commencing at a point in such lake 16½ chains or thereabouts, measured in a north-westerly direction from the south-west corner of the southern end of Chambers' Slipway, and extending in a south-easterly direction to a point 1½ chains, measured in a north-westerly direction from the said south-west corner of Chambers' Slipway, and there terminating.

(i) A river wall or embankment (No. 2) in the said parish and borough of Lowestoft on the bed and shore of the said Lake Lothing, on the north side thereof, commencing at a point in such lake 6½ chains or thereabouts, measured in a south-easterly direction from the said south-west corner of Chambers' Slipway and extending in a south-easterly direction for a distance of 10 chains and there terminating.

(j) A widening in the said parish and borough of Lowestoft and on the foreshore and bed of the sea of the Company's existing South Pier on its south side, commencing at the shore end of such pier, and terminating at a point 8 chains or thereabouts measured in an easterly direction along such pier.

(k) An extension in the said parish and borough of Lowestoft and on the foreshore and bed of the sea of the existing breakwater belonging to the Mayor, Aldermen, and Burgesses of the borough of Lowestoft (hereafter called "the Lowestoft Corporation"), situate on and adjoining the south side of the Company's said pier for a distance of 27 feet or thereabouts in a south-westerly direction,

and the Bill will or may provide for the vesting of such extension in the Lowestoft Corporation as part of the existing breakwater.

(l) The alteration, strengthening and reconstruction in the parish of St. Anne, Linchouse, in the metropolitan borough of Stepney, in the county of London, of the bridge carrying the London and Blackwall Railway over the Regent's Canal, near Regent's Wharf.

2. To authorise the Company in the construction of the aforesaid works to deviate from the lines and levels thereof shown on the plans and sections to be deposited as hereinafter mentioned, and to stop up, alter or divert temporarily or permanently the River Waveney and Lake Lothing and the channels and navigation thereof at or near the sites of the aforesaid swing bridges and river walls or embankments or either of them, and the Regent's Canal and the banks, channel, and tow-paths thereof at or near the said bridge carrying the London and Blackwall Railway over the same, and all or any roads, streets, foot-paths or other highways, tow-paths, bridges, rivers, canals, streams, watercourses, sewers, drains, pipes, telegraphic and other tubes, wires and apparatus, and all other constructions or works of any description which it may be necessary or convenient to stop up, alter, or divert for any of the purposes of the Bill, and to provide that the Company shall not be liable under section 46 of the Railways Clauses Consolidation Act, 1845, to maintain the surface of any road or public highway which shall be carried over any of the intended widenings and improvements or deviations and improvements of railways by a bridge or the immediate approaches thereof except so far as the level of such road, highway or approaches is permanently altered.

3. To authorise the Company to demand, levy, take and recover tolls, rates, and charges for or in respect of the aforesaid works, and to confer exemptions from the payments of such tolls, rates, and charges respectively.

4. To authorise the Company to dredge and deepen the channel and bed of the River Waveney and Lake Lothing at or near the sites of the said swing bridges or adjoining or near to the intended river walls or embankments and for the purpose of obtaining access thereto.

5. To enable the Company to enclose and reclaim the portions of the foreshore and bed of Lake Lothing which will lie between the intended river walls and embankments respectively and the northern bank of such lake, and to vest or provide for the vesting of the same in the Company.

6. To enable the Company from time to time to remove all or any works of or connected with their Lowestoft Harbour and the said South Pier as now existing, the maintenance of which may be rendered unnecessary by or the removal of which may be considered expedient in consequence of the construction of the proposed pier widening, and to excavate and dredge the area forming the site of or adjoining or near to the proposed pier widening and breakwater extension.

7. To constitute the proposed pier widening part of the existing South Pier above mentioned, and of the Company's Fish Market at Lowestoft for the purposes of tolls, rates and charges, by-laws, rules and regulations, the powers and duties of the harbour master,

PARLIAMENTARY NOTICES—(Continued).

and all or any other purposes, and to apply to the proposed pier widening all or some of the provisions of the Acts relating to the said existing pier and fish market.

8. To incorporate with the Bill and make applicable to the Company and to the proposed pier widening the provisions of the Harbours, Docks and Piers Clauses Act, 1847, with such exceptions and modifications as may be provided by the Bill.

9. To authorise the Company to purchase by agreement additional lands for extraordinary purposes, and for getting ballast and materials, and for any other purposes of their undertaking.

10. To authorise the Company for the purposes of the aforesaid works and of the Bill to purchase by compulsion or agreement lands (including the bed and foreshore of Lake Lothing and the River Waveney and of the sea), and buildings and rights and easements in, over, under or affecting lands and buildings in the aforesaid parishes, and also to purchase by compulsion or agreement for the purposes of extending or affording access to their railways, stations, sidings, warehouses, buildings, wharves, depôts, and other accommodation, and for the general purposes of their undertaking the lands and buildings hereinafter described or referred to or some of them or some part or parts thereof respectively, and any rights or easements or outstanding estates or interest in, over, under or affecting any of such lands and buildings, and to confirm and sanction the purchase by the Company of any of such lands or buildings which may have been or may be acquired by them, and the expenditure of money for or in connection with any such purchase (that is to say):—

In the County of London.

Lands and buildings in the parish of St. George in the East, in the metropolitan borough of Stepney, being the properties numbered 107 and 109, Cable-street.

In the County of Middlesex.

A strip of land in the parish and urban district of Enfield, situate on and adjoining the south-west side of the Company's engine shed and sidings at their Enfield Town Station.

In the County of Essex.

(a) A strip of land in the parish of Bradfield, in the rural district of Tendring, situate on and adjoining the south side of the Company's Harwich branch railway and being a portion of the property numbered on the Ordnance Map (scale 1:2500 2nd edition, 1897) 282 in such parish.

(b) A strip of land in the parish and borough of Colchester, situate on and adjoining the north side of the Company's station yard at Colchester and being portions of the properties numbered respectively on the Ordnance Map (scale 1:2500 2nd edition, 1897) 577 and 583 in such parish.

(c) A piece of land in the parish and county borough of West Ham forming the south-easterly portion of the disused brick-field belonging to Gerard Thomas Manby Colegrave, and situate on the northern side of the Company's High Meads loop railway.

(d) A strip of land in the parish of Weeley, in the rural district of Tendring, situate on the northern side of the Company's Clacton branch railway and being portions of the properties numbered respectively on the Ordnance Map (scale 1:2500 2nd edition, 1897) 34 and 44 in such parish.

(e) A strip of land in the said parish of Weeley situate on the north-eastern side of the said branch railway, being portions of the properties numbered respectively on the Ordnance Map (scale 1:2500 2nd edition, 1897) 45, 71, 75 and 76 in such parish.

(f) A strip of land in the parish and urban district of Buckhurst Hill situate on the north side of the Company's Woodford to Ilford branch railway and a strip of land in the same parish situate on the south side of the said branch railway, being portions of the property numbered on the Ordnance Map (scale 1:2500 2nd edition, 1896) 5 in such parish.

(g) Three strips of land in the parish of Chigwell in the rural district of Epping on the north side of the said Woodford to Ilford branch railway, being respectively portions of the properties numbered respectively on the Ordnance Map (scale 1:2500 2nd edition, 1896) 112, 106, and 87 in such parish.

(h) Three strips of land in the said parish of Chigwell on the south side of the said Woodford to Ilford branch railway, being respectively portions of the properties numbered respectively on the Ordnance Map (scale 1:2500 2nd edition, 1896) 108, 107 and 105 in such parish.

(i) A strip of land in the parish and urban district of Romford situate on and adjoining the north-west side of the Company's Squirrels Heath Station on the Company's Colchester main line.

(j) A strip of land in the said parish and urban district of Romford situate on and adjoining the south-east side of the Company's said Squirrels Heath Station.

(k) A piece of land in the parish of Hornchurch, in the rural district of Romford, situate on the south-east side of the Company's Colchester main line near Harold Wood Station, being the property numbered on the Ordnance Map (scale 1:2500 2nd edition, 1896) 49 in such parish.

In the County of Suffolk (Eastern Division.)

(a) A strip of land in the parish and urban district of Leiston-cum-Sizewell, situate on and adjoining the south side of the Company's Leiston Station, being portions of the properties numbered respectively on the Ordnance Map (scale 1:2500 2nd edition, 1904) 355, 358, 360, and 362 in such parish.

(b) A strip of land in the parish and county borough of Ipswich situate on and adjoining the

north side of the Company's Westerfield Station, being a portion of the property numbered on the Ordnance Map (scale 1:2500 2nd edition, 1904) 1118 in such parish.

(c) Two houses in the parish and borough of Lowestoft, being the properties numbered 23 and 24 in Commercial-road.

In the County of Suffolk (Western Division.)

A strip of land in the parish of Brandon, in the rural district of Brandon, situate on and adjoining the south side of Lakenheath Station, being a portion of the property numbered on the Ordnance Map (scale 1:2500, 2nd edition, 1905) 27 in such parish.

In the County of Norfolk.

(a) In the parish of Brundall, in the rural district of Blofield:—

(1) A piece of land situate on the north-east side of the Brundall Station of the Company, and being part of the property numbered on the Ordnance Map (scale 1:2500 2nd edition, 1907) 251 in the said parish.

(2) A piece of land situate on the north side of the Company's Brundall, Acle and Yarmouth line near Brundall Station, being the property numbered on the Ordnance Map (scale 1:2500 2nd edition, 1907) 245 in the said parish, and part of the property numbered on the said Ordnance Map 246 in the said parish.

(b) A strip of land in the parish of Wymondham, in the rural district of Foreham, situate on and adjoining the south-east side of the Company's Spooner Row Station, being a portion of the property numbered on the Ordnance Map (scale 1:2500 2nd edition, 1905) 2013 in such parish.

(c) In the parish of Wolferton, in the rural district of Freebridge Lynn.

(1) A strip of land situate on the south-east side of and adjoining the Company's sidings on the west side of Wolferton Station, being part of the properties numbered on the Ordnance Map (scale 1:2500 2nd edition, 1905) 145 and 154 in the said parish.

(2) Three strips of land situate on the south-east side of and adjoining the Company's Wolferton Station, and being portions of the property numbered on the Ordnance Map (scale 1:2500 2nd edition, 1905) 163 in the said parish.

(3) A strip of land situate on the south-east side of and adjoining the Company's Wolferton Station, being a portion of the property numbered on the Ordnance Map (scale 1:2500 2nd edition, 1905) 158 in the said parish.

(4) Three pieces of land situate on and adjoining the north-west side of the Company's Wolferton Station, being respectively portions of the properties numbered respectively on the Ordnance Map (scale 1:2500 2nd edition, 1905) 157a and 157b, 157 and 157b, and 165a, in the said parish.

In the County of Cambridge.

A strip of land in the parish of Oakington, in the rural district of Chesterton, situate on and adjoining the west side of Oakington Station, being a portion of the property numbered on the Ordnance Map (scale 1:2500 2nd edition, 1902) 11 in such parish.

In the Isle of Ely, in the County of Cambridge.

A triangular piece of land in the parish of Ely Trinity, in the urban district of Ely, situate on the south side of and adjoining the Company's railway or siding known as Padnal siding.

11. To authorise the purchase by the Company of so much only of any house, building, manufactory or property as may be required for the purposes of the intended works or of the Bill notwithstanding anything contained in the 92nd section of the Lands Clauses Consolidation Act, 1845.

12. To extinguish all public or private rights of way or other rights, if any, over or affecting any street, road, footpath or way to be diverted or stopped up under the Bill, and to vest in the Company or the adjoining owners or partly in one and partly in the other the site and soil of the street, road, footpath, or way stopped up, freed and discharged from all or any such rights, and to provide for the dedication to and repair by the public, or in such manner as the Bill may prescribe of any street, road, footpath or way to be constructed or diverted under the Bill.

13. To further extend the periods now respectively limited for the completion of, and if necessary, to revive the powers for the construction of the following works, namely:—

(a) The widening and improvement authorised by section 5, sub-section (F) of the Great Eastern Railway (General Powers) Act, 1897, of the Company's Ware and Hertford Branch Railway.

(b) The widening authorised by section 5, sub-section 3 (A) of the Great Eastern Railway (General Powers) Act, 1898 (hereinafter called "the Act of 1898") of the Company's siding or line of rails, and of the bridge over the River Orwell mentioned respectively in that sub-section.

(c) The works (widening of bridge at Ipswich, and additional line or lines of rails) authorised by section 5, sub-section 3 (C) of the Act of 1898.

(d) The widening and improvement (No. 2) of the Company's main line at West Ham authorised by section 4, sub-section (D) of the Great Eastern Railway (General Powers) Act, 1900.

14. To alter or increase the tolls, rates or dues which, under the provisions of section 16 of the Great Eastern Railway (Capital, &c) Act, 1865, or of section 30 of the Great Eastern Railway Act, 1903, or otherwise, the Company are now entitled to demand and take for, or in respect of their South Pier, Fish Market and Harbour at Lowestoft.

15. To authorise the Great Northern and Great Eastern Joint Committee to purchase by compulsion or agreement for the general purposes of their under-

taking the lands hereinafter described or referred to, or some of them or some part or parts thereof respectively, and any rights or easements or outstanding estates or interests in, over, under or affecting any of such lands (that is to say):—

A piece of land in the parish and urban district of Chatteris, in the Isle of Ely, in the county of Cambridge, situate on the west side of the Great Northern and Great Eastern Joint Committee's Chatteris Lock Goods Station, and being the property numbered on the Ordnance Map (scale 1:2500, 2nd edition, 1902) 101, in such parish.

16. To extend or further extend the period or periods now respectively limited for, and within which, the Company or any other company whose undertaking is leased to, or worked by the Company or the Great Northern Railway Company and the Company jointly, or the Great Northern and Great Eastern Joint Committee, or the Midland Railway Company and the Company jointly, or the Midland and Great Northern Railway Companies and the Company jointly, or the Norfolk and Suffolk Joint Railways Committee or the Company and any other company or companies possessed of lands or an undertaking jointly with the Company and any joint committee incorporated or constituted by Act of Parliament of the Company and any other company or companies or any joint committee on which the Company may be represented, or any or either of those companies or committees may respectively hold, sell and dispose of any superfluous lands connected with the railways of, or vested in, or leased to or worked or managed by them respectively, and to empower the Company, and such other companies, and such joint committees, notwithstanding anything to the contrary contained in the Lands Clauses Consolidation Act, 1845, or any Act relating to the Company or any of the said companies, or any such joint committee with which that Act is incorporated, to retain, hold and use such lands, and notwithstanding as aforesaid to sell, lease or otherwise dispose of, or grant easements over, free from any restrictions contained in such Acts, any lands, buildings and premises acquired, held or vested in, or to be acquired by the Company or any of the said companies, or any such joint committee, for the purposes of, or in connection with the railways and works of, or leased to or worked or managed by the Company or any such companies or joint committee, or for the purpose of providing accommodation for persons of the working class, or for any other purpose, which have not yet been applied to those purposes, or sold or disposed of, or which are not immediately or may not hereafter be required to be used for those purposes.

17. To authorise the Company to sell to the county council of the administrative county of Middlesex (hereinafter called "the Middlesex County Council"), and to authorise the Middlesex County Council to purchase or acquire an easement or right of user of certain lands belonging to the Company in the parish and urban district of Enfield, in the county of Middlesex, forming the embankments supporting the road known as Southbury Road and the bridge whereby such road is carried over the railways of the Company near Churchbury Station (hereinafter called the railway bridge), and to enable the Company and the Middlesex County Council to enter into contracts or agreements for such purpose, and with reference to the widening of the railway bridge and the approaches thereto, either by the Company or the Middlesex County Council, and the execution of any works in connection therewith, or in connection with or necessitated by the railways authorised by the county of Middlesex (Waltham Cross and Enfield) Light Railways Order, 1906, so far as the same are constructed over the railway or the approaches to the railway bridge, and the payment by the Middlesex County Council of the expenses relating to all or any such works, and in reference to the maintenance, repair, and lighting of the said railway bridge and approaches and the roadway and footpaths over the same by the Middlesex County Council, and indemnifying the Company against liability in respect of any such maintenance and repair, and to confirm and make valid any contract or agreement that may have already been entered into by the Company and the Middlesex County Council in reference to such matters, and more especially but not exclusively to confirm the execution by the Company of the works of widening the said railway bridge and approaches to a width of 60 feet, and to sanction any payments made by the Middlesex County Council to the Company in respect thereof.

18. To authorise the Company, notwithstanding anything in any Acts relating to the Company or the Acts incorporated therewith, to sell to J. and J. Colman, Ltd., certain lands situate at Trowse, in the city of Norwich, in the county of Norfolk, containing by admeasurement 1,087 square yards or thereabouts, in the occupation of J. and J. Colman, Ltd., and now used as a seed warehouse, and being portions of lands leased by the Company to J. and J. Colman, Ltd., by an indenture of lease, dated the 25th December, 1895, and to Messrs. J. and J. Colman, the predecessors in title of J. and J. Colman, Ltd., by an agreement dated the 28th October, 1869, and subject to a condition for the repurchase of such lands by the Company in the event of such lands being at any time required for purposes connected with the Company's railway, and to enable the Company and J. and J. Colman, Ltd., to enter into agreements for such purposes, and to confirm and make valid any provisional agreement which may have already been made between the Company and J. and J. Colman, Ltd., and to enable the same to be carried out by the said parties.

19. To empower the Company, the London, Brighton

PARLIAMENTARY NOTICES (Continued).

and South Coast Railway Company, the Metropolitan Railway Company, the Metropolitan District Railway Company, the South Eastern Railway Company, and the London, Chatham and Dover Railway Company (hereinafter in this Notice referred to as "the lessee companies"), or the joint committee for the management and control of the East London Railway, appointed in pursuance of the East London Railway Act, 1882 (hereinafter called "the joint committee"), to work the East London Railway and any extensions thereof by electrical power, and for that purpose to lay down, erect, maintain, and use electric cables, conductors, mains, wires, posts, brackets, tubes, transformer stations, lifts and apparatus necessary or convenient for such working and to make such alterations in such railway and in any stations and works connected therewith as may be necessary to adapt the same for working by electrical power, and for those purposes to break up and interfere with roads, highways, streets, bridges, sewers, drains, and apparatus over, under, or across which such railway passes, and to empower the lessee companies and the joint committee on the one hand, and the Metropolitan District Railway Company and the London Electric Railway Company, or either of such companies, and any other company, authority, or person, on the other hand, to enter into and fulfil contracts and agreements for the supply to the lessee companies or the joint committee by the Metropolitan District Railway Company and the London Electric Railway Company, or either of them, or such other company, authority, or person of electrical energy or power required for the working of the East London Railway, and if and so far as may be necessary to confer upon the Metropolitan District Railway Company and the London Electric Railway Company, or either of them, or any other company, authority, or person power to afford such supply for use outside any area within which they are authorised to supply electricity and to apply their funds for such purpose.

20. To make provision for the contribution by the lessee companies of the funds required for the purposes of works of electrification of the East London Railway in such shares and proportion as may be prescribed by the Bill or agreed between the lessee companies, and to enable the Company or the directors of the Company without further authority for such purpose to raise or borrow and appropriate any capital which the Company may have power to raise or borrow, and which may not be required for any of the purposes for which the same is now authorised to be raised or borrowed, and to raise further capital by the creation and issue of ordinary or preference stock or debenture stock and by mortgage or by either of such means, and to make provision for the guarantee by all or any of the other of the lessee companies of the principal and interest secured by any such stock or debenture stock or mortgage created and issued by the Company. To provide for the repayment to the Company out of moneys so raised of any expenses incurred by them in raising capital for the purposes of such works and of a proper proportion of the costs and expenses incurred in obtaining the intended Act, and for the payment to the lessee companies or the joint committee of moneys required for such works from time to time, and for the advance by the Company of moneys from time to time necessary for such works, and the repayment by the lessee companies out of the moneys so to be raised with interest to the Company of moneys so advanced, and to make provision for the payment or repayment to the Company by the lessee companies or any of them of the interest paid or payable on any such stock or debenture stock or mortgage created or issued by the Company, and the manner and proportions in which such interest is to be ultimately paid, contributed and borne by the lessee companies respectively.

21. To make provision for the payment of the interest on any such stock or debenture stock or mortgages so created or issued as aforesaid out of the annual receipts from traffic of the East London Railway, and as part of the working expenses of such railway, and for such purposes to alter or amend the provisions of the East London Railway Act, 1882, and particularly section 39 of that Act, and the lease dated the 30th March, 1883, made between the East London Railway Company and the lessee companies, and to repeal or amend such of the provisions of section 39 of the Act of 1882 as provides for the revision of the proportion of the gross receipts to be allowed for working expenses of the East London Railway Company and to make further provision with respect thereto.

22. To confirm and give effect to any agreements which may be entered into between the East London Railway Company and the lessee companies or the lessee companies between themselves with reference to any of the matters aforesaid, and to sanction and confirm any works which may have been carried out in pursuance thereof.

23. To authorise the Company or the directors of the Company without further authority for all or any of the purposes of the Bill or other the purposes of the Company to apply the funds of the Company, and to raise or borrow and appropriate any capital and to empower the Company to have power to raise or borrow, and also to authorise the London, Brighton and South Coast Railway Company, the Metropolitan Railway Company, the Metropolitan District Railway Company, the South Eastern Railway Company, the London, Chatham and Dover Railway Company, and the Great Northern and Great Eastern joint committee for the purposes of the Bill relating to such companies and joint committee respectively or to their respective undertakings to apply their respec-

tive funds and to raise or borrow or appropriate any capital which they may respectively have power to raise or borrow.

24. To authorise and provide for the issue by the Company of warrants or certificates (transferable by delivery) for the amount of any stock or debenture stock of the Company to which any person is or may become entitled, and to provide for the payment by means of coupons, or otherwise of dividends or interest on the stock or debenture stock included in any such warrant or certificate, and to make any necessary or incidental provisions with regard to the issue, registration, loss or destruction of any such warrants, certificates or coupons, and the transfer of any stock or debenture stock included in any such warrants or certificates, and with regard to the rights, privileges and obligations of the holders of such warrants or certificates, and in reference to meetings of and voting and exercise of other rights by holders of such warrants or certificates, and to applications to Parliament by the Company affecting such rights, and to the giving of notices to such holders, and to enable the directors of the Company to make regulations with reference to all or any of the above matters, to empower trustees and others acting in a fiduciary capacity to hold such warrants or certificates, and for all or any such purposes to amend, alter or repeal the provisions of any of the existing Acts relating to the Company or the Acts incorporated therewith.

25. To authorise the Company for all or any of the purposes of the Bill or other the purposes of the Company to raise further capital by the creation and issue of ordinary or deferred stock or by preference stock or preference stock convertible into ordinary stock at such times and upon such terms (pecuniary or other) and conditions as they may think proper or the Bill may prescribe, and by debenture stock and by mortgage or by any or either of such means.

26. To alter and to define, prescribe and regulate the voting powers of the shareholders and stockholders of the Company in respect of the new capital.

27. To enable the Company or the Directors of the Company without further authority in addition to any other powers of borrowing conferred upon them to create and issue debenture stock for the purpose from time to time of the investment of the funds forming part of the new superannuation fund established under the provisions of section 42 of the Great Eastern Railway (General Powers) Act, 1897, and the new pension fund and the new pension supplemental fund established under the provisions of the Great Eastern Railway (Pensions) Act, 1898, and to make further provision for the allotment thereof and as to the investment of such funds.

28. To alter the date up to which, under the provisions of section 50 of the Great Eastern Railway (General Powers) Act, 1878, and the rules made or to be made thereunder, the annual general statement (as audited) of the receipts and expenditure, funds and effects of any Savings Bank established under the said section is to be made out and the date on or before which such statement with a copy of the auditor's report must be sent to the Registrar of Friendly Societies (or to the Commissioners for the Reduction of the National Debt), and so far as may be necessary or expedient in that behalf to amend the said section and to provide for an alteration of the said rules.

29. To vary the times at which the directors and auditors of the Company shall be elected or appointed to provide for the continuance in office of existing directors and auditors beyond the times limited by the existing Acts of the Company or otherwise, or the Companies Clauses Consolidation Act, 1845, as the duration of office of directors and auditors, and to enable the directors of the Company to fill casual vacancies in the office of auditor, and so far as may be necessary or expedient in that behalf to amend the provisions of the Great Eastern Railway Act, 1862, or any other Act or Acts of the Company or otherwise relating to the election or appointment of directors or auditors, and to exempt the Company from the operation of the provisions of the Companies Clauses Consolidation Act, 1845.

30. To alter, amend, extend or repeal the provisions or some of the provisions of the several local and personal Acts and the Order following (that is to say):

The Acts 25 and 26 Viet. cap. 223, 28 Viet. cap. 100, 28 and 29 Viet. cap. 184, 41 and 42 Viet. cap. 155, 60 Viet. cap. 33, 60 and 61 Viet. cap. 95, 61 and 62 Viet. caps. 66 and 121, 63 and 64 Viet. cap. 110, 1 Edw. VII. cap. 90, and 3 Edw. VII. cap. 43 and any other Act or Acts relating to the Company or their undertakings; 8 and 9 Viet. cap. 203 and any other Act or Acts relating to the London and Blackwall Railway Company or their undertaking; 9 and 10 Viet. cap. 71 and any other Act or Acts relating to the Great Northern Railway Company or their undertaking; 42 and 43 Viet. cap. 110, and 50 and 51 Viet. cap. 161, and any other Act or Acts relating to the Great Northern and Great Eastern Joint Committee or their undertaking; 7 and 8 Viet. cap. 18, and any other Act or Acts relating to the Midland Railway Company or their undertaking; 25 and 26 Viet. cap. 200, and 29 and 30 Viet. cap. 175, and any other Act or Acts relating to the Tottenham and Hampstead Junction Railway; 61 and 62 Viet. cap. 120, and any other Act or Acts relating to the Norfolk and Suffolk Joint Railways Committee or their undertaking; 9 and 10 Viet. cap. 283, and any other Act or Acts relating to the London Brighton and South Coast Railway

Company or their undertaking; 17 and 18 Viet. cap. 221, and any other Act or Acts relating to the Metropolitan Railway Company or their undertaking; 27 and 28 Viet. cap. 322, and any other Act or Acts relating to the Metropolitan District Railway Company or their undertaking; 6 Will. IV. cap. 76, and any other Act or Acts relating to the South Eastern Railway Company or their undertaking; 16 and 17 Viet. cap. 132, and any other Act or Acts relating to the London, Chatham and Dover Railway Company or their undertaking; 28 Viet. cap. 147 and 46 Viet. cap. 181, and 46 and 47 Viet. cap. 1, and any other Act or Acts relating to the East London Railway Company or to the Joint Committee of the undertaking; 10 Edw. VII. and 1 Geo. V. cap. 32, and any other Act or Acts relating to the London Electric Railway Company; 45 and 46 Viet. cap. 22, and any other Act or Acts relating to the Regent's Canal and Dock Company or their undertaking, and the County of Middlesex, Waltham Cross and Enfield Light Railways Order, 1900, and any other Order or any Act relating to the Middlesex County Council or to the Administrative County of Middlesex.

31. To vary or extinguish all rights and privileges inconsistent with or which would in any way interfere with the purposes of the Bill and to confer other rights and privileges.

Plans and sections showing the lines, situations and levels of the works proposed to be authorised by the Bill (so far as the same are works of the second class mentioned in the Standing Orders of either House of Parliament), and the lands and other property in or through which the same will be made or pass or be situated, and plans of the other lands and property intended to be compulsorily taken or used under the powers of the Bill, together with books of reference to such plans, respectively containing the names of the owner, and lessee, or reputed owners and lessees, and of the occupiers of such lands and other property, together with in the case of each deposit a copy of this Notice as published in the London Gazette, will on or before the 30th day of November instant, be deposited for public inspection as follows (that is to say):—

As regards works and lands in the county of Norfolk and works and lands partly in that county and partly in the county of Suffolk (Eastern Division) with the Clerk of the Peace for the county of Norfolk at his office at Norwich.

As regards works and lands in the county of Essex with the Clerk of the Peace for that county at his office at Chelmsford.

As regards works and lands in the county of Suffolk (whether Eastern or Western Divisions), and works and lands partly in that county and partly in the county of Norfolk, with the Clerk of the Peace for the Eastern Division of the county of Suffolk at his office at Ipswich, and with the Clerk of the Peace for the Western Division of the county of Suffolk at his office at Bury St. Edmunds.

As regards lands in the Isle of Ely, in the county of Cambridge, and works and lands, partly in the Isle of Ely and partly in the county of Cambridge outside the Isle of Ely, with the Clerk of the Peace for the Isle of Ely, at his office at Wisbech, and as regards such works and lands and other works and lands in the county of Cambridge with the Clerk of the Peace for the county of Cambridge at his office at Cambridge.

As regards works and lands in the county of London with the Clerk of the Peace for that county at his office at the Sessions House, Newington Causeway, S.E.

As regards lands in the county of Middlesex with the Clerk of the Peace for that county at his office at No. 63, Victoria-street, Westminster.

And on or before the same day copies of so much of the said plans, sections and book of reference as relate to each of the areas hereinafter mentioned in or through which the works proposed to be authorised by the Bill will be made, or in which any lands or other property intended to be taken or used compulsorily are situated, together with a copy of this Notice, will be deposited for public inspection as follows (that is to say):—

As relates to any metropolitan county or other borough with the town clerk of such borough at his office.

As relates to any urban district not being a borough or to any rural district with the clerk of the district council of such district at his office; and

As relates to any parish comprised in a rural district other than the parishes next hereinafter mentioned, with the clerk of the parish council, or if there be no clerk, with the chairman of that council; and as relates to each of the following parishes (that is to say):—Alcshourn Priory, Lexington, Stratton Hall, Herringfleet, and Wolferton, with the chairman of the parish meeting of such parish; and such deposit will, if made with the clerk to the parish council, be made at his office, or, if he has no office, at his residence and if made with the chairman of the parish council or chairman of the parish meeting, be made at his residence.

Printed copies of the Bill will be deposited in the Private Bill Office of the House of Commons on or before the 16th day of December next.

Dated this 16th day of November, 1911.

EDWARD MOORE, Liverpool-street Station, E.C., Solicitor for the Bill.
REES AND FREER, 5, Victoria-street, Westminster, Parliamentary Agents.

PARLIAMENTARY NOTICES—(Continued).

IN PARLIAMENT—SESSION 1912.

Great Northern Railway.

(New Railways and Widening of Railway in Counties of Leicester, Lincoln (Parts of Kesteven) and York (West Riding); Diversion and stopping up of footpaths in County of Lincoln (Parts of Lindsey); Compulsory purchase of lands and easements over Railways, etc., for purposes of Works; Compulsory purchase and confirmation of purchase of additional lands in Counties of Northampton (Soke of Peterborough), Lincoln (Parts of Kesteven and Parts of Holland), Nottingham and York (West Riding); Extension of Time for completion of Works under Tichhill Light Railway Order, 1901, and Tichhill Light Railway (Amendment and Transfer) Order, 1908; Purchase of parts only of properties; Entry on property for survey and valuation; Provisions as to costs of arbitration and claims for compensation in certain cases; Power to deviate; Provisions as to maintenance of roads and footpaths; Underpinning; Tolls, rates, and charges; Extinction of rights of way over roads, footpaths, etc.; Agreements as to construction of Works, etc.; Power to retain or dispose of superfluous and other lands; Application of Funds; Incorporation, repeal, and amendment of Acts; General and incidental provisions).

NOTICE IS HEREBY GIVEN that application is intended to be made to Parliament in the ensuing Session by the Great Northern Railway Company (hereinafter referred to as "the Company") for leave to bring in a Bill for the following purposes or some of them (that is to say):—

Construction of Works.

To authorise the Company to make and maintain the Railways and the Widening and alteration of railway and other works hereinafter described with all proper stations, junctions, lines of rail, sidings, approaches, roads, works and conveniences connected therewith (that is to say):—

Railway from Waltham to High Dyke.

A Railway (No. 1) commencing in the Parish of Waltham-on-the-Wolds in the Rural District of Melton Mowbray in the County of Leicester by a junction with the Waltham Branch of the Company at a point about 10 yards north of the northern end of the bridge carrying that Branch Railway over the public road leading from Harby and Goadby Marwood to Waltham-on-the-Wolds and terminating in the Parish of Great Ponton in the Rural District of Grantham in the Parts of Kesteven in Lincolnshire by a junction with the Main Line of Railway of the Company at a point thereon about 6½ chains north-west of their High Dyke Signal Box.

The said Railway (No. 1) will be made or pass from, in, through or into the following Parishes or Townships or some of them: Waltham-on-the-Wolds, Rescaby, Stonesby, Salthy, Sproxton and Buckminster all in the said Rural District of Melton Mowbray, and Skillington, Colsterworth, Easton, South Stoke, North Stoke and Great Ponton in the said Rural District of Grantham.

A Railway (No. 2) commencing in the Parish of Colsterworth in the said Rural District of Grantham by a junction with the intended Railway (No. 1) at a point thereon about 2 chains south-east of the point where the centre line of the said Railway (No. 1) crosses the south-eastern boundary of Crabtree Road, such last mentioned point being at or nearly at the centre of the north-western boundary of the field numbered 288 in the said Parish on the 1/2500 scale Ordnance Map (Second Edition 1904) Lincolnshire Sheet No. CXXX. 11, and terminating in the Parish of Stainby in the said Rural District of Grantham in the field numbered 68 in the said Parish on the 1/2500 scale Ordnance Map (Second Edition 1904) Lincolnshire Sheet No. CXXX. 15 and 16, at a point about 10 chains south of the public road leading from Buckminster to Stainby and about 10 chains west of the south-eastern corner of the said field numbered 68.

The said Railway (No. 2) will be made or pass from, in, through or into the Parishes of Skillington, Colsterworth, and Stainby or some of them.

Railway to Rossington Colliery.

A Railway (No. 3) wholly in the Parish of Rossington in the Rural District of Doncaster in the West Riding of the County of York commencing by a junction with the down Main Line of the Company at a point thereon about 12 chains south-east of the centre of the bridge carrying the said down line over the River Torne and terminating at the southern boundary of the field numbered 260 in the said Parish of Rossington on the 1/2500 scale Ordnance Map (Second Edition 1902) Yorkshire Sheet No. CCLXXXV. 10 at a point on the said boundary about 4 chains east of its western end.

Widening at Rossington.

A widening of the Main Line of the Company on the western side thereof wholly in the said Parish of Rossington commencing by a junction with the down Main Line of the Company at a point thereon about 4 chains north-west of the centre of the level crossing of the Railway of the Company by the public road at the northern end of Rossington Station and terminating by a junction with the down Goods Line at the southern termination thereof and about 3 chains south-east of the centre of the bridge carrying the said railway over the Mother Drain.

Diversion and stopping up of Footpaths at Tattershall Thorpe, Tumby and Coningsby.

To authorise the Company in the Rural District of Horncastle in the Parts of Lindsey in Lincolnshire:—

(a) To divert in the Township or Parish of Tattershall Thorpe the existing footpath passing along the southern side of the field numbered 267 in that Parish on the 1/2500 scale Ordnance Map (Second Edition 1905) Lincolnshire Sheet No. LXXXVIII. 8, such diversion commencing by a junction with the said footpath at a point therein about 5 chains measured in a south-westerly direction along the said footpath from its junction with the public road leading from Woodhall Spa to Tattershall and terminating by a junction with the said public road at a point about 4 chains south of the said junction of the existing footpath therewith and to stop up so much of the said existing footpath as lies between the commencement of the proposed diversion and the said public road.

(b) To divert in the said Township or Parish of Tattershall Thorpe the public footpath passing along the south-eastern side of the field numbered 272 in the said Township or Parish on the last-mentioned Ordnance Map and thence across the field numbered 271 in the said Township or Parish on the said Ordnance Map such diversion commencing by a junction with the said footpath at or near the south-eastern corner of the said first mentioned field and terminating by a junction with the said footpath at a point about 9 chains measured along the said footpath in a north-easterly direction from the said south-eastern corner and to stop up so much of the said existing footpath as lies between the commencement and the termination of the proposed diversion.

(c) To divert in the Township or Parish of Tumby the existing footpath leading from Tumby Woodside to Mareham Gate such diversion commencing by a junction with the said footpath at a point about ¼ chain northward of the south-western boundary of the field numbered 420 in the said Township or Parish on the 1/2500 scale Ordnance Map (Second Edition 1905) Lincolnshire Sheet No. LXXXIX. 11, and terminating by a junction with the public road leading from Tumby Woodside to Mareham-le-Fen at a point therein about 14 chains south-west of the junction of that road with Moorhouses Road.

(d) To divert in the said Township or Parish of Tumby the last-mentioned existing footpath such diversion commencing by a junction with the said footpath at a point therein about 23 chains north-east of the commencement of the diversion (c) described above and terminating by a junction with the said public road leading to Mareham-le-Fen at a point therein about 1½ chains north-east of its junction with Moorhouses Road and to stop up so much of the said existing footpath as lies between the points of commencement of the said diversions (c) and (d).

(e) To stop up in the Parish of Coningsby so much of the public footpath leading from Back Lane Coningsby to the Horncastle Road as lies between the south-western boundary of the field numbered 38 in the said Parish on the 1/2500 scale Ordnance Map (Second Edition 1905) Lincolnshire Sheet No. LXXXIX. 5, and the junction of the said footpath with another public footpath passing along the south-western side of field numbered 12 in the said Parish on the last mentioned Ordnance Map.

The Bill will extinguish all rights of way in and over the portions of footpaths so stopped up and will vest in the Company the site and soil of such portions thereof as lie between the boundary fences of the Company's property and will make such provision (if any) as may be thought fit as to the vesting or ownership of other portions of such footpaths.

Acquisition of Lands.

To authorise the Company to purchase by compulsion or agreement for the construction and maintenance of the said intended Railways, widening and works and for other the purposes of the intended Act and for the general purposes of their undertaking all or any of the lands (including in that word where used in this Notice houses, buildings, easements and other property) shown on the deposited plans hereinafter referred to as intended to be taken or used for the purposes of such Railways, widening and works.

To authorise the Company to purchase by compulsion or agreement the lands next hereinafter described for the general purposes of their undertaking and to sanction and confirm the purchase of any such lands which may have been purchased before the passing of the intended Act and the holding and use thereof by the Company for the purposes aforesaid or some of them (that is to say):—

Additional Lands at Walton.

A strip of land about 17 yards wide in the Hamlet of Walton in the Rural District of Peterborough in the Soke of Peterborough and County of Northampton adjoining the Main Line of the Company on the north-eastern side thereof bounded on the south-east by property of the Company and on the north-west by the Occupation Road crossing the said Main Line on the level at about 4 chains south of the mile post denoting 78½ miles from London.

A piece of land in the said Hamlet of Walton forming part of the occupation road which is crossed by a branch or siding from the said main line on the level at a point about 6 chains southward of the mile post denoting 78½ miles from London bounded on the north-west, south-west and south-east by property of the Company and lying between the gates on the north-eastern side of the said level crossing and the said main line.

Additional Lands at Tallington.

A strip of land about 17 yards wide in the Parish

of Tallington in the Rural District of Uffington in the Parts of Kesteven in Lincolnshire adjoining the Tallington Station of the Company on the south-western side thereof bounded on the south-east by and extending for a distance of about 14 chains measured in a north-westerly direction from the public road leading from West Deeping to Tallington and crossing the railway on the level at the said Station.

Additional Lands at Boston.

Lands in the Parts of Holland in Lincolnshire partly in the Hamlet of Skirbeck Quarter in the Rural District of Boston and partly in the Parish and Borough of Boston bounded on the north and north-west by property of the Company on the east by High Street and London Road or one of them on the south by Stell's Lane otherwise Betty Barber's Lane and on the west by a straight line drawn in a northerly direction from a point in the said Lane about 61 yards westward of its eastern end to the boundary fence of the said property of the Company.

Additional Lands at Gedling.

A strip of land about 11 yards wide in the Township of Gedling in the Rural District of Basford in the County of Nottingham adjoining the Derbyshire and Staffordshire Railway of the Company on the western side thereof bounded on the south by Chandos Street and on the north by the Nottingham and Lincoln Railway of the Midland Railway Company.

Another strip of land about 11 yards wide in the said Township of Gedling adjoining the said Derbyshire and Staffordshire Railway on the western side thereof bounded on the south by the said Nottingham and Lincoln Railway and extending therefrom in a northerly direction to the public road known as Burton Road leading from Nottingham to Southwell.

Additional Lands at Doncaster.

Lands in the Township and Borough of Doncaster in the West Riding of the County of York bounded on the north-west by the premises of the Brown Cow Inn on the north-east by the new road known as North Bridge Road on the south-west by property of the Company and extending for a distance of 30 feet or thereabouts in a south-easterly direction from the said Brown Cow Inn.

Lands in the said Township of Doncaster bounded on the east by property of the Company and extending westwards therefrom for a maximum distance of about 22 yards on the south-east by the road leading from Marsh Gate to the Goods Yard of the Great Central Railway Company and on the north by property of the Great Northern and Great Central Railway Companies.

Additional Lands at Dewsbury.

A triangular piece of land in the Township or Parish and Borough of Dewsbury in the West Riding of the County of York forming part of the enclosure numbered 327 in that Parish on the 1/2500 scale Ordnance Map (Second Edition 1907) Yorkshire Sheet No. CCXLVII. 4, and bounded on the north-west and north-east by property of the Company and on the remaining side by a straight line drawn from a point in the north-western boundary of the said enclosure about 23 yards south-westward of the northernmost corner thereof to a point in the north-eastern boundary of the said enclosure about 75 yards south-eastward of the said northernmost corner.

Extension of Time.

To extend the time limited by the Tichhill Light Railway (Amendment and Transfer) Order 1908 for the completion of the railways and works respectively authorised by the Tichhill Light Railway Order 1901 and the said Tichhill Light Railway (Amendment and Transfer) Order 1908.

General Powers and Provisions.

To authorise the Company to purchase and take by compulsion so much of any house, building, manufactory or property as may be required for the purposes of the intended works or other the purposes of the intended Act, notwithstanding anything contained in Section 92 of the Lands Clauses Consolidation Act, 1845.

To empower the Company to acquire compulsorily or by agreement such easements and rights in and over any railway river canal navigation watercourse drain or dyke which may be crossed or interfered with by any of the intended works as may be necessary or expedient for the construction, maintenance, working and use thereof in lieu of purchasing such railway, river, canal, navigation, watercourse, drain or dyke or any greater estate or interest therein than such easements or rights as aforesaid.

To empower the Company and their officers and other persons to enter upon any property which or easements or rights in or over which may be authorised to be acquired under the intended Act for the purpose of surveying and valuing such property.

To make provisions as to the costs of arbitration in certain cases and to require in certain circumstances persons claiming compensation in respect of lands taken or injuriously affected or easements or rights acquired under the intended Act to pay the whole or part of the costs incurred by them.

To make provisions as to claims for compensation in respect of improvements, alterations or buildings or interests in lands effected or created after such date as may be specified in that behalf in the Bill.

To authorise the Company in the construction of any of the works which they may be authorised to construct under the powers of the intended Act to deviate from the lines and levels thereof as shown on the plans and sections to be deposited as hereinafter mentioned; to cross, stop up, alter, or

PARLIAMENTARY NOTICES—(Continued).

divert and remove temporarily or permanently roads, streets, footpaths, railways, tramways, bridges, rivers, canals, streams, waters, water-courses, sewers, drains, pipes, telegraphic, telephone and other tubes, wires and apparatus and all other constructions or works which it may be necessary or convenient to stop up, alter, divert or remove for any of the purposes of the Bill; to appropriate the site and soil of so much of any of such streets, roads, footpaths or ways as will become unnecessary, and to extinguish or provide for extinguishing all rights of way thereover.

To provide that diverted or substituted roads or footpaths shall be maintained or repaired by the same bodies or persons as are now liable to maintain and repair the roads and footpaths for which they are respectively substituted, and that new roads and footpaths shall be maintained and repaired by the same bodies or persons as are liable to maintain and repair other streets and roads in the parishes, townships or places in which such new roads or footpaths will be situate, and that as respects the said intended Railways, widening of Railway and other works the Company shall not be liable under the 40th Section of the Railways Clauses Consolidation Act, 1845, to maintain the surface of any road carried over such intended Railways, widening or works by a bridge or the immediate approaches thereto.

To authorise and provide for the underpinning or otherwise securing or strengthening of any houses or buildings which may be rendered insecure or be affected by the said intended Railways, widening or works.

To authorise the Company to demand, levy, take and recover tolls, rates and charges for or in respect of the Railways, widening of Railway and works which they will by the intended Act be authorised to construct, and to alter existing tolls, rates and charges, and to confer or vary exemptions from the payment of such tolls, rates and charges respectively, and to authorise the Company to exercise other rights and privileges.

To constitute the said intended Railways and widening of Railway for all purposes part of the undertaking of the Company.

To extinguish or provide for the extinguishment of all rights of way and other rights (if any) in, over or affecting any road, footpath, or way to be diverted or stopped up under the provisions of the intended Act or in or over any of the lands to be acquired or the acquisition of which is to be confirmed under the said provisions or over any Railway of the Company at the point or points at which such Railway is now crossed by any such road, footpath or way, and to vest in the Company or in the adjoining owners the site and soil of the road, footpath or way stopped up, freed and discharged from all or any such rights.

To empower the Company on the one hand and any council, local authority, company or person on the other hand to enter into agreements in relation to the execution of any works and the contributing to the cost thereof and the construction, repair and maintenance of any streets, roads, footpaths or ways and to enable any such authority or council to provide the necessary funds for the purpose of borrowing on mortgage of the rates leviable by them or by creating and issuing stock and by the levying of rates, and to confirm any such agreements which may already have been or which at any time hereafter may be entered into in relation to any of the matters aforesaid.

To enable the Company as to lands acquired or held by them alone and the Company and any other Company as to lands acquired or held by them jointly notwithstanding anything to the contrary contained in the Lands Clauses Consolidation Act, 1845, or any Act relating to the Company or such other Company to retain, hold and use or to sell, lease or otherwise dispose of such lands, notwithstanding that the same are not immediately and may not hereafter be required to be used for the purposes of their undertaking, and so far as may be necessary to alter and amend the provisions of the Lands Clauses Consolidation Act, 1845, and any such Act as aforesaid with respect to the sale of superfluous lands in their application to the Company and such other Company as aforesaid or their respective undertakings.

The Bill will or may confer powers on the Company to apply their capital or funds to the purposes of the intended Act.

The Bill will vary and extinguish all existing rights or privileges which would interfere with its objects, and it will incorporate with itself, with or without modifications, the provisions or some of the provisions of the Companies Clauses Acts, 1845 to 1889, the Lands Clauses Acts, the Railways Clauses Consolidation Act, 1845, and the Railways Clauses Act, 1863. And the Bill will or may so far as may be deemed expedient, repeal, alter and enlarge the powers and provisions of amongst others the following Acts (that is to say):—

The Great Northern Railway Act, 1846, and any other Act or Acts relating to the Company or to their undertaking; and any other Act or Acts which would interfere with the objects of the Bill. Duplicate Plans and Sections describing the lines, situations and levels of the proposed Railways, widening of Railway and Works, and the lands and property in or through which they will be made, and also duplicate plans showing the lands and property intended to be compulsorily taken for other purposes or the acquisition of which is intended to be confirmed under the powers of the Bill, together

with a Book of Reference to such Plans containing the names of the owners and lessees or reputed owners and lessees and of the occupiers of such lands and property, also an Ordnance Map with the lines of railway delineated thereon so as to show their general course and direction and a copy of this Notice as published in the "London Gazette" will, on or before the 30th day of November instant, be deposited for public inspection at the Clerk of the Peace in the several counties or divisions hereinafter mentioned with the respective Clerk of the Peace thereof at their respective offices also hereinafter mentioned (that is to say):—

For the County of Leicester at his Office at Leicester.

For the Parts of Holland in Lincolnshire at his Office at Boston.

For the Parts of Kesteven in Lincolnshire at his Office at Stamford.

For the Parts of Lindsey in Lincolnshire at his Office at Lincoln.

For the County of Northampton at his Office at Northampton.

For the County of Nottingham at his Office at Nottingham.

For the County of Peterborough at his Office at Peterborough.

For the West Riding of the County of York at his Office at Wakefield.

On or before the same day a copy of so much of the said plans and sections as relates to the areas hereinafter mentioned in or through which the intended Railways, widening of Railway, and other works will be made, or in which any lands or property intended to be taken or the acquisition of which is intended to be confirmed are situate, together with a copy of so much of the Book of Reference as relates to such respective areas and a copy of this Notice as published in the "London Gazette" will be deposited as follows (that is to say):—

So far as relates to any Borough, with the Town Clerk of such Borough, at his office, so far as relates to any Urban District not being a Borough or to any Rural District, with the Clerk of the District Council of such District at his office; so far as relates to any Parish or Township comprised in a Rural District other than the Parishes or Townships next hereinafter mentioned, with the Clerk of the Parish Council (if any) or if there be no Clerk with the Chairman of that Council; so far as relates to each of the following Parishes or Townships (that is to say) Bescoby, Stomesby, Saltby, Stainby, Easton South Stoke, North Stoke, Tattershall Thorpe, Tallington, with the Chairman of the Parish Meeting of such Parish or Township; and such deposit will if made with the Clerk of the Parish Council be made at his office, or if he have no office at his residence, and if made with the Chairman of the Parish Council or of the Parish Meeting, be made at his residence.

Printed copies of the proposed Bill will be deposited in the Private Bill Office of the House of Commons on or before the 16th day of December next.

Dated this 15th day of November, 1911.

NOTICE IS HEREBY GIVEN that

An application is intended to be made to Parliament in the ensuing Session by the Great Western Railway Company (hereinafter called "the Company") for an Act under the above name or short title for all or some of the following purposes (that is to say):—

[In this Notice the expression "Parish" means any place for which a separate Poor Rate is or can be made or for which a separate overseer is or can be appointed.]

To empower the Company to make and maintain the railways deviation widening and alteration of railways and works hereinafter mentioned or some part or parts thereof together with all proper and convenient stations sidings approaches roads works and conveniences connected therewith (that is to say):—

A Railway (No. 1) wholly in the Parish of Rhyndwylwydach in the Rural District of Pontardawe in the County of Glamorgan commencing by a junction with Railway No. 5 authorised by the Great Western Railway Act 1911 at a point on or near the north eastern side of the road leading from Craig-efn-pare to Glais 14 chains or thereabouts north-west of the crossing by that road of the main road between Pontardawe and Swansea and terminating at a point on or near the eastern bank of the Lower Clydach River 4 chains or thereabouts west of the northernmost corner of the field or enclosure numbered 1385 on the 25-inch Ordnance Map (2nd Edition 1899) of the said Parish.

A Railway (No. 2) wholly in the said Parish of Rhyndwylwydach commencing by a junction with the said intended Railway (No. 1) at a point in the field or enclosure numbered 1757 on the 25-inch Ordnance Map (2nd Edition 1899) of the said Parish 5 chains or thereabouts west of a point in the south eastern boundary of the said field or enclosure 11 chains or thereabouts from the easternmost corner thereof and terminating by a junction with the Colliery Tramway belonging or reputed to belong to the Western Merthyr Coal and Fuel Company Limited at or near the south-eastern end of the sidings on that tramway at Upper Forge.

A Railway (No. 3) wholly in the said Parish of Rhyndwylwydach commencing by a junction with the said intended Railway (No. 2) at or near a point on the south-eastern side of the new road (known as Bryn Road) which has been constructed across the field or enclosure numbered 1740 on the said Ordnance Map 7 chains or thereabouts south-west of the junction of that road with Lone Road and terminating at a point 1 chain or thereabouts west of or near the crossing on the level by the said tramway of the road leading from Craig-efn-pare to Glais.

A Railway (No. 4) wholly in the said Parish of Rhyndwylwydach commencing by a junction with the said intended Railway (No. 1) at or near its termination hereinafter described and terminating at a point 2 chains or thereabouts north-west of the bridge carrying the Colliery Siding connecting Moody's Colliery with the said Tramway over the Lower Clydach River.

A Railway (No. 5) commencing in the said Parish of Rhyndwylwydach by a junction with the said intended Railway (No. 1) at or near its termination hereinafter described and terminating in the Parish of Bettws in the Rural District of Llandilo Fawr in

PARLIAMENTARY NOTICES—(Continued).

the County of Carmarthen at a point on the common or commonable lands known as Mynydd Bettws Common 11 chains or thereabouts east of the easternmost corner of the field or enclosure numbered 1042 on the 25-inch Ordnance Map (2nd Edition 1906) of the said Parish of Bettws which said intended Railway (No. 5) will pass from through or into the following parishes areas and places or some of them (that is to say):—The Parishes of Rhyndwyltydach and Mawr in the Rural District of Pontardawe in the County of Glamorgan and the Parish of Bettws in the Rural District of Llandilo Fawr in the County of Carmarthen.

For the purposes of or in connection with the said intended Railways or some or one of them it is proposed to purchase and take portions of certain lands which are or are reputed to be common or commonable lands (that is to say):—

Name of Common or Commonable Lands.	Parish or Parishes in which Lands are situate.	Area within limits of deviation about	Area estimated required to be taken.
		Acres.	Acres.
Mynydd-Gelli-Wastad Common	Rhyndwyltydach and Mawr	5	$\frac{1}{2}$
Mynydd Y Gwair Common	Rhyndwyltydach	26	2 $\frac{1}{2}$
Mynydd Carn-Llechart Common	Rhyndwyltydach	17 $\frac{1}{2}$	1
Mynydd Bettws Common	Bettws	18	1

A Railway (No. 6) wholly in the County of Monmouth commencing in the Parish of Saint Woollos in the Rural District of Saint Mellons by a junction with the loop line (known as the Western Curve) connecting the Monmouthshire (Western Valleys) Railway with the South Wales Railway of the Company at a point 1 chain or thereabouts east of the bridge carrying that loop line over Cardiff Road and terminating in the same Parish and Rural District by a junction with the said Monmouthshire (Western Valleys) Railway at or near the bridge carrying that Railway over the said South Wales Railway which said intended Railway (No. 6) will pass from through or into the following parishes areas and places or some of them (that is to say):—the Parish and County Borough of Newport and the Parish of Saint Woollos in the Rural District of Saint Mellons.

A Railway (No. 7) wholly in the County of Monmouth commencing in the Parish of Saint Brides Wentlog in the Rural District of Saint Mellons by a junction with the South Wales Railway of the Company at a point 24 chains or thereabouts south-west of the bridge carrying the road leading from Newport to Saint Brides over that Railway and terminating in the Parish of Saint Woollos in the Rural District of Saint Mellons by a junction with the loop line (known as the Western Curve) connecting the Monmouthshire (Western Valleys) Railway of the Company with the said Railway at a point 10 chains or thereabouts south of the bridge carrying the Alexandra (Newport and South Wales) Railway over the said loop line which said intended Railway (No. 7) will pass from through or into the following parishes areas and places or some of them (that is to say):—the Parishes of Saint Brides Wentlog, Duffryn and Saint Woollos in the Rural District of St. Mellons and the Parish and County Borough of Newport.

A Railway (No. 8) wholly in the Parish and Urban District of Redwelly in the County of Monmouth commencing by a junction with the Pennar Branch Railway of the Company at or near its termination near Markham Colliery and terminating at a point 3 chains or thereabouts north of a point in the northern boundary of the field or enclosure numbered 812 on the 25-inch Ordnance Map (2nd Edition 1901) of the said Parish 1 $\frac{1}{2}$ chains or thereabouts east of the north-west corner thereof.

A deviation and widening wholly in the County of Devon of the Dartmouth and Torbay Branch Railway of the Company commencing in the Parish and Urban District of Brixham at a point 5 chains or thereabouts south-east of the level crossing by that Railway of the road leading to the slipway adjoining the River Dart at the south-eastern end of the Britannia Crossing Platform on that Railway and terminating in the Parish of Churston Ferrers in the Rural District of Totnes at a point 59 chains or thereabouts north-west of the said level crossing.

A widening wholly in the Parish and Urban District of Mynyddyslwyn in the County of Monmouth of the Pennar Branch Railway of the Company between points respectively about 3 chains north-west and 32 chains south-east of the level crossing near Certybella Schools by that Railway of the road leading from Argold to Manmoel.

To empower the Company to abandon and discontinue the maintenance and use of so much of the said Dartmouth and Torbay Branch Railway as lies between the commencement and termination of the said deviation and widening of that Railway hereinbefore described or some portion or portions thereof and to sell and dispose of or retain hold or appropriate the site and soil thereof for the purposes of the said intended deviation and widening and for the general purposes of the Company.

To empower the Company in the Parish and Urban District of Paignton in the County of Devon to lay down an additional line of rails on the level adjoining the existing line of rails at the crossing

(known as Tanner's Level Crossing) by the Dartmouth and Torbay Branch Railway of the Company of the road leading from Paignton to Goodrington Sands near Goodrington House Convent.

To empower the Company in the Parish of Bourton (Great and Little) in the Rural District of Banbury in the County of Oxford to lay down two additional lines of rails on the level adjoining the existing lines of rails at the crossing by the Oxford and Birmingham Railway of the Company of the road known as Mill Lane and which leads from Great Bourton to Pewet Farm.

To empower the Company in the Parish of Solihull in the Rural District of Solihull in the County of Warwick to lay down two additional lines of rails on the level adjoining the existing lines of rails at the crossing situate 41 chains or thereabouts north-west of Knowle and Dorridge Station by the Oxford and Birmingham Railway of the Company of the road leading from Manor Road to Bentley Farm.

To empower the Company in the Parish and Urban District of Mynyddyslwyn in the County of Monmouth to lay down an additional line of rails on the level adjoining the existing line of rails at the crossing (known as Springfield Level Crossing) by the Pennar Branch Railway of the Company of the road leading from Penmaen to Pont-llan-fraith.

To empower the Company in the Parish of Llangeinor in the Urban District of Ogmore and Garw in the County of Glamorgan to lay down an additional line of rails on the level adjoining the existing line of rails at the crossing (known as Caedu Level Crossing) by the Ogmore Branch Railway of the Company of Bridge Street Ogmore Vale.

To empower the Company to make and execute the works and to exercise the powers following (that is to say):—

In the Parish and Borough of Ealing in the County of Middlesex the lengthening at both ends of the bridge carrying Hanger Lane over the main line of Railway of the Company.

In the Parish of Madron in the Urban District of Madron and in the Parish of Gulval in the Rural District of West Penwith in the County of Cornwall the substitution of a solid embankment for the viaduct (known as Ponsandane Viaduct) which carries the West Cornwall Railway of the Company over Chavandour Brook and to stop up and extinguish all rights of way (if any) thereunder.

In the Parish of Solihull in the Rural District of Solihull in the County of Warwick the lengthening at both ends of the bridge which carries the road leading from Tilehouse Green to Four Ashes over the Oxford and Birmingham Railway of the Company near the house known as Widney.

In the Parish of Knowle in the Rural District of Solihull in the County of Warwick the lengthening at the north-eastern end of the bridge which carries the road over the said Oxford and Birmingham Railway at or near the post on that Railway indicating 11 $\frac{1}{2}$ miles from Paddington.

In the Parish of Lapworth in the Rural District of Solihull in the County of Warwick the lengthening at the eastern end of the bridge which carries the road over the said Oxford and Birmingham Railway at a point 28 chains or thereabouts north of Lapworth Station.

In the Parish of St. Mary in the Borough of Shrewsbury in the County of Salop a new bridge between the existing bridges carrying Ellesmere Road over the two southernmost sidings adjoining the Shrewsbury and Chester Railway of the Company and the lengthening at the north-eastern end of the bridge carrying the said road over the three north-easternmost sidings adjoining the said Railway and the lengthening at the south-western end of the bridge carrying the said road over the said Railway.

In the Parish of Rusdon in the Rural District of Wrexham in the County of Denbigh the lengthening at both ends of the bridges which respectively carry the road connecting the road known as Pont Adam with Church Street and Llangallen Road over the Shrewsbury and Chester Railway of the Company near Rusdon Station.

In the Parish of Churston Ferrers in the Rural District of Totnes in the County of Devon the widening on the south-western side of the Viaduct known as Hookhills Viaduct on the Dartmouth and Torbay Branch Railway of the Company situate at a point 35 chains or thereabouts north-west of Churston Station.

It is proposed to take for the purposes of the said intended widening of Hookhills Viaduct portions not exceeding 20 perches in extent of certain lands in the said Parish which are or are reputed to be common or commonable lands known as Galmpton Warborough and of which 1 road or thereabouts is included within the said limits of deviation.

In the Parish and Urban District of Paignton in the County of Devon the widening on the north-western side of the Viaduct known as Broadlands Viaduct on the said Dartmouth and Torbay Branch Railway situate at a point 70 chains or thereabouts north of Churston Station.

In the Parish and Urban District of Paignton in the County of Devon the widening on both sides of the bridge which carries the said Dartmouth and Torbay Branch Railway over the road leading from Brixham to Goodrington Sands near the house known as Cliff Park.

In the Parish and County Borough of Devonport in the County of Devon the widening on the eastern side of the bridge which carries the Cornwall Railway of the Company over the road at the northern end of Dockyard Halt.

In the Parish of Bourton (Great and Little) in the Rural District of Banbury in the County of Oxford

the widening on both sides of the bridge which carries the Oxford and Birmingham Railway of the Company over the road leading from Cropredy to Great Bourton near the southern end of Cropredy Station.

In the Parish of Neithrop in the Borough of Banbury in the County of Oxford the widening on both sides of the bridge which carries the said Oxford and Birmingham Railway over the Oxford Canal near the junction (known as Banbury Junction) of the Great Central Railway with that Railway.

In the County of Warwick the widening of the bridges which carry the Oxford and Birmingham Railway of the Company over the roads hereinafter specified and of the bridge on the said Railway hereinafter described such bridges being respectively situate in the Parishes and areas hereinafter mentioned.

Description of Road or Bridge.	Side of Bridge on which widening is to be made.	Parish and Area.
Richmond Road	South-western side	Parish of Solihull in the Rural District of Solihull.
Old Warwick Road	Both sides	Parish of Solihull in the Rural District of Solihull
Blossomfield Road	Both sides	Parish of Solihull in the Rural District of Solihull
Fairfields Lane	Both sides	Parish of Solihull in the Rural District of Solihull
Bridge situate 17 chains or thereabouts south-east of the last mentioned bridge	Both sides	Parish of Solihull in the Rural District of Solihull
Bridge at northern end of Widney Manor Station	Western side	Parish of Solihull in the Rural District of Solihull
Bridge at north-western end of Knowle and Dorridge Station	South-western side	Parishes of Solihull and Knowle in the Rural District of Solihull
Bridge situate 59 chains or thereabouts south-east of Knowle and Dorridge Station	North-eastern side	Parishes of Knowle and Packwood in the Rural District of Solihull
Bridge situate 15 chains or thereabouts north of the Stratford-on-Avon Canal of the Company	Western side	Parish of Lapworth in the Rural District of Solihull
Bridge situate 56 chains or thereabouts south of the said Canal bridge	Western side	Parish of Rowington in the Rural District of Warwick
Bridge situate 7 chains or thereabouts north-west of the junction of the Henley-in-Arden Branch Railway with the said Railway	South-western side	Parish of Rowington in the Rural District of Warwick

In the Parish and City and County Borough of Birmingham in the County of Worcester the widening on both sides of the bridge which carries the Oxford and Birmingham Railway of the Company over Adderley Street.

In the Parish of Oldbury in the Urban District of Oldbury in the County of Worcester the widening on both sides and reconstruction of the bridge which carries the Stourbridge Extension Railway of the Company over Langley Green Road.

In the Parish of Griffithstown in the Urban District of Panteg in the County of Monmouth the widening on the eastern side of the bridge which carries the Monmouthshire (Eastern Valleys) Railway of the Company over the road connecting Union Road with Pont-y-felin Road at Coed-y-gric.

In the Parish and Urban District of Risca in the County of Monmouth the widening on both sides of the bridge which carries the Monmouthshire (Western Valleys) Railway of the Company over the main road leading from Crumlin to Newport at the north-western end of Cross Keys Station.

In the Parish and Urban District of Abersychan in the County of Monmouth the widening on the western side of the bridge which carries the Monmouthshire (Eastern Valleys) Railway of the Company over the road connecting Old Road and The Square near the southern end of the Company's Abersychan Station (Low Level).

In the Parish of Llanhilleth in the Urban District of Abertillery and in the Parish and Urban District of Aherarn in the County of Monmouth the widening on the eastern side of the bridge which carries the Monmouthshire (Western Valleys) Railway of the

PARLIAMENTARY NOTICES—(Continued).

Company over the River Ebbw at or near Crumlin Viaduct.

In the County of Monmouth the widening on the eastern side of the bridge which carries the Pennar Branch Railway of the Company over the road leading from Woodfield to Pontwyn-mawr at a point 23 chains or thereabouts south-east of the level crossing by that Railway of the road leading from Pemmen to Pont-lan-fraith.

In the Parish and Urban District of Briton Ferry in the County of Glamorgan the widening on the eastern side of the bridge which carries the South Wales Railway of the Company over the road connecting Regent Street East with Regent Street West.

In the Parish of Ammanford Urban in the Urban District of Ammanford in the County of Carmarthen the widening on the eastern side of the bridge which carries the Llanelly Railway of the Company over the River Amman at or near Pantyffynnon Station.

In the Parish and County Borough of Bristol in the County of Somerset.

To stop up and discontinue the footpaths leading from South Lane to Marsh Lane which cross the Company's Bristol and Portishead Railway and the loop line connecting that Railway with the Company's Bristol and Exeter Railway south of and near to the junction of the said loop line with the first mentioned Railway and which footpaths join South Lane at a point 7 chains or thereabouts west of the bridge carrying the said loop line over South Lane and join Marsh Lane at points respectively about 9 chains 21 chains and 27 chains north-west of the junction of Marsh Lane with South Lane.

In the Parish of Congresbury in the Rural District of Axbridge in the County of Somerset.

To stop up and discontinue the footpath which crosses the Company's Cheddar Valley Railway on the level at the southern end of Congresbury Station between its junction near Dolemore Cottage with the road leading from Puxton to Congresbury and its junction with the approach road to St. Andrew's Church and to stop up and extinguish all rights of way (if any) over the fields or enclosures numbered respectively 733 and 734 on the 25-inch Ordnance Map (2nd Edition 1903) of the said Parish and in lieu thereof to make and maintain a new footpath between points in the said road from Puxton to Congresbury respectively about 13 chains and 20 chains east of Dolemore Cottage.

In the Parish of West Cranmore in the Rural District of Shepton Mallet in the County of Somerset.

To stop up and discontinue the footpaths leading from the road between West Cranmore and Bruton to the road between the Company's Wells Branch Railway on the level at the eastern end of Cranmore Station and to stop up and extinguish all rights of way (if any) over the Company's approach road from the first mentioned road to the said station and in lieu thereof to make and maintain a new footpath along the southern boundary of the said Railway between the said level crossing and the said first mentioned road.

In the Parishes of Packwood and Knowle in the Rural District of Solihull in the County of Warwick.

To alter and divert Arden Road for a distance of 5 chains or thereabouts from its junction with the road which connects Grange Road with Station Road and which passes under the Oxford and Birmingham Railway of the Company at Knowle and Dorridge Station.

In the Parish of Rowington in the Rural District of Warwick in the County of Warwick.

To alter and divert so much of the road leading from Lapworth to Turners Green which passes under the Oxford and Birmingham Railway of the Company at a point 56 chains or thereabouts south of the bridge carrying the said Railway over the Stratford-on-Avon Canal of the Company as lies between the bridge carrying the said Railway over the said road and a point 8 chains or thereabouts north-west thereof.

In the Parish of Cakenore in the Rural District of Halefowen in the County of Worcester.

To stop up and discontinue so much of the footpath leading from the road which crosses over the Company's Stourbridge Extension Railway at the south-western end of Rowley Regis and Blackheath Station to a point in Pencricket Lane east of and near to its junction with Oldbury Road as lies between its junction with the first mentioned road and a point 7 chains or thereabouts north-east thereof and in lieu thereof to make and maintain a new footpath between the last mentioned point and a point in the first mentioned road 2 chains or thereabouts west of the said Railway.

In the Parish of Pixley in the Rural District of Ledbury in the County of Hereford.

To alter the levels of so much of the road leading from Leominster to Ledbury as lies between points respectively about 4 chains north and 2 chains south of the bridge carrying the said road over the Company's Worcester and Hereford Railway at Ashperton Station.

In the Parishes of Withington Bartestre and Luzwardine in the Rural District of Hereford in the County of Hereford.

To alter the levels of so much of the road leading from Bartestre to Withington as lies between points respectively about 3 chains south and 4 chains north of the bridge carrying the said road over the said Worcester and Hereford Railway at Withington Station.

In the Parish of Saint Devereux in the Rural District of Dore in the County of Hereford.

To alter the levels of so much of the road leading from Hereford to Kilpeck as lies between points respectively about 1 chain north-west and 4 chains south-east of the bridge carrying that road over the Company's Newport Abergavenny and Hereford Railway at Saint Devereux Station.

In the Parishes of Kilpeck and Kenderchurch in the Rural District of Dore in the County of Hereford.

To alter the levels of so much of the road leading from Wormaridge to Orop as lies between points respectively about 2 chains north-west and 1 chain south-east of the bridge carrying that road over the said Newport Abergavenny and Hereford Railway near Withington Farm.

In the Parish of Wombourne in the Rural District of Seaton in the County of Stafford.

To alter and divert so much of the road leading from Wombourne to Blakeley which crosses Deviation Railway No. 2 authorised by the Great Western Railway Act 1908 as lies between a point 13 chains or thereabouts north-east of the junction of that road with the road from Blakeley to Giggety and the said junction.

In the Parish of Claverley in the Rural District of Bridgnorth in the County of Salop.

To stop up and discontinue so much of the road leading from the road between Stourbridge and Bridgnorth to Claverley as lies between its junction with the first mentioned road and a point 19 chains or thereabouts north-east of that junction and in lieu thereof to make and maintain a new road between the last mentioned point and a point in the road between Stourbridge and Bridgnorth 5 chains or thereabouts north-west of the said junction.

To stop up and discontinue so much of the footpath leading from the portion of the said road to be stopped up and discontinued as aforesaid to More Barn as lies between its junction with the said road and a point 3 chains or thereabouts south-east thereof and in lieu thereof to make and maintain a new footpath between the last mentioned point and the junction of the said road with the road between Stourbridge and Bridgnorth.

In the Parish of Corwen in the Rural District of Edeirnion in the County of Merioneth.

To alter the levels of so much of the road which is carried over the Company's Corwen and Rala Branch Railway by means of a bridge at the south-western end of Corwen Station as lies between points respectively about 2 chains north-west and 1 chain south-east of the said bridge.

In the Parishes of Burton and Allington in the Rural District of Wrexham in the County of Denbigh.

To alter and divert so much of the footpath which crosses the Shrewsbury and Chester Railway of the Company on the level at a point 19 chains or thereabouts north of Rossett Station as lies between points respectively about 1 chain south-east and 2 chains north-west of that crossing and to carry the same over that Railway by means of a footbridge.

To stop up and discontinue so much of the footpath which crosses the said Shrewsbury and Chester Railway on the level at a point 11 chains or thereabouts south of Broad Oak Level Crossing as lies between points respectively 1 chain east and 22 chains north-west of its said crossing of the said Railway and in lieu thereof to make and maintain a new footpath between the first mentioned point in the said footpath and a point in the footpath which crosses the said Railway on the level about 19 chains north of Rossett Station 1 chain or thereabouts south-east of that crossing.

In the Parish of Llanover Lower and Higher in the Rural District of Abergavenny in the County of Monmouth.

To alter the levels of so much of the road leading from Abergavenny to Usk as lies between points respectively about 2 chains north-west and 2 chains south-east of the bridge carrying that road over the Company's Newport Abergavenny and Hereford Railway at a point 10 chains or thereabouts north of the point on that Railway indicating 26½ miles from Hereford.

In the Parish and Urban District of Llanfarcha Upper in the County of Monmouth.

To stop up and discontinue so much of the footpath which leads from a point in the road between Griffithstown and Pontllydydd near the Waterloo Beer House to the house known as Wren's Nest and crosses the Monmouthshire (Eastern Valleys) Railway of the Company on the level as lies between the western boundary of the said Railway and the said road.

In the Parish and Urban District of Abereghvan in the County of Monmouth.

To alter the levels of so much of the road which connects Plas-y-coed Road with Ty-bwmpyn Road and which is carried over the Company's Cwm-fwd-ger Branch Railway by means of a bridge at a point 51 chains or thereabouts south-west of the bridge carrying the Company's Talywain branch of the Monmouthshire (Eastern Valleys) Railway over that Branch Railway as lies between points respectively about 1 chain south-east and 5 chains north-west of the first mentioned bridge.

In the Parish and Urban District of Risca in the County of Monmouth.

To stop up and discontinue so much of the footpaths which cross the Company's Monmouthshire (Western Valleys) Railway on the level at points respectively about 41 chains south-west and 6 chains and 8 chains north of Risca Station as lies between the boundaries of the Company's property. And so far as may be deemed necessary or expedient to alter amend or repeal all or some of the provisions for the protection of the Urban District Council of Risca

contained in Section 14 of the Great Western Railway Act 1898 as varied by Section 35 of the Great Western Railway Act 1903.

In the Parish of Llanlilioth in the Urban District of Aberdillery and in the Parish and Urban District of Aberearn in the County of Monmouth.

To alter and divert so much of the River Ebbw as lies between a point 23 chains or thereabouts north-east of the weir in that river adjoining the feeder to the Crumlin arm of the Company's Monmouthshire Canal and the said weir.

In the Parish of Gelligaer in the Urban District of Gelligaer and in the Parish of Llanfabon in the Urban District of Caerphilly in the County of Glamorgan.

To stop up and discontinue so much of the footpath which crosses the Company's Taff Vale Extension Railway and the Taff Vale Railway on the level at the north-western end of Llancach Station as lies between the north-eastern boundary of the said Taff Vale Extension Railway and the south-western boundary of the Taff Vale Railway and so much of the footpath which crosses the said Taff Vale Extension Railway at a point 1 chain or thereabouts south-east of the said station as lies between the north-eastern boundary of that Railway and the southern end of the Goods Yard on the Taff Vale Railway at Llancach and to stop up and extinguish all rights of way over the said Railways between the said footpaths and in lieu thereof to make and maintain a new footpath between the first mentioned footpath at or near the south-western boundary of the Taff Vale Railway and a point in the second mentioned footpath at or near the north-eastern boundary of the said Taff Vale Extension Railway.

In the Parish of Llantisant in the Rural District of Llantisant and Llantwit-Fardro in the County of Glamorgan.

To alter and divert so much of the footpath which crosses the Ely Valley Railway (Clydach Vale Section) of the Company on the level at a point 21 chains or thereabouts north of the junction known as Gellyrhand Junction of the Company's Ely Valley Railway (Hendreforgan Section) with that Railway as lies between points respectively about 2 chains north-east and 2 chains south-west of that crossing and to carry the same over the first mentioned Railway by means of a footbridge.

To alter the levels of so much of the road leading from Landyodog to Giltard as lies between points respectively about 4 chains south-west and 1 chain north-east of the bridge at Hendreforgan carrying that road over the Company's Ely Valley Extension Railway.

In the Parish and County Borough of Swansea in the County of Glamorgan.

To stop up and discontinue the footpath at the southern end of the locomotive depot of the Company at Landore between its respective junctions with Neath Road and Washington Street and in lieu thereof to make and maintain a new footpath along the western boundary of the said South Wales Railway between the last mentioned junction and Pontre-Treharne Road.

In the Parish of Llanidlo Talybont in the Rural District of Swansea in the County of Glamorgan.

To stop up and discontinue so much of the footpath which crosses Railway No. 1 (now in course of construction) authorised by the Great Western Railway Act 1904 on the level at the north-western end of the station at Pont-llyw as lies between its junction with the road leading from Gwrolus-tawr to Pont-llyw and a point 14 chains or thereabouts south thereof and in lieu thereof to make and maintain a new footpath between the said point and a point in the said road 4 chains or thereabouts west of the junction therewith of the said existing footpath.

To stop up and discontinue so much of the footpath leading from the road between Waun-gron and Llanidlo to Cwcl-bach Road as lies between its junction with the first mentioned road near Castell-du and a point 10 chains or thereabouts north-east of that junction and in lieu thereof to make and maintain a new footpath between the said point and a point in the first mentioned road 7 chains or thereabouts north of the said junction.

In the Parishes of Llangnick and Rhyndwylgydach in the Rural District of Pontardawe in the County of Glamorgan.

To stop up and extinguish all rights of way over the road which connects Baran Road with the main road between Brynamman and Pontardawe and which is numbered on the plans relating to Railway No. 3 authorised by the Great Western Railway Act 1911 and deposited with the Clerk of the Peace for the County of Glamorgan in respect of that Act 100 in the said Parish of Llangnick and 124 in the said Parish of Rhyndwylgydach.

To extend the time now limited by the Great Western Railway Act 1903 for the completion of the Harbour Works and the Railways Nos. 4, 5 and 6 authorised by the Great Western Railway (New Works) Act 1898.

To extend the time now limited by the Great Western Railway Act 1908 for the completion of so much of Railways Nos. 6, 7 and 8 authorised by the Great Western Railway (New Railways) Act 1905 as was not by the said Act of 1908 abandoned and to extend the time limited by the said Act of 1908 for the completion of Deviation Railway (No. 1) and Deviation Railway (No. 2) thereby authorised.

To authorise the abandonment of the Railways and works authorised by the Windsor and Ascot Railway Act 1898 (so far as the same have not already been abandoned under the provisions of the Great Western Railway Act 1904) and of the deviation of a portion

PARLIAMENTARY NOTICES—(Continued).

of those Railways authorised by the Great Western Railway Act 1904.

To authorise and provide for the sale by the Company to such person persons company or companies as they may think fit and in such manner on and subject to such terms and conditions and for such price or consideration as may be agreed upon or prescribed by the intended Act of the whole or any part or parts of the lands acquired by the Company for the purposes of the said Railways and Deviation proposed to be abandoned as aforesaid.

To confirm and give effect to an Agreement entered into between the Swansea Harbour Trustees the Company and the Rhondda and Swansea Bay Railway Company varying and modifying the terms of certain Heads of Agreement between the said Trustees and Companies confirmed by and scheduled to the Swansea Harbour Act 1901 and so far as may be necessary or expedient to alter amend extend or repeal the provisions of the said Act of 1901.

To confirm and give effect to any agreement which may have been entered into or which may be entered into before the passing of the intended Act between the Company the Taff Vale Railway Company the

Cardiff Railway Company and the Lord Mayor Aldermen and Citizens of the City of Cardiff or some of them varying altering or repealing all or some of the provisions of Sections 6 and 7 of the Great Western Railway (Additional Powers) Act 1896 and Section 22 of the Cardiff Railway Act 1899 with reference to the widening and maintenance of the bridge carrying the Roath Branch Railway of the Taff Vale Railway Company over Lascelles Road in the Parish of Roath in the County of Glamorgan.

To empower the Company to subscribe and contribute towards the undertaking of the Cork City Railways Company incorporated by the Cork City Railways Act 1906 in addition to the amount which by that Act they are already authorised to subscribe and contribute such a further amount not exceeding in the whole £50,000 as may be provided for by the intended Act and to enable the Cork City Railways Company to create and issue to the Company and the Company to accept in respect of such subscription debenture stock of the Cork City Railways Company of such nominal amount or amounts as may be agreed upon or provided for by the intended Act and to authorise the Company to enter into and carry into

effect agreements with that Company with reference thereto.

To enable the Company to apply to the purposes of the intended Act or some of them such portion of their corporate funds as they shall think expedient and to raise for such purposes and for the general purposes of their undertaking and for the purposes of any other Acts of the same Session additional capital by the creation of shares or stock with or without a preference in payment of dividend or other rights or privileges and by the creation and issue of debenture stock and by borrowing or any of such means.

And notice is hereby also given that on or before the 17th day of December next printed copies of the intended Act will be deposited in the Private Bill Office of the House of Commons.

Dated the 14th day of November 1911.

COMPANY NOTICE.

Bombay, Baroda, and Central India
Railway Company.

NOTICE is hereby given that the One Hundred and Twelfth Half-Yearly General Meeting of the Bombay, Baroda and Central India Railway Company will be held at the Cannon Street Hotel, E.C., on Friday, the 8th December, at One o'clock precisely.

(1) To receive the Directors' Report and Accounts.
(2) To authorise the Directors to distribute the interest payable by the Secretary of State on the 1st January, 1912, on the Capital Stock of the Company.

(3) To authorise the Directors to enter into an agreement with the Secretary of State to provide for the inclusion of the Nagda-Muttra Railway in the Company's System, and for such revision of the Company's principal contract as the Directors may think fit, and

(4) To Transact the General Business of the Company.

The Transfer Books will be closed from the 11th to the 31st December, both days inclusive, and transfers will not be received at the office while the Books are closed.

Warrants for the half-yearly guaranteed interest will be forwarded on the 5th day of January to the Stockholders who are registered in the Company's Books on the 9th day of December.

By order,

C. CROMMELIN,
Secretary.

Offices: Gloucester House,
110, Bishopsgate, London, E.C.,
17th November, 1911.

TENDERS INVITED.

East Indian Railway.

THE East Indian Railway Company is prepared to receive Tenders for the Supply and Delivery of Girder Bridges (27ft. clear span, as per specification to be seen at the Company's offices). Tenders are to be sent to the undersigned, marked

"Tender for Girder Bridges," not later than Twelve o'clock noon on Wednesday, the 6th day of December proximo.

The Company reserves to itself the right to divide the order, also to decline any Tender without assigning a reason, and does not bind itself to accept the lowest or any Tender.

For each specification a fee of £1 1s. is charged, which cannot under any circumstances be returned.

By order,

C. W. YOUNG,
Secretary.

Nicholas-lane, London, E.C.
23rd November, 1911.

The South Indian Railway Company.

THE South Indian Railway Company, Limited, are prepared to receive Tenders for the Supply of:—

1. Steel Rails and Fishplates (about 1,567 tons).
2. Wheels and Axles (310 Pairs Disc Wheels and Axles).
3. Tie-bars, Gibs, and Cotters (about 52 tons).
4. Fishbolts, Nuts, and Washers (about 15 tons).

Specifications and forms of Tender may be obtained at the Company's Offices.

Tenders, addressed to the Chairman and Directors of the South Indian Railway Company, Limited, marked "Tender for Steel Rails and Fishplates," or as the case may be, must be left with the undersigned not later than 1 o'clock p.m. on Wednesday, the 6th December, 1911.

The Company is not bound to accept the lowest or any Tender.

A charge, which will not be returned, will be made of 40s. for each copy of specification No. 1; 20s. for each copy of No. 2; and 10s. for each copy of Nos. 3 and 4.

Copies of the drawings may be obtained on payment at the office of Robert White, Esq., M.I.C.E., Consulting Engineer to the Company, 3, Victoria-street, Westminster, S.W.

By order,

V. E. DE BROE, M.I.C.E.,
for Managing Director.

Company's Offices,
91, York-street, Westminster, S.W.
24th November, 1911.

Great Northern Railway Company
(Ireland).

THE Great Northern Railway Company (Ireland) are prepared to receive Tenders for Fifty or One Hundred Covered Goods Wagons and Twenty Timber Trucks.

Copies of the specifications, drawings and forms of Tender may be obtained on application to the Secretary, at Amiens Street Terminus, Dublin, on payment of a fee of ten shillings, which will be refunded on receipt of a bona fide Tender and the return of the drawings.

Tenders, under cover, marked "Tender for Wagons," should be delivered to the undersigned not later than ten a.m. on Monday, the 18th December, 1911.

The Directors do not bind themselves to accept the lowest or any Tender.

T. MORRISON,
Secretary.

Secretary's Office,
Amiens Street Terminus, Dublin,
21st November, 1911.

Madras and Southern Mahratta
Railway Company, Limited.

THE Directors are prepared to receive Tenders for the Supply of:—

Cast-iron Sleeper Pots, with fittings, in accordance with the specification, which may be seen at the Offices of the Company. The charge for the Specification will be One Guinea, and is not returnable.

Tenders must be sent in, addressed to the Secretary of the Company, not later than 2 p.m. on Tuesday, the 5th day of December, 1911, marked, "Tender for C.I. Sleeper Pots."

The Directors do not bind themselves to accept the lowest or any tender.

H. BONHAM-CARTER,
Secretary.

Company's Offices,
91, York-street, Westminster, S.W.,
21st November, 1911.

THE RAILWAY TIMES

Established in 1837.

PUBLISHED EVERY SATURDAY.

Annual Subscription (post free), 25 shillings.

NOTICES.

All communications for the following issue should be received not later than 6 p.m. on Friday.

New Advertisements or changes in copy for the inside pages must be received not later than 6 p.m. on Friday. Advertisements for the cover must be received by noon on Thursday.

Advertisements of which proof is desired should reach us by the second post on Wednesday.

Money Orders, Cheques, etc., should be drawn in favour of THE RAILWAY TIMES, and should be crossed "National Bank."

Telegraphic Address: "Altimetry, London." Telephone No.: 2948 Gerrard.
Offices: 12, Norfolk Street, London, W.C.

THE RAILWAY DEBATE.

That large section of the public which is concerned with railway interests, and that still larger section which is desirous of seeing fair play, were naturally somewhat anxious as to what would be the result of the railway debate on Mr. Ramsay Macdonald's motion submitted to the House of Commons on Wednesday evening. The House of Commons is not, as is a rule, too benevolent in its attitude towards railway interests, and for various reasons political influences were rather directed against the honest and straightforward treatment of the railways, in spite of the strength of the companies' case. With some relief, therefore, we admit that the House of Commons and the Government handled the delicate position in a businesslike and straightforward way, and the discussion not only assumed a high level, but it has contributed very largely towards clearing the air. The suggestion made in various quarters that both sides were not bound by the findings of the Royal Commission is absolutely repudiated by the Government, and, as has been repeatedly shown in these columns, never had any basis in fact. To assume that one of the parties to an arbitration would consent to be bound beforehand by the result, while the other was left free, is absurd on the face of it. Not only did the Prime Minister give full credit to the companies for acting in an honourable way in connection with this matter, but he acknowledged that in entering into the agreement in August, in reinstating the men then on strike, and in the considerable concessions since made by them in regard to wages, the companies had shown a patriotic spirit "and a spirit which redounds to their credit both as citizens and as men of business." The discussion was conducted with an almost entire freedom from personalities and unnecessary recrimination. Exceptions, perhaps, should be made in regard to the remarks of Mr. J. H. Thomas, whilst we fear that Sir Frederick Banbury did the companies' case more harm than good by his somewhat uncompromising remarks. The original motion submitted by Mr. Ramsay Macdonald contained a deliberate reflection upon the companies, declaring that they had no justification for refusing to discuss the report of the Royal Commission with the representatives of the men. Their justification was, of course, the repudiation in various quarters of the findings of the report. Had the companies agreed to a conference in these circumstances it would have implied that the whole question might have been re-opened, and more harm than good certainly would have resulted. The more reasonable form of resolution submitted by the Chancellor of the Exchequer contains no reflection on the attitude of either party. It is as follows: "That in the opinion of this House a meeting should take place between the representatives of the parties on whose behalf the Railway Agreement of August, 1911, was signed, to discuss the best mode of giving effect to the report of the Royal Commission, and that this House asks the Government to use its good offices to bring both sides into a Conference without delay." The Government made it quite clear that as a preliminary

to any action upon this resolution the report itself must be accepted. Matters of interpretation are already referred by the report to the judgment of the Board of Trade. Consequently it is a perfectly logical course of action for the representatives of the companies and the men to meet under the auspices of the Board of Trade, and thrash out any differences of interpretation at the outset. But there can be no reconsideration, for instance, of the question of recognition. So far as that was granted by the report it is accepted by the companies, but it will not be competent for the representatives of the men at the conference to attempt to secure any change in the position. For this reason we think the companies may without inconsistency accept the invitation. Indeed, if either party take the responsibility of still refusing to accept the findings of the report or of declining the invitation to the Conference, they will incur a grave responsibility, not only to railway interests in general, including both the railwaymen and the companies, but also towards the public, the Government, and even the House of Commons itself. Whether a basis has been found for a peaceful settlement now entirely depends upon the spirit in which the invitation of the Government is received by all parties concerned. In this respect we believe the outlook has somewhat improved, and would still further rapidly brighten if the responsible Labour leaders would cease to indulge in platform fireworks and act as men of business, and if the Labour representatives at the Congress would take credit for what they have achieved instead of bemoaning what they did not get. Now that the interests of the railwaymen and of the companies have received the sympathetic support not only of the public, but of the House of Commons, a remarkable opportunity is presented of solving any differences which have lately arisen. In particular, we would point out that the Government are under a pledge to assist the companies in the matter of rates, so that the latter may increase their wages. If, as a result of the Conference, an amicable understanding is arrived at and representatives of railway interests as well as of labour interests combine to secure the end in view, certainly not the Government, and much less the House of Commons, could resist so strong an appeal. It may be asked, why should the public be expected to pay more? We may point out that in all similar movements for advances in wages, whether in the shipping world or elsewhere, the public have had, to some extent, at least, to recoup the industries concerned for the increased charges they have had to undertake. The public, we fully believe, would be willing to pay slightly more, whether in the goods department or in the form of passenger fares, to insure themselves against any disturbance to the regular conduct of railway traffic such as occurred in August last. The losses which many traders, travellers and the general public must have suffered during those disturbances are losses which they cannot contemplate without serious misgiving, and we do not think that any impartial tribunal would deny that many charges made by the railways, whether in respect of goods, mineral, or passenger traffic, are unduly low.

WANT OF INITIATIVE.

Although there are some features of American railway practice that do not commend themselves to everyone in this country, there are others from which much might be learnt. There is no doubt, for instance, that the natural independence peculiar to the citizen of the United States and Canada leads to some remarkable results in many departments of railway work; the want of this same independence, on the other hand, is responsible for many of the worst features of our organisation, and, indeed, for the hold that union leaders have upon their members. This difference in the spirit of the two nations has been brought out very vividly by visitors from the

States, evidently from a well-grounded knowledge of shop-practices on both sides of the Atlantic. In America men are expected and encouraged to have and to express ideas; moreover they have been known to work o' nights at thrashing out improvements in out-turn, whereas in Britain such excess of zeal would in most cases be looked upon with disfavour by foremen and even by those over them. The superiors are paid to think; the mechanics and the minor officials are paid to work, and neither should encroach on the other's field of labour. In America boxes are fixed into which men are invited to drop any suggestions that may occur: in how many English undertakings is this done? What is the result? The men gradually lose the use of their intellect and become little better than machines, and the heads of departments drift further and further apart from the men, who have only to carry out, according to fixed rules, the ideas for which liberal salaries are paid to those who alone are supposed to be capable of originating them. This kind of discipline has become largely out of date even in the Army, where, as in Tennyson's "Balaclava Charge," the men were supposed not to think but to act blindly. Nowadays soldiers are taught and encouraged to think for themselves and to be self-reliant, and any information they can impart is received and appreciated. This can also be effected without weakening discipline—for, as a rule, if men are promoted for merit only, they will have no difficulty in enforcing obedience from their subordinates. There are difficulties in the way, no doubt, as in all human affairs, but the British workman has proved his real worth for many centuries past, and it ought to be possible to stir his natural and inherited qualities and so save them from degeneration and ultimate extinction, without going quite so far as the free and independent citizens of the United States on the way to "equality" *in excelsis*. This kind of general or all-round equality is apt in time to fall into the Socialist error of considering one man as good as another, if not better, and of therefore bringing everybody down to the level of the laziest and most incompetent man that ever was entrusted with any work to do. The real remedy is in the reverting to the old feeling between masters and men where respect and even affection for the former resulted in willing and intelligent obedience from the latter.

LONDON RAILWAY ELECTRIFICATION.

The announcement made in our last issue of the important proposals of the London and North Western Railway Company for providing through electric railway communication between Watford and the City of London on the one hand, and Charing Cross and the south side of the Thames on the other, has been rapidly followed by another scheme which is to some extent of a rival nature. It is that of the Metropolitan Railway Company, and it proposes to construct a branch electric railway from their main line at Rickmansworth to Watford. The distance is only about three miles, but by this branch, by extending the company's electrification on the main line out to Rickmansworth, and by the completion of the junction between the main line terminus and the Inner Circle Railway at Baker Street it will be possible for the Metropolitan Railway Company to run electric trains between Watford and all their stations on the Inner Circle. On the other hand, the North Western Company's electric trains will come in contact with the District Railway's part of the Inner Circle at Earl's Court. They will also traverse the whole of the North London Railway into Broad Street in the City, and the whole length of the extended Baker Street and Waterloo Railway from Willesden to the Elephant and Castle. The Hampstead Junction and Richmond branches, also to be electrically equipped, will bring up the total addition to electric railways in the London district to some 30 miles of route. Watford is a

Valparaiso 90-day exch'ge	10½d.	10½d.	10½d.
Calcutta transfers	18. 4½d.	18. 4½d.	18. 4½d.
Hong Kong transfers	18. 10½d.	18. 10½d.	18. 10½d.
Shanghai transfers	28. 5½d.	28. 5½d.	28. 6½d.

Credit has been cheap during November, and dealers in that commodity have not been altogether easy in their minds over the fact. There have been several attempts to maintain the rates for bills, but until lately with little success. Cheap money has kept rates of discount low, as is so often the case. The situation was aggravated to some extent by the buying of bills with French money, and has been sustained by the small foreign demand for gold. Next month money is likely to be less plentiful. For one thing, the Bank is known to hold a large amount in bills maturing in December, which will reduce the resources of the open market; then there are the usual exigencies of the Christmas season. Meanwhile, the Government is mopping up supplies. During the week another £1,000,000 was borrowed, but again not, apparently, from the Bank, as the item Government Securities remains unchanged. Public Deposits, on the other hand, rose £2,183,000, chiefly at the expense of Other Deposits, which declined by £1,179,000, in spite of the addition of £108,000 to Other Securities. The resources of the market, as reflected in Private Deposits, are thus reduced to under forty millions, which at this season of the year is a fairly certain sign of approaching tightness, and during the week a marked advance in rates has occurred. Weekly loans are quite a half per cent. dearer. Sixty-day bills are ½ per cent. more, three months' bills about ¼, while on four and six months' bills the discount is higher by over ¼ per cent. These changes indicate belief in a continuing demand for money, and both traders and speculators must take account of that. The proportion of Reserve to the liabilities of the Bank is

favourite residential town of the people, and under the new schemes its rapid development is accelerated. It is about 20 miles from the City of London, and it will have means of communication with all parts of the metropolis such as no other town in the country can boast of. Why the Metropolitan Railway Company have turned their attention to Watford at the present time does not seem very clear. It remains to be seen whether Parliament will sanction the Metropolitan proposal and the London Electric Railway Company's scheme for extending the Baker Street and Waterloo line from Paddington to Willesden. That the proposal to electrify the North London Railway will be passed admits of no doubt. If all the proposals are passed, there will, of course, be competitive routes between Watford and all the area served by the Inner Circle Railway, but all the intermediate traffic will, of course, be non-competitive. On the North Western Railway, which has hitherto done comparatively little to encourage suburban traffic, there should be an enormous development all the way from Willesden to Watford. The route of the Metropolitan line should also see an increase in the rate of present growth of residential and manufacturing districts. Three railway centres should witness great developments in passenger traffic, especially for purposes of interchange. One is Willesden Junction, with electric railways radiating from it in various directions. A second is Baker Street with its increasing traffic between the Metropolitan main line and the Inner Circle, and its interchange with the Baker Street and Waterloo line. A third is the Liverpool Street district, where the existing stations of the North London, Great Eastern, and Metropolitan Companies are about to be supplemented by the new terminus of the Central London Railway. Moreover, the Central London will be able to bring in passengers from the Great Western line as soon as the Ealing extension is open, and the Metropolitan also propose a connection with Ealing. The prospective developments are certainly extraordinary and remind one of the tube railway rush of several years ago. It will only, however, be by the month of July next year that it will be possible definitely to forecast the future. About that time it will be quite clear what is the Parliamentary fate of the Bills which propose new lines. The North Western scheme, of course, so far as Watford is concerned, is approaching completion, having been authorised four years ago, and their proposals to electrify other lines are pretty certain to pass. It is the construction of new connecting lines about which the action of Parliament is uncertain.

Weekly Traffic Summary.

The traffic receipts for the week ended November 19, as officially published by the fifty-two principal railways of the United Kingdom, amounted to £2,153,259, which was earned on 21,521 miles, being at the rate of £100 18s. 1d. per mile of line open. For the corresponding week of 1910 the receipts of the same lines amounted to £2,063,955, with 21,467 miles open, or £96 2s. 10d. per mile. There was thus an increase of £89,304 in the receipts, an increase of 54 in the mileage, and an increase of £3 18s. 3d. in the receipts per mile. Thirty-four of the returns distinguish between the receipts from passenger and goods traffic, and these show an increase of £28,709 (or £1 5s. 7d. per mile) in the passenger receipts, and an increase of £55,738 (or £2 10s. 2d. per mile) in the receipts from goods traffic. The aggregate increase of the thirty-four railways for twenty weeks in the passenger receipts has been £185,160, while the aggregate increase in the goods traffic was £306,381. The aggregate receipts of the fifty-two railways for twenty weeks (July 2 to November 19) amounted to £47,484,838, in comparison with £47,027,255 in the corresponding period of last year—an increase of £457,583.

nearly one point higher at 51 per cent., indicating a very healthy position as far as the Bank is concerned.

The attention of the public has been diverted to a great extent from established Stock Exchange securities to new issues of capital. We pointed out some weeks ago that this was a contingency very likely to arise, and it accounts in some degree for the dull tone that has reigned in many departments of the market during most of the week. A good deal of financial uneasiness is felt, due to the situation in Egypt, following upon the failure of the Bank of Egypt and other incidents of the same kind. The situation is much aggravated by the dislocation of Levantine commerce, brought about by the state of war existing between Turkey and Italy, and the trouble may at any time extend in disconcerting ways. Such considerations have sufficed to keep numbers of large operators out of the markets, especially those associated with Continental enterprise and undertakings. Again, the labour situation at home, though much ameliorated, is still sufficiently in evidence to influence a large portion of the public to keep away from the stock markets for the present. Hence the business in stocks and shares during the week has been inconsiderable.

Last Saturday the firmest stocks were among foreign rails. Entre Ríos rose another $1\frac{1}{4}$ to $74\frac{1}{2}$ -75. Home rails were dull, and the falls outweighed the few rises that were recorded. On Monday they fell a good deal more, being influenced by the tone which characterised the meetings of railway employees the day before. A rise in London and South Western ordinary was almost the only exception. The American market was also weak, and Mexicans relapsed. Like conditions prevailed the following day, but United States railways rallied in the afternoon. The result of the Sorocabana issue of capital was said to have rendered the underwriters responsible for nearly 50 per cent. On Wednesday the tone at the opening was as bad as ever, but the rise in American rails made further progress, and the success of the upward movement in copper shares helped to make the general tone of the markets more cheerful. The new Chilean 5 per cent. loan was well received, and a small premium was established in it, though existing stocks of that Republic declined. Transactions in Home Rails were few, but the traffic receipts published were good, and a recovery ensued before the close which left many of them higher in the end. The next day things were distinctly better. Louisvilles advanced $\frac{1}{4}$ on the belief that the stock was to be increased to two-thirds as much again on terms involving a handsome bonus to present holders. Chinese stocks advanced. A further rise occurred in Home Rails consequent upon a favourable interpretation of the Parliamentary debate upon the railway agitation.

On Friday business was stagnant. Consols were lower and Home Rails declined generally. The statement that the electrification of the North London will be met by the London and North Western Company out of revenue served as a reminder that dividends may in many cases prove lower than anticipated owing to appropriation for purposes that have formerly been provided for out of capital. Canadas were well supported, and Mexican Ordinary and Second Preference were in demand.

The movements of the week are set forth in the following table:—

DIVIDEND ANNOUNCEMENTS.

BARS: LIGHT RAILWAY.—The directors have transferred £5,000 to reserve account for the equalisation of dividends, etc., and, subject to final audit, have decided to recommend at the forthcoming general meeting the payment of a final dividend of 3 per cent. (6s. per share), making, with the interim dividend already paid, a total of 6 per cent. for the year to June 30, and carrying forward £6,880. A year ago £10,000 was transferred to reserve and £5,548 carried forward. The dividends were the same as this year.

SOUTHERN PUNJAB RAILWAY.—At the board meeting on Wednesday last the directors decided to recommend the payment of an interim dividend at the rate of £6 per cent. per annum for the six months ended June 30, carrying forward the sum of £100,000. A year ago the dividend was at the rate of £7 per cent. per annum, and £95,778 was carried forward.

CENTRAL RAILWAY OF CHUTBUT.—A dividend of 6 per cent. for the year, carrying forward £11,102.

DARJEELING HIMALAYAN RAILWAY.—An interim dividend of 8 per cent., Rs.2,176 added to the provident fund, and Rs.1,75,642 carried forward.

BANK RETURN.

The return of the Bank of England for the week ended Wednesday, November 22, compared with that for the previous week, shows the following changes:—

PARLIAMENT AND THE RAILWAY AGITATION.

RAILWAY COMPANIES VINDICATED IN THE HOUSE OF COMMONS DEBATE — GOVERNMENT ASKED TO ARRANGE A MEETING BETWEEN DIRECTORS AND MEN'S REPRESENTATIVES.

The long-expected debate on the present unhappy situation of the labour question in the railway world took place in the House of Commons on Wednesday. It consisted of a flood of talk, which ran its course from four o'clock in the afternoon till eleven o'clock at night, and when it was over, and a vote had been taken, it did not appear that the prospects of a settlement between the railway companies and their employees were much brighter than they had been before. The resolution finally carried by a majority expressed the opinion of the House that a meeting should take place between the representatives of the companies and the men to discuss the best mode of giving effect to the report of the Royal Commission, and asked the Government to use its good offices to bring both sides into conference. As directors of the companies who took part in the discussion stood to their guns against "recognition," and as the Labour party voted against the resolution, it does not appear that very much was gained, and the possibility of a strike has by no means been removed. If the debate did nothing else, however, it gave a splendid vindication of the action of the directors of the companies, and showed that no plausible plea of justification could be put forward for the railway employees repudiating the findings of the Royal Commission.

THE CASE FOR THE MEN.

The subject was brought forward by Mr. Ramsay MacDonald, the Labour member for Leicester and leader of the Parliamentary Labour Party, in the form of the following motion:—"That this House regrets that the directors of the railway companies have refused to meet the representatives of the men in order to discuss the report of the Royal Commission appointed to inquire into the Railway Conciliation Agreement of 1907, declares such refusal to be contrary to the public interest and to have no justification, and asks the Government to bring both sides into conference without delay."

Speaking in a well-filled though not a crowded House, Mr. MacDonald developed the argument for the railwaymen with considerable skill, but in attempting to justify the contention that the men were not bound by the report of the Royal Commission he had as poor a case as has ever been put before an assembly of reasoning men. To begin with, he remarked that his resolution raised only a very narrow and specific point, and that it will be necessary in the near future to raise the question of the wages of railwaymen and the relation of the State towards the management of railways in the form of railway nationalisation. What he asked the House to consider at the moment was the crisis which next month might involve this country in a dispute as dangerous in its character as that which broke out last August. Therefore he confined his motion to the one point of asking the Government to procure a meeting between the railway directors and the railway servants, and expressed regret that up to now the railway directors had refused all overtures that the Government had made to them. As to the men having agreed to accept the decisions of the Commission, he said that the agreement at the Board of Trade offices was only reached at midnight, and the men's representatives were "tired" and anxious to get away. After the agreement was signed, a representative of the Board of Trade read out a paper which contained words which undoubtedly committed the men to acceptance of the Commission's report. He felt certain, however, that everyone in the House of Commons would not insist that the letter of that statement, which was read to tired men scattered over a room, was going to bind them absolutely under such circumstances. He did not think it was fair. The men put no names to it. The statement was nothing but a sort of unofficial addendum to the official agreement. To use the document as an argument that the men had absolutely bound themselves to accept the report without question, without discussion, and without conference was driving the semblance of a bargain far too far. He was willing to admit that there was a sort of understanding that when the report was issued it would be the basis for a complete settlement, though there might be small alterations and agreements superimposed on it. It was under that impression that the joint executive of the men's unions asked the directors to meet them. He pressed the importance of the need for modifications in various directions, and urged that it was impossible for the Government to be neutral in the matter. In conclusion, Mr. MacDonald assured the House that the men wanted to give

the report a fair chance, and that if the Government accepted his motion he believed there would be peace.

JUSTIFICATION OF THE DIRECTORS.

When Mr. MacDonald sat down, after a speech of fifty minutes' duration, Mr. Cave, K.C., the Unionist member for the Kingston Division of Surrey, rose, and at once entered into a spirited vindication of the action of the railway directors in the matter. Mr. Cave is possessed of an exceedingly smooth and bland manner, coupled with the utmost clearness and incisiveness of thought and argument. In quiet and telling sentences he showed that the agreement between the parties at the Board of Trade offices was considered line by line, and that no objection or correction was made in the declaration that both parties would accept the findings of the Commission. He cited the testimony of various labour leaders to show that during the sittings of the Commission they professed that they would accept such findings, and he argued that the facts fully justified the railway directors in their present attitude. If they gave way there might be another discussion, and there might be another finding, and that might be thrown over the day after. He agreed with what had been said the other day by Mr. J. H. Thomas, that if a great strike occurs it will be a national crime, and he pointed out that the blame for that would not be on the directors of the companies, but on the trade unions.

The Prime Minister then came on the scene, and in one of his short and pointed speeches he insisted that the motion contained language which would make any effort on the part of the Government to bring the two sides together altogether impossible. The Government could not subscribe to such language as that about the directors' refusal being contrary to the public interest and having no justification. The directors had shown a patriotic spirit and one which redounded to their credit both as citizens and men of business. The directors agreed in advance to accept the findings of the Commission, and they were absolutely entitled to assume, as they did assume, that the other party would undertake a similar and reciprocal obligation. During the sittings of the Commission no protest or qualification was put forward to suggest that that was not the view taken. The Government could not consent to a motion of this kind unless the words of reflection and censure on the directors were omitted, and unless it was clearly understood that the good offices of the Government would be given on the assumption that the report in substance was to be accepted as the basis of everything that was to follow. He understood that Mr. MacDonald would accede to that, and that made a substantial advance on the position. That being settled, and as they had got acceptance by the men of the report in substance, apart from adjustment in detail, he thought that the railway directors might meet under the auspices of the Board of Trade to go into conference with the men as to the best way of carrying out the recommendations of the Commission.

NO QUESTION OF RECOGNITION.

Mr. Bonar Law, the new leader of the Opposition, made a brief appearance in the debate. He expressed surprise at the entirely new and unexpected position taken up by Mr. Asquith. He asked the Prime Minister whether he had the consent of the directors to the proposal which he now made, which seemed to imply recognition. The Prime Minister at once rejoined that there was no question of recognition beyond what was recommended in the report of the Commission. Mr. Bonar Law said that to the question of recognition the railway directors attached the utmost importance. Some of them had told him that they regarded the reopening of this question in any way with the representatives of the unions as granting recognition. The Prime Minister replied that he had the consent neither of the directors nor of the employees. The Government were impartial.

Mr. J. H. Thomas, the Labour member for Derby, next made an astonishing attempt to justify the action of the men in declining to be bound by the Commission's report. Notwithstanding the now admitted fact, he declared that the Board of Trade statement was never put to the men's representatives, and he also affirmed that a strike was inevitable in the next few weeks unless there was a meeting between representatives of the men and of the companies.

LORD CLAUD HAMILTON'S VIEWS.

Lord Claud Hamilton, chairman of the Great Eastern Railway and Unionist member for South Kensington, very ably put the case of the railway directors. In a convincing historical sketch he showed how the unions had taken care that the scheme of 1907 should never have a fair trial. As to the strike, he thought that if it had been allowed to last another four days it would have been broken, and the companies would have been triumphant. By the present action of the railwaymen the companies were deceived for a second time. As to recognition, the companies objected to it because their business was different from that of any other in the United Kingdom; they were responsible to the country and to the public for the discipline and administration of the railways, and if recognition was granted the effect would be to drive all the employees into trade unions. Neither could the companies recognise the unions in view of the gross intimidation and outrages which had occurred. The Prime Minister's proposal had come upon him as a surprise, and it was impossible for the railway directors to give an opinion that night. He made the suggestion that the debate should be adjourned.

SUGGESTED AGREEMENT.

Sir A. Cripps, K.C., another suave barrister and Unionist member for the Wycombe Division of Buckinghamshire, now came forward with an amendment designed to throw oil on troubled waters. It ran:—

"That the report of the Royal Commission being accepted by both parties, this House requests the Government to use its good offices with a view of arranging that the directors of the railway companies shall meet the representatives of the men in order to discuss questions of detail arising out of the report of the Royal Commission."

Colonel Lockwood, Unionist member for the Epping Division of Essex, and a railway director, professed himself more "advanced" than some of his brethren, and, after a humorous speech, supported the idea that the debate should be adjourned in order that the companies might consider the Government suggestion which he gathered carried with it that the findings of the Commission should be received, adopted, and acted on in every sense before anything further was done. That, of course, was a *sine qua non*. The prospects of an agreement, so far at least as the House was concerned, became brighter when Mr. Lloyd George, Chancellor of the Exchequer, came forward with another suggestion. He had fully understood that at the conference which closed the strike and at which he was present both parties agreed to abide by the Commission's report, and it was on that basis that the Government were now giving advice. He thought the words proposed by Sir A. Cripps were slightly provocative, and the Government suggested as an alternative the following:—"That in the opinion of this House, a meeting should take place between the representatives of the parties on whose behalf the Railway Agreement of August, 1911, was signed to discuss the best mode of giving effect to the report of the Royal Commission, and this House asks the Government to use its good offices to bring both sides into conference without delay."

In the discussion following, Mr. Bonar Law, Mr. Austen Chamberlain, and other Unionist members pointed out that the motion ought to contain a clear statement that both parties accepted the findings of the Commission, but the Government took the view that that was unnecessary as the fact was implied in the words of the suggested resolution. This produced a somewhat awkward situation, which was rendered more awkward when Sir Frederick Banbury, one of the Unionist members for the City of London, and a railway director, intervened in the debate to give a clear statement of the position of the Great Northern Railway and other directors.

A DIRECTOR'S VIEW.

The hon. baronet laid down plump and plain the justifiable and consistent attitude of the directors. Though his style of speech is frequently halting in delivery, he is never lacking in determination. He pointed out that the question of 25 per cent. of a grade signing a requisition was part of the principle of the award, and to raise it would be reopening the whole matter. The directors of the Great Northern Company did not care two straws whether the words supposed to be uncomplimentary to the railway directors remained in the resolution or not. They had done what they considered to be their duty. What they did care about was the motive underlying the amendment. On November 3 the Prime Minister in Downing Street met six or seven chairmen of the large railway companies who were signatories to the 1907 agreement. They were accompanied by their general managers, and the Prime Minister endeavoured to bring about a meeting between the representatives of the trade unions and the chairmen of

the companies. Every single chairman refused to do what the right hon. gentleman wanted, because they knew what was required was recognition. Acceptance of the amendment by the railway companies would mean that they accepted the principle of recognition. That was the whole issue at variance between the parties. His own board having so far sacrificed themselves, they had now unanimously decided that under no circumstances whatever would they advance any further. They would not pay the slightest attention to the resolution, believing that the only result would be, as in the case of the other meetings and conferences, to intensify the dispute.

Mr. Asquith expressed doubt as to whether Sir F. Banbury's speech improved the prospects of peace. If the suggested motion was passed it would still be open to either party to refuse to accept the invitation. The Government could not coerce the representatives of either party. But the Government would take no part in any conference except on the basis of acceptance of the report.

A COMMISSIONER'S OPINION.

The next interesting feature in the debate came when Mr. Arthur Henderson, Labour member for the Barnard Castle Division of Durham, and one of the members of the Royal Commission, spoke and expressed disagreement with both parties in the controversy. Some railway directors put an interpretation on the report which he, knowing the mind of the Commission, would not put upon it. The directors tried to narrow down the report, while the Commission intended to admit the possibility of recognition on subjects outside discipline and management, such as existed on the North Eastern Railway. The debate had convinced him that no machinery this Commission could set up would work satisfactorily if the same spirit was introduced as had been introduced by Sir F. Banbury. In more than one part of the report the Commission referred to the absence of meetings between the two parties. He did not think he misrepresented the position of every member of the Commission when he said that they expressed their disappointment at the failure of the companies to show a conciliatory spirit when the national programme was set up.

LABOUR PARTY REJECT GOVERNMENT'S ADVICE.

After some extreme talk from one or two Labour members the House got to a vote on Sir A. Cripps' amendment, when it was lost by 218 votes to 74, the support coming from the Unionist side. Then Mr. Leif Jones, Liberal member for Rushcliffe, wished to move to omit from the motion the words "declares such refusal to be contrary to the public interest, and to have no justification." On attention being called to the fact that the Government had an amendment, the Speaker said that the Government did not propose to proceed with it. This brought an explanation from Mr. Lloyd George that he had been informed that the Government proposal was not acceptable either to the Unionists or the Labour party. Mr. A. Lyttelton, Unionist member for St. George's, Hanover Square, assured the Government that the Opposition would prefer the Government amendment. Thereupon Mr. Lloyd George agreed to move his, and he made a strong appeal to the Labour party to withdraw their original motion and so make the finding of the House unanimous. A unanimous appeal from the House, he thought, would be irresistible by the directors. Mr. Leif Jones withdrew his amendment, but Mr. Macdonald announced that his party would vote against the Government proposal. He said he regretted the necessity for that, but he was speaking the view of his party and of the railway trade union representatives who were in the precincts of the House, and who had been consulted. They regarded the formula about devising how to put the report into operation as indefinite. When lawyers' brains were put to interpret resolutions like that the common, blunt workman was no match for the lawyer. The Labour party were suspicious, and they could not forget the speeches delivered by railway directors during the debate.

So a division was challenged and the Government amendment was carried by 167 votes to 108. A large number of Liberals voted with the Labour party, while the Unionists supported the Government. Lord Claud Hamilton, Sir F. Banbury, and Colonel Lockwood did not vote.

The South Western and Electrification.—After giving further consideration to the question of the electrification of their suburban lines, the London and South Western directors see no cause to depart from their decision not to undertake the change until the completion, some two and a-half years hence, of the reconstruction of Waterloo Station and the additions to the number of tracks.

To enable the company to make a railway from a junction with their main line at Gloucester Road, St. Pancras, to a junction with the same line in Hampstead, an alteration of the main line in the same district, a railway in Hampstead also connected with the main line by physical junctions, and a railway to be called the Holywell Curve in Flintshire; to carry out works and to acquire lands in various parts of the country; to extend the time for the completion of several authorised railways; to empower the company by agreement to equip for electric traction the North London Railway, the North and South Western Junction Railway, and so much of the London and South Western Railway as lies between Kew East Junction and New Kew Junction and between South Acton Junction and Gunnersbury Junction; to empower the company to supply electrical energy for factories and works;

to increase the capital of the company. *Solicitor*—C. de J. Andrewes, Euston Station, London. *Parliamentary agents*—Sherwood and Co., 22, Abingdon Street, Westminster.

LOTHIAN RAILWAYS.

To incorporate a company and to authorise it to construct railways from Leith to Prestonpans, Edinburgh, Newbattle, Inveresk, etc.; to obtain running powers over certain lines of the Caledonian Railway Company in Leith and also the railways of the Leith Harbour Commissioners; to enable the company to work its railways by electrical power. *Solicitors*—Norton, Rose, Barrington and Co., 57½, Old Broad Street, London, E.C. *Parliamentary agent*—John Kennedy, W.S., 25, Abingdon Street, Westminster.

METROPOLITAN DISTRICT RAILWAY.

To authorise the London and South Western Railway Company to make widenings on their Wimbledon and Fulham Railway; to provide for the working of the widening by electrical power; to confirm an agreement between the company and the South Western Company relating to the construction, maintenance and use by both companies of the widenings and of the Wimbledon and Fulham Railway; to provide that the South Western Company shall, instead of running over the now existing portion of the Wimbledon and Fulham Railway between Wimbledon Station and East Putney Station, run over the intended widenings; to limit the maximum weight of personal luggage which may be taken free of charge by any passenger in the trains of the company; to empower the company and the London Electric Railway Company to enter into agreements for the maintenance and working of Lot's Road generating station and as to appointment of a joint working committee; to make further provisions with regard to the constitution and powers of the Lot's Road power house joint committee incorporated by the Metropolitan District Railway Act, 1911, and with regard to the vesting in the joint working committee of the generating station; to authorise the supply of electrical energy from the power station in Lot's Road, Chelsea, to the North Metropolitan Electric Power Supply Company, and the Richmond Electric Light and Power Company. *Solicitors*—Baxter and Co., 12, Victoria Street, Westminster. *Parliamentary agents*—Martin and Co., 27, Abingdon Street, Westminster.

METROPOLITAN RAILWAY.

To empower the company to make widenings of their railway from Willesden through Kilburn to Hampstead; to construct a new railway from a junction with the Hammersmith and City Railway near Latimer Road to a junction with the authorised Ealing and Shepherd's Bush line of the Great Western Railway; to make a subway under Euston Road at King's Cross; to empower the company and the Metropolitan and Great Central Joint Committee to make railways in Hertfordshire from a junction with the company's railway near Rickmansworth to Watford; to authorise the working by electrical power of their widenings and new railway to give the company running powers over the Great Western line between Bishop's Road Station, Paddington, and the junction with the Hammersmith and City Railway at Westbourne Park and over part of the Hammersmith and City Railway and part of the Great Western authorised line; to empower the company and the Great Central Company to increase their capital. *Solicitor*—C. de W. Kitcat, 32, Westbourne Terrace, Paddington. *Parliamentary agents*—W. and W. M. Bell, 3a, Dean's Yard, Westminster.

MIDLAND RAILWAY.

To empower the company to make railways in Glamorgan-shire; to acquire lands in various parts of the country; to authorise the company and the Lancashire and Yorkshire Railway Company to enter into agreements for mutual running powers in connection with the Bradford through lines authorised by the Midland Railway Act, 1911; and to raise further capital. *Solicitors*—Beale and Co., 16, Great George Street, Westminster. *Parliamentary agents*—Sherwood and Co., 22, Abingdon Street, Westminster.

MIDLAND RAILWAY (LONDON, TILBURY AND SOUTHEAST RAILWAY PURCHASE.)

To transfer to the company the undertaking of the London, Tilbury and Southend Railway Company; to wind up the Tilbury Company; to make provision for the transfer of and compensation of officers and servants of the Tilbury Company; to empower the company to raise further capital. *Solicitors*—Beale and Co., 16, Great George Street, Westminster. *Parliamentary agents*—Sherwood and Co., 22, Abingdon Street, Westminster.

NEWRY, KEADY, AND TYNAN RAILWAY.

To extend the time for the completion of authorised railways, and for the purchase of lands; to enable the company to enter into an agreement with the Treasury, the Lord Lieutenant of Ireland and the Commissioner of Public Works in Ireland, for a further grant to the company of public money. *Solicitors*—R. A. Mullen and Son, 9, Trevor Hill, Newry. *Parliamentary agent*—John Kennedy, W.S., 25, Abingdon Street, Westminster.

NORTH EASTERN RAILWAY.

To authorise the company to make additional railways in the West Riding of Yorkshire in the Doncaster district; to raise addition capital. *Solicitor*—R. F. Dunnell, York. *Parliamentary agents*—Sherwood and Co., 22, Abingdon Street, Westminster.

WIRRAL RAILWAY.

To extend the time for the completion of an authorised railway, and for the sale of superfluous land. *Solicitors*—Birch, Cullimore and Douglas, Friars, Chester. *Parliamentary agents*—W. and W. M. Bell, 3a, Dean's Yard, Westminster.

SOLIDIFIED PETROLEUM AS FUEL.

A considerable advance has been made in the evolution of the Armstrong-Mordan process* for solidifying oil, to which reference was made in this journal on October 14, in view of its importance to locomotive engineers and to railway companies. A pamphlet issued by the Petroleum Solid Fuel Company, Ltd., shows that a number of subsidiary companies have been incorporated to work the rights for particular parts of the world on the advice of their own experts. In some cases the object is to solidify oil pure and simple; in others it is to manufacture a combination with coal and with various waste substances, producing a fuel with highly satisfactory calorifics. The companies referred to are Oriental Petroleum Fuel Co., Ltd.; the Burmah Solid Petroleum Fuel Co., Ltd.; the India Oil Syndicate; and the Solidified Fuel Co., Ltd., of the United States; while others are stated to be in course of formation. The last-mentioned company also has an option over Canada. Among those concerned in the Burmah company are the chairman and manager of the Burmah Oil Co., and the managing director of the Anglo-Persian Oil Co. At first the interest in the invention was more or less confined to the oil world, but it has now extended to the shipowner (including several Admiralties), the railway engineer, the boiler maker, and the owners of various waste substances.

Experiments, we are informed, have been for some time in progress on one of the standard locomotives of a leading British railway, and when the results are announced and collated, with the results gained from the series of experiments with marine boilers, an interesting comparison will be available. The company states that the introduction of solid oil fuel is not likely in any way to displace the use of other fuels, but it will increase the same by virtue of the fact that it will add to the efficiency, and thus create a better market for all classes of fuel. It can be used exclusively or in conjunction with coal, increasing the efficiency of the latter to a degree beyond that attained by liquid fuel. Its efficiency is put at about 2½ times of that of coal, and it needs less space for storage, while being handled exactly as coal is handled. Apart from the high cost of liquid oil fuel in this country, it is maintained that its use reveals a difficulty in obtaining perfect combustion, owing to the necessity of pressure in its application, which means that sufficient time for perfect combustion is not obtainable, resulting in a large percentage of unconsumed carbon finding its way to the stack, with a consequent percentage of loss equivalent to the capacity of the operation. In using solid fuel this can be regulated to a degree which enables the fireman to obtain perfect gasification and consequent high efficiency in the consumption of his fuel.

A London Assessment Reduced.—The Great Western Railway Company has obtained an order at the London Sessions, reducing the rateable value of its property in Paddington by £12,000 from the figures in force during the past five years.

Inspection of Grimsby-Immingham Railway.—Col. von Donop, on behalf of the Board of Trade, on Wednesday inspected the light railway connecting Grimsby with the new deep water dock at Immingham. He was accompanied by the chief officials of the Great Central Railway Company, the promoters of the scheme, and members of the Grimsby Corporation. The question of speed was discussed, and it was agreed, subject to confirmation by the Council, that the cars should travel twelve miles per hour in the town, and twenty-five per hour when clear of the streets.

MEETINGS AND REPORTS.

FORTHCOMING MEETINGS.

- Nov. 27 (*Mon.*)—**South Yorkshire Junction Railway** (Half-yearly), 50, Moorgate Street, E.C., at 12.30.
- Nov. 28 (*Tues.*)—**Argentine Great Western Railway** (Extraordinary), Dashwood House, New Broad Street, E.C., at 4.45.
- Nov. 29 (*Wed.*)—**Bolivar Railway** (Extraordinary), 1, Broad Street Place, E.C., at 2.30.
